More Light than was ever before thought possible!

Yet it Conserves Electricity!

● Fluorescent Lighting, latest and most amazing method of illumination, provides more light from a given measure of energy than was ever before though possible — and so makes possible *better lighting without excessive power consumption!*

By far the most efficient light source yet developed, the Mazda Fluorescent Lamp makes "daylight" lighting conditions available for 24 hours of the day! And that is not all. Mazda Fluorescent gives *cool* light. Mazda Fluorescent gives notably *glare-free* light. It minimizes shadows. It ensures much greater comfort . . . simplifies air-conditioning . . . reduces eye-strain and consequent nervous fatigue.

By making seeing *easier,* Mazda Fluorescent Lamps are making production *faster* in scores of Canadian war factories. One of the greatest developments in the history of lighting, efficient, dependable Mazda Fluorescent is proving a potent war production aid.

GENERAL ELECTRIC

Fluorescent Lighting

Wartime Prices and Trade Board Administrator's Order A-401 restricts the manufacture and sale of commercial and industrial lighting fixtures. In the majority of cases, it is necessary to obtain permission in writing from the Administrator for the use of fluorescent lighting equipment. In addition, priority ratings are usually required. For further information, contact your nearest C.G.E. office.

HELP *S-T-R-E-T-C-H* CANADA'S FUEL SUPPLY

In your home (if you have not already done so), have your plumbing and heating contractor check over your entire heating and hot water systems at once. He can help you save fuel this winter by making sure they are thoroughly clean—adequately insulated—free of air leaks.

If you are responsible for the operation of a large building—an industrial plant, commercial structure or public institution—arrange to have your maintenance men or plumbing and heating contractor look for and eliminate all causes of fuel waste. As a heavy user, you have an opportunity to effect bigger-than-average savings.

From MUD to AIR POWER

ALUMINUM has its origin in the mud like substance, Bauxite. However, before it reaches final expression in the shape of battle planes a complicated process is required, involving the application of electrical current to extract pure metalic aluminum from aluminum oxide. Here is where Westinghouse electronic engineering contributed a vital step in the development of the Ignitron Rectifier which converts alternating current into direct current with **higher efficiency** than any other type of equipment.

This practical application of electronics helps the United nations production for Victory.

The Late Professor W. G. McBride (1879-1943)

IT WAS with the profoundest regret that members of the Editorial Board of THE McGILL NEWS read of the sudden death of their beloved Chairman, Professor Wilbert G. McBride at his summer residence on Dorval Island, Lake St. Louis, near Montreal, on August 22.

The late Professor McBride succeeded Dr. D. Sclater Lewis as Chairman of the Editorial Board in the autumn of 1942, and since that time his quiet, unassuming manner, patience, and wise counsel had come to be greatly valued by his co-workers on the Board. At the time of his death, Professor McBride was head of the Department of Mining and Metallurgical Engineering at McGill University.

Blank & Stoller

The Late PROFESSOR W. G. MCBRIDE
Chairman, Editorial Board, McGILL NEWS

He was born in Inglewood, Ontario, on February 8, 1879, and after attending public school and Orangeville Collegiate Institute, came to McGill, from which he graduated in 1902 with the Bachelor of Science degree. During his college vacations he had worked in the coal mines at Fernie, B.C., and the lead and silver mines near Nelson, as well as doing surveying and exploration work for the British Columbia Department of Mines.

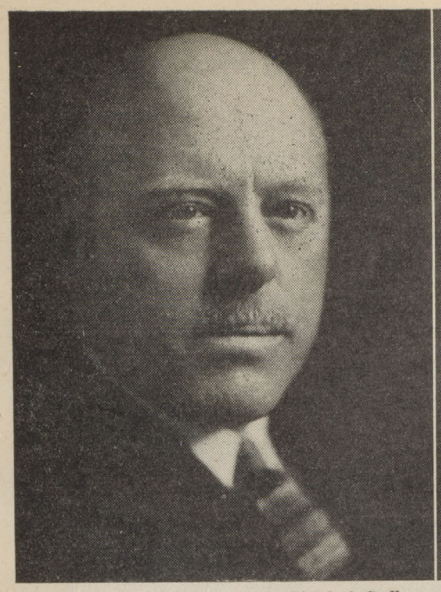

In 1903 he went to Bisbee, Arizona, where he had been appointed chief engineer of the Copper Queen Mine. While holding this position he was deputed to examine numerous mines in the southwestern United States and in Mexico, and from 1907 to 1909 he acted as superintendent of the Sierra de Cobra Mines in Cananea, Mexico, a subsidiary of Copper Queen. In 1909 he became general superintendent of the Great Western Copper Co. at Courtland, Ariz. He remained with that company until 1916, when he accepted the position of assistant general manager of the Detroit Copper Co., Morenci, Ariz.

In the following year, operations at Morenci were halted by a strike and, before they were resumed, Prof. McBride was appointed general manager of the Old Dominion Co. at Globe, Ariz. He was remarkably successful at Globe where, despite the increased difficulties as mining operations were carried to greater depths, he achieved a reduction of nearly 35 per cent in the cost per pound of copper produced.

Prof. McBride came to Quebec in June, 1927, and was appointed professor of mining engineering at McGill University in the same year. A few years later that department and the department of metallurgical engineering were merged and Prof. McBride was elected president of the enlarged department. As an elected representative of the Faculty of Engineering, he served for six years as a member of the Senate of the University, and for two years as president of the McGill Chapter of Sigma XI. He had a long and distinguished record of service with the Canadian Institute of Mining and Metallurgy, of which he was president in 1941-'42.

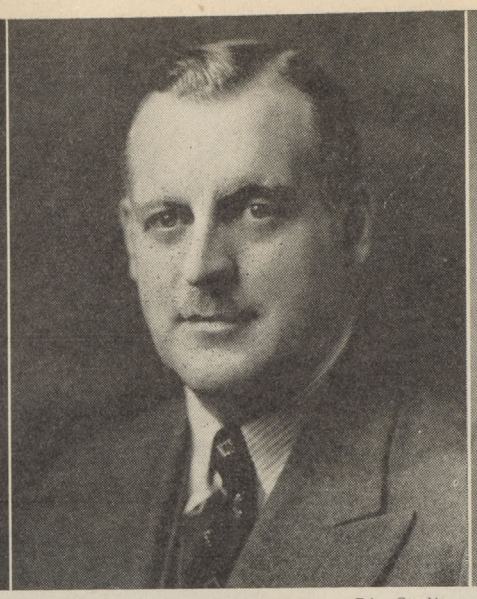

In 1942 the Engineering Institute of Canada, of which he was a member, awarded him the Julian C. Smith medal in recognition of his distinguished service as teacher, engineer and administrator. He was also a member of the American Institute of Mining and Metallurgical Engineers and, during his residence in Arizona, was chairman of the Southwestern Section of that Institute. He had also the distinction of being a member of the Council of the Institution of Mining and Metallurgy (London).

Professor McBride was an active Mason being a member of the University Lodge, and was also a member of the Mount Stephen Club, Montreal.

McGill Graduates Elect New Officers

G. Gordon Gale, B.Sc., '03; B.Sc., '04; M.Sc.,'05, will be one of the representatives of the McGill graduates on the Board of Governors of the University, serving for a three year term, according to the results of the recent Graduates' Society elections. At the same time F. J. Cunningham, F.A.S., B.Sc., '21, was elected Honorary Secretary of the Society for a two year term, while James S. Cameron, B.Sc., '08; M.E.I.C., will be Honorary Treasurer, also for two years. G. Stuart Ramsey, B.A., '08; M.D., '12, and Kenneth B. Roberton, B.Sc., '20, were elected to the Executive Committee for two years.

The new representative to the Board of Governors, G. Gordon Gale is a well-known industrialist, being President of the Gatineau Power Company, and of the E. B. Eddy Company, Limited, Ottawa. He has also had wide experience in the affairs both of the parent and branch societies, having served as Second Vice-President of the Graduates' Society from 1931-1933, and as President of the Ottawa Valley Graduates' Society in 1931. During the war he has given generously of his time and efforts to the National War Finance Committee, being Honorary Chairman of the Ottawa Division. His wide experience in the fields of finance and business should prove of great value to the Board of Governors, on which he will be an able representative of the graduates.

Fred J. Cunningham who has been elected Honorary Secretary has already served for one year in this capacity in 1942-'43 when he was elected to fill an existing vacancy in this office. In business he is Secretary of the Sun Life Assurance Company of Canada, and is a Member of the Council of the Montreal Board of Trade.

The newly-elected Honorary Treasurer, James S. Cameron, is also a Science graduate. He is Manager of the Telephone Division of the Northern Electric Company, and is also Vice-Chairman of the Executive Committee, Canadian Engineering Standards Association. Mr. Cameron has long been active in Graduates' Society affairs, having been a member of the Executive Committee from 1933-1935 and of the Nominating Committee, 1935-1938.

Dr. G. Stuart Ramsey who will now serve for two years on the Executive Committee is Assistant Professor of Ophthalmology at McGill University. He holds the rank of Lieutenant-Colonel in the Royal Canadian Army Medical Corps from which he has retired. When still a student in the Faculty of Medicine he was honoured by his fellow-students by being elected President of the Students' Council in 1911. He served as a member of the Executive Council, Montreal Branch of the Graduates' Society from 1932-1934.

Kenneth B. Roberton, who was also elected to the Executive Committee is Vice-President and Manager, Dominion Oilcloth and Linoleum Company, Limited, Montreal. He is also Vice-President and Managing Director, Barry and Staines Linoleum (Canada) Limited, and a Director of McFarlane Son and Hodgson, Limited, Canada Linseed Oil Mills, Limited, and Parke Stethem, Limited, as well as being Treasurer and Director of Congoleum Canada, Limited.

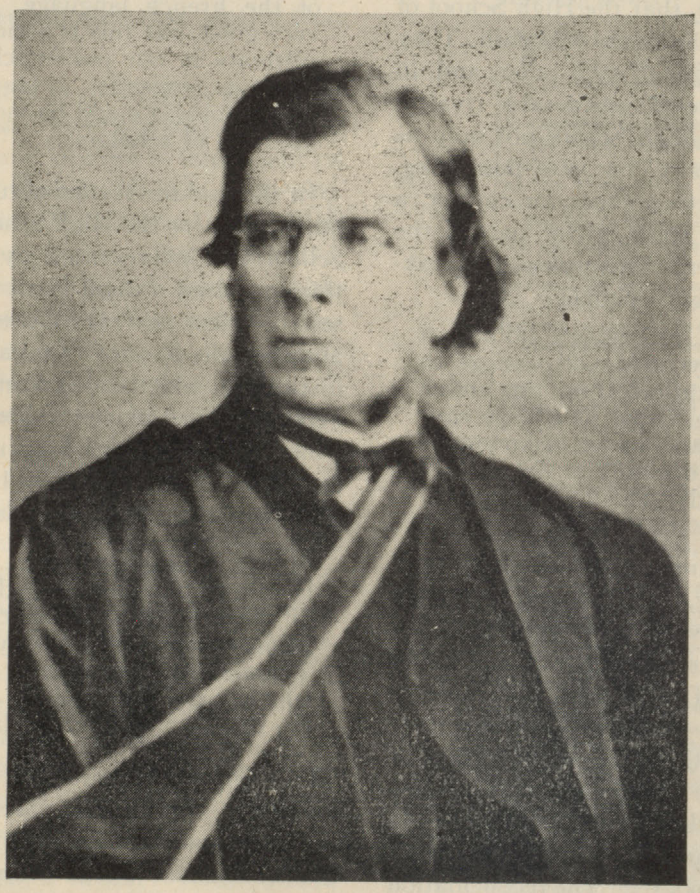

When the High School of Montreal and McGill Were One

By
JOHN IRWIN COOPER

The High School of Montreal celebrates its Centennial this Autumn, and has always maintained close and cordial relationships with McGill University. The last issue of THE MCGILL NEWS *commemorated the Centennial of the Arts Faculty which is also being celebrated this year.*

THIS PAPER makes no pretence to be a complete or definitive history of the High School of Montreal or of McGill University. Rather, it is offered as a sampling of the little-known period, when, for practical purposes, the two institutions were one ([1]).

The antecedents of the High School of Montreal may be traced directly to the later 1830's. In 1838, some of the Governors of McGill, despairing of ever opening the University, contemplated establishing a secondary school, or "Scholastic Institution," as they called it, in the Burnside estate house. The school was to be supported by the income from James McGill's legacy ([2]). The prime mover in all this was Sir John Colborne, the Administrator of the Province. When we recall that only a few years before, Colborne had founded Upper Canada College at Toronto as a classical school for well to do boys, it becomes clear what he intended in Montreal. He appears to have talked airily of "a large Government grant . . ." by way of additional endowment, and of ". . . a distinguished Scholar [who] should be got from England as Principal . . ." But Colborne reckoned without Reverend John Bethune, the acting Principal of the University. Unwilling, so he said, to see James McGill's benevolent intentions thus perverted, and, perhaps, more humanly, to have himself superseded as Principal, Bethune resolutely opposed the scheme ([3]). Colborne turned to the more congenial business of stamping out the last embers of the Lower Canadian Rebellion, leaving Bethune, as the history books say, in possession of the field; quite literally so, since he occupied Burnside house himself. In the following year, 1839, the corner stone of the Arts Building was laid, thus closing the first phase in the long story of McGill and the High School of Montreal.

Wm. Notman & Son

HENRY ASPINWALL HOWE, the second Rector of the High School, from an hitherto unpublished photograph taken about 1867.

The High School of Montreal, that we know, was a product of the 1840's. It was called into being by a group of local business men to fill the void made by the declining Royal Grammar School. In April, 1842, appeared the celebrated "Exposition of the Plan for the Projected High School of Montreal." This outline became the basis of discussion which extended well over a year, till, in September, 1843, the High School was actually opened. It was neither public nor private, but proprietary. "The Friends of Education" paid £10 annually, and were thus eligible to vote, or to be voted on, as "directors." The directors, of course, formed the active governing body of the School, being charged specifically with its financial management. In its original form, the High School bore a depressing resemblance to a joint-stock company, and the resemblance was emphasized by the clause which empowered the directors to declare dividends.

The "Exposition" and the subjoined "Constitution"

JOHN I. COOPER, M.A. (Western Ontario), Ph.D., is Assistant Professor of History at McGill.

of the High School warrant a brief examination. They made up a formidable document, filling almost an entire newspaper page. Nevertheless, the sense of both pronouncements may be briefly broken down: The aim, ". . . to provide a system of education for our youth who are destined for the liberal professions, or the higher walks of life and business . . ."; the means, a school modelled on the High School of Edinburgh. The reasons for the selection of the Scots' model are arresting. It was ". . . *eminently practical*, . . . *comprehensive*, . . . *complete* . . ." It was also cheap, since it was possible to obtain ". . . faithful and laborious teachers upon terms more economical from Scotland . . ." In order to perpetuate this admirable characteristic, the constitution of the High School provided that the masters, curriculum, and text books should be passed on by a "Board of Referees," most of whom were Edinburgh men.

It was inevitable of course, that the High School of Montreal should cut across the path of McGill. They were opened within a fortnight of each other, and, in other ways, there is evidence of considerable rivalry. The directors regarded the High School not only as "a nursery" for the University, but also possessing, ". . . a powerful tendency to prevent, or correct, a narrow sectarian or illiberal spirit on the part of the Governors of the College . . ." This was plain speaking, but what followed was even plainer.

> "In the event of a partial, or absolute failure on the part of the University of McGill College to fulfil the end of its institution, from the undue influence of any faction or cabal, it will be easy to extend, or carry out the various departments of this Academy so as to embrace the utmost range of courses of study usually pursued in Colleges . . ."

To this scarcely veiled threat, John Bethune had equally hard things to say. He accused the High School of robbing the University of its prospective students, and roundly declared that the School would never have been thought of, if *he* had been able to open McGill in 1838 ([4]). Fortunately, there were cooler heads, and, apparently through the efforts of David Davidson, a notable friend both of the High School and McGill, the University consented to appoint three directors, and to regard the High School as a preparatory school ([5]). The reconciliation was sonorously acknowledged when McGill opened on September 6, 1843.

Independent of its association with McGill, the High School of Montreal had an extremely interesting story of its own. It was exceedingly peripatetic, moving from the Bingham house, on Notre Dame street, its first home, ([6]) to St. Paul street, and, finally, to Belmont street. The school house on Belmont street still stands, and, with its pie crust Gothic and lancet windows is a curious example of Victorian taste. The architect was John Ostell, who designed many of Montreal's prominent buildings including the beautiful parish church of Notre Dame de Grace. The High School was much favoured officially, the Governor General usually attending its public exercises. Lord Metcalfe, for example, laid the corner stone of the Belmont building, drafting the Band of the 93rd Regiment to give emphasis to the ceremony. The School enjoyed a good press. The following throws abundant light on the inner workings of the High School,—likewise on contemporary editorial opinion.

> "On Friday last we attended the concluding exercises of . . . this interesting and important institution . . . and were delighted to see so many healthy, intelligent looking boys. Several recitations in the English language were very creditably delivered—as also an oration in Latin— but a scene from a French Comedy . . . particularly attracted our attention, on account of the singularly easy and accurate pronunciation of the French language. The acting was also very good, but this is a most dangerous talent to cultivate in our public schools, as it is not unlikely to engender a taste for the stage than which nothing could be more inimical to the best interests of scholars . . ." ([7]).

In the middle 'forties occurred two events of great importance for the High School. In March, 1845, the School was incorporated by Provincial Statute, and thus acquired a legal basis such as it had not possessed. Next year, 1846, the High School of Montreal absorbed the Royal Grammar School. This venerable institution, which dated from 1816, like its even more venerable head master, Alexander Skakel, who dated from 1776, had been long in decline. A grumbling letter, written by Skakel in 1845, gives an unflattering picture of the school in its latter, unprosperous days:

> "I beg to acquaint you . . . that their [sic] are twenty-two pupils attending school at present, of whom sixteen are on the foundation, and six whom their parents pay for their education. There are four vacancies . . . on the foundation which have occurred at different periods since the month of September last . . ."

The High School profited considerably by this inheritance. In the first place, it fell heir to a number of Government scholarships, the foundation, of which Skakel spoke. These enabled it to reach boys too poor to pay the very high regular fees. The other gain was in continuity. The High School could now claim descent from 1816, the date of the foundation of the Royal Grammar School, as well as the great reputation the school early enjoyed. Less substantial, perhaps, was the quasi-official position the High School acquired, with the Governor General a fixture of its openings and closings. But from whatever cause, there can be little doubt that by 1846, the High School had become the leading school of Montreal.

The curriculum was classical, heavily ballasted on

the side of Latin. One boy who had left the High School at the age of fourteen had read Vergil, Horace, Tacitus, Sallust, Ovid, but only some Xenophon and Homer. He recalled further, ". . . old Mr. Gibson's drill in Latin Grammar was very thorough. I knew all the rules by heart for many years after I had left his hands . . ."—an inimitable commentary on educational aims and methods in that distant age. The High School reflected accurately civic ups and downs. In the flood tide of prosperity, $40,000 was sunk in the Belmont street school. Then came the crash of 1848, and the years following, when Montreal property values fell fifty per cent, and more than half of the city's business men were bankrupt. The first Rector, Reverend George Simpson, judiciously retired; the property was seized by the sheriff; the School itself was maintained only through the devotion of some of the directors and masters, under the leadership of young Henry Aspinwall Howe, the second Rector. It was at this truly desperate juncture that McGill University came forward.

It was high time. There is nothing to shew that previous to the 'fifties the University had done very much to aid the High School, or even to implement its directorship. It is true that in 1847, a suggestion had been put forward that McGill absorb the High School; it remained a suggestion. But with 1852, things changed. The revised Charter made possible the modernization of the University, and, by November, the Governors were earnestly considering ways of ". . . increasing the utility of the College . . ." The High School manifestly stood in need, and, two months later, they were negotiating with its heroic defenders. By August, 1853, the University had made itself responsible, undertaking to pay the salaries of the masters, and to house the boys. To regard all this as an act of gratuitous charity would be much off the point. The High School was absolutely essential to McGill as "a feeder," for few of the existing Montreal schools, public or private, were capable of preparing for University entrance. Thus began a connexion, destined to last almost twenty years, when the High School of Montreal became "the High School Department of McGill College," or, "the High School of McGill University."

Under McGill inspiration, a virtual revolution took place in the High School. The curriculum was revised, slowly but completely, till it approached something which a modern educator would regard as adequate. At University direction, the High School Department issued its first prospectus with the cautious proviso, ". . . care has been taken not to promise more than can be performed, and . . . not to offer less than is to be expected from an Institution professing to give what is termed a *Liberal Education* . . ." That was in 1855, when, it is clear, the School was still

HIGH SCHOOL OF MONTREAL.

DIRECTORS:

The Honble. George Moffatt,
William Lunn, Esquire,
B. H. LeMoine, Esquire.
James Ferrier, Esquire,
Joseph Savage, Esquire,
Dr. Campbell,
Dr. M'Culloch,
H. Stephens, Esquire,
W. C. Meredith, Esquire,
David Torrance, Esquire,
J. J. Day, Esquire,
Charles Geddes, Esquire.

Treasurer—Benjamin Holmes, Esquire.
Honorary Secretary—D. Davidson, Esq.
Rector—The Rev. G. F. Simpson, M. A., of Corpus Christi College, Cambridge, (late Principal of Hull College).
2nd Master—Mr. T. A. Gibson, late Head Master, of Cauvin's School, Edinburgh.
3d Master—Expected from England.
French Master—
Writing Master—
Drawing Master—

THE School Session will be divided into two Terms, viz: from the 3rd Monday in August to Christmas, and from Christmas to the 2nd Saturday in July. The vacations will be a fortnight at Christmas and six weeks in Summer.

The Hours of Attendance will be, from 9 to 3 or 4 o'clock, according to the age of the Pupil, with an hour of interval for recreation, except on Saturday, when the hours will be from 9 to 12 o'clock.

The Yearly Payment for each Pupil will be £10, one half payable on the admission of the Pupil, and thereafter one half upon the 1st day of February; and upon the opening of the School after the Summer Holidays. A new Pupil entering the Schoo between terms, will be charged in propor ion.

The subjects to be taught are READING, WRITING, the LATIN, GREEK, and FRENCH languages, ANCIENT and MODERN HISTORY, GEOGRAPHY, ARITHMETIC, and BOOK KEEPIN ; the Elements of MATHEMATICS and NATURAL PHILOSOPHY.

Classes for *beginning* LATIN and GREEK will be formed only on the 1st term after the Summer Holidays.

Lessons in DRAWING will be given on Wednesdays and Saturdays, and Pupils who attend this class, may do so upon both days or on one only. There will be an extra charge for this class.

A monthly report of each Pupil will be furnished to his Parent or Guardian.

There will be a general Examination of the School at the end of the Session, when prizes will be distributed amongst the Pupi's of each class, according to their proficiency and good conduct.

Suitable refreshments will be provided if desired at a moderate charge, by a person appointed by the Directors, so as to obviate the necessity of boys living at a distance returning home, during the forenoon interval.

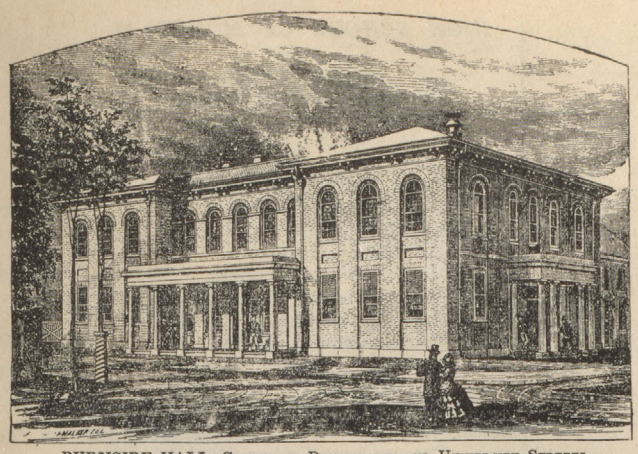

As already announced, the School will be opened on MONDAY, the 25th instant. In the meantime the Directors request that Parents or Guardians who purpose entering Pupils, will send them to the Rector, for the purpose of being classed.

The Rector will be in attendance at the Schoolhouse (Mr. BINGHAM'S house, Notre Dame Street,) on Monday, the 11th instant, and succeeding days, between the hours of twelve and two o'clock.

N B—The Directors are receiving applications or the appointments of French, Writing and Drawng Masters.

September 8. 162

"A copy of the first prospectus of the High School of Montreal."
the Montreal Herald, August, 1843.

BURNSIDE HALL, CORNER OF DORCHESTER AND UNIVERSITY STREETS.

Occupied by High School of Montreal from 1854–1870.

dominated by the sterile classicism of an earlier age. Latin and Greek were taught because of their "utility." Mathematics, which consisted chiefly of the study of Euclid, were accorded a high place, ". . . because they are admirable means of strengthening and disciplinning the reason, . . . and because the pursuit of them affords a very high and pure pleasure to the active and enquiring mind . . ." Succeeding years saw significant changes, marked by new studies, or by new emphasis on old courses. The most important change lay in the prominence given modern languages. The old High School had maintained, apparently, a satisfactory standard in teaching French. Under the new régime, however, French occupied an increasingly important place on the curriculum, being described as "imperative," or, as we should say to-day, obligatory. It was taught moreover, as much for its practical, as for its cultural value, ". . . because it is one of the colloquial languages of the country . . ." And, at the end of the University régime, French received equal share with English in the Preparatory Department, where, of course, it was studied by every boy. The other great innovation introduced was the teaching of Natural Science, or, as it was quaintly styled, Natural Philosophy. This probably reflected the influence of Sir William Dawson, the Principal of the University, whose interest in the High School was keen. The surmise is reinforced by the consideration that, as early as 1858, provision was made for the boys in the upper forms to attend University lectures in Physical Geography, Geology, Zoology, and Botany. The more modern subjects, such as History and Geography, were accorded recognition also. Although the High School conceded, with becoming liberality, ". . . History has been long regarded as a Science . . . ", there is little indication that it was taught scientifically. British and Roman History were given simultaneously, while the study of Greek History followed that of Rome! In all fairness, it should be noted, however, that the teaching of British American, that is to say Canadian, History began in first form; so the system had the virtue of basing the entire study of the subject on a sound knowledge of the country the students knew best.

In more mundane matters, in the arrangement of the School by forms, in examinations, and so on, the same trend towards modernity may be observed. In the 1840's, the High School had been graded curiously in reverse order, First Form being the highest form. The University did away with this medieval survival by rearranging the School on the basis of five, later six forms in addition to the preparatory division. As the age of admission was seven, a boy graduated at fourteen or fifteen, a distinctly tender age. Changes in the examination system were more far-reaching. Originally, the examinations had been oral, conducted publicly on the last three days of the term, when all Montreal was invited to be present. They must have been extremely trying to everyone concerned, examiner, examinee, and parent. One who knew the School in the 'forties recalled the terrifying ". . . general *vive voce* review for 3 hours on the whole six books [of Euclid] . . ." McGill retained the oral examinations, but increasingly substituted written tests at Christmas and June. By this means, and by the School Entrance Examinations, instituted in 1858, the University was able to adequately grade its candidates, and to confer on the Province the inestimable benefits of a scientific and rationalized examination system. In fact, a study of the High School in those years must suggest how frequently present-day educational devices were anticipated. The Rector was strong on the blessings of supervised study. He was, likewise, a firm believer in the advantages of parent-teacher co-operation, so as ". . . to aid in securing that regularity and industry without which education is but the stone of Sisyphus . . ."

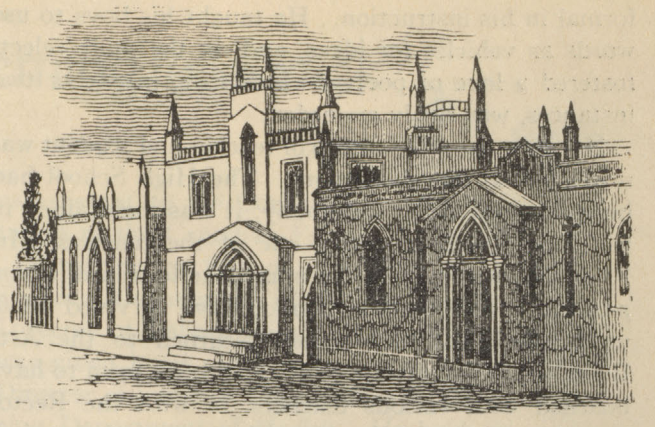

Yet, in all this energetic forward march, one phase remained obstinately halted. The University retained, and, as will be seen, increased High School fees. The fee system had been an integral part of the old proprietary school. In the later 'forties, it stood at £10 *per annum* for a Senior boy. The University adroitly cloaked its charges by demanding payments of £2 10s. quarterly, with a thoughtful addition of 2/6 for fuel in the Spring and Winter terms. Latterly, the charge was compounded at $60 for the entire year. To a degree, the rigour of this was mitigated by government scholarships, but the fact remains that the high fees very emphatically moulded the School. Under McGill control, the High School was distinctly a school for the well to do. The boys who ran down University street, or along Dorchester, clutching their books in the traditional green cloth bags were the scions of Montreal's best families. To regard the High School as either popular or democratic would be

very wide of the mark; but, after all, it made no pretence at so being.

Unconscious (perhaps, mercifully) of these weighty problems of management, courses and costs, life in the High School Department flowed on serenely. Classes were held in Burnside Hall, an exceedingly utilitarian structure, which was shared by the Arts Faculty as well. The High School occupied the entire lower floor, the class rooms being arranged round a large central assembly hall. Interruptions, such as the fire of 1856, were only temporary. In fact, the reopening of the Hall in October was the excuse for some ceremony, since it was attended by Sir Edmund Head, the Governor General, the Mayor, and a galaxy of Parliamentarians. When the Governor's party was seated,

> ". . . the classes marched in with admirable order, and with military precision took their places . . . at a signal from the Rector, they rose . . . and, at another signal resumed their seats with the same regularity and celerity . . ."

The ensuing oratory probably meant less to the boys than the half holiday granted at Sir Edmund's request. At an earlier date, the School had received a holiday to mark the fall of Sebastopol, so the years were pleasantly punctuated by occasions patriotic or official. In the later 'sixties, the High School had its cadet corps, or, as it was oddly styled its "Drill Association." The corps was inspired, no doubt, by the dangers of the United States Civil War, or by the Fenian Raids. The physical director was the strenuous Mr. Fred Barnjum, one of Montreal's most enthusiastic athletes and amateur soldiers. Drill was alternated with more inspiring games, cricket and football being the chief favourites. Matches were played with St. Mary's College, which was, in those days, the High School's nearest scholastic neighbour. *Esprit de corps* was high, and in the later 'fifties was organized the High School Society, the forerunner of the modern Old Boys Association. The High School Society had the well-being of the School very much at heart, in earnest of which it undertook to provide a medal,—with curious results which will be noted later. In point of fact, the High School had always been well endowed with awards. As early as 1844, Alfred Driscoll, the first head boy, had received "a beautifully bound Shakespeare" from the hands of Lord Metcalfe. In later years, the McGill Governors laid out $150 annually in prizes, as well as providing University scholarships, which, were, of course, open to High School students. Then, in 1858, David Davidson began to award his gold medal to the "Dux," the first winner being George Ross. Davidson had been one of the original promoters of the High School, as he was one of its most enlightened friends; so it was fitting that his name should be linked with the highest award the School could offer.

First permanent home of the High School of Montreal, on Belmont Street

It would be patently inaccurate to ascribe this ascending perfection to administrative tacks alone. The teaching staff of the High School Department was an able and experienced body. At its head was Dr. Henry Aspinwall Howe who had become Rector in the dark days of 1848. He was a sound classicist, and mathematician, with that relish for symmetry frequently observable in those whose studies take them far from reality. Perhaps it was for this reason he so sternly forbade any departure from the prescribed course of study. It certainly inspired his disapproval of the medal the High School Society proposed to establish in Canadian History and Geography. This, Howe felt, would give undue prominence to these subjects. In virtue of his training at Trinity College, Dublin, Howe possessed an almost-renaissance versatility. As well as serving as Rector of the High School, he taught Natural Philosophy and Mathematics in the University, and, at one time, had been named to the Chair of History! Between the Rector and Principal Dawson, a more than professional friendship grew up. They were close neighbours, Howe tenanting a section of the Arts Building, and assisting Dawson in reclaiming the McGill campus from a rubbish heap to something approaching the stately grounds we know to-day. Henry Aspinwall Howe must have been an engaging companion; he was an accomplished violinist, an able draughtsman, and a formidable antagonist at chess,—and then he gardened, as has been intimated. Closely attached to him were the veterans, Gibson and Rodger, who actually antedated the Rector in terms of service. Gibson was the Classics master, a typically and grimly humorous Scots dominie; Rodger was the Mathematician, affectionately known as "Davy" and widely (if secretly) admired for his moral austerity. Of the younger men, George Murray was probably the most influential. He was the teacher of English Literature. Although Murray was fond of describing himself as a "pundit," there was nothing dry or

formal in his instruction. He taught his boys to use words as vehicles for ideas, and, in the more select, fostered a love of poetry, which care, in one or two instances, was richly rewarded.

Not that the relationship of teacher and student was restricted to the class room. The High School had its residential side. Originally, it was maintained in the Arts Building, where one of the masters, Mr. Fronteau, was cast in the sympathetic rôle of *locum parentis*. This method cannot have survived 1860, when the University classes returned to the Arts Building. Thereafter, out of town boys seem to have boarded with various teachers, or with the Rector himself. This was a unique feature of the period, and given good sense on both sides, must have contributed immensely to the inner life of the High School.

The articulation of the High School and the University was of great importance to both. The High School Department formed a convenient yard stick whereby entrance requirements were maintained, and the general standards of secondary education raised. In the early 'sixties, the Provincial government scarcely concerned itself with secondary schools, with the result that Canada East abounded in an astonishing variety of academies and colleges, each with its own standards. Moreover, the High School was the testing ground for new subjects and new methods of teaching. It is impossible to believe that the progression in the High School curriculum was occasioned by mere chance. In those significant changes, we must admit some directing mind at work, and the surmise is that it was the mind of Sir William Dawson. Dawson was, and we must never forget, an inspector of schools before he was principal of a university, and there is evidence to shew that his interest lay with the schools for a long time ([8]). More directly, the High School aided the University by supplying highly qualified men like Howe, who were capable of conducting University lectures. It is interesting to note, that Howe was usually referred to as "Professor" Howe, and there was more than uncritical courtesy in the title. But the supreme service rendered by the School was in the rôle of feeder. The precise number of candidates sent up, we have no way of determining. Tradition, supported by statements of Dr. Howe and Sir William Dawson, suggests that about one half the boys who matriculated into the University before 1870 came through the High School. The correctness of this supposition is reinforced by an examination of the annual "Prize Lists," which show that High School boys usually carried off the majority of the awards. In 1853, for example, ten of the sixteen prizemen were graduates of the High School Department. If, therefore, in the early 'sixties, McGill University rode the crest of the wave, it did so largely through High School support.

No appraisal of the High School of Montreal, in this period, would be complete without reference, at least, to its great contemporary, St. Mary's College ([9]). St. Mary's had been founded in the late 'forties by the Jesuit Fathers for the purpose of providing secondary school training. The inheritors of a long educational tradition, the Jesuits adapted their methods to Canadian needs, and, in Father Martin, found a Superior who embraced many of the qualities of Principal Dawson and Dr. Howe. The scope of this paper does not admit an extended comparison of the two institutions. Interest lies in the fact, that, here, within a few city blocks, St. Mary's College and the High School were making their contribution to the life of Montreal. If their methods differed, their aim was the same, the creation of an educated man,—in the truest meaning of the term.

And yet, the University parted with its admirable ally, the High School. In measure it was financial stringency, and in measure the complicated march of progress which occasioned the disjunction. The 'sixties were trying times, financially for McGill. The modernization of the University cost heavily. The Civil War years, which were so rich for the Canadian speculator, bore hard on institutions with fixed incomes. The Finance Committee of the Board of Governors, surveying rising costs, and stationary revenues with an apprehensive eye, was struck by the recurring deficits of the High School Department ([10]). So it was resolved to put the High School on an independent basis, as far as finances were concerned. This was in 1863, and the new name, the High School of McGill University cloaked the ingenious arrangement whereby deficits were to be made up out of the teachers' salaries. What might be expected, at once happened. As salaries became uncertain, the staff disintegrated, attendance declined from the halcyon days of three hundred and more to about half that number, and discipline went from bad to worse. The "Black Book," long a deplorable feature of High School life, came into even more unpleasant prominence. Salvation appeared from a somewhat unexpected quarter in the guise of the Montreal Protestant School Commission. That body, which had been immensely strengthened by the Education Act of 1869, was anxious to crown its system with a secondary school. Accordingly, throughout 1869, negotiations were carried on, which resulted in the formal transfer in January of 1870. At the same time, the Burnside Hall property was sold to the Commissioners, and, when the High School resumed classes in September, 1870, it was as a public school. Thus ended a relationship which had endured for seventeen years.

The change was inevitable. Secondary education was no longer something which could be conducted

(*Continued on Page 55*)

The Late Dr. Grant Fleming (1887-1943)

By
J. C. SIMPSON

ON APRIL 9TH, 1943, Dr. Grant Fleming, Strathcona Professor and Chairman of the Department of Public Health and Preventive Medicine, died in the Montreal Neurological Institute after a comparatively short illness and at the early age of fifty-five. In his death McGill has lost an internationally known teacher and Canada an outstanding citizen the importance of whose contributions in the field of social welfare can hardly be overestimated.

Born in 1887 in the City of Toronto, where he remained until the outbreak of the First World War, he graduated with the medical degree of the University of Toronto in 1907, before he had reached his twenty-first birthday. He remained for another year of graduate study in the University's Department of Pathology and then joined the staff of the Department of Public Health of the City of Toronto as bacteriologist, an appointment he held until 1914.

Early in the war he was commissioned in the Royal Canadian Army Medical Corps and attached as Medical Officer to the Fourth Canadian Battalion, with which he served in France. In 1918 he was awarded the Military Cross for gallantry under fire. "During the attack of September 27, he established his aid post for the attack in the extreme eastern portion of Inchy within 400 yards of the enemy outpost line, and occupied this position during the night, despite a high explosive and gas bombardment, in order to be as close as possible to the attack." Later he was recalled to London to act as assistant to the Consultant in Hygiene and Sanitation to the Canadian Forces.

Wm. Notman & Son

The late DR. GRANT FLEMING
Dean of Medicine, 1936–1940

Returning to Canada, Dr. Fleming rejoined the Toronto Department of Public Health in 1919 as Director of Laboratories. In the following year he was given leave of absence to assume the duties of Director of Venereal Disease Prevention in the Dominion Department of Health. He held this appointment for two years before returning to Toronto as Deputy Medical Officer of Health.

It was during these earlier years of his professional life, from 1907 to 1924, that he came under the influence of two men who were outstanding leaders in Canadian public health and who played no small part in helping him to lay the foundation of his future success. Dr. Charles M. Hastings, Medical Officer of Health of the City of Toronto, and Dr. John A. Amyot —first as a professor in the University of Toronto, then as Consultant in Hygiene and Sanitation to the Canadian Army overseas and, later, as Deputy Minister of the Dominion Department of Health —both left a lasting mark on Grant Fleming.

The second period in his professional life began in 1924 when Lord Atholstan, who had long been interested in public health and had undertaken to support a five-year demonstration, invited Dr. Fleming to come to Montreal to organize the Montreal Anti-Tuberculosis and General Health League. As Director of the League from 1924 to 1929, his ability as an organizer and administrator was given full scope for play. In a situation calling for tact and sound common-sense, his modest, unselfish helpfulness and his clear understanding of the difficulties and frustrations which beset the path of

---

J. C. SIMPSON, B.Sc., '07; L.L.D. (Mount Allison) was Secretary of the Medical Faculty of McGill University from 1922-'36, Associate Dean 1936-'40, and Dean 1940-'41. He has recently served as Secretary of the Divisional Advisory Committee of the Canadian Medical Procurement and Assignment Board, with the rank of Captain in the R.C.A.M.C.

the public health official, enabled him to succeed where another might have failed. Previous to the formation of the League the City Health Officer had been waging an up-hill fight against political interference and public indifference; in Dr. Fleming he found a powerful ally. The Health Survey of 1927 was the end towards which Fleming had been working and was very largely his own creation. It aroused in the public a demand for better service and a more adequate support of the city Health Department and thus inaugurated a new era in the health services of the community.

Dr. Fleming's work with the Health League gave convincing proof of his ability as an educationist as well as an administrator and in 1927, by arrangement with the League, he was entrusted with the reorganization of the Department of Hygiene of McGill University and appointed its Acting Director. A year later, he was made Professor and Chairman of the enlarged Department of Public Health and Preventive Medicine into which the old Department of Hygiene was absorbed, and in 1929, when his tenure as Director of the Health League ended, became a full-time member of the University staff.

In September 1936, upon the retirement of Dr. Charles F. Martin as Dean of the Faculty of Medicine, Dr. Fleming succeeded him in that office. In the preceding academic year the reorganized four-year curriculum, which had been long under consideration, had finally been adopted, so that he assumed the deanship at the time the first class of students entered upon the new course. As dean he guided the Faculty during the four years that elapsed before this class graduated in May, 1940, and it was largely due to his wise leadership that this period of transition from the old to new curriculum passed smoothly and without friction.

Upon retiring from the Deanship, Dr. Fleming carried on as Chairman of the Department of Public Health and Preventive Medicine and at the same time became the Medical Director of the Bell Telephone Company of Canada. This new venture he welcomed as an opportunity to add practical experience in adult health care to his already wide training. That he not only did this but also laid the foundations for far-reaching advances in industrial medicine was not surprising to those who knew him.

When war again broke out in 1939, he volunteered for service, feeling that there must be some place where his training and experience would be of value. Unfortunately, however, it was not until November, 1942, that the call came and he was appointed to the Headquarters Staff at Ottawa as Officer in Charge of Preventive Medicine in the Royal Canadian Army Medical Corps. Obtaining leave of absence from the University, he went to this post with enthusiasm and confidence. To him the health problems of the army were essentially the same as those of industry. Efficiency depends upon morale; and morale is a question of physical, mental and spiritual health. Hygiene and sanitation are essential, but experience in the field of industrial medicine had shown that they alone are not sufficient. The opportunity to apply, to test and to improve upon the leads of industrial medicine in the wider field of the army had an irresistible appeal to him. It was an opportunity which he was not to grasp, however; for scarcely had he taken up his new duties when symptoms of his final illness began to manifest themselves and he had to lay down the work that was nearest to his heart.

At the time of his death Dr. Fleming was President of the Canadian Public Health Association, a life Fellow and member of the Governing Council of the American Public Health Association, a member of the Public Health Advisory Committee of the Commonwealth Fund, New York City, and Consultant in Public Health to the W. K. Kellogg Foundation, Battle Creek, Michigan. From 1928 to 1936 he was Associate Secretary of the Canadian Medical Association and, from its inception, a member of the National Committee for Mental Hygiene of Canada. It was while he was Medical Director of this latter organization that the "Study of the Distribution of Medical Care," for which he was largely responsible, was published in 1939. These are but a few of the more important international and national bodies to which he belonged; even a list of the many others in which he was a constructive force would be too long to come within the limits which this article allows.

As a writer he had a clear and simple style which carried his message in a convincing way. This was shown not only in the reports of his many surveys and the papers contributed to professional journals but also in the articles and papers he prepared for lay audiences. Had he lived to write the text-book which he planned, the field of public health would undoubtedly have been enriched.

Although the early part of his training had been in the laboratories, it was the human and social aspects of public health which attracted him most strongly. In a recent appreciation of Dr. Fleming's life and work, Dr. C. M. Hincks speaks as follows: "In his chosen field of public health, Dr. Fleming will be remembered for three outstanding contributions; the linking of mental hygiene with physical hygiene; the combining of public health with social welfare; and the effecting of a partnership between preventive and therapeutic medicine." In all of these movements he was a pioneer.

With an almost unbelievable capacity for work, he never seemed to be busy. Those who came to him for advice were always made to feel that he had a personal interest in their problems. An excellent listener,

(*Continued on Page 56*)

The Challenge of War Time to University Women*

By
A. VIBERT DOUGLAS

THE CHALLENGE to University Women to play a part in these stirring days is a very urgent challenge which no one of us has any right to ignore. To most of you there is no need to emphasize this point—you feel the challenge of the times and you hear the trumpet call to service and sacrifice. Your problem is to select the form of service for which you are best fitted and in which you are most needed. You can play a worthy part in the united effort required of our country in these anxious years whether you be in uniform or out of it, so long as you carry to your tasks the enthusiasm of a burning desire to contribute the best that is in you. Skill, patience, understanding, great honesty and hard work—we must give all these, and we must think and think and keep on thinking if we are to help in the attainment of victory and in the building of the world of a better tomorrow.

The enlisted services are calling for women with various skills and with no particular skill, but, above all, they are calling for women with qualities of leadership. There are over 22,000 women in the King's uniform today in the Canadian Navy, Army and Air Force. Some of our finest university graduates and undergraduates are giving leadership in these units. Their influence is being exerted to help keep the whole tone and standard of the women's units high and dignified. I think of an M.A. in English who was tennis champion at one of our universities a few years ago, and who is now in the R.C.A.F. (W.D.). I think of an excellent pass degree student, an assistant swimming instructor in her final year, who is now a sergeant in the C.W.A.C. I think of another student who took a B.Sc. a few years ago and who was one of the first to enlist in the Wrens. An undergraduate doing a brilliant first year course felt the call and did not return this session but is now doing radio duty on the west coast in an Air Force uniform. These young women are enthusiastic about their work and they and many others have expressed their certainty that they did the right thing when they enlisted. The services need more and more women with good home background and good education, and I commend this challenge to you with all sincerity and seriousness.

Some of you may have home responsibilities which render enlistment out of the question. Many of you may have a definite bent towards a civilian form of service for which perhaps you also have or are taking special training. Such fields of service of national importance and urgently calling for women today are the teaching profession, nursing and medical work, the wide field of social work, the civil service with its branches requiring special academic qualifications such as censorship and accounting. I need not dwell upon these— the first four have a great social significance in both war and postwar years, while the last two are essential present needs. How far returned men will displace women in accountancy is not certain; but for women with language qualifications, the postwar reconstruction and rebuilding of education in Europe will offer a tremendous and a thrilling challenge, and there will be openings in the diplomatic service, in consular and trade commissioners' offices on every continent.

For women with some mathematical and laboratory knowledge of physics, there are the physical research openings, the gauge testing laboratories, electrical instrument testing jobs. I think of one young women who taught for three years after Normal School, then went to a university for two years and wrote me last summer that she had decided to drop college for the duration. She is checking flying instruments in a Toronto laboratory and has the satisfaction of doing a skilled and essential job upon which our intrepid young airmen depend in large part for their safety.

Those of you with training in biochemistry, bacteriology and allied sciences are needed in hospital and research laboratories and in the units of the R.C.A.M.C. Chemists are needed in industry, in metallurgical laboratories and in war researches. The war has brought new duties and responsibilities to those trained in psychology and methods of psychological testing. All these are important fields where a woman with the requisite training can serve her country.

Some of you may have the ambition to go on beyond the Bachelor's degree to professional courses such as law, theology, library science, journalism; others may wish to take postgraduate courses of one kind or another, but without specific intent to train for a particular war or postwar job. Some of you may be even continuing an undergraduate course with no defined motive. The government has laid down very explicit regulations regarding men and how far they may legitimately go with their studies during these war years. Thus far, women have been left to decide for themselves where duty lies.

A. VIBERT DOUGLAS, M.B.E., M.Sc., Ph.D., F.R.A.S., for many years Lecturer in Astrophysics at McGill, is now Dean of Women at Queen's University, Kingston.

*Address to McGill Women's Union, R.V.C., March 20, 1943.

Are you justified in remaining at college another year? That question you must ask yourself. No one can decide for you, though many people may advise you one way or the other. Whether you be an undergraduate or a postgraduate student you must ask yourself that question. To return and train yourself further for a specific form of national service may be the obvious path of duty and wisdom. To get right out into a job which you are now fitted to do may be the only course which in the years to come may seem to you to have been justified. There are women today who were young adults in 1914-18 but who were asleep, never realizing that they could share in the service and to some small extent in the sacrifice of those years. They missed the opportunity of being active participants in a great experience. Do not make the same mistake.

In trying to help you to a decision I have touched upon some of the forms of service for which university training is essential. Now I am going to tell you my own experience. When war was declared on August 4, 1914, I had completed my second year of the four year BA. course at McGill. I returned to college that autumn and carried through my third year. In August 1915, I decided to leave my undergraduate course unfinished and I went to England in September. My first paid job was in the Customs House between Billingsgate Market and the Tower of London, overlooking that portion of the Thames known as The Pool. Here I took the place of an enlisted man as a "Deberture clerk." Later I transferred to the War Office and was immersed in the statistical work relating to recruiting and national service with the whole manpover of Great Britain as background. At the end of the summer of 1919, I returned to Canada and entered my fourth year at McGill that autumn. Four years had elapsed and, of course, I had forgotten a vast amount and, of course, it was hard work picking up the threads. But I assure you it can be done. Hundreds of returned soldiers did it, and we all brought to our studies a greater maturity of mind and judgment. It was a hard year but it was a great year. The experiences of those war years form some of my richest memories and never have I for a moment regretted breaking my course as I did. There is the satisfaction of feeling that one played a part, even though it was a very small and humble part, in the great events of those momentous years. A rich store of experience was gained which has influenced all my subsequent life. I covet for you some such memories when you look back from middle age upon these days of challenge and great opportunity.

Recently, I have realized as never before, how much the world can ask of us, how much we are expected to know about many things. It is not enough to be a specialist in something. We must also be intelligent citizens, aware of what is happening in the world, aware of the trends of constructive thought in the world about us, ready to assume a measure of responsibility for moulding a sound honest public opinion, and willing to pull our weight in whatever way we honestly think that we can render the greatest service.

In a Montreal newspaper last autumn I saw a drawing of a vast expanse of ocean with wild cold waves to a far horizon—a dark bleak lonely waste. An airplane trailing a long plume of black smoke was falling headlong into the sea. Four words told the story: "He gave his life." Here is a grim challenge to each of us to fill these war years with some effort of which we need never be ashamed. Nothing short of our best will seem good enough when we look back upon these years.

Allan Memorial Institute of Psychiatry Founded

ANOTHER important donation furthering McGill's fame as a medical centre and increasing the facilities available for training and research, was made recently when the stately and spacious Ravenscrag Estate on Pine Avenue, former home of Sir H. Montagu and Lady Allan was given to the Royal Victoria Hospital for the establishment of the Allan Memorial Institute of Psychiatry, according to a joint announcement by McGill University and the Royal Victoria Hospital.

The project, the result of several years work by leading Montreal citizens, including the late Sir Edward Beatty, President of the Royal Victoria Hospital and Chancellor of McGill University, has the support of the Rockfeller Foundation, which is generously providing $150,000 payable over a five year period for the teaching and research aspects of the work, of the Province of Quebec, which has undertaken to support the 50-bed hospital to be established, with $30,000 a year for the next 20 years, and J. W. McConnell who donated $40,000 for the expense of remodelling and converting the building.

Moreover, Dr. D. Ewen Cameron, one of the world's leading psychiatrists has been secured to direct the work of the institute. He will become the first full Professor of Psychiatry at McGill and will also be psychiatrist-in-chief at the Royal Victoria Hospital.

The establishment here of the institute, which will be one of the finest of its kind on the continent, in close cooperation with McGill's renowned medical faculty and the Royal Victoria Hospital will make possible the modern diagnosis and treatment of the large body of patients suffering from some underlying mental trouble, as well as advance teaching and research in psychiatry.

Some Memories of John Macnaughton

By
A. S. NOAD

The Late Professor John Macnaughton died on February 5, 1943. He taught at McGill University from 1903-1904 and from 1908-1919, becoming Professor of Classics.

IN writing of John Macnaughton, it is hard to avoid superlatives. The man had so rich and vigorous a personality that to tell about him brings one immediately under his spell and forces an unconscious imitation of his energetic, pungent style. Since my student days on the *Daily*, I have read many tributes to him, and in all of them I have thought I could detect traces of this sincerest flattery. Professor Macnaughton invited highly-coloured epithets, even as he distributed them. What I shall write of him, though designed as one more expression of grateful admiration, must be pitched in a lower key; it will attempt only to depict the aspects of this many-sided character that were shown to me personally over a period of twenty-five years, and to hint at how much his way of looking at life and literature impressed one among his former students.

THE LATE PROFESSOR JOHN MACNAUGHTON

I remember the class in which, as a freshman, I sat for the first time under John Macnaughton—who indeed could forget such an occasion? It was Latin, studied in a set of short extracts illustrating Roman life and ways and in the charming, if mannered, elegiac poet Tibullus. What an impact he made on us! Of course, everything was new just then, and at the beginning of the hour the rather small jerkily-moving figure, with whitening hair that crowned a face in which the bristling mustache seemed always at variance with the kindly blue eyes, was one more of a number of rather bizarre shapes that were passing before us—the professors under whom we were to work. But by the end of that period it was dawning on some, at any rate, of our minds, anaesthetized by exposure for years to the arid light of high school "Latin authors," that the study of Latin literature might be an exciting contact with personalities and a culture, like yet unlike our own, and that problems we had envisaged as specifically of our time had been wrestled with in the very pages we had been trained (I regret to say) to regard as "classics" and nothing more.

Without being fully aware of the process, we were having demonstrated to us the methods of the born teacher. John Macnaughton could strike sparks out of the most leaden human substance. An extract describing the collapse of a Roman amphitheatre was swiftly brought into the perspective of 1915 when the punishment (exile) inflicted on the contractors who had used shoddy materials was made the occasion of some trenchant remarks on war profiteers. The musical lines in which Tibullus renounces a life of action, and specifically military adventure, gave rise to a discussion and denunciation of Pacifism and then of President Wilson (supposed to be keeping the United States out of the war); in the next breath the same lines were related, with an aptness that seemed magical, to the songs of Burns. Quotations and illustrations from the entire field of literature ancient and modern fell into their places in the discourse and played their parts as though it had all been rehearsed many times, yet without a sign of coercion or artifice. Our teacher, we could see, used no notes, consulted nothing but the text in front of us and his memory. The performance was flowing inevitably from him, from his experiences of men and books.

For most of us the sensation was a new one, and like other new sensations not altogether agreeable. To be forced to keep pace with such a swift and far-ranging mind made some uncomfortable, a few sullen, though there were some again to whom from the first it was a stimulus and a joy. Yet before long even the reluctant had to yield, and admit that if first year Latin could be made interesting Professor Macnaughton was the man to accomplish the miracle.

His class-rooms could never be dull. Years after, I happened to mention boredom to him; he gave me an almost startled look and said simply, "I have never been bored in my life." That I am certain was the strictest truth, and the reason why he could tackle the most unresponsive set of dunderheads (as we must often have appeared to him), evoking things from them that surprised even themselves. Impatient, of course, he was—and what enthusiast has not been, from Moses down? He once slammed his book on the desk and headed out of the room growling his disgust with "a pack of asses who never heard of Moloch." (Some of us *had* heard of Moloch, but were too much in awe to speak out). The story has often been repeated, but not, I think, the whole story. That

A. S. NOAD, M.A., is Associate Professor of English at McGill University, presently on leave of absence on war work.

"Moloch" reference arose when a line in Tibullus suddenly set him to repeating in his beautiful voice the lines from Milton's *Ode on Christ's Nativity* that begin:

> "The oracles are dumb.
> No voice or hideous hum
> Runs through the arched roof in words deceiving"

and include the stanza:

> "And sullen Moloch, fled,
> Hath left in shadows dread
> His burning idol, all of blackest hue . . ."

Now one of the freshmen, hearing the verse of the young Milton rendered as he had never imagined verse could sound, went home and forthwith set himself to memorize the whole poem. He has been grateful for that, among other things, ever since.

"John," as he was affectionately known, could not suffer fools gladly, but the effect produced in him was never a yawn. Nor was he one of those who "assent with civil leer." He once confided to me, apropos some luckless student who had drawn the lightning on his head," I can stand a great deal, but when I see a face looking up at me with that peculiar mixture of insolence and ignorance . . ." The explosion always cleared the air, however; let the offender show an interest in the next topic brought up, and he was restored to the status of intelligent humanity.

Perhaps he sometimes forgot how rare and precarious that status really is, even at a university, and expected of his students a knowledge and a breadth of interest few of them normally possessed. For instance, in dealing with the passage in Lucretius about envy, which, like the thunderbolt, blasts the highest peaks, "and this is not more so now, nor will it be in the future, than it has been in the past," what more natural for him than to quote the equally famous "things are what they are, and their consequences will be what they will be; why then should we seek to deceive ourselves? " ? But how disconcerting for the apprentice months later to meet in an examination paper, appended to the Lucretius, the demand, "Quote a saying, similar to the above, by an English bishop!" And how "John" must have chuckled when in an inspired moment one examinee * wrote down, "As it was in the beginning, is now, and ever shall be, world without end, Amen." I am sure he gave full marks for that answer.

Not that this urge to learn more than the minimum we were content to set ourselves was not part of a legitimate educational process. I well recall my own humiliation on being requested, in a Fourth Year Greek paper, to compare the civic administration of Periclean Athens with that of contemporary Montreal. This was modernizing the classics with a vengeance: little as I knew of Athens, it was a good deal more than I knew of my own city, and I felt ashamed. Though I grumbled at the time, I knew that this was knowledge I should have acquired long ago.

Being taught, along with fifty or sixty others, by John Macnaughton was an invigorating process. Later on I was fortunate enough to sit under him in classes of only two or three, and for one year had him to myself. The books we read together, usually at his home, with him smoking his pipe and discoursing inimitably, to reach up now and then and pluck a volume from his shelves (this not so often, for his memory usually served), included Thucydides, Pindar, Plato, and Sophocles.

Thucydides was one of "John's" favourites, partly perhaps because of the difficulties to be faced in the translation, difficulties which made some of the lectures a battle of giants, partly too, no doubt, because of the recurrent aptness of the historian's observations on the Peloponnesian War to the Europe of 1917-1918. Those who portray John Macnaughton as entirely a dealer in rich phrases and bravura passages matching the more violent emotions can surely take no account of the intellectual prowess of the scholar, admirably displayed in his wrestling with the subtle, often intricate, but never confused expression of Thucydides. He used to say of that marvellous funeral speech put in the mouth of Pericles that a copy of it should be pasted inside every New Testament printed. It does him a great injustice to imagine that this was no more than the hyperbole of an enthusiast, anxious to reconcile his love of things Greek with his Christian training. He was here trying to show how the tremendous personal and social truths set forth in the New Testament had as their perfect corollary in the political sphere the "possession for all time "laid up for us by the historian of Athens. His rendering of the speech, supposed to have been uttered before the first of the cenotaphs erected to Unknown Soldiers, was made the more poignant by the cruel loss he had himself recently suffered.

Pindar brought out the other side of his nature. The gorgeous epithets, the linked phrases that seemed to defy adequate presentation in English, the brilliant colour—all of these stimulated to the utmost the imaginative powers that made him the masterly translator he was. In search of help, labouring along on a different level from his, I bought the Loeb edition of Pindar, with the excellent though rather pedestrian version of Sandys printed alongside the Greek. But what was the use? Once "John" was fairly launched on the translation of an ode Sandys was nowhere,

*It was MORREY CROSS (Arts '19), subsequently killed in action in the first World War.

and I had to reconcile myself to the idea that I was going to feel this poet and see his imagery as my teacher did or not at all. Years afterward I came across the notebooks I had filled with those fiery and stirring utterances and, remembering that he had told me he never wrote such things down, copied them out and sent them to him. His answering letter spoke of his some day publishing the *Isthmian Odes*. I wish he had held to the idea, for, still running in my head by the half-page, they seem to me the finest of all the fine translations I heard from him.

A deeply moving thing it was to be with him while he worked at a notable piece of verse or prose, bringing it over from the one idiom to the other. His sense of the texture and flavour of language was prodigious. It extended beyond single words to whole phrases, sentences, paragraphs. He would spend the entire morning period over a few lines, coming back and back to the charge and with each return beating out a few more of the roughnesses and filling out a few more of the inadequacies, until the poetry came flooding back into the words like the colour into heating iron, and the thought took shape and, finished at last, stood as one felt it must have stood when it left its creator's brain.

If it is to be regretted that so few of these recreations of classic works were given permanence, we should recall that often the extemporaneous nature of the process was what gave the result its unique validity. John Macnaughton was assuredly a lover of "becoming" rather than "being," the "werden" over the "sein;" in fact I have heard him talk of the two Greek verbs which have similar connotations in a manner leaving no doubt as to where his natural trend lay. The static and frozen held no appeal for him. He must each time feel the joy of creation afresh. That was doubtless why he wrote so little down; he had the reward of the musical performer or the singer and suffered their penalty.

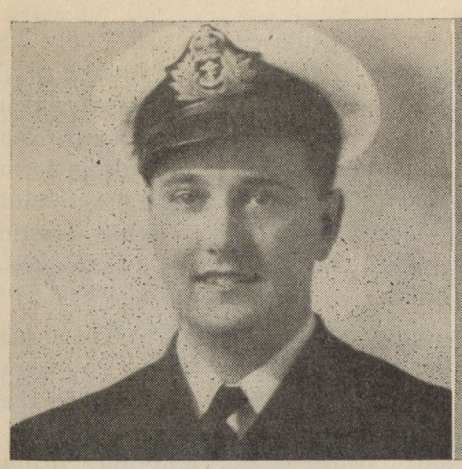

How he loved to roll words about on his tongue and savour them! Like all true craftsmen of language, too, he was conscious of certain inadequacies in his medium and tried his hand at supplementing them. Not altogether in jest, he used to lament the absence from the English vocabulary of a twin for "such" that would enable the easier translation of the Latin pair "tantum—quantum," and experiment with forms like "whatch;" "whatch the this, such the that . . ." and so on. When, during his later years at Toronto, after Virgil had long occupied his attention, he was telling of the new treasures he had found in that poet, I recall that one of the things he most rejoiced in was his own rendering of certain combinations of preposition and verb in which the verbal force seemed to be conveyed by the preposition and vice versa. Thus, he would cite "prolivit se," "he flung himself headlong," not the literal "he rolled himself forward;" only his way of putting it was: "Not 'he volved himself pro,' but 'he pro'd himself volving'." These phrases, which in cold print may seem grotesque, when heard from the lips of their inventor and backed by a gleam from his blue eyes carried in them the germ of all successful translation, that feeling for words as living, plastic things without which no amount of dictionary-knowledge will suffice.

This was something he was delighted to find in his pupils, even in the most embryonic form. You were always given credit for any little contribution to the version in hand, and his way of receiving and acknowledging it left a warm glow. Anything really good was greeted with a shout of enthusiasm. As a result, his classes fostered a sensitivity to accuracy and beauty of expression in English no less than in Latin or Greek. In fact, what they provided was not a narrowly specialized and "departmental" view of classical languages and literature but a training in the liberal arts, or as he loved to call them "the humanities."

Such methods of instruction, discursive and allusive, may now be frowned upon as depending too closely on the idiosyncrasies and personal preferences of the instructor; I am only sure that with him they worked. If he quoted from *The Golden Bough*, not so generally known in those pre-Eliot days as it has since become, and we looked blank, it was enough to have him say amazedly, "what? Don't you know Frazer?" We went away and read or at least dipped into the book. He was a great hand, too, at showing up the jerry-built foundations of our hasty judgments. In my Junior Year cockiness, having just saturated myself in Ste. Beuve and a few other French critics, I once hazarded the view that there was no English criticsm worthy of the name, and drew some pointed references to Coleridge which sent me back to *Biographia Literaria* in a rather humbler frame of mind. No essays on literary parallels could match the effect of hearing John Macnaughton, while translating a chorus from Aristophanes's *Clouds*, suddenly launch into Shelley's *Ode to the West Wind*, quoting stanza after stanza and revealing a similarity between two poets whom most readers would regard as utterly unlike.

The generation of men who could do things like this has passed or is passing away. They really were a generation at McGill: Paul Lafleur, Charles Moyse, S. B. Slack, William Caldwell, Brodie Brockwell, to name only some of those who studied and taught in the old Arts Building. None of them was much like the successful college professor of today, and I doubt if any would have cut any figure at a convention of such modern teachers, supposing they could have been prevailed upon to attend. Yet they were themselves,

McGill University War Records—VII

By
R. C. FETHERSTONHAUGH

A SHARP increase of 598 cards in McGill University War Records brought the total on August 20, 1943, to 4,636, compared with the 4,038 reported on April 20. Each of the 4,636 cards now in the file represents a graduate or past student of McGill, or a member of the University Staff, on Active Service in the Armed Forces of the United Nations, or serving the war effort in a reserve or civilian capacity. Of these, 3,845 are in the Active Service category, including 150 women in the Navy, Army, or Air Force, and 328 men in the forces of the United States. The majority of McGill men in the American forces are in the Medical Corps of the U.S. Army or Navy. They are at duty in the United States and in all the American theatres of war from the North and South Pacific to the North Atlantic and North Africa. A substantial minority are in the U.S. Army or Navy Air Forces, some still in training, others already serving in active combat against the Germans or the Japanese. We have particularly welcomed the contact these men have maintained with McGill and look forward to further reports from them with lively interest. Their letters are assured of a cordial welcome.

Of the 598 new cards filed since April, all but a handful were in the Active Service category. Many were made out when we learned for the first time of graduates or past students already serving overseas; others were filed when news came of McGill men or women in the Armed Forces at home; a large group recorded new student enlistments; and more than one hundred were added as the result of a special canvass of students who had left McGill since the outbreak of the war without leaving or sending word of their enlistment. This canvass is continuing and will undoubtedly add to our files as more replies to our letters of enquiry come in.

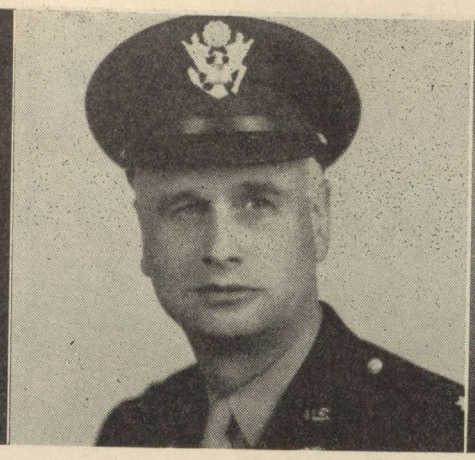

Indicating the cosmopolitan status of McGill, it is interesting to note that the cards added to the War Records included one or more representing service in the Royal New Zealand Air Force, the Royal Australian Air Force, the South African Artillery and Engineers, the Royal Netherlands Navy, and the Polish Army, in addition to those covering service in the Canadian Forces and in the forces of Great Britain and the United States. With the possible exception of the Russian front, McGill men are serving, it would seem, in every major theatre of war, a belief which is fortified by the evidence of the University's roll of killed, missing, and died on active service. On August 20, before full details of losses in the Sicilian campaign were known, the roll comprised 126 names. The casualties recorded were incurred in training in Canada, Great Britain, and the United States; in air combat over Germany, Norway, Holland, France, and the waters of the English Channel and North Sea; in bitter fighting against the Japanese in Java, Bataan, Burma, and India; in air operations over Malta, Egypt, and the Western Desert; in the final stand of the Canadians at Hong Kong; in the memorable raid in August, 1942, at Dieppe; in the North Atlantic and off Iceland; in Tunisia, and at Dunkirk. These are the records of the dead and missing; on the same date the list of prisoners of war totalled 27, ten of whom were held by

R. C. Fetherstonhaugh, Vice-Chairman of the Editorial Board of the McGill News and Editor of the "On His Majesty's Service" section, is in charge of McGill University War Records.

the Japanese, 16 of whom were prisoners in Germany; and one, shot down in air operations from Malta, was known to have been captured by the Italians.

In the lists of honours and awards gazetted from time to time, recognition to 75 McGill men has been accorded, to 55 for services in the Armed Forces and to 20 for wartime service in civilian capacities. One past student, since killed in a flying accident, was awarded the Distinguished Flying Cross and Bar; one, a member of the Royal Canadian Naval Volunteer Reserve serving in the Middle East, received the George Medal and Bar; 15 McGill men have won the Distinguished Flying Cross; five have received the Distinguished Service Cross; one, an airman, has been awarded the Distinguished Service Order; and one, serving with the American forces in the South Pacific, has received the United States Air Medal.

As usual, a listing of the latest honours and awards to McGill men and a synopsis of the news we have received of graduates and past students in the Armed Forces at home and overseas will be found in the "On His Majesty's Service" section of this issue. To maintain the value of this section, we again invite our own men, their friends, or next of kin, to send us particulars of McGill honours, promotions, appointments, and enlistments. Photographs to add to the collection the War Records has already made will also be appreciated; and newspaper clippings referring to the wartime services of McGill men and women will be welcomed. A special file for these has been provided. Please address photographs, clippings, and correspondence to

WAR RECORDS,
Registrar's Office,
MCGILL UNIVERSITY.

We wish most sincerely to thank those who have already sent us photographs or information. Their help has been appreciated at home and, unmistakably, as many letters from afar have assured us, by those who read this paper overseas.

HOWARD KENNEDY
B.Sc. '14

We welcome this opportunity to congratulate Major-General Howard Kennedy, M.C., upon his promotion to his present rank and appointment as Quartermaster-General of the Canadian Army, announced by National Defence Headquarters, May 1, 1943. Born in Dunrobin, Ontario, he graduated in Applied Science at McGill in 1914 and, proceeding overseas, served with distinction in the Canadian Forces in France, where he won the Military Cross and was severely wounded. At the outbreak of the present war, he left his post as Manager of the Quebec Forest Industries Association and crossed to England with the First Contingent of the Canadian Active Service Force as Lieut.-Col., Commanding No. 3 Field Company, Royal Can. Engineers. Later, he commanded the Royal Engineers of the 1st Can. Division, Can. Army Overseas, and returned to Canada in 1941 to assume duties at National Defence Headquarters. Prior to his appointment as Quartermaster-General, he was serving with the rank of Brigadier as Chairman of the Officer Selection and Disposal Board, N.D.H.Q., Ottawa.

ROBERT EDMOND JESS, D.S.C.
ENG. 1937-'40

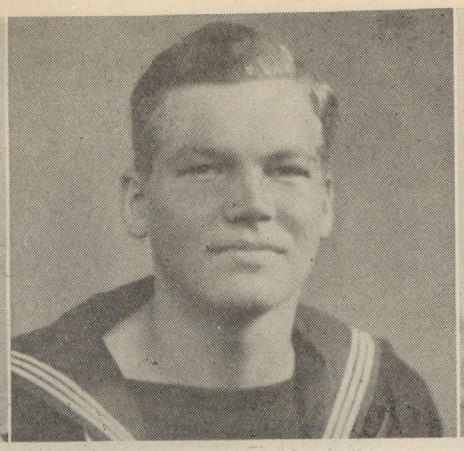

News of the award of the Distinguished Service Cross to Lieut. R. E. Jess, R.C.N.V.R., son of Mr. and Mrs. R. L. Jess, of Quebec, reached us soon after our Summer issue went to press. In that issue, we noted the outstanding service Lieut. Jess had rendered as an observer in a Swordfish squadron of the Fleet Air Arm based on Malta and before that while serving in the Mediterranean in the aircraft-carrier, H.M.S. *Eagle*. Commenting on the award, which was granted

for "air operations against enemy shipping," Royal Canadian Naval Headquarters noted that, behind the bare citation, lay a story of daring torpedo-plane attacks at night, resulting in the destruction of six enemy merchant ships. Lieut. Jess was one of a group of Canadians who volunteered for Air Arm duties in the Royal Navy in 1940 and worked his way up to a commission from the lower deck. His record of eight months of flying out of Malta included at least one attack on the Italian naval base at Spezia and one flight, in January, 1943, from which, having been shot down near Bone, Tunisia, he returned safely after being listed as "Missing" for some time.

RAYMOND GARDINER HATRICK
SCI. 1935-'37

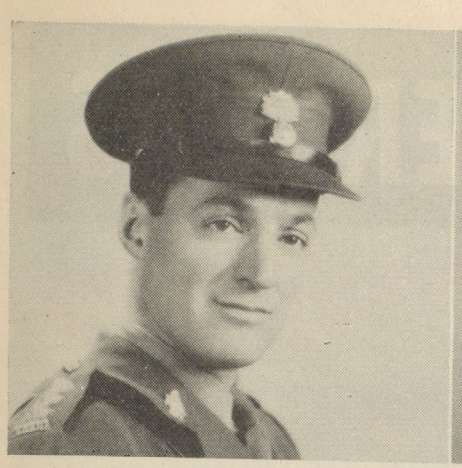

Veteran of convoy duty aboard H.M.C.S. *Lewis*, which was credited by the First Lord of the Admiralty with highly successful operations against enemy submarines before she was herself sunk in September, 1942, and later of duty in the corvette, H.M.C.S. *Ville de Quebec*, which rammed and sank a German submarine in the Mediterranean, Lieut. R. G. Hatrick, R.C.N.V.R., was Mentioned in Despatches, May 4, 1943. The son of Mr. and Mrs. James Hatrick, 3940 Côte des Neiges Road, Montreal, Lieut. Hatrick was educated at Strathcona Academy, Outremont, and had completed two years in Science at McGill. He was serving as Gunnery Officer in the two corvettes on the occasions when their successful operations against enemy submarines brought them their prized distinction.

RODDICK BARCLAY THOMAS, D.S.C.
ARTS, 1939-'42

The Distinguished Service Cross was awarded on June 29 to Sub-Lieut. R. B. Thomas, R.C.N.V.R., only son of Dr. and Mrs. James E. Thomas, 148 Quinn Boulevard, Longueuil, P.Q., for his part in the action announced in March in which the Canadian corvette, H.M.C.S. *Regina*, sank an Italian submarine in the Mediterranean and captured its crew. Twenty-three years old, Sub-Lieut. Thomas was educated at Longueuil High School and McGill University and received his commission in the R.C.N.V.R. on graduating from H.M.C.S. *King's*, Halifax, in September, 1942, with seniority from May 11 of that year. Eight awards in all were made to officers and men of the *Regina's* crew, including the Distinguished Service Order to the Commanding Officer, the Distinguished Service Cross to Sub-Lieut. Thomas, the Distinguished Service Medal to two petty officers, and four ratings Mentioned in Despatches.

WILLIAM CEDRIC NICHOLSON, D.S.O., M.C.
B.A., '13; B.C.L., '19

In the death last July at Lake Manitou, P.Q., of Lieut.-Col. W. C. Nicholson, D.S.O., M.C., Vice-President of the Canadian Legion, British Empire Service League, formerly Officer in Charge of Machine-Gun Instruction, McGill University Contingent, C.O.T.C., veteran of the Great War, and partner in the legal firm of Magee, Nicholson and O'Donnell, Montreal, Canada lost an outstanding soldier-citizen and McGill a devoted graduate. News of Colonel Nicholson's sudden death as the result of a heart attack shocked his many friends and dismayed the even wider circle of those with whom he shared the burden in his profession and in many forms of patriotic endeavour. In a tribute of deep sincerity, W. B. Scott, K.C., wrote of him in words which express the sorrow the news of his death caused: "From Coast to Coast, Colonel 'Billy' Nicholson, D.S.O., M.C., originally Trooper in the ranks of the 5th C.M.C., will be remembered with love and affection and as a man worthy of his country. God rest his gallant, happy soul!" The memory of his devotion in war and peace is a heritage which McGill will always cherish.

ROBERT McAMIS REILLEY
COM. 1938-'41

Direct news has been received of Pilot Officer R. M. Reilley, Royal Canadian Air Force, son of Professor H. E. Reilley, McGill University, and Mrs. Reilley, who was reported "Missing" on the night of May 1, 1943, and later was listed as a Prisoner of War. He was one of the crew of a bomber taking part that night in a raid over Germany. The plane was heavily hit, two of the crew were killed, and the remainder, forced to bail out over Holland, were taken prisoners of war. Pilot Officer Reilley suffered two wounds in the back and a badly torn ankle, but his injuries have responded to treatment and no disability from them is expected. His wife, the former Miss Megan Pratt, is living at 236 Strathearn Avenue, Montreal West.

LAWRENCE MOORE COSGRAVE
SCI. 1912-'13

We received in July a long and interesting letter, which read in part as follows, from Lieut.-Col. L. M. Cosgrave, D.S.O., Canadian Military Attaché in Canberra, Australia: "After these many years, I recently saw a copy of THE McGILL NEWS and read with interest and enjoyment the section headed *McGill University War Records.* I even discovered that I was amongst those mentioned, indicating that your records are particularly efficient. Curiously enough, this copy was handed to me on board a U.S. warship in the South-West Pacific fighting area by Commander McGuigan, a McGill medical graduate about 1936 or '37. Incidentally, he gave me a magnificent supply real quinine, which staved off malaria most effectively. On my return here to Canberra, our new Third Secretary, Alfred Pick (B.A., '36), had arrived with another McGILL NEWS. It was good to read of many old McGill friends. . . .

"I am enjoying my present job tremendously, though it entails a great amount of travelling throughout our extended operational areas in New Guinea and the Solomons to keep an eye on the brand of fighting in jungle country, which differs so violently from the old days in the Flanders mud.

"It made me quite homesick to read in the NEWS of McGill C.O.T.C. doings. I believe I am the only original officer of the O.T.C. left, now that Colonel Smart is dead. I think our O.T.C. in 1912 was indeed like the original awkward squad, but it did form the nucleus for a grand lot of lads by the time 1914 arrived. With every good wish from the South-West Pacific to old McGill, yours aye"—*Moore Cosgrave.*

THE LATE GEORGE PATTERSON CHRISTIE
SCI. 1935-'36

A stained glass window of unusual design was dedicated on June 27, 1943, in Erskine and American United Church, Montreal, to the memory of Squadron Leader G. P. Christie, D.F.C. (and Bar), of the Royal Air Force, son of Professor C. V. Christie, McGill University, and Mrs. Christie. Commemorating Squadron Leader Christie's service in the R.A.F., which ended when he was killed in a flying accident over Lake St. Louis, P.Q., on July 5, 1942, the window shows an airman just alighted from his plane, with burning London as a background. To the right is the dome of St. Paul's, with searchlights piercing the sky, through the smoke of burning hangars. In the framework of the design are the shields of Westmount High School and McGill University, also the Union Jack, the flag of the Royal Air Force, and the badges of the 242nd, 66th, and 43rd Fighter Squadrons, R.A.F., and the R.A.F. Transport Command, in which Squadron Leader Christie won distinction.

DR. F. CYRIL JAMES, PRINCIPAL AND VICE-CHANCELLOR,
ADDRESSING McGILL'S SPRING CONVOCATION ASSEMBLY.

For the first time since the Sir Arthur Currie Memorial Gymnasium-Armoury was built through the efforts of the Graduates' Society, it was used for the Spring Convocation on May 26 this year, when unsuitable weather prevented the ceremonies being held on the Campus.

Graduates' Society News and Notes

The McGill Alumnae Society And Its Manifold Activities

By
SUSAN E. VAUGHAN

A MEMBER of the McGill Graduates' Society glancing over the newspaper report of the annual meeting of the Alumnae, remarked that though a smaller society than his own it seemed to include more varied interests. Besides the usual executive reports, he observed that those of over a dozen committees were presented, committees with names that ranged from Education to Refreshments and from Scholarships to the University Settlement. He expressed some curiosity about the society and how it had arrived at its present differentiation from the type familiar to him.

As an attempt to answer his and similar queries, these notes on the origin and development of the Alumnae Society have been put together.

It began fifty-five years ago, when the first class of women graduated, and undoubtedly something of its special quality is owing to the earnest quality and high aims of those pioneer women. Conscious that they had just received a precicus inheritance—some called it a right, others a privilege, but all knew it as a benefit—they recognized instantly that they must assume new responsibilities. The society which they organized was from the beginning a twofold affair. It was to continue, by means of its monthly meetings with their papers and discussions, the intellectual interests of undergraduate days; and it was to undertake some definite altruistic work for the benefit of those less privileged than themselves. As young women they looked into the world of other young women, and they found that the Montreal of 1888 offered very few amenities to the girls who worked in its shops and factories. Here was their opportunity. With a temerity which evokes a gasp from their timid successors, our eight pioneers, without money or influence, rented a building in a downtown side street, and established a Girls' Club and Lunch Room.

For years, this small group, augmented of course from each graduating class, put into this first enterprise the hard work of their own hands and brains, and carried a wearing load of financial anxiety. As the years passed, the Club, as is the way of such things, changed in character, added new features to fit new needs, and finally evolved into the University Settlement. This, now a large and varied institution, naturally draws its maintenance and management from a larger community than that of the Alumnae. In that maintenance and management, however, the Alumnae still has its part, while content to hand on to others a responsibility which has outgrown its resources.

New conditions suggested new types of effort and the history of other organizations has followed more or less that of the first one. During the last war the Alumnae organized a soldier's library, which, after sundry removals, was lodged in the Royal Victoria Hospital. Its benefits were gradually extended from the military ward to other parts of the hospital, and the work first assumed by Alumnae members, passed to others; and finally the hospital took over both the library and its administration. The Soldiers' Library at the Ste. Anne's Military Hospital still receives an Alumnae grant, and also the Children's Library, in the initiation of which the Society took part. Hence the number of Library reports.

MRS. SUSAN E. VAUGHAN, B.A., M.A., LL.D., was Warden of Royal Victoria College from 1928-1937.

Early in the present war an Alumnae Red Cross Group sprang up, and, in close collaboration with the Women Associates of McGill, it works throughout the year in the ballroom of the Faculty Club and sends down to Headquarters every week cases well filled with hospital supplies, soldiers' comforts and civilian clothing.

The Scholarship Committee, a growth of recent years is one that has gained solid support. Thanks to the generous cooperation of friends outside as well as inside the society, its balance sheet is more imposing that that of the Alumnae itself. Three endowments, representing over three thousand dollars each, permit the granting of three annual scholarships, and in addition to these, some seventy bursaries and loans have been given within a comparatively short span of years.

I have accounted for some of the committees, others must be taken for granted. Some exist because of affiliations, or membership in larger organizations, such as the Canadian and the International Federations of University Women of which the Alumnae is a member. As a part of the first named body it pays its quota to the travelling scholarships offered annually for graduate study and open to women of all Canadian universities. As a part of the International it has been able to contribute, modestly, to the relief of those University women who are refugees from their enemy-occupied countries.

So much for the activities of the Alumnae Society which is a coherent group, and small in proportion to the whole number of graduates. The Society is very conscious that it could do more if a large proportion of each year's graduating class and also classes of earlier dates joined it each autumn, bringing their fees in their hands. A proportion of each year's revenue is passed over, very properly, to the Graduates' Society to pay the expenses of THE McGILL NEWS, which circulates among all graduates, and in the publication of which the Alumnae takes part.

In this as in other McGill enterprises, such as the building of the Memorial Gymnasium, the Alumnae has been glad and proud to take part; but it would like to do more. The Queen's Alumnae has built a residence hall for undergraduate women!

When discussing the painful fact of the disproportion between the large scattered body of graduates and the small organized nucleus, I have heard the defence of not being interested in organization, and of preferring solitary reading to discussion in a crowd. As defence this is feeble enough. Attendance at meetings is not compulsory, though at times when important business is on the agenda it is desirable. Many of us miss a good deal of what goes on in the Parliament Buildings and the City Hall, and still contrive to keep some self-respect as citizens. We could hardly hope to do so if we failed both to poll our votes and pay our taxes.

To the citizens of McGill last year Dr. Leacock delivered a message in the form of a gay red folder. It was addressed, I fear, only to the men citizens. Perhaps he thought the women didn't need it, but they know better, and fortunately it reached a good many of them. I hope it may appear in a new and larger edition. To its sparkling words I have nothing to add. Its trumpet sound was more rousing than the McGill scarlet in which it was clothed. Read by every man, woman and child of McGill it should have a swift reaction. And then Alumnae and Graduates' Societies could do a great deal more.

Alumnae Society - Officers for 1943-'44

The following officers have been elected by the McGill Alumnae Society for 1943-'44:

Hon. President: Mrs. Walter Vaughan; *Past President:* Miss A. Muriel Wilson; *President:* Miss Dorothy Roberts; *1st Vice-Pres.:* Mrs. W. R. Kennedy; *2nd Vice-Pres.:* Mrs. Wallace Roy; *3rd Vice-Pres.:* Miss Barbara Dougherty; *4th Vice-Pres.:* Mrs. George Savage; *Recording Sec'y:* Miss R. Watson; *Asst. Rec. Sec'y:* Miss M. Garlick; *Corres. Sec'y:* Mrs. R. R. Merifield; *Asst. Corres. Sec'y:* Miss Phyllis Buckingham; *Treasurer:* Miss Patricia Maybury; *Asst. Treas.:* Miss Mary Grant.

CHAIRMEN OF COMMITTEES:—

Membership: Mrs. Sidney Bruneau; *Scholarship:* Miss Mabel Corner; *Education:* Mrs. R. S. Eadie; *Red Cross:* Mrs. Gordon Sproule; *Tea:* Mrs. H. C. Mayhew; *Archives:* Miss M. Johnson; *Modern Literature Group:* Miss M. F. Hadrill and Miss E. P. Simpson.

REPRESENTATIVES:—

St. Anne's Military Hospital: Miss Kathleen Flack; *University Settlement:* Mrs. A. M. Bain; *Children's Libraries:* Miss L. Shaw; *Local Council:* Mrs. Hendry and Mrs. Hoover; *Canadian Federation of University Women:* Miss Hope Barrington; *The Editorial Board of* THE McGILL NEWS: Miss Joan Foster and Miss Betty Cowper.

McGill Alumnae Society Collecting For Late Georgina Hunter Scholarship

The Scholarship Committee of the McGill Alumnae Society announces that from its inception in 1931, it has assisted 76 students with scholarships, bursaries and loans. Only one scholarship was made possible by a legacy. All other funds have been collected in relatively small amounts.

The Committee is now trying to collect the last third of the amount required to endow a scholarship in memory of the late Georgina Hunter who was the first President of the McGill Alumnae Society.

Names of subscribers from the last published list to date are as follows:

Miss Ethel Block; Mrs. Winthrop Brainerd; Miss Margaret Brodie; Miss Pearl Burrell; Mrs. P. E. Corbett; Miss Mabel Corner; Miss E. Darling; Mrs. A. G. Dawson; Mrs. G. M. Edwards; Miss G. Norton Evans; Miss Margaret Gibb; Miss A. Muriel Gillean; Mrs. Hampson Gillean; Mrs. Gavin Graham; Mrs. Arthur Henderson; Miss L. M. Hendrie; Miss Beatrice Hickson; Miss Mabel Hickson; Miss Caroline Holman; Miss Charlotte Houston; Miss Agnes Houston; Mrs. Alex. Hutchison; Mrs. J. R. Jeffrey; Mrs. S. Wright Jewett; Mrs. Charles Johnson; Mrs. David Kert; Miss L. C. Lamb; Mrs. P. C. Leslie; Mrs. Louis L'Espérance; Mrs. Walter Molson; Miss E. C. Monk; Mrs. G. S. Murray; Mrs. G. C. McDonald; Mrs. Gordon MacDougall; Mrs. H. M. MacKay; Mrs. N. M. McLeod; Mrs. J. H. Norris; Mrs. S. C. Nors-

worthy; Mrs. J. B. Porter; Miss Ethel Raynes; Miss Dorothy M. Roberts; Mrs. Ben Robinson; Miss E. C. Rorke; Mrs. Graham Ross; Miss Jean H. Scott; Miss Ruth Shearing; Mrs. W. S Simpson; Mrs. O. Sitwell; Mrs. Allan Smith; Miss Daisy Snyder; Miss Margaret Taylor; Mrs. Walter Vaughan; Mrs. Harris Whittemore; The Honourable Cairine Wilson; Miss A. Muriel Wilson; Mrs. F. Wright; Alumnae Society of McGill University; B'nai B'rith, Mount Royal Women's Auxiliary No. 257; Local Council of Women; Council of Jewish Women; I.O.D.E. Edward Baldwin Savage Chapter; Class of 1913; Class of 1916; Class of 1933, and Class of 1942.

Subscriptions may be sent to the McGill Alumnae Scholarship Committee, Royal Victoria College.

Members of the Committee are: Miss Mabel E. Corner, *Chairman;* Miss Christine Rorke, *Treasurer;* Miss Gladys M. Banfill, *Secretary.* Miss Jane Fleet; Mrs. Geo. C. McDonald; Mrs. Malcolm V. Mackenzie; Mrs. J. H. Morris; Mrs. David Scott; Mrs. Allan L. Smith; Mrs. Gordon Sproule; Miss Ellen Stansfield; Mrs. Walter Vaughan and *ex-officio* Miss Dorothy Roberts, President McGill Alumnae Society and Dr. Muriel Roscoe, Warden, Royal Victoria College.

Quebec Graduates Meet

On June 15th, President Fraser Keith visited Quebec and was entertained at a dinner gathering of the Quebec Graduates' Society held in the Hotel St. Louis under the presidency of Donald Gray-Donald, President.

In addressing the members present, Mr. Keith emphasized the importance of the branches in holding McGill men together and in keeping them in touch with the University. He believes that the branches should play a more important role in the activities of the McGill Graduates' Society and the secretaries of branches should be given a place in connection with the publication of The McGill News.

A campaign had been conducted during the past year to increase the membership through the issuance of a booklet entitled "My Old College," by Dr. Stephen Leacock. It was anticipated that as a result, many new members would be enrolled and he thought that the branches had a distinct part to play in connection with holding and increasing the number of members, particularly from among those who had held membership at one time. Keeping in touch with undergraduates was a subject being discussed by the executive at the present time and it was his firm conviction that the further growth of the Society was largely dependent on the extent to which this policy was carried out.

At the conclusion of Mr. Keith's address the Graduates' Society's motion picture technicolor film was shown which aroused much interest.

Among the many present were the following: Donald Gray-Donald, president of the Quebec City branch; Fraser Keith, Dominion President; Roger H. Taschereau, secretary of Quebec City branch; E. Larochelle; F. C. Denis; Montefiore Joseph who graduated from McGill in 1870 and to whom high tribute was paid; Capt. Bleau; Dr. Lawrence Tombs; Arthur G. Penny; L. Swift; A. G. Grigg; G. Sarault; L. Rousseau; R. Rolleston; J. P. Giguere; R. Stanton; J. Henri Bieler; Dr. J. M. Elliott; Leo Roy; Leo De Haitre and Vernon Howe Bailey.

Prince Edward Island Branch Organized

On July 21, a number of McGill graduates met at Charlottetown to organize a Prince Edward Island Branch of the Graduates' Society. The Hon. Dr. W. J. P. MacMillan was elected President, and other officers elected were as follows:

Vice-Presidents, Dr. Claude Simpson, Summerside, C. H. B. Longworth, Charlottetown, Dr. A. A. MacDonald, Souris; Treasurer, Professor L. C. Callbeck, Charlottetown; Secretary, R. H. Rogers, Charlottetown; By-law Committee, Dr. I. J. Yeo, R. H. Rogers and Dr. B. C. Keeping, all of Charlottetown.

Dr. A. T. Bazin, Montreal, addressed the meeting and dealt with the good work done by the McGill Graduates' Society in the war effort. Moving pictures of the McGill open air convocation at which Dorothy Thompson received the LL.D. degree, and the McGill University buildings, were shown.

Present at the meeting were: Dr. T. M. Tanton, Dr. J. C. Simpson, J. F. McNeil, Dr. E. T. Tanton, Doctors W. J. P. MacMillan, H. D. Johnson, J. P. Lantz, I. J. Yeo, B. C. Keeping, Prof. L. C. Callbeck, W. E. Curtis, F. M. Cannon, Lilian McKenzie, Laura Young and R. H. Rogers.

The meeting resulted from a request of the McGill Graduates' Society that a branch society be formed in Prince Edward Island.

McGill Society of Ontario Meets Regularly

An enthusiastic meeting of McGill Graduates of Toronto and vicinity, one of their regular monthly meetings, was held at the University Club on Friday, May 28th, at which President Fraser Keith was present.

These meetings of the Ontario Society are unique and inspiring. Around 5 o'clock the members gather for a social hour at which formality is banned and a friendly spirit of comradery exists. Following an informal dinner, the members present to a number of about 40 repaired to the lounge room and after all were comfortably seated, E. G. McCracken called upon the president to address the group. Mr. Keith expressed his pleasure at being in Toronto which recalled pleasant memories and afforded an opportunity of meeting many old friends. He gave a brief review of the activities of the Society during his term of office. He paid tribute to the contribution made by Dr. Stephen Leacock in writing the booklet, "My Old College," which had been sent out to all graduates and which no doubt had done much to stimulate a greater interest in McGill affairs. The present objectives of the Society were to bind McGill Graduates more closely together and to the University and to promote more actively the interests of McGill. The present policy was to increase membership, to make the branches more important; to eliminate the impression that the Society is merely a collecting agency; to keep in touch with the under-graduates and particularly to see that McGill men and women overseas and engaged in war services were kept informed of McGill affairs. This was being done by sending out copies of The McGill News to all whose addresses were known.

A brief review was given of the achievements of the Society since 1911. An interesting discussion followed in which many took part.

The virility of the Ontario Society was demonstrated by a report from Ken Carter, Chairman of the Rehabilitation Committee, which showed an intense interest on the part of the members in post-war preparedness. A committee which consists of practically all the members of the Society meets regularly and is enthusiastic in its efforts to be of service. Harry Galley expressed how the Committee was constituted and how it was made possible to have so many willing workers. Mr. Keith complimented the Ontario Society on what it is accomplishing.

Among those present were: H. M. Williams; John W. Little; H. T. Kirkpatrick; Herman L. Eberts; E. W. Camp; R. C. Crawford; D. T. Smith; R. B. Cowan; D. A. Duff; J. F. Ross; R. Shatford; G. Bishop; R. M. P. Hamilton; T. Moran; H. C. Davies; Dr. S. C. Swift; I. G. Wheaton; W. S. Ewens; M. J. McHenry; K. Carter; B. W. Chave; Fraser Keith; Jack Frith; A. A. Pitts; J. N. Alford; J. H. Hooper; R. H. Reid; E. N. Martin; T. M. Fyshe; J. G. G Kerry; J. H. McOuat; E. K. McLean; R. E. L. Johnson; E. G. McCracken; A. H. Galley; R. B. Spears; F. W. Cowie.

Halifax Branch Resurrected

Through the good offices of C. H. Wright, B.Sc.,'96, of Halifax, in collaboration with H. C. MacKeen, K.C., and a group of ardent McGill graduates in the city, the Halifax Branch has been resurrected, and at a meeting held on May 31st, the following officers were elected:—

Edward M. Woolcombe, B.Sc., '23, Manager of Foundation (Maritime) Limited, President;

John Robert Kaye, B.Sc., '24, President of The Engineering Service Co., Limited, Secretary;

Walter Lawson Muir, M.D., '07, Treasurer.

The officers of the Halifax Branch anticipate renewing branch activities in the Fall, although at the present time practically all members are engaged in some form or other in war work.

On August 25, the Branch received a visit from Principal James who spoke to the members at a meeting held in the Nova Scotia Hotel. He dealt with the present and post-war plans of McGill University and also with the problem of post-war reconstruction generally, pointing out that Canada has already gone farther than any other country in planning a demobilization program and that scholarships and maintenance allowances will be available to those in the armed services who wish to attend a university on demobilization to complete their studies. On the preceding day the Principal had spoken to a large gathering at the Halifax Rotary Club outlining the three main problems of reconstruction—international relations leading to peace, full employment resulting in prosperity, and human welfare assuring security.

M.S.P.E. Alumnae Elect Officers

The following officers have been elected by the M.S.P.E. Alumnae for the coming year: President, Ruth Schnebly; Vice-President, Aileen Keane; Sec.-Treas. and Corresponding Sec., Doris Banfill Boothroyd; Social Convenor, Elnora Adams MacKay; Bulletin Editor, Joan Matheson; Social and Personal, Violet Pick; Contact Reporter, Joyce Tyrrell; Mailing List, Dorothy Amaron.

Prominent Medical Graduate Dies

(From Highland Hospital Bulletin, Rochester, N.Y.)

Dr. THOMAS JAMESON (1867-1943)
IN MEMORIAM

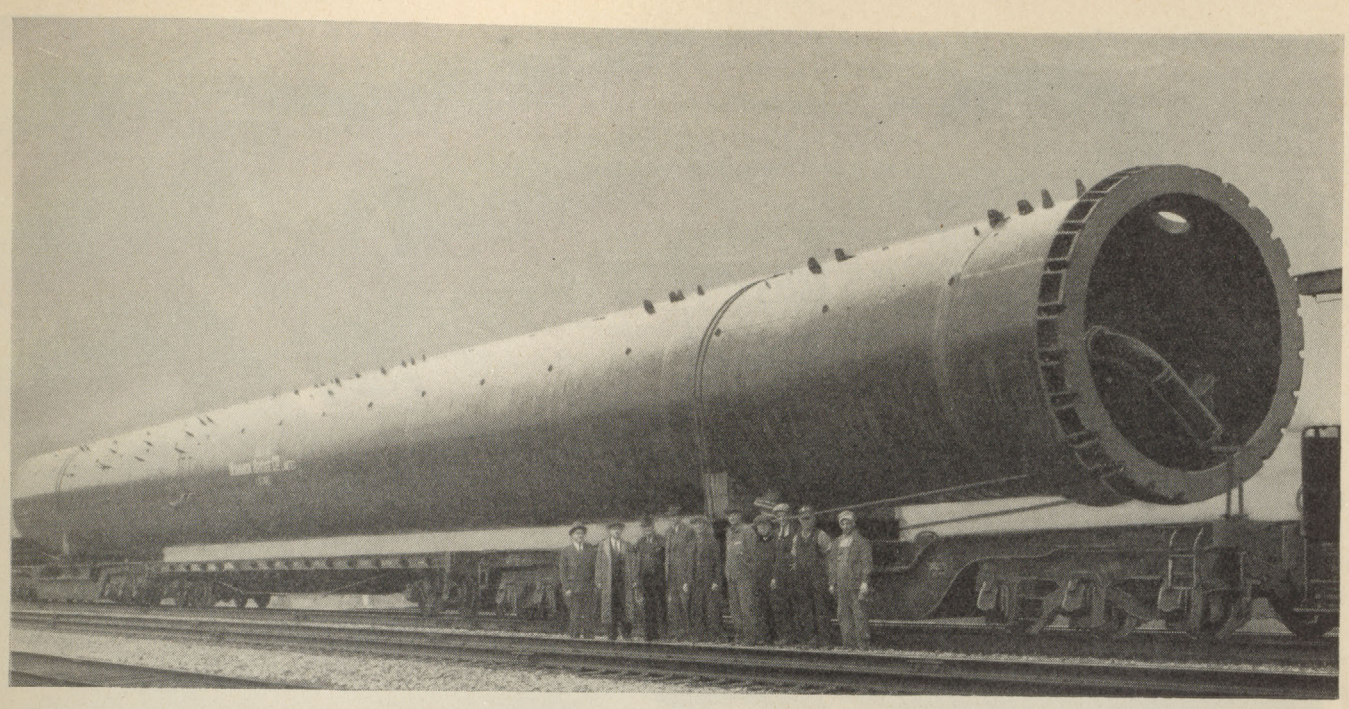

On April 23, 1943, Dr. Thomas Jameson passed to the great beyond after a long and honourable career as a physician in this community. He was born in Dublin in 1867, attended Wesley College in that city, later matriculating in the Royal College of Surgeons. After pursuing his medical studies for a short time, he transferred to chemistry and pharmacy. In 1883 he moved to Rochester and became a registered pharmacist. In 1888 his interest in medicine reviving, he entered the medical department of McGill University from which he was graduated in 1892. Dr. Jameson's career in McGill was a notable one. He had several teachers who were inspiring leaders, among them being William Osler, who was then laying the foundation for his epoch-making bed side teaching; J. G. Adami, the eminent pathologist, who with Osler gave great impetus to post mortem study; and the elder Campbell Howard, a clinician of renown. Dr. Jameson was in a class of brilliant students, among them Charles F. Martin, who later became professor of medicine and dean, and R. Tait McKenzie, anatomist and sculptor. Dr. Jameson was the gold medalist and valedictorian of his class. He was also awarded a gold medal for his work in chemistry.

After serving an interneship in the Montreal General Hospital, he returned to Rochester and engaged in the practice of medicine, affiliating with the General and St. Mary's Hospitals. At this time there were no scientific laboratories attached to hospitals. The clinical use of the microscope by physicians was in its infancy as was medical chemistry and bacteriology. Indeed, the first properly equipped laboratory did not appear until 1915. Dr. Jameson became one of a group of aggressive and progressive young doctors who organized to study disease from the scientific point of view. Their first interest was in gross and microscopic anatomy and pathology. Early in his career he manifested an interest in surgery and made many and frequent trips to the leading surgical clinics in this country.

Dr. Jameson was an omnivorous reader and particularly kept in touch with the work of the English School of surgeons. He was a good teacher and delighted in demonstrating to internes and his younger colleagues the new techniques of modern surgery. His professional skill was appreciated both by the medical profession and the public. He enjoyed a large private and consulting practice and served with distinction on the staffs of both St. Mary's and the Highland Hospitals. He was chief of the surgical staff of the Highland from 1916 to 1936.

Dr. Jameson may be regarded as one of the pioneers who laid the foundation for the splendid medical structure which exists in Rochester today as exemplified by its well-organized medical societies, its thoroughly equipped hospitals, and fine medical school. It was men like Dr. Jameson who showed the need and the way. We cannot be too grateful for what he did. His life work was a real contribution to the profession which he adorned. We sincerely regert his passing.

JOHN R. WILLIAMS, M.D.

"The Longest Piece of Freight Ever Handled on a North American Railroad"

This B.B. Extractor, 165' 4¼" long with a shipping weight of 138½ tons, necessitated the full length of three flat cars. It was built at our Lachine plant for the Polymer Corporation Limited, Canadian Government synthetic-rubber plant at Sarnia, Ont.

Designed for a pressure of 130 lbs. per square inch, the shell plates are 1" thick in the bottom half and 15/16" thick in the upper. The vessel was fabricated, welded, stress relieved and x-rayed where necessary in our own plant.

Unusual arrangements had to be made and extraordinary precautions taken by the Canadian National Railways to transport this, the longest piece of freight ever to be handled over any railroad in North America.

DR. VINEBERG RECEIVING TESTIMONIAL VOLUME
Left to right: DR. I. C. RUBIN, Chairman of Committee, DR. HIRAM N. VINEBERG, DOUGLAS S. COLE, President McGill Graduates' Society of New York

Dr. Hiram N. Vineberg Honoured in New York for 65 Years of Service in Medicine

DR. HIRAM N. VINEBERG, a pioneer of modern gynaecology and one of the oldest living graduates of McGill University, was honoured by the medical profession and civic leaders of Canada and the United States at a ceremony in the Mount Sinai Hospital in New York City on Tuesday, June 8th.

Dr. Vineberg, who was reared in Canada and received his medical education at McGill University, was presented with a testimonial volume, a 360-page issue of the *Journal of the Mount Sinai Hospital*, containing original scientific contributions by 40 noted medical men of Canada and the United States. This tribute climaxed a 65-year career of medical achievement and adventure, during which Dr. Vineberg has not only done much to relieve womankind of disease and suffering, but has served as a physician in the Canadian frontier regions, in the South Seas, in England, and Europe, as well as in New York City.

One of the principal guest speakers at the presentation ceremony was Douglas S. Cole, Senior Canadian Trade Commissioner in the United States, who saluted Dr. Vineberg on behalf of the graduates of McGill University, in his capacity as President of the New York Graduates' Society.

Mr. Cole recounted that Dr. Vineberg was one of the founders and an early President of the McGill Graduates' Society of New York, and also that he was an associate and close friend of the great Canadian physician, Sir William Osler.

Relating an incident of Dr. Vineberg's early life "to illustrate his ruggedness of character and determination of purpose," Mr. Cole said:

"In the early days in Canada, one of the largest and most reputable dry goods houses was J. G. McKenzie and Company of Montreal, now long defunct. The manager or head man of this concern was J. P. Cleghorn, a dignified and imposing personality with old fashioned "mutton chop" whiskers. He was one of the foremost men in Montreal—President of the Board of Trade for three terms; Treasurer of Montreal General Hospital; Director of Molson's Bank and many other public and financial institutions.

"One day Mr. Cleghorn received a visit at his office

from two boys who said they had come to buy goods; one was a rugged little fellow about 19 and the other was a mere child who said he was 14 although he looked 12. The young man was the spokesman and in a few words he told his story: that they wanted to start up in business in Foresters Falls which was just bordering on a new and undiscovered rich country; that it was the wealthiest lumbering district in North America; and that it was their plan to penetrate into the depth of that country, supplying the lumbermen and workers with merchandise; this, the boy thought, undoubtedly would prove a great feeder to the store.

"Ordinary politeness and perhaps sympathy prevented Mr. Cleghorn from smiling at the novelty of such a situation. He asked the little fellow, 'What capital have you?' The young man answered bravely, '*We have no capital, sir, but we are honest and if you will trust us I feel morally certain that we will repay you and prove good customers.*' Those were the youthful words of Dr. Vineberg!

"Mr. Cleghorn was impressed with the very demeanour of the boy, and after consultation with his associates they decided to take a 'flyer.' I need hardly add their confidence was not misplaced. In time the account ran into thousands of dollars and the firm of H. and H. Vineberg of Foresters Falls, of which Dr. Vineberg was one of the partners, became one of the biggest and most valued customers of the Montreal house."

The circumstances of Dr. Vineberg's graduation from McGill in 1878 constituted a bright spot in the annals of the university. The final examinations were traditionally held on a Saturday. As an observant follower of the Jewish faith, Dr. Vineberg asked for a special examination on the following Monday in order that he might not have to violate the Sabbath. This permission was granted by Principal Sir William Dawson, a highly religious man himself, but only on condition that the examination would have to be much harder and that Dr. Vineberg would not be eligible for the highest graduation honour, the Holmes Gold Medal. However, his mark was so high that the medal was granted to him anyway, and his fellow-students hailed the event by carrying him around the campus on their shoulders. From that time on, the final examinations were held on Mondays.

Dr. Vineberg started a promising general practice in Montreal but, in his own words, "the roving spirit seized me." He went to Liverpool and then to London, "walking" the hospitals there. Receiving an appointment as doctor on a clipper ship, he sailed to New Zealand. From there he wandered to Hawaii, and for a year was physician to three sugar plantations on the island of Oahu in the realm of King Kalakau.

At the end of the year, Dr. Vineberg resigned. The king offered him the position of physician in the leper settlement on the island of Kolokai. He did not accept the position, but he visited the settlement and stayed for three days with Father Damien, the famous missionary to the lepers.

Returning to Canada, Dr. Vineberg practiced for three years at Portage La Prairie, Ontario, where he developed an interest in gynaecology which impelled him to leave his practice once more and travel to Berlin, Vienna, and Prague for specialized study. When he came back to America in 1886 he settled permanently in New York. In 1894 he was appointed Chief of Staff in the Out-Patient Department of The Mount Sinai Hospital. He has been associated with that hospital ever since, having been appointed Consulting Gynaecologist on his retirement in 1921.

Dr. Vineberg was also associated at various periods with Polyclinic Hospital and Post-Graduate Hospital, and was Gynaecologist-in-Chief at Beth Moses Hospital. In 1918 he was President of the New York Obstetrical Society and in 1926 he was First Vice-President of the American Gynaecological Society.

Speakers at the presentation ceremony in addition to Mr. Cole included the following: Hon. Leo Arnstein, Commissioner of Welfare of New York City and President of The Mount Sinai Hospital; Dr. Bernard Sachs, Consulting Neurologist and Past President of the Medical Board of The Mount Sinai Hospital; Dr. George Gray Ward, emeritus Chief Surgeon, Woman's Hospital, and Past President of the American Gynaecological Society; Margaret Sanger; Arthur Hays Sulzberger, President and Publisher of the New York Times; Dr. Harold Neuhof, Attending Surgeon, The Mount Sinai Hospital; Dr. Isidor C. Rubin, Attending Gynaecologist, The Mount Sinai Hospital, and Chairman of the Hiram N. Vineberg Anniversary Volume Committee.

ALL MEMBERS OF THE SOCIETY ARE CORDIALLY INVITED TO ATTEND

The Annual General Meeting *of* The Graduates' Society

WEDNESDAY, OCTOBER 6, at 8.15 p.m.

In the Mess of the McGILL C.O.T.C., GYMNASIUM-ARMOURY, 475 Pine Ave. W.

REPORTS FOR THE YEAR 1942-'43—INSTALLATION OF OFFICERS—GENERAL DISCUSSION
to be followed by a social evening with refreshments

AIR IN ACTION

THE Pressure of Air On a Sail was one of the first uses of Air In Action—air under pressure—to help mankind. Centuries later, but still over two thousand years ago, air minded men compressed the air in vessels made of animal skins for smelting, operating temple doors, or giving voice to their stone gods.

Now, Air In Action—Compressed Air—is essential in the performance of thousands of tasks, such as mining coal and metals, maintaining railway rolling stock, bridges and roadbeds, fabricating ships, guns and 'planes, or in processing oil, chemicals, paper, food and countless other products.

To the Air Minded Men of Today, who are using Air in Action—to increase production, cut manufacturing costs or improve their product—we offer practical assistance based on our experience in the design, construction and application of compressed air equipment during the past sixty years.

Killed on Active Service in Great Britain

On His Majesty's Service—XVI

Edited by
R. C. FETHERSTONHAUGH

MARKING the completion of four years of war, this sixteenth quarterly installment of *On His Majesty's Service* follows the pattern used since December, 1939, in presenting the latest news of McGill men and women in the Armed Forces and in other branches of wartime service. For the items printed below we are indebted, as in the past, to many contributors, to all of whom we once more express our thanks and appreciation. We are particularly indebted for information to the McGill Contingent, C.O.T.C., No. 5 Squadron, University Air Training Corps, R.C.A.F., the Faculties of the University, and to those officers and men of the Armed Forces, or their next of kin, who, by mail, or by telephone, have notified the Graduates' Society of promotions, honours and awards, or Active Service appointments. We cordially invite further information of this nature and would also appreciate the correction of any errors noted in the items below. Please address such correspondence to

THE McGILL NEWS,
3466 University Street,
Montreal.

In view of new postal regulations restricting the forwarding of magazines from private addresses, it is now more than ever essential that the full addresses of McGill men on active service overseas should be recorded in our mailing files.

Following the system used now for several issues, we have added dates to many of the notices published in this installment. Precise dates, when given, need no further explanation; general dates, such as "July, 1943," are used to indicate merely when the information reached us, or when the news contained in the item was known to be valid.

In the preparation of this Section, all items are written to conform with the requirements of the Press Censors for Canada. The general service notices below contain information received in the period April 15 to August 15, 1943, less those items published as a supplementary list in our Summer issue. The Casualty List and the notices of Honours and Awards cover the period from April 25 to August 25, 1943. A supplementary list of general service items received too late for classification in this issue will be found at the end of this section.

Casualties

WE deeply regret to record the following casualties, reported in the period from April 25 to August 25, 1943.

Killed in Air Operations

Schnebly, 1st Lieut. Clarence Dexter (Eng., 1930-'32), United States Army Air Corps, formerly of the Royal Canadian Air Force, while serving as Pilot of a Flying Fortress in an attack on German territory, May 21, 1943. Lieut. Schnebly was the only son of Mr. and Mrs. C. D. Schnebly, 124 Brock Avenue, North, Montreal West, P.Q., and is survived also by his wife, the former Ruth Kuhlman, of Spokane, Washington, U.S.A.

Killed in Flying Accident

Allan, W02 Charles Needham (Sci., 1936-'40), Royal Canadian Air Force, killed in a Flying Accident at Gander, Newfoundland, May 8, 1943. Warrant Officer Allan was the only son of Mr. and Mrs. C. F. Allan, 1132 Graham Boulevard, Town of Mount Royal, P.Q.

Cameron, Flight Lieut. Robert Joel (B.Com., '27), Royal Canadian Air Force, near Clark's Crossing, Saskatchewan, May 30, 1943. Flight Lieut. Cameron was a son of Mr. and Mrs. R. G. Cameron, 143 MacLaren Street, Ottawa, and is survived also by his wife, Dorothea Sands Cameron, 435 Glencairn Avenue, Toronto.

A new page in history . . .

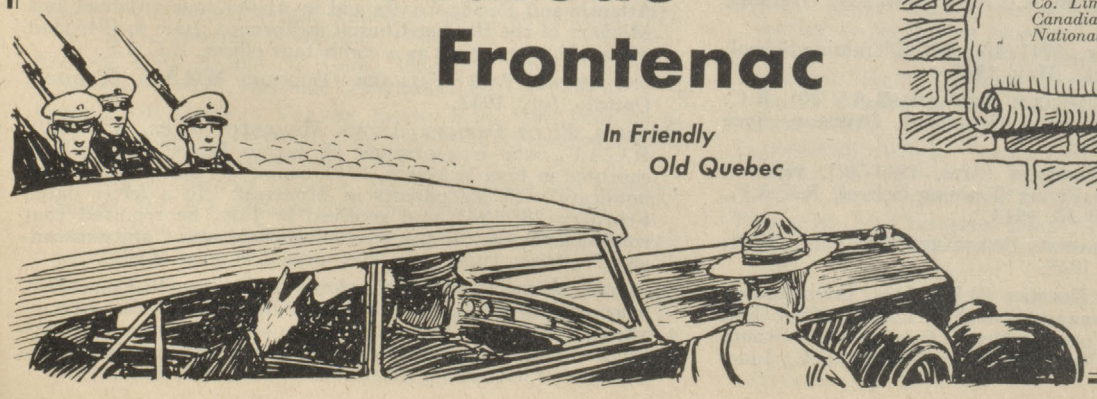

A new invitation to Quebec

As the meeting place of world leaders, a new chapter has been added to the annals of Old Quebec and the Chateau Frontenac. Perhaps you have been planning a restful change from your wartime duties. Autumn is a lovely time to visit the Chateau Frontenac whose doors are once again open to its many patrons, old and new. Special rates for visits of two weeks or longer, European plan, or from $8 a day, American plan.

Confirmation of reservations should be obtained from Hotel Manager.

Wolvin, Cadet Donald Faro (Science), R.C.N.V.R., May 7, 1943.

University Air Training Corps, R.C.A.F.

THE following undergraduates, members of No. 5 (McGill University) Squadron, University Air Training Corps, have been struck off the strength on transfer to Active Duty in the Royal Canadian Air Force. All were posted on the dates shown to No. 5 Manning Depot, R.C.A.F., Lachine, P.Q., unless otherwise noted.

Argue, AC2 Thomas A. (Engineering), to No. 13 Recruiting Centre, R.C.A.F., Montreal, May 6, 1943.

Armstrong, AC2 Douglas L. (Engineering), June 16, 1943.

Bailey, AC2 Edward E. (Engineering), to No. 13 Recruiting Centre, R.C.A.F., Montreal, May 11, 1943.

Beaton, AC2 John Wallace (Commerce), to No. 13 Recruiting Centre, R.C.A.F., Montreal, May 27, 1943.

Bentham, AC2 James Mallory (Engineering), June 17, 1943.

Clarke, AC2 Walter T. (Science), to No. 2 Manning Depot, R.C.A.F., Brandon, Man., May 26, 1943.

Coates, AC2 Donald Francis (Engineering), June 15, 1943.

Futterer, AC2 Edward (Engineering), June 17, 1943.

Gravel, AC2 Jean J. O. (Science), to No. 2 Manning Depot, R.C.A.F., Brandon, Man., May 26, 1943.

Grimaldi, AC2 Anthony E. (Commerce), to No. 13 Recruiting Centre, R.C.A.F., Montreal, May 27, 1943.

Helynck, AC2 Dan E. (Science), to No. 13 Recruiting Centre, R.C.A.F., Montreal, June 2, 1943.

Holland, AC2 George H. (Science), to R.C.A.F. Detachment, Saint John, N.B., May 24, 1943.

Howard, AC2 Kenneth S. (Arts), June 1, 1943.

Johnson, AC2 Frederick O. (Commerce), to No. 13 Recruiting Centre, Montreal, June 23, 1943.

Kemp, AC2 Robert G. (Engineering), to No. 13 Recruiting Centre, R.C.A.F., Montreal, June 2, 1943.

Leslie, AC2 William T. (Architecture), to No. 13 Recruiting Centre, R.C.A.F., Montreal, May 11, 1943.

Love, AC2 Bartlett G. (Science), to No. 15 Recruiting Centre, Moncton, N.B., July 16, 1943.

Macdonald, AC2 Ian Stanley (Engineering), June 13, 1943.

MacEwan, AC2 Douglas W. (Science), June 1, 1943.

Meek, AC2 Robert George (Engineering), June 15, 1943.

Mitchell, AC2 Herbert Eustace (Science), June 1, 1943.

Moore, AC2 Stephen Robert (Engineering), June 17, 1943.

Murray, AC2 Charles S. (Commerce), to No. 13 Recruiting Centre, R.C.A.F., Montreal, May 26, 1943.

Poole, AC2 Ross Alden (Engineering), June 20, 1943.

Routledge, AC2 Ralph Frederick (Engineering), June 15, 1943.

Smith, AC2 Lawrence A. P. (Science), to No. 13 Recruiting Centre, R.C.A.F., Montreal, May 26, 1943.

Smith, AC2 Roger W. (Engineering), to No. 13 Recruiting Centre, R.C.A.F., Montreal, May 11, 1943.

Stewart, AC2 Robert Chesley Tait (Engineering), to No. 15 Recruiting Centre, Moncton, N.B., June 21, 1943.

Stewart, AC2 William Lester (Engineering), June 13, 1943.

Townson, AC2 Arthur (Science), to No. 13 Recruiting Centre, R.C.A.F., Montreal, June 10, 1943.

Woodcock, AC2 John George Nelson (Engineering), to No. 2 Manning Depot, R.C.A.F., Brandon, Man., May 26, 1943.

Zalkind, AC2 Louis (Engineering), to No. 13 Recruiting Centre, R.C.A.F., Montreal, May 11, 1943.

Graduates, May 26, 1943

THE following, who graduated at the University Convocation, May 26, 1943, were "On Active Service" at that time. Particulars of their appointments are given below, so far as these are known.

Anderson, James Douglas (Engineering), Prob. Sub-Lieut (E), R.C.N.V.R.

Baker, Maxwell Clifford (Engineering) Pilot Officer, R.C.A.F.

Bardsley, Leonard Walter (Engineering), 2nd Lieut., R.C.O.C.

Berry, Arthur Herbert (Engineering), Sub-Lieut. (E), R.C.N.V.R., Halifax.

Booth, James (Engineering), R.C.A.F.

Chauvin, John Cecil (Engineering), Sub-Lieut. (E), R.C.N.V.R. (Returned to McGill to complete studies for degree after long Active Service, R.C.N.V.R.)

Cliffe, Bruce Frederick (Agriculture), 2nd Lieut, R.C.A.

Compton, Neil Marriott (Arts), Cadet, Can. Army.

Coote, Alexander Harcus (Engineering), Sub-Lieut. (E), R.C.N.V.R., Halifax.

Corse, Wayne York (Engineering), Training for aircrew, U.S. Army Air Corps.

Crerar, Malcolm Broder (Engineering), Lieut., R.C.O.C. (Returned from service with the Active Army to complete studies for degree).

Cross, Harold Morrey (Engineering) Prov. 2nd Lieut., R.C.E.

Cruse, Clement (Engineering), Sub-Lieut. (E), R.C.N.V.R., with seniority from June 8, 1942.

Damecour, Charles (Engineering), 2nd Lieut., R.C.O.C.

Edmison, Ralph Staples (Dentistry), Lieut., C.D.C.

Fitzpatrick, Louis Fairlie (Engineering), Prov. 2nd Lieut., R.C.E.

Freeman, John Edward (Engineering), Sub-Lieut. (E), R.C.N.V.R., Halifax, N.S.

Freeman, Paul Ora (Engineering) 2nd Lieut., R.C.E.

Fry, Roderick Milton (Engineering), 2nd Lieut., R.C.O.C.

Gillon, William Stanley (Engineering), Pilot Officer, R.C.A.F. Aeronautical Engineering Branch, Montreal.

Grant, Ernest Allnutt (Agriculture), 2nd Lieut., R.C.A., Brandon, Man.

Hendrie, John Strathearn (Commerce), Active Army.

Henning, Fred Kenneth (Engineering), 2nd Lieut., R.C.O.C.

Hobson, William (Engineering), Sub-Lieut., R.C.N.V.R.

Irwin, John Robert (Engineering), Prob. Sub-Lieut. (E), R.C.N.V.R.

Jackson, George Edward Merville (Engineering).

Kennedy, Lowell Keith (Engineering), R.C.A.F., Aeronautical Engineering Branch.

Leigh-Smith Kenneth (Engineering), Electrical Sub-Lieut., R.C.N.V.R., training in England.

Lochhead Douglas Grant (Arts), Cadet, R.C.A.

Lowe, Stanley Cathcart (Engineering), Sub-Lieut. (E), R.C.N.V.R., Halifax.

McKimmie, George Bruce (Engineering), Electrical Sub-Lieut., R.C.N.V.R., training in Toronto.

Mainguy, Robert Edgeworth (Engineering), Prob. Sub-Lieut. (E), R.C.N.V.R.

Melanson, Richard Edgar (Agriculture), 2nd Lieut., R.C.A.

Mercer, Ross Malcolm (Arts), AC2, R.C.A.F.

Miller, Zavie, (Engineering), 2nd Lieut., R.C.O.C. (Returned to McGill to obtain degree after service in Active Army).

Montgomery, Edward Wilford (Engineering), Prob. Sub-Lieut. (E), R.C.N.V.R.

Mountford, Keith William (Science), Active Army.

Norton, Harold Arthur (Engineering), Sub-Lieut. (E), R.C.N.V.R., Halifax.

Orr, Robert Rice (Agriculture), 2nd Lieut., Can. Armoured Corps.

Ouimet, Paul A. (Law), Prob. Sub-Lieut., R.C.N.V.R.

Pitts, Gordon Marshall (Arts), Cadet, R.C.A.

Popovich, Maxim (Science), Active Army.

Power, John Kevin (Commerce), Prob. Paymaster Sub-Lieut., R.C.N.V.R.

Proudfoot, Frederick Gordon (Agriculture), 2nd Lieut., R.C.A., Shilo, Manitoba.

Ransom, George Edgar (Engineering), Lieut., R.C.O.C., Barriefield, Ont.

Richer, Jean Hebert (Engineering), Prob. Sub-Lieut. (E), R.C.N.V.R.

Solkin, Wolf William (Arts), Lieut., R.C.A.

Stacey, Cooper Harry (Science), 2nd Lieut., R.C.A., Brandon, Manitoba.

Steen, Allan John (Agriculture), 2nd Lieut., R.C.A.

Strong, Norval Morrison (Engineering), Prov. 2nd Lieut., R.C.E.

Tetrault, Robert (Engineering), Electrical Sub-Lieut., R.C.N.V.R., training in England.

Watson, John Howard (Arts), Cadet, R.C.A.

Weaver, Alan Clyde Q. (Engineering), Pilot Officer, R.C.A.F.

Wilson, Ronald Spurgeon (Engineering), Sub-Lieut. (E), R.C.N.V.R., Halifax.

Wishart, Gerald Anderson (Engineering), Pilot Officer, R.C.A.F.

Wolever, Frank Day (Engineering), Prob. Sub-Lieut. (E), R.C.N.V.R.

Wright, Gordon William (Engineering), Electrical Sub-Lieut., R.C.N.V.R., training in England.

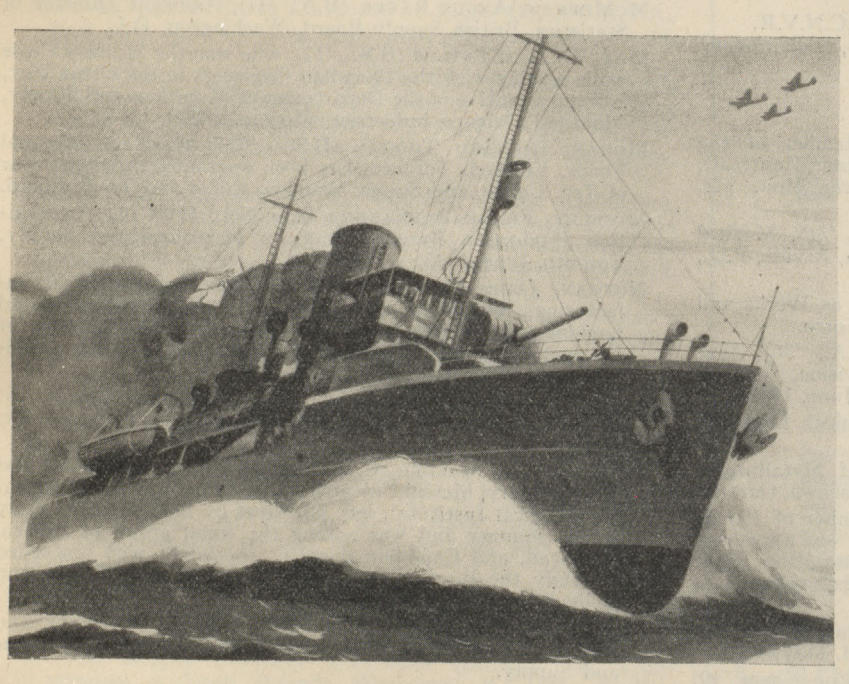

Wright, Lloyd James (Science), AC2, R.C.A.F.

Women's Services

Davis, Isabel Margaret (Arts), Probationary Wren, W.R.C.N.S.

Dawson, Mary Christabel (Arts), Probationary Wren, W.R.C.N.S.

War Uses FOR LINOLEUM Include

CORVETTES
AIR FORCE SCHOOLS
TRAINING and ADMINISTRATIVE ESTABLISHMENTS
MUNITION PLANTS
HOSPITALS

Where the going is tough, where the traffic is heavy, there you'll find Dominion Battleship Linoleum. Dependable, economical, easy to clean and easy on the feet.

MONTREAL

DOMINION *Battleship* LINOLEUM

Enlistments Reported Since Convocation

AYOUB, RAYMOND (Science), Active Can. Army.

BACKER, PROVISIONAL 2ND LIEUT. GEORGE ERNEST (Engineering), R.C.O.C., Active Army, Grand'Mere, P.Q.

BLAKELY, NELSON WESLEY (Engineering), 2nd Lieut., R.C.O.C., Chilliwack, B.C.

BLANCHARD, DONALD ANTHONY (Arts), U.S. Army.

BRAZER, HARVEY ELLIOT (Commerce), Active Can. Army.

BURGESS, BASIL ARTHUR (Engineering), Probationary Sub-Lieut. (E), R.C.N.V.R.

CUNNINGTON, FRANCIS ALBERT (Engineering), Provisional 2nd Lieut., Active Army.

CYR, WILLIAM HENRY (Engineering), 2nd Lieut., R.C.O.C.

EIDINGER, STANLEY LOUIS (Arts), Active Army.

FITZPATRICK, LOUIS FAIRLIE (Engineering), Active Army.

FRASER, WILLARD SCOTT (Agriculture), Active Army.

FREEMAN, JOHN E. (Engineering), R.C.N.V.R.,

HOBSON, WILLIAM (Engineering), R.C.N.V.R.

HYNDMAN, PATRICK ROBERT (Commerce), Active Army.

JENKINS, WILLIAM ANGUS (Agriculture), Officers' Training Centre, Three Rivers, P.Q.

LEVINE, ARTHUR H. (Science), Active Army.

LOWE, STANLEY CATHCART (Engineering), R.C.N.V.R.

MCCOLM, GEORGE TOZER (Arts), Active Army.

MCKENNA, JOHN BRUCE (Science), R.C.A.F.

MITCHELL, ROBERT ALLAN (Commerce), AC2, R.C.A.F.

PERRAULT, CHARLES HUBERT (Engineering), 2nd Lieut., R.C.O.C.

POPOVICH, CADET MAXIM (Science), Active Army.

RITCHIE, ROSS ALFRED (Engineering), 2nd Lieut., Active Army.

ROSSY, MICHAEL (Commerce), Active Army.

SMILEY, CADET ROBERT MILLER (Engineering), Active Army.

STEWART, 2ND LIEUT. WILLIAM TINLING (B.A., '40; B.C.L., '43), McGill C.O.T.C., to Active Army, July 13, 1943.

TROSSMAN, MARSHALL (Arts), Active Army.

VOYVODIC, LOUIS (Science), Active Army.

WEIN, HARRY GARRICK (Engineering), Provisional 2nd Lieut., R.C.E.

WEINER, MERVYN L. (Commerce), Active Army.

WONG, WILLIAM GEORGE GAR (Engineering), R.C.N.V.R.

WRIGHT, CADET GORDON WILLIAM (Engineering), Probationary Sub-Lieut. (E), R.C.N.V.R., Overseas.

Civilian Service

ABBOTT, DOUGLAS CHARLES (B.C.L., '21), Member of the Dominion Parliament for St. Antoine-Westmount (Montreal), was appointed Parliamentary Assistant to the Hon. Mr. Ilsley, Minister of Finance, April, 1943.

ALEXANDER, JOHN DUNCAN FRANKLYN (M.D., '34), Medical Supt., Arvida Works, Aluminum Co. of Canada, Arvida, P.Q., May, 1943.

ALFORD, JOHN NEWTON (B.Sc., '11), is serving as Works and Buildings Officer of the Royal Canadian Air Force.

BLOOMFIELD, ARTHUR IRWING (B.A., '35; M.A., '36), War Economic Research, Foreign Research Division, Federal Reserve Bank of New York, New York, N.Y., June, 1943.

BRETT, JOHN EDWARD (B.Eng., '42), Mechanical Engineer, United Shipyards, Limited, Montreal.

CAIRNS, WILLIAM MORRIS (B.Eng., '40), Chief Metallurgist, Munitions Division, The Pedlar People, Ltd., Oshawa, Ontario.

CLAXTON, BROOKE, D.C.M. (B.C.L., '21), Member of Parliament for St. Lawrence-St. George, Montreal, was appointed Parliamentary Secretary to the Prime Minister, the Right Honourable W. L. Mackenzie King, in the latter's capacity as President of the Privy Council, May 7, 1943.

CLOSE, JOHN FREDERICK (B.Com., '33), Director, Ration Administration, Wartime Prices and Trade Board, May, 1943.

DE TONNANCOUR, LOUIS CHARLES GODEFROY (B.Eng. Chem.,'40) Plant Supervisor, Can. Resins and Chemicals, Ltd., Shawinigan Falls, P.Q.

DOUGLAS, GEORGE VIBERT (B.Sc., '20; M.Sc., '21), Professor of Geology, Dalhousie University, who won the Military Cross while serving with the Northumberland Fusiliers in the Great War, is Consultant on War Minerals to the Government of Nova Scotia and is a Member of the Veterans' Committee on War Inventions and on Defence of the Atlantic Coast.

FINLEY, JOHN A. (M.D., '37), Asst. Medical Supt., Arvida Works, Aluminum Co. of Canada, Arvida, P.Q., May, 1943.

GILES, B. H. DRUMMOND (B.Sc., '27), to be Special Assistant to the Co-Ordinator of Production, Dept. of Munitions and Supply with Headquarters in Montreal, June, 1943.

GITTERMAN, SAMUEL A. (B.Arch., '35), employed, Dept. of Finance, National Housing Administration, Land Planning Division, in research on Post-War Town-Planning.

GLASSCO, JOHN GRANT (B.Com., '25; C.A., '27), has been appointed Controller of de Havilland Aircraft of Canada, Ltd., by the Department of Munitions and Supply to speed the production of Mosquito Bombers in Canada.

GORDON, CRAWFORD (B.Com., '36), to be Special Assistant to the Co-ordinator of Production, Dept. of Munitions and Supply, with Headquarters in Toronto, June, 1943.

HOLMES, MRS. MILDRED (Mildred Richards, Social Service Diploma, '25), Lady Divisional Supt., St. John Ambulance Brigade, Halifax, N.S., has been appointed Supervisor of Female Personnel, National Selective Service (Dept. of Nat. Defence), and will be stationed in Saint John, N.B.

HUDSON, MARY AGNES (B.A., '40), is employed by J. L. E. Price and Company, Ltd., engaged in carry out war contracts, Arvida, P.Q.

JOHNSON, DAVID M. (B.A. Sc., '23), Canadian Dept. of External Affairs, Canada House, London, England, May, 1943.

KER, FREDERICK INNES (B.Sc., '09), General Chairman, National Press Committee on War Finance.

LEGATE, MRS. DAVID M. (Marjorie Matthews, B.A., '27), is Assistant Director of Civilian Relief, Clothing and Work Room, Can. Red Cross Society, London, England.

MACFARLANE, JOSEPH HARRISON (B.A., '17), who won the Distinguished Conduct Medal and Bar while serving with a Canadian Field Ambulance in the Great War, is Resident Representative, Allied War Supplies Corporation, Shell Filling Plant, Bouchard, P.Q.

MACKENZIE, MAXWELL H. W. (B.Com., '28), Deputy of the Director, Wartime Prices and Trade Board, Ottawa.

MACMILLAN, HON. CYRUS (B.A., '00; M.A., '03, Dean of the Faculty of Arts and Science, McGill University), Member of Parliament for Queen's, Prince Edward Island, was appointed Parliamentary Assistant to the Minister of National Defence for Air (Hon. C. G. Power), May 6, 1943.

MCMORRAN, ANGUS BAKER (B.A., '37), Assistant Director of Statistics, British Supply Board, Washington, D.C.

MAY, WILLIAM TAYLOR (B.Sc., '12), who won the Military Cross while serving with the Canadian Engineers in the Great War, is Representative of the Department of Munitions and Supply, Montreal Defence Industries, Montreal, P.Q.

MOHAN, RICHARD THOMAS (B.Sc., '08), President, General Foods, Limited, Toronto, has been appointed Administrator of Tea, Coffee, and Spices, Wartime Prices and Trade Board.

MOSELEY, FRANK ALEXANDER (App. Sci., 1908-'11), Ammunition Production Branch, Dept. of Munitions and Supply, Toronto, June, 1943.

NOTMAN, JAMES GEOFFREY (B.Sc., '22), Manager of Manufacturing, Dominion Engineering Works, Longueuil and Lachine, P.Q., was appointed Assistant Co-ordinator of Production, Dept. of Munitions and Supply, with Headquarters in Montreal, May, 1943.

OWEN, FRANCIS JAMES (B.Sc., '27), Inspecting Officer, Inspection Board of the United Kingdom and Canada, New York, N.Y.

PENFIELD, DR. WILDER, C.M.G. (Professor of Neurology and Neurosurgery, McGill University, and Director of the Montreal Neurological Institute), left Montreal by bomber plane early in the summer and was among the small group of British, American, and Canadian scientific specialists who proceeded to study the surgical techniques in use in the military and civilian hospitals of Russia.

PERLEY, ERNEST CLINT (B.Sc., '28), Director of Production, Automotive and Tank Production Branch, Dept. of Munitions and Supply.

PICK, ALFRED JOHN (B.A., '36; M.A., '37; B.C.L., '40), assumed duties as Secretary to the Office of Mr. Justice T. C. Davis, Canadian High Commissioner to Australia, May, 1943.

SAVAGE, MRS. EDWARD BALDWIN (Marion Creelman, Arts, 1904-'08), who has retired after four years' service as President, Montreal Soldiers' Wives League, is a Director, War Services Co-ordinating Committee, and a Member, Women's Advisory Committee, Wartime Prices and Trade Board.

SAVAGE, LILIAS MARGARET (B.A., '37), is on the staff of the Australian Legation, Washington, D.C.

SAVAGE, MARION CREELMAN (B.Sc., '42), is War Research Assistant to Dr. E. G. D. Murray, Dept. of Bacteriology, McGill University.

SMITH, BRITON OLIVER (B.Sc., Mech., '15), Engineer (Machinery, Scientific), Gibbs and Company, Inc., Naval Architects and Marine Engineers, New York, N.Y.

STIKEMAN, HARRY HEWARD (B.A., '35; B.C.L., '38), Counsel and Executive Assistant, Income Tax Division, Dept. of National Revenue, Ottawa.

WEST, EINAR (Ph.D., '42), Research Chemist, Hercules Powder Company, Wilmington, Delaware, U.S.A.

WISDOM, CHARLES STUART COTTON (B.Com., '35), Divisional Accountant (Small Arms Ammunition Plants), Defence Industries, Limited.

YOUNG, ALEXANDER ARTHUR (B.Sc., '10), Director, Works and Buildings, Navy Department, Dept. of National Defence, Ottawa.

YUILL, RUSSEL (B.Sc., '15), was promoted to Assistant Director-General, Naval Shipbuilding Branch, Dept. of Munitions and Supply, August 9, 1943.

Supplementary List

Sicilian Campaign

PRESS despatches in recent weeks have reported the following McGill men among those taking part in the campaign of the Canadian Forces in Sicily. The dates given are those on which the press notices appeared. In accordance with the regulations of the Press Censors for Canada, the units with which these officers and men were serving are identified when the units were named in the despatches quoted.

BARCLAY, SUB-LIEUT. IAN ANDREW (Arts, 1939-'41), R.C.N.V.R. who took part in the landing operations in North Africa in November, 1942, was a boat officer during the landing operations in Sicily in July, 1943. So reported, August 19, 1943.

BEECHER, LIEUT. KEITH DAVIDSON (B.Eng., '41), R.C.N.V.R., took part in the landing operations. So reported, July 14, 1943.

BRAIN, CAPT. DONALD (Arts, 1936-'39), Princess Patricia's Canadian Light Infantry, took part in the heavy fighting during the attack on Leonforte. So reported, August 14, 1943.

CAYFORD, CAPT. RALPH BARRETT (Eng., 1938-'41), Can. Army, July 10, 1943.

COHEN, CAPT. ARTHUR (M.D., '40), No. 9 Field Ambulance, R.C.A.M.C., worked a 36-hour stretch with Major Young in the surgical care at a hastily prepared advance station of approximately one hundred United Nations' and enemy wounded. So reported, August 12, 1943.

COLEMAN, CAPT. ROWAN CORRY (B.A., '36), Princess Patricia's Canadian Light Infantry, took part in the attack on a commanding hill at Agira. So reported, July 25, 1943.

DRENNAN, SUB-LIEUT. ROBERT MELVILLE (Arts, 1940-'41), R.C.N.V.R., took part in the shelling and capture of Pozzalo, Sicily. So reported, July 28, 1943.

HART, CAPT. PAUL (Past Student in Commerce), serving with the Royal 22nd Regiment, August 5, 1943.

LEWIS, LIEUT. DAVID JAMES (B.A., '41), R.C.N.V.R., attached to a Landing Craft Flotilla, Royal Navy, took part in the landing operations on July 10. So reported, July 29, 1943.

MCDOUGALL, LIEUT. COLIN MALCOLM (B.A., '40), Princess Patricia's Canadian Light Infantry, took part in the street-fighting in Leonforte and in the operations leading to the capture of Piazza Armerina. So reported, July 25, 1943.

MCGEE, MAJOR LEONARD DAVIDSON (B.Eng., '33), Commanding a Tank Brigade Workshop, R.C.O.C., Sicilian Theatre of Operations, August 7, 1943.

ROBERTSON, MAJOR HAROLD ROCKE (B.Sc., '32; M.D., '36), in command, a field surgical unit, from the staff of No. 9 Field Ambulance, R.C.A.M.C. So reported, August 12, 1943.

SHAPIRO, LIONEL S. B. (B.A., '29; Grad. Studies, 1929-'30), Accredited War Correspondent, reporting for the *Montreal Gazette*, July 15, 1943.

our Business

"Our business is to look after those who are often overlooked in social planning—the widows and orphans of men who had the courage to save for their own and their families' sake. Higher taxation and lower interest rates mean smaller returns from savings. Necessary in wartime, these hit hard the inarticulate people—widows and orphans; they have no union to protect them and no voice to speak for them. The Trust Company spends its time and performs its services to help them live."

From the President's address at our Forty-third Annual Meeting.

THE ROYAL TRUST COMPANY

CORPORATE SECURITY — PERSONAL SERVICE

Offices across Canada from Coast to Coast

Scope for ENGINEERS in all Categories

At CANCAR, we build rolling stock, street cars, buses . . . and aircraft . . . meaning countless opportunities for engineering graduates. Plan your engineering future NOW. Think in terms of this huge company, now in all-out war production but ready on the day of victory to swing into full-scale peacetime production.

Canadian Car & Foundry Company Limited

MONTREAL FORT WILLIAM BRANTFORD AMHERST

SPARLING, MAJOR DOUGLAS W. (Assistant Demonstrator, Faculty of Medicine, McGill University), in command, a field dressing station, from the staff of No. 9 Field Ambulance, R.C.A.M.C. So reported, August 12, 1943.

STURSBERG, ARTHUR LEWIS PETER (Arts, 1930-'31; Science 1931-'32, serving in Sicily as a reporter for the Canadian Broadcasting Corporation.

SUTHERLAND, MAJOR JAMES ROBERT GORDON (B.S.A., '32), Princess Patricia's Canadian Light Infantry, took a notable part while in command of a company in the operations of the regiment at Leonforte, July, 1943. (Subsequently reported wounded), August, 1943.

WRIGHT, LIEUT. (E) AUSTIN MEADE (B.Eng., '41), R.C.N.V.R., took part in the landing operations in July. So reported, August 19, 1943.

YOUNG, MAJOR DONALD ALEXANDER (M.D., '35), Second-in-Command, No. 9 Field Ambulance, R.C.A.M.C., which landed at Pachino at the opening of the offensive, accompanied the day by day advance of the Canadian Forces, and attended, as circumstances required, to Canadian, British, American, and enemy wounded. So reported, August 12, 1943.

General Service

THE following items have been received too late for classification in the regular divisions of this section.

Navy

BRUCE, WREN A. JOCELYN (B.A., '36; B.L.S., '39), is serving in the W.R.C.N.S. at Galt, Ont.

CHENOWETH, LIEUT. DAVID MACPHERSON (B.A., '38), was listed by Naval Service Headquarters as an officer serving on the new destroyer, H.M.C.S. *Huron*, August 19, 1943.

DOUGLAS, WREN JEAN (B.A., '41), is serving in the W.R.C.N.S. at H.M.C.S. *Montreal*, Montreal, P.Q., August, 1943.

GALE, CHARLES GORDON (B.Com., '39), was among the candidates who have completed courses and have been appointed Probationary Paymaster Sub-Lieutenants, R.C.N.V.R., August, 1943.

HUSHION, WILLIAM KINGSLEY (B.Com., '38), graduated recently from a West Coast Training Station and received his commission as Paymaster Sub-Lieut., R.C.N.V.R., August, 1943.

MCCALLUM, LIEUT. RESIDE (B.Eng., '39), R.C.N.V.R., who served for a time at the U.S. Naval Operating Base, Guantanamo Bay, Cuba, is now serving in a corvette of the Royal Canadian Navy, based in Newfoundland, August, 1943.

MCMURTRY, ARTHUR SHEPHERD (B.A., '33; B.C.L., '36), was granted a commission as Paymaster Sub-Lieut., R.C.N.V.R., on graduating recently from a West Coast Training Station, August, 1943.

MILNE, PROBATIONARY SUB-LIEUT. MARGERY JEAN (B.A.,'42), Women's Royal Can. Naval Service, recently completed an officers' training course in Ottawa, August, 1943.

OPPE, LIEUT. JAMES STEPHEN (Arts, 1929-'30), is now serving in the new destroyer, H.M.C.S. *Huron*, according to the announcement by Naval Service Headquarters, August 19, 1943.

PIPER, LIEUT. EDWARD HENRY SYLVESTER (B.A., '36; B.C.L., '39), R.C.N.V.R., has returned to Canada after three years' service attached to the Royal Navy. As an officer of an armed merchant cruiser, he saw service in the Middle East, Madagascar, the Indian Ocean, and Singapore, having previously served in the area of the Straits of Dover and the English Channel.

Air Force

BACON, PILOT OFFICER GEORGE STEWART A. (B.A., '30), R.C.A.F. Headquarters, Ottawa, August, 1943.

BAKER, PILOT OFFICER KENNETH GORDON (B.A., '32; M.A.,'33; B.C.L., '36), Administrative Branch, R.C.A.F., Air Force Headquarters, Ottawa, August, 1943.

BEAMISH, DR. OSWALD F. (M.D., '21), recently joined the R.C.A.F., Medical Branch, and is in training in Toronto, August, 1943.

BILLINGSLEY, PILOT OFFICER LAWRENCE WINSTON (B.Sc. '32; M.Sc., '33; Ph.D., '37), is serving as a Medical Associate in the Medical Branch, R.C.A.F., and is Officer Commanding, No. 3 Nutritional Laboratory, R.C.A.F., Manitoba Medical College, Winnipeg, June, 1943.

BOOTH, PILOT OFFICER JAMES (B.Eng., '43), No. 1 Central Navigation School, R.C.A.F., Rivers, Manitoba, August, 1943.

CORBETT, VAUGHAN BOWERMAN, D.F.C. (B.C.L., '36), was promoted to Wing Commander, R.C.A.F., June 1, 1943. (*Canada Gazette*, August 14, 1943).

GIFFORD, FLYING OFFICER CUTHBERT GORHAM (B.A., '39; Theology, 1940-'42), Instructor, No. 9 Air Observers' School, R.C.A.F., St. Johns, P.Q., August, 1943.

MACLEAN, PILOT OFFICER RODERICK WATSON (B.Com., '34), recently won his Wings and Commission at Uplands, Ontario, August, 1943.

NESBITT, ARTHUR DEANE, D.F.C. (B.Eng., '33), was promoted to Wing Commander, R.C.A.F., June 1, 1943. (*Canada Gazette*, August 14, 1943).

PICARD, FLYING OFFICER ROBERT I. C. (B.A., '31; M.A., '32), R.C.A.F. Headquarters, Ottawa, August, 1943.

ROBERTSON, PILOT OFFICER ALEXANDER MORRIS HENNING (Com. 1929-'31), R.C.A.F., a Prisoner of War in Germany, has been promoted to Flying Officer, with effect December 12, 1942. (*Canada Gazette*, July 10, 1943).

SCHULTZ, AC2 PAUL A. (Sci., 1942-'43), was struck off the strength, No. 5 (McGill University) Squadron, University Air Training Corps, on transfer to No. 5 Manning Depot, R.C.A.F., Lachine, P.Q., August 16, 1943.

THORNHILL, ASSISTANT SECTION OFFICER BERTHA ELEANOR EMMA (B.Sc., '36), led a class of 35 in the Officers' Training Course at No. 2 Composite Training School, R.C.A.F. (Women's Division), some weeks ago, August, 1943.

WESTMAN, FLYING OFFICER HERBERT (B.Eng., '39), was among the officers of the R.C.A.F. whose arrival overseas was reported in a press despatch, August 15, 1943.

Army

ALBERT, CADET HENRY LOUIS (Eng., 1942-'43), was struck off the strength, McGill Contingent, C.O.T.C., on enlistment in the Active Army, August 12, 1943.

BARNES, LIEUT. WILFRED L. (B.Com., '33), Victoria Rifles of Canada, Active Army, Camp Sussex, N.B., August, 1943.

BEATTIE, CAPT. HOWARD A. (M.D., '40), R.C.A.M.C., Overseas, August, 1943.

BERKOWITZ, 2ND LIEUT. SAUL MILTON (B.Arch., '39), R.C.E. Training Centre, Petawawa, August, 1943.

BIRKS, LIEUT. RICHARD SAVAGE (B.Sc., '40; M.D., '42), R.C.A.M.C., Overseas, August, 1942.

BURLAND, MAJOR GEORGE HAROLD, M.C. (B.Com., '20), Cameron Highlanders of Canada, to be Second-in-Command, a Battalion, Eastern Ontario Regiment, Overseas, May 16, 1943. (*Canada Gazette*, July 10, 1943).

CREELMAN, CAPT. DONALD WESLEY (B.Sc.]Agr.] '38), North Nova Scotia Highlanders, Overseas, August, 1943.

CROSS, COLONEL CARLETON ERNEST (B.A., '05; M.D., '09), formerly Commanding Officer, No. 1 Neurological Hospital, and later No. 1 General Hospital, R.C.A.M.C., Overseas, was among the officers who retired on reaching the Active Army age-limit, as announced by Headquarters, Military District No. 4, Montreal, August 24, 1943.

EMORY, CAPT. JAMES VERNON (B.Com., '38), has been promoted to Major, R.C.A., Overseas, August, 1943.

LOGAN, 2ND LIEUT. DAVID R. (B.A., '26), No. 3 R.C.A. Advanced Training Centre, Camp Shilo, Man., August, 1943.

MOORE, MAJOR WILLIAM H. (B.Sc., '27; M.Eng., '32), "B" Corps Signals, Reserve Army, Montreal, has reverted in rank to Lieut., to accept an appointment in the R.C.C.S., Canadian Army Overseas, August, 1943.

PATTERSON, MAJOR WILLIAM JOHN (M.D., '06), R.C.A.M.C., President of Medical Boards, Military District No. 4, Montreal, retired on reaching the Army age-limit, August, 1943.

PAYTON, CAPT. JOHN RUSSELL TALBOT (B.A., '32), National Defence Headquarters, Ottawa, August, 1943.

PICK, LIEUT. CHARLES ANSON (B.Sc., '40; M.D., '42), R.C.A.M.C., Active Army, attached H.Q., Military District No. 4, Montreal, August, 1943.

RANKIN, LIEUT.-COL. ALLAN COATS, C.M.G. (M.D., '04), Director of Hygiene, Can. Military Forces, will retire this autumn and will resume his civilian duties as Dean of Medicine, University of Alberta, August, 1943.

REID, SIGNALMAN EWART P. (B.A., '31), 3rd Divisional Signals, R.C.C.S., Reserve Army, Ottawa, August, 1943.

ROLLITT, LIEUT. JOHN B. (B.A., '31; M.A., '32), Duke of Connaught's Royal Canadian Hussars, Overseas, August, 1943.

STINSON, LIEUT. NORMAN COPLEY (B.Com., '42), is among the officers of the Royal Canadian Artillery whose arrival overseas has been reported, August, 1943.

SUTHERLAND, LIEUT.-COL. ROBERT HIRAM (M.D., '07), R.C. A.M.C., who served with distinction in the Great War and served in the present war in command of Military Hospitals in Halifax and Sydney, retired on reaching the Army age-limit and returned to his home in Pictou, N.S., August, 1943.

WATSON, CAPT. CYRIL JAMES (B.S.A., '21), was promoted to Major, University of Ottawa Contingent, C.O.T.C., Reserve Army, July, 1943.

WRIGHT, COL. ROBERT PERCY, C.M.G., D.S.O., V.D. (M.D., '08; Lecturer in Oto-Laryngology, McGill University), a veteran of the Great War and in the present war Commanding Officer, Fort Osborne Military Hospital, Winnipeg, has retired from the R.C.A.M.C., Active Army, on reaching the age-limit prescribed in recent regulations, August, 1943.

United States Forces

HENDEL, 1ST LIEUT. JAMES NORMAN (Arts, 1937-'39), U.S. Army Air Corps, has recently been promoted to Capt. at the Advanced Two-Engine Pilot School, Moody Field, Georgia, where he is an Instructor and Squadron Commander, August, 1943.

MCKEE, AVIATION CADET JAMES WILSON, JR. (B.Com., '42) U.S. Army Air Corps, has completed his basic training and has been posted to the Advanced Flying School at Columbus, Mississippi, August, 1943.

MURNEN, LIEUT. OWEN FREDERICK (D.D.S., '33), Dental Corps, U.S. Army, completed training at Carlisle, Pennsylvania, and was assigned to duty at Camp Miles Standish, Taunton, Mass., July, 1943.

Civilian Service

CROFT, CARMAN M. (B.Sc., '21), formerly Chief Executive Officer of the Dominion Shipping Priorities Committee, was appointed Director of Commercial Intelligence Service, Dept. of Trade and Commerce, Ottawa, June, 1943.

HENDERSON, KENNETH ARMSTRONG (B.Com., '25), formerly Deputy Chairman of the National War Finance Committee, was appointed Executive Chairman, to work in collaboration with G. F. Towers, General Chairman, August 16, 1943.

TOWERS, GRAHAM FORD (B.A., '19), Governor of the Bank of Canada, was appointed General Chairman of the National War Finance Committee, on the resignation of G. W. Spinney, President of the Bank of Montreal, August 16, 1943.

High School of Montreal

(*Continued from Page 14*)

with a blackboard and a dog-eared Xenophon. It was a costly science, and in cool retrospect, one can only applaud McGill's decision to withdraw. The School Commission had financial resources, and singleness of interest such as the University could not possess. Under its direction the High School was brought gradually into line with the general Provincial system. The full significance of this last change seems to have been missed by contemporaries. To-day we can see that it was a more serviceable and representative institution which resumed the honoured title, the High School of Montreal.

So much for the ascertainable facts; what may be said of those imponderables of school life, outlook; interest; spirit? Among the older boys, at least, the connexion with the University had been highly valued. They regarded themselves, a trifle romantically, as the heirs of James McGill. Extraordinary as this attachment may appear, it had the solid advantage of making them conscious of a great past, and more willing, therefore, of accepting the responsibilities of a greater future. The 'sixties and 'seventies saw Canada emerge. Already the spiritual foundations of Confederation had been laid by the schools and colleges,—not least among them, the High School of Montreal ([11]).

NOTES

(1) The High School, in its larger setting, has been very well discussed by the late Canon Rexford in the MCGILL NEWS, March, 1933. In collaboration with Dr. Gammell, Canon Rexford prepared an extensive history of the School in manuscript. I have freely employed it in writing this paper.

(2) Appendix VV. *Journals of the Legislative Assembly;* Canada 1844-1845.

(3) Bethune, J. *A Narrative of the Connection of Rev. John Bethune, D.D., with McGill College.* p.9.

(4) Bethune, J. *ibid.* p.10.

(5) *Governor's Minute Book;* July 14, 1843.

(6) No picture of the Bingham residence when it was occupied by the High School appears to exist. In 1845 and 1846 the property was much altered to accommodate Donegani's Hotel. In the opinion of M. E. Z. Massicotte the central facade remained unchanged and the resulting building may be seen in *Hochelaga Depicta*, 1846 ed. on p.22.

(7) *Montreal Witness;* July 16, 1849.

(8) See especially the addresses, "Duties of an Educated Young Man in British North America," and "History and Progress of Protestant Education in Lower Canada."

(9) *Le Collège Sainte Marie de Montréal: la fondation, le fondateur.* This admirable history, by Reverend Father Desjardins S.J., traces the College from its projection in 1842 to the death of Father Martin in 1886.

(10) Report of the High School Committee to Corporation, March, 1862.

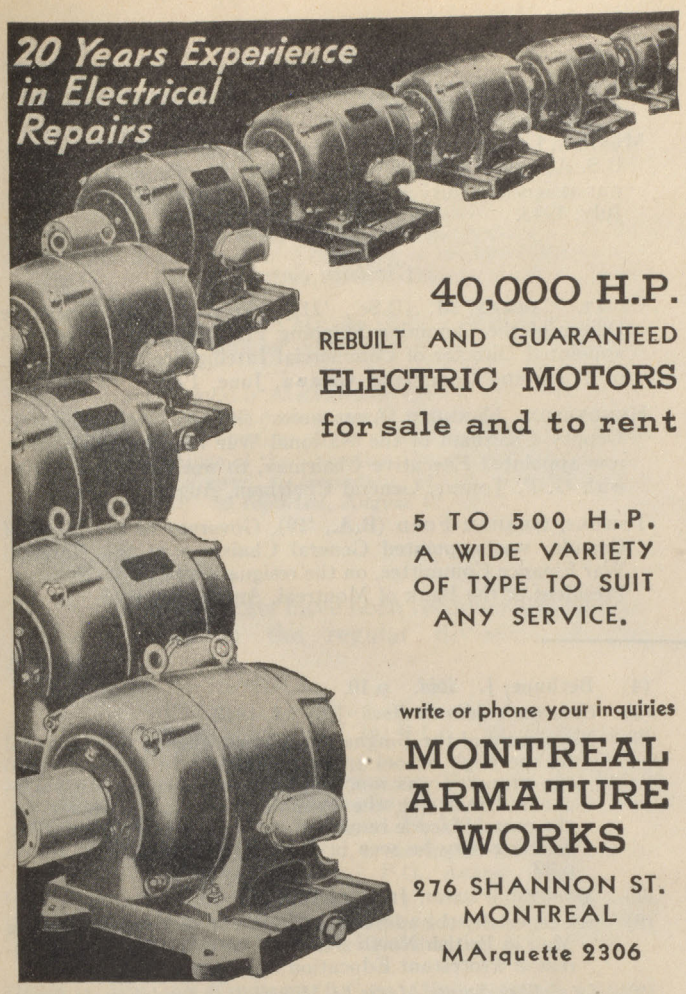

(11) I am indebted to Dr. W. D. Lighthall for many of these statements upon the outlook of the High School; likewise for the appraisals of the teachers. While Dr. Lighthall knew the School best in the 'seventies, nevertheless the traditions of an earlier day were still strong.

McGill Plans Law Extension

The law courses at McGill have been reorganized according to a recent announcement so as to give more prominence to public law in view of the greatly increased role government is playing in the economic and social life of the community. The basic concepts of government are being dealt with in an introductory course in public law, and a course on industrial law has been established. The course on constitutional law will be extended as will the course on international law, while the course on criminal law will be made to include a study of the causes of crime and its treatment, and the development of the law dealing with offences of a social and political nature.

Dr. Harry Starr Awarded Fellowship

A $1,000 fellowship for teaching and research in pathology tenable at McGill University has been awarded to Dr. Harry Starr who graduated in medicine last February under the new wartime accelerated program.

The Late Dr. Grant Fleming

(Continued from Page 16)

he had an extraordinary power of sifting out the non-essentials in an involved presentation and his counsel was direct and simple, never dogmatic. In all that he did he was himself—helpful, modest and without personal ambition. Never troubling to defend himself, he was fearless and courageous in championing a cause in which he believed regardless of personal consequences.

He enriched the world in which he lived and worked and his influence will remain for good. To those who had the privilege of knowing him more intimately he will always be remembered as a peerless friend, cheerful, loyal, sympathetic and charitable.

Dr. Purves Appointed to McGill

McGill University has been fortunate in securing the services of Dr. Clifford B. Purves, of the Massachusetts Institute of Technology, as E. B. Eddy, professor of Industrial and Cellulose Chemistry, to succeed Prof. Harold Hibbert who has retired. Dr. Purves ranks high among the organic chemists on this continent and has maintained close contact with industrial research, so will be admirably fitted to play an active part in the development of the Pulp and Paper Research Institute with the activities of which the Eddy professorship is intimately related.

Some Memories of John Macnaughton

(Continued from Page 21)

all men of strong and unusual personality and gifts, and their ideas, their modes of expression, their private peculiarities, their very physical presence and tones of voice, these are a part of McGill which none of us who worked with and under them will willingly allow to be forgotten. They were not men who could be "replaced."

I have said little here of the side of John Macnaughton that impressed many observers, Macnaughton the "tremendous companion," with his intense likes and dislikes, his fiery denunciations and impulsive loyalties, his oft-repeated definitions of Bismarck and others. I feel that a good many of these attributes have been so often stressed as to disturb the balance and make people forget how well adjusted he fundamentally was. He himself once shook his head over such a portrait and confessed ruefully that it seemed very close to caricature. The picture or legend, however, has been created and will not easily be done away; doubtless, there was some truth in it. What I have tried to add in this sketch is the image of John Macnaughton as I remember him, and always will—the figure of a kindly and gifted man who granted me his friendship.

Accelerated Course Proves Beneficial

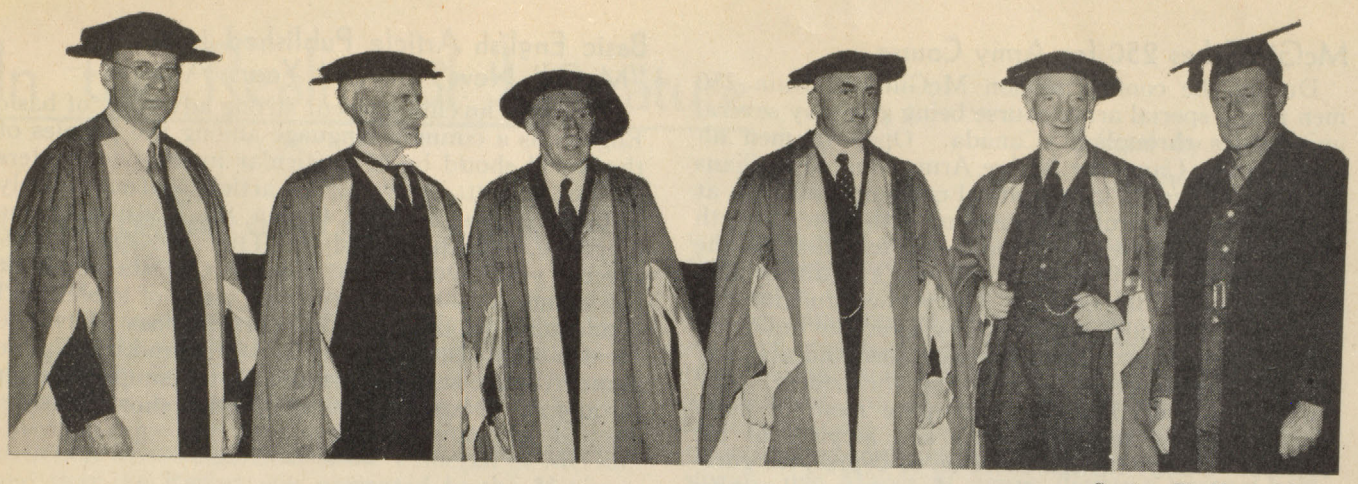

According to an announcement of Dr. W. H. Hatcher, director of the McGill summer school, about 35 students completed their degree work at the accelerated summer session this year. The summer school had a registration of 62 men and 30 women or a total of 92 as against registrations of 157 last year, the reduction being accounted for by the fact that only courses in chemistry, physics, psychology, and mathematics were given this year.

Class Reunion at Britannia

A reunion of a number of former classmates of McGill University and the United Theological College took place in April of this year at the home of Rev. Gordon F. Dangerfield, Britannia, Ottawa. Rev. Edwin B. Bugden, Ashton; Rev. W. H. Legrow, Fitzroy Harbor; Rev. E. C. Kellowoy, Carleton Place, and Rev. Kenneth B. MacMillan of Parkdale United Church, Ottawa, were present to meet Rev. H. Maxwell Dawe, B.D., now superintendent of missions for Newfoundland of the United Church of Canada. A feature of the meeting was the baptism of the infant son of Rev. and Mrs. Dangerfield, the ceremony being conducted by Rev. Edwin B. Bugden and the child given the name Vincent Gordon.

Course for Ecucational Officers Given

McGill University gave a course of instruction for educational officers of the Canadian Army, M.D. 4, during the summer.

Courtesy, The Montreal Star

Distinguished Recipients of Honorary Degrees at Spring Convocation. *Left to right:* Hon. J. L. Ilsley, Minister of Finance, Ottawa; Huntly R. Drummond, former president of the Bank of Montreal and a senior governor of the University; Alexander Loveday, director of the economic, finance and transit section of the League of Nations; Hon. J. A. Mathewson, Provincial Treasurer; Sir William Beveridge; Lieut.-Col. J. M. Morris, M.C., V.D., officer commanding the McGill C.O.T.C.

Dr. Penfield Visits Russia

Dr. Wilder G. Penfield, head of the Montreal Neurological Institute was one of a party of six internationally famous scientists invited to Soviet Russia on a medical mission to study new methods of treatment of war casualties. Dr. Penfield was the only Canadian so honoured and it is reported that his inclusion in the medical mission was expressly requested by Maxim Litvinoff, former Soviet ambassador to the United States, while he was still serving in Washington in that capacity.

Professor Turner Dies

With the death on August 13 of Professor Philip J. Turner, McGill University lost a professor who had been associated for thirty-five years with the School of Architecture as a lecturer on architecture and professional practice.

Well known as a practising architect also, Professor Turner designed many of the branch buildings of Molson's bank, as well as a number of homes on the upper level in Westmount. He was in charge of the remodelling of Westmount Library and in association with S. H. Maw, was architect of St. Phillips Church, Montreal West, and the Crown Trust building.

Professor Turner was particularly known as an authority on cathedrals and libraries. He was a fellow of the Royal Institute of Britsh Architects, and of the Royal Architects' Institute of Canada, and a past president of the Province of Quebec Association of Architects. He was also a member of the Executive Committee of the Diocese of Montreal

McGill has suffered a great loss by his death.

McGill Receives Valuable Gifts

Among the recent gifts received by McGill were an 1830 copy of Orders from the British War Office "for those in command of Her Majesty's Forces in Quebec, Montreal, Bytown, and other Canadian depots "donated by Mrs. W. W. L. Clipman, and a legacy of $25,000 from the late Arthur C. Tagge to found a scholarship.

Dawson's Relatives Celebrate Golden Wedding

Dr. and Mrs. W. Bell Dawson were the recipients of congratulations on September 6, when they celebrated their diamond wedding anniversary. Dr. Bell Dawson is the son of former Principal Sir William Dawson.

McGill Receives Generous Donation

According to the will of the late Stuart Lindsay Crawford who died in Rochester, N.Y. on September 2, 1942, McGill University is to be the eventual beneficiary of a trust fund of $168,237. The late Mr. Crawford, a native of Montreal, graduated from McGill 35 years ago in science, and the fund is to be used by the science faculty preferably for scholarships in memory of Emily Ross Crawford, mother of the donor.

Two Emeritus Professors Appointed

Dr. John Tait, who taught at McGill from 1919-1939 in physiology, becoming Director of Experimental Medicine in 1924, has been made Emeritus Professor of Physiology according to a recent announcement of the Board of Governors. At the same time Professor Ernest Brown was made Emeritus Professor of Mechanics and Hydraulics. Prof. Brown had served as Dean of the Faculty of Engineering from 1930-1942, after having been a member of the McGill faculty since 1905.

Four Year Home Economics Course Given at Macdonald College

The one year Homemakers' course at Macdonald College has been suspended for the duration of the war but the four year course leading to the degree of B.Sc. in Home Economics is being continued. All subjects relating to the broad field of home economics are given and with world attention focused on proper feeding and clothing, the demand for graduates is great for work in government departments, research, and civilian institutions.

McGill Takes 250 for Army Course

During the coming session McGill will train 250 men in the special army course being given by several universities throughout Canada. Open to men already in the Canadian Active Army, and to civilians between 17 and 22 in A medical category and with at least Junior Matriculation standing with some strength in mathematics, who are prepared to enlist in the army, the course will provide one year's credit towards the B.Sc. or B.Eng. degree. The soldier-students will be housed at Douglas Hall and will receive uniforms, board, lodging, text-books and supplies, and also pay and allowances as privates during the course. The purpose of the course is to prepare men for commissions in the technical arms and services of the Canadian Army, though there is, of course, no guarantee that everyone completing the course will receive a commission.

The students were welcomed to the course by Principal James who told them of McGill's great military traditions and pointed out to them the importance of trained minds and technical knowledge, not only during the war, but in the years to follow. He urged them to make themselves an integral part of the university and avail themselves of all the facilities it offers for leisure and recreation as well as for study, and the formation of friendships to broaden their outlook.

Prof. Newton Appointed to United Nations Information Board

Professor Theodore F. M. Newton, formerly a member of the English Department at McGill University, and for some time editor of the book review section of THE MCGILL NEWS, who left on leave of absence for the duration of the war to take a post under the Wartime Information Board in Ottawa, has recently been appointed Canadian representative on the United Nations Information Board. In recent months he has been directing speakers on the Canadian war effort in the United States.

Visiting American WACs Use R.V.C.

When two hundred and two members of the American Women's Army Corps came to Montreal recently to take part in the parade held as part of the C.W.A.C. second anniversary celebrations, they were quartered in the Royal Victoria College during their stay in Montreal. Special double decker bunks were installed for the occasion, and a special cooking staff from the C.W.A.C. establishment at Ste. Anne de Bellevue was sent in to prepare their meals.

McGill Gives Special Army Courses

Doctors Wesley Bourne and M. Digby Leigh of the McGill Faculty of Medicine have been conducting special courses in anaesthesia for medical officers of the three armed services. Lectures were also given on anatomy by Professor C. P. Martin, head of the Department of Anatomy, and by Dr. J. S. L. Browne of the University Medical Clinic on the modern treatment of shock.

Basic English Article Published in "McGill News" Several Years Ago

Premier Churchill's recent strong advocacy of basic English as a common language among the peoples of the world should be of particular interest to readers of THE MCGILL NEWS for an article written entirely in basic English by Prof. Ogden, the inventor of the language, was published in THE MCGILL NEWS several years ago. Basic English consists of about 650 nouns and 200 verbs or other parts of speech and is adequate for expressing all normal ideas which the speaker may wish to convey in a clear and intelligible manner, while at the same time being simple enough for anyone to learn in a comparatively short time.

Divinity Faculty Proposed

While the McGill University Senate has as yet made no decision respecting the question of establishing a faculty of divinity at the university, some progress is being made in this direction by the governing bodies of the churches concerned. Last year the United Church General Council went on record as favouring the plan, and this summer the General Assembly of the Presbyterian Church in Canada also approved it with minor changes. When the decision of the Church of England has been made known the Senate will then consider the plan further and make its decision.

Senate Studying Teachers' Training

With the advent of compulsory education the McGill University Senate has set up a special committee to study the question of training for teachers. Chairman of the committee, which was formed with the approval of the Provincial Teacher Training Committee is Dean Brittain, of Macdonald College. Other members are: Prof. John Hughes, head of the Department of Education, Dr. A. B. Currie, assistant professor of education, Dean Sinclair Laird, of the School for Teachers, Dean C. S. LeMesurier, of the Faculty of Law, Dr. W. H. Hatcher, chairman of the physical sciences group of the Faculty of Arts and Sciences, and Dr. M. V. Roscoe, warden of the Royal Victoria College.

Nigerian Medical Student Dies

Asuquo Idiong, Nigerian medical student died on August 24, in the Royal Victoria Hospital after a long illness. Born in Abak, Nigeria, he was chosen by the Ibibio Union, a native organization, to be sent to North America to receive a medical education and then return to his own people. He studied at five American universities before entering McGill as a second year medical student in 1941.

Prof. Avison, Secretary of Conference

Professor H. R. C. Avison of Macdonald College was Secretary of the Canadian Association for Adult Education conference held at Ste. Anne de Bellevue this month which discussed problems of postwar reconstruction.

T. H. MATTHEWS

REPORT ON SOCIAL SECURITY FOR CANADA, *by L. C. Marsh. 145 pp. King's Printer, Ottawa. 50 cents.*

TO the readers of the McGILL NEWS it will certainly be a matter of interest and, doubtless, of gratification that this Report on Social Security was prepared by a former member of the staff of McGill University for the Advisory Committee on Reconstruction whose chairman is the Principal of McGill, and that the Report was presented by the Minister of Pensions and National Health to the Special Committee on Social Security whose chairman is the present Dean of our Faculty of Arts and Science.

Dr. Marsh's Report has earned high praise from many, including Sir William Beveridge. It is a solid piece of work, showing little or no evidence of the speed with which it was compiled, and well deserves the careful study of everyone interested in the future welfare of this country. No short review of the Report could do justice to its comprehensive scope or to its careful exposition of the many aspects of the subject matter. All your reviewer offers will be a few of his own thoughts as stimulated by his reading of the Report.

One would suppose that, after four or more years of highly destructive warfare, we all should need a period of very hard work, strict economy, and thrift, in which to endeavour to reconstruct what has been destroyed and, especially, to attempt to produce as quickly as possible all that wealth which might have been produced during the war years had not efforts and energies been forced to turn to war services. There is, however, neither fun in contemplating, nor credit to be gained by advocating, the old dull paths of hard work, economy, and thrift; hence the more impatient spirits turn to schemes of financial jugglery and some mysterious planning by which, if they are only bold enough, all the natural results of waste and destruction may be dodged, and a better World for all be obtained without any payment for past human folly and wickedness.

It is curious that the insistence on bold schemes is made by those who also strenuously advocate the need for greater economic security, and it rather suggests the analogy of the man who, having lost on the first four races, plunges violently on the last one in order to regain his losses. We have lost heavily in the four war years, considering what wealth might have been produced instead of the necessary guns and munitions: now, some bold gamble is to restore everything. Even Dr. Marsh hankers after boldness: "the new factor for Canada is the scale of the programme and the challenge of bold conception and operation which it presents." He asks for 'bold acts of income mobilisation' and 'efforts of courage and initiative which alone will succeed.' But boldness obviously implies risk and it does not promise security except to those who subscribe to the "*l'audace, toujours l'audace*" slogan. Dr. Marsh, of course, desires a rational boldness; he seems to fear we may not be bold enough. My own fear is that, with the disillusionment and discontent that always comes in that post-war period when people begin to see what the war years have really lost them, we may run into a serious danger of impatient, reckless, and may be disastrous, experimentation.

There is no doubt that much of the popular support for measures of economic security comes from those who believe that not they, but somebody else, will pay for it. But will this be so? Bank clerks are paid as little as they are because, once appointed, they run practically no risk of being laid off or dismissed except for misconduct. Dock workers are paid as much as they are because their employment is discontinuous and considerable periods of unemployment recur during their working life. If an unemployment insurance scheme is to tax bank clerks for contingent benefits to which they will in fact never become entitled, and if dock labourers, working or idle, are guaranteed a continuous income, it would seem that the relative attractiveness of the occupations will be changed in a way to influence the relative supplies of labour with the natural result that wage rates will eventually be altered. It follows that wage rates for dock labourer will tend to fall and that these workers will then in reality themselves be paying the premium for economic security, from whomsoever the contribution may be tangibly collected.

Dr. Marsh does not mislead us here. "Whatever contribution arrangements are made, in any comprehensive system of social insurance, the current aged and disabled and others receiving benefits are in effect supported by the current population of working age, subject to such supplementation from government funds as is considered desirable." Even the government funds have to be derived from the current national income. There is an aspect here which concerns our men on active service. At present they are asked to fight for us—we who are too young to go, or too old, or too sick, or even it may be a few who don't like fighting. When they return and become a large part of the 'current population of working age,' are we then going to ask them to work for us—we who are too young, too old, or too sick to work, or even it may be a few who don't like working? The idea, sometimes voiced, that our fighting men on their return will not put up with the old bad ways and will demand economic security looks a bit different when it seems, that far from the Government granting them

Increased Numbers Study Teaching

Seventy-two applicants have been admitted to the McGill School for Teachers this year, twenty-one in the intermediate class, forty-nine for the elementary diploma, and two for the kindergaten director's certificate, an increase of seventeen over the number admitted last year.

economic security, it is the Government which is going to demand that they provide it.

These are random thoughts not expressed with any desire to weaken the drive for greater economic security but rather to correct any over-optimism which might lead to error, disappointment, and a dismayed defeatism. No nation can, and no individual should, obtain the benefits of a higher standard of living and greater economic security without earning them. Do not let us forget that.

J.P.D.

THE GREEK READER, *Compiled and edited by A. L. Whall. McClelland & Stewart, Toronto. $6.00.*

AN Anthology of all that is best and most beautiful in Greek literature, chosen from translations by scholars ranging from Chapman to the present day, is an ambitious undertaking. But the editor has performed his task with discerning taste and discrimination; and the result is a volume of over 800 pages which should make a welcome addition to any library. The introductions to the various sections are admirably brief and to the point, and the compiler has been wise enough to include selections from the great prose writers of Greece as well as the famous poets. The versions selected are for the most part excellent, and great credit is due to the editor, whose task of including and excluding must, indeed, have been laborious. No happier quotation could have been selected for the opening page than those wise words of John Buchan: "Indeed, I cannot imagine a more precious viaticum than the classics of Greece and Rome, or a happier fate than that one's youth should be intertwined with their world of clear, mellow lights, gracious images, and fruitful thoughts."

The book seems to be singularly free from mistakes. On page 710, in the second selection, Callimachus appears as the speaker's name instead of Callicles; but this is a trivial error. There is always, however, a danger in selecting for the headings of passages some phrase which may have real immediate significance, but which may convey little in years to come. "Genesis of a Hitler" will always be understood, and "Free speech prostituted by Quislings" enshrines a word which will probably, for all time, become a synonym for "traitor": but "Plea for the opening of a 'second Front' " is a title which may call for an explanatory note in years to come. This would matter little, if the book were intended to satisfy only the reader of the present generation: but it is just because The Greek Reader deserves a long, long life that we make the above reflection. The best that we can wish the author of this book is that it will meet the fate which it deserves: he will then have every reason to be satisfied with his labour of love.

W. D. WOODHEAD.

Macmillan Company Offers Literary Awards

The Macmillan Company is offering an award of £500 for the best novel and another award of £500 for the best work of non-fiction by a British subject between 19 and 35 serving in any branch of the Empire's Armed or Auxiliary Forces, as well as smaller awards and a special award of $500 for the best Canadian entry if it does not get one of the major awards.

The HEIR APPARENT

MEET THE HEIR APPARENT to the thrilling new world of to-morrow . . . the world he will help to build.

Already he's learning to stand on his own feet, a young man with ideas; self-reliant, courageous, ready to carve out a future by his own personal efforts.

Many of these young men of to-morrow—future leaders—already have accounts of their own at the Royal Bank. They have spare-time jobs, work hard and save some of their money for the day when opportunity will beckon. Theirs is the spirit that has made this country great. It is the spirit that will build a Canada worthy of her future.

What is PRIVATE ENTERPRISE?

It is the natural desire to make your own way, as far as your ability will take you; an instinct that has brought to this continent the highest standard of life enjoyed by any people on earth. It is the spirit of democracy on the march . . .

THE ROYAL BANK OF CANADA

CONCRETE INFORMATION

FOR many years we have maintained a service department which gives technical advice to Engineers, Architects and Contractors. Literature is also available for distribution covering many uses of concrete and reinforced concrete.

If you feel that we can aid you in avoiding or reducing the use of critical war materials or aid you in solving any of your problems relating to concrete work get in touch with the service department.

Offers You

FREE

. . . this Beautiful New Book about ELECTRONICS

What do you know about Electronics? Do you realize how this "new science for a new world" is playing a big part in many secret war weapons? Do you know how it is speeding war production? How it is performing new miracles of healing? How it will beneficially affect all our lives, after the war? The Electronics story is a fascinating one. It is one with which every progressive-minded Canadian will want to become acquainted. It is pictured and described excitingly in this valuable, new, full-colour, 32-page book which is offered free to you. Simply mail the coupon now.

CGE-3043

WHAT THE BOOK CONTAINS

- The thrilling story of electronic research — the development of the electronic tube — the discoveries of Thompson, Edison, Fleming, de Forest, Steinmetz.
- How electronics is being applied — in war, in industry, in the battle against disease, in producing new strains of flowers and fruits.
- The electronic world of the future — television . . . static-free FM radio . . . wireless transmission of power and a host of other possible uses.

"There's something about it you'll like!"

90%

NO LESS than 90% of the total factory production of Crane and its subsidiaries is today going directly to war uses.

"Customers" include the Department of Munitions and Supply, the Navy, Army and R.C.A.F., the Wartime Shipping Board. Valves, fittings and pipe for synthetic rubber plants, high-octane gasoline plants, munitions and chemical plants are also being turned out in huge quantity by Crane workers.

This heavy war programme explains why there is so little plumbing and heating equipment available for normal civilian needs. First things must come first!

CALCULATING with A.C. POWER Slide Rule!

The 4 components of A.C. Systems generators, transformers, transmission circuits and live load have been successfully represented in a Network Calculator built by Westinghouse.

First of its kind in Canada, this A.C. Calculating board helps the Hydro-Electric Power Commission of Ontario to analyse the electrical labyrinth of existing or projected power networks.

A.C. CALCULATING BOARD
Saves thousands of dollars by providing rapid solutions of the complex electrical problems of ever expanding power systems.

CANADIAN WESTINGHOUSE COMPANY LIMITED - HAMILTON, CANADA

Westinghouse

The Name that means Everything in Electricity

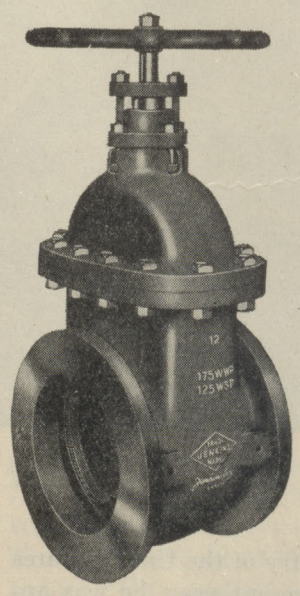

For an ENGINEERING FUTURE

Cancar, builders of rolling stock, street cars, buses and Canada's major producer of Hawker Hurricane, Avro-Anson and Curtiss Dive Bombers, affords wide scope for engineers in every category. And with an assured peacetime future. For Cancar even now, is planning for the days ahead when once again its plant and personnel will swing full-tide into civilian production.

Morris W. Wilson Appointed Chancellor

THE BOARD OF GOVERNORS of McGill University has, by a unanimous vote, elected Morris W. Wilson, president and managing director of the Royal Bank of Canada, to succeed the late Sir Edward Beatty as Chancellor of the university and President of the Royal Institution for the Advancement of Learning. At a special convocation held on December 10th, following his appointment, the honorary degree of LL.D. was conferred on the new Chancellor. Dr. James in announcing the appointment said, "Mr. Wilson, who was born in Lunenburg, Nova Scotia, has been a Governor of McGill University since 1937, and during the last few years he has played an important part in the war effort of the United Nations. Early in 1940 he was appointed to represent Lord Beaverbrook, British Minister of Aircraft Production in the United States and Canada, a responsibility that was substantially increased when he became Deputy Chairman of the British Supply Council in North America, on its formation in January, 1941. After the tragic death of the Right Honourable Arthur B. Purvis, Mr. Wilson became Chairman of the British Supply Council, and directed its work until its functions were curtailed, during the months following Pearl Harbour, as a result of the entry of the United States into the war. During the present year, he was appointed by the Canadian Government as its representative on the Pulp and Paper Committee of the Combined Materials and Resources Board—a Canadian-American Committee charged with the task of finding solutions to the problems that result from the present pulp and paper shortage.

Notman, Montreal

MORRIS W. WILSON, LL.D.

Well-known throughout Canada, as well as in Great Britain and the United States, Mr. Wilson has spent his entire business life in the Royal Bank of Canada, of which he is now President and Managing Director. The breadth of his interest is however evidenced by his position on the directorates of some of the most important companies in Canada, and the quality of his citizenship by the extent of his activity in civic and philanthropic organizations. At the present time, he is Chairman of the Board of Governors of the Welfare Federation of Montreal, Chairman of the National Committee on Mental Hygiene, a Governor of the Royal Victoria Hospital, and Chairman of the Saint-John Red Cross Joint Board of Management, to name but a few of the organizations with which he is prominently associated.

Mr. Wilson assumes office as Chancellor at a time when McGill University is actively engaged in the task of preparing for the post-war period—a period in which the University expects to make outstanding contribution, in line with its past tradition, to the educational progress and national life of Canada. All members of the University look forward to steady progress under his leadership."

Mr. Wilson succeeds to a distinguished tradition in the McGill University chancellorship, whose functions have been carried out by some of Canada's most eminent citizens.

The names of Sir Edward Beatty, Lord Strathcona and Mr. Justice Charles Dewey Day are most closely identified with this office. The chancellorship of these three famous Canadians extended over a period of 70 years, Sir Edward occupying the post for 23. The position was also held by Sir Robert Borden for two years, Sir William Macdonald for four years, and Senator James Ferrier, also for four years.

It is expected that the new Chancellor will bring added renown to the University.

MACDONALD CHEMISTRY AND MINING BUILDING

Wm. Notman & Son

The McGill Chemistry Department

The Pre-War Years

By
R. V. V. NICHOLLS

IN SEPTEMBER of the year 1843 the first lectures were given in McGill College, now the Faculty of Arts and Science. Three students were enrolled. The teaching of chemistry at McGill University, however, antedates the opening of the Faculty of Arts by many years. A group of four Montreal physicians, members of the staff of the Montreal General Hospital, banded together in the Eighteen Twenties to form the Montreal Medical Institution, which was "engrafted" upon the University in 1829 as its Medical Faculty. This operation was of mutual benefit to both parties. Among other advantages, it permitted the Royal Institution for the Advancement of Learning to come into physical possession of James McGill's bequest and it permitted the Montreal Medical Institution legally to grant degrees. One of the original members of the Medical Institution was Dr. Andrew Fernando Holmes, Lecturer in Chemistry and Pharmacy. He later became Secretary and then Dean of the Faculty. The Holmes Gold Medal in Medicine is a memorial to him. He remained on the staff until the middle of the century and established the traditional and cordial relationship between Chemistry and Medicine which remains until today, even though ever since the Nineteen Twenties the Department of Chemistry has been solely responsible for the teaching of that science to medical students.

Dr. William Sutherland succeeded Holmes as Professor of Chemistry. The Sutherland Gold Medal in Biochemistry is named after him.

R. V. V. NICHOLLS, M.Sc. Ph.D., is Assistant Professor of Chemistry at McGill University.

When the Medical Faculty moved uptown in 1872 it was accommodated in a new building on a site now occupied by the south end of the present Biological Building. The building was enlarged no fewer than three times during the next thirty years. It was here that Dr. G. P. Girdwood came soon after his appointment in 1869 as Lecturer in Medical Chemistry and here he remained until his resignation in 1902 as Professor. Five years later a portion of the Old Medical Building was burned but even after the construction of the New Medical Building in 1911 higher up the hill, Medical Chemistry continued to be taught there undisturbed. Even today an extension of the Chemistry Department is housed in the Biological Building.

The Chemistry which Dr. Holmes taught would be what is now known as Medical or Physiological Chemistry, the forerunner of the present day Biochemistry. We must thank Sir William Dawson for instituting the teaching of pure Chemistry. To be sure the original plans for McGill College, drawn up in 1838, provided "two rooms for . . . chemical apparatus, etc." but it is obvious that these were intended for the accommodation of medical students. One of the first acts of the young Dawson after being inaugurated as Principal in the autumn of 1855 was to deliver an extension course of thirty lectures on such diverse topics as the Chemistry of Life, Natural Philosophy, Zoology, Civil Engineering, and Palaeography. There can be no doubt that this course inaugurated the teaching of the physical sciences, the biological sciences, and the applied sciences at McGill.

One hundred years ago McGill College was housed in two unfinished buildings, one which forms the central portion of the present Arts Building, one which is its East Wing. Twenty years later, through the generosity of William Molson, a third building (West Wing, known as the William Molson Hall) was built to serve as a convocation hall and library and a few years later, through the further generosity of his wife, the three original buildings were connected by single-storey structures. In the one joining the Centre Building and the Principal's Residence (East Wing) space was found for a chemical and natural science room and laboratory. It was here that B. J. Harrington came on his appointment as Lecturer in Assaying and Mining in 1871. A year later he was appointed, in addition, Lecturer in Chemistry. Chemistry continued to be taught in the Arts Building until the opening of the Macdonald Chemistry and Mining Building in 1898. The name is significant. It perpetuates in stone the tradition established by the efforts of Dawson and Harrington, the relationship between Chemistry and Engineering, particularly Geology and Mining. When Harrington died in 1907 he was Greenshields Professor of Chemistry and Mining and Director of the Chemistry and Mining Building. Surely the present pre-eminent position of the Department of Chemistry is in no small measure due to the fact that it has been the faithful servant both of Medicine and of Engineering.

Though the Chemistry Building was occupied in 1898 the present Department of Chemistry was not constituted until 1912. Nevertheless, during the first decade of the twentieth century memorable future events were in the making. The supremely generous Macdonald had endowed two professorships. R. F. Ruttan, who since his appointment as Lecturer in 1886, had served as assistant to Girdwood, succeeded the latter in 1902. Together with J. W. Walker, appointed Macdonald Professor of Organic Chemistry in 1898, he became responsible for the teaching of Medical and Organic Chemistry. N. N. Evans, who since his appointment as Lecturer in 1892, had served as assistant to Harrington, succeeded to the latter's duties in 1907 and became responsible for the embryonic course in Chemical Engineering. It may be remembered that instruction in Engineering had been inaugurated as early as 1856 as the Department of Applied Science of the Faculty of Arts. After a number of uncertain early years it was revived, strengthened, and raised to the status of a Faculty in 1878. Since then its future has never been uncertain and it only remained for the generosity of Thomas Workman and Sir William Macdonald to provide a suitable home. D. A. McIntosh joined the staff in 1904 and F. M. G. Johnson four years later. They were to introduce to McGill the teaching of that new branch of the science, Physical Chemistry. McIntosh was especially gifted in research and was the first of the modern directors of research. It is noteworthy that the appointment of these men coincided with the establishment of a Graduate School, prophetic of the rise of the Department to international fame as a centre for postgraduate training in Physical, Organic and Cellulose Chemistry.

In 1912 the unification within one department of all forms of chemical instruction was accomplished, and then, for the first time McGill University was able to offer a complete professional course of training to chemists. It was natural that Professor R. F. Ruttan should be chosen as the first director of the new Department of Chemistry. He possessed to a high degree those attributes necessary to achieve eminence in the academic life; he was at once a teacher, an administrator, a researcher, and a personality. In addition, his training had been above reproach. He had received his Bachelor's degree from the University of Toronto in 1881 with a gold medal in Natural Science and the degree of Doctor of Medicine from McGill University two years later with a gold medal in Chemistry. Like most ambitious young chemists of his time he chose to study in Germany, under the great Hofmann of Berlin. Finally, Ruttan had been

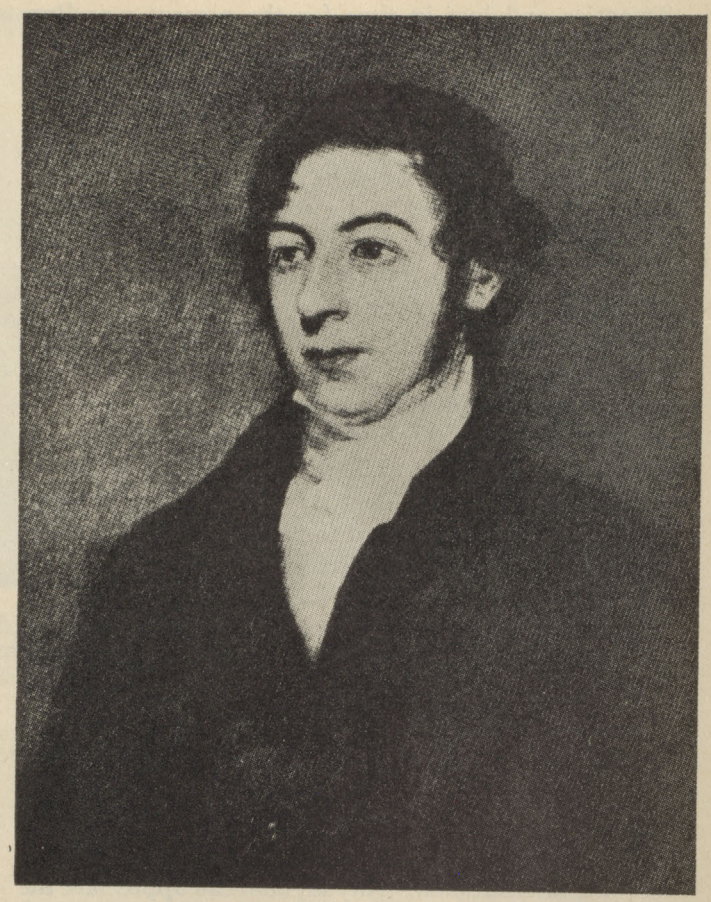

persona grata with the most powerful faculty in the University, the Faculty of Medicine, ever since he had become its secretary in 1902. For fifteen years Ruttan was to rule the Department of Chemistry with a firm and just hand.

His influence in matters scientific was a natural one. He was continually being invited to assume posts of prominence. During the early years of World War I the disadvantages resulting from the primitive condition of research in Canada were, in part at least, overcome by the formation of the Honorary Advisory Council for Scientific and Industrial Research. Ruttan became a member of the Council and, before long, its Chairman. In the postwar years, and under his care, it became the National Research Council of Canada, respected among such institutions throughout the world. As Chairman of its Committee on Assisted Research he was responsible for the birth of the present system of university scholarships.

During the Nineteen Twenties Ruttan's life was filled with responsibilities and honours. In 1895 he had been elected a Fellow of the Royal Society of Canada; in 1920 he became its president. In 1912 he had been elected Chairman of the Canadian Section of the Society of Chemical Industry, a British organization; in 1921 he became the President of the whole society and was host to the international delegates at McGill University that summer, the first Canadian to hold this office. He was an organizer of and in 1922 became a charter member of the Canadian Institute of Chemistry, the professional society of chemists. It is said that Dr. Ruttan never practised Medicine. Be that as it may, the first major operation for which he was responsible was most successful, the separation of the teaching of Medical Chemistry from the Department of Chemistry in 1922 and the creation of the Department of Biochemistry with the brilliant A. B. Macallum as its head. But that is another story. It is natural that, having so proved himself, he should become the first Dean of the new Faculty of Graduate Studies and Research formed at McGill University in 1924.

Ruttan was an effective teacher in his chosen subject of Organic Chemistry and, when he found time, a competent research worker, especially in the chemistry of fats and as an analyst. But above all he was a judge of men. It was he who attached to his beloved department such men as McIntosh, Johnson and Maass, Whitby, Hatcher and Hibbert. Robert Fulford Ruttan resigned in 1927 and died in 1930, a towering figure among men.

Douglas McIntosh, it will be remembered, was a prototype of the modern directors of postgraduate research. He had been trained at Dalhousie, Cornell and Leipzig early in the century and joined the staff of McGill immediately after. In 1913 he became Professor of Physical Chemistry, the first to bear that title at the University. After 1915 he was successively head of the Departments of Chemistry, University of British Columbia, and Dalhousie University and in 1930, Director of Research for Shawinigan Chemicals, mark of one of the outstanding industrial chemists of Canada. At Shawinigan Falls, he succeeded Dr. F. W. Skirrow, who, as Assistant Professor of Chemistry, had been with him at McGill.

DR. ANDREW FERNANDO HOLMES
McGill's first chemistry teacher, Lecturer in Chemistry and Pharmacy in Montreal Medical Institution, later Secretary and Dean of Faculty of Medicine

The late F. M. G. Johnson joined the staff soon after McIntosh, following a period of study in Germany, at Leipzig under Ostwald. Like McIntosh he was interested as a research worker in problems of Physical Chemistry; as a teacher his duties led him to lecture in Inorganic and Analytical Chemistry. But he chiefly shone as an administrator. He followed Ruttan in 1927 as Director of the Department and, after a period as Dean of Science, as Dean of Graduate Studies in 1934. He remained as joint Director and Dean until his resignation from the University in 1937. His untimely death followed all too soon after. During the last war and, in part at least, as a result of the war, Professor Ruttan had established McGill's reputation as an outstanding school for the professional teaching of chemists. During the Nineteen

Twenties and just in time for the present war Professor Johnson, after a careful survey of teaching methods at other universities, modernized the courses of instruction for the honours degree of Bachelor of Science and for the degree of Bachelor of Chemical Engineering. The modernization of the course in Chemical Engineering under the immediate direction of Dr. J. B. Phillips, a course which heretofore had been operated on a modest scale, was a noteworthy step forward. The result was a most gratifying increase in the number of students enrolled in these courses.

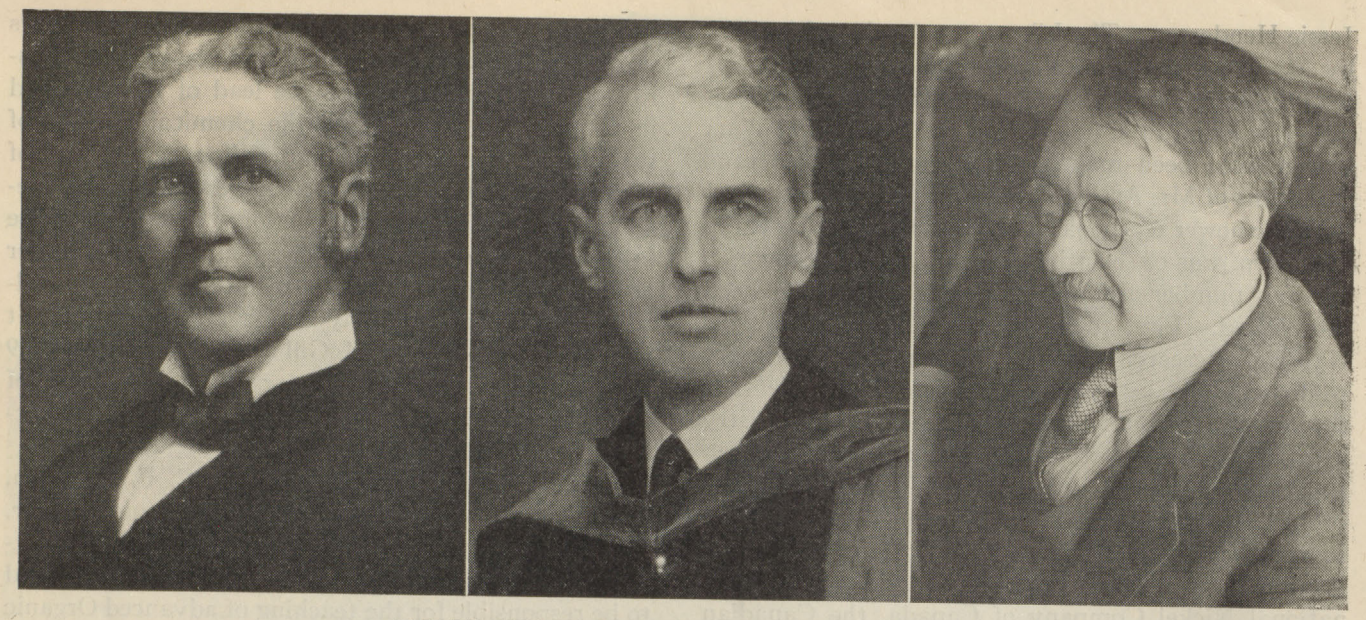

The early training of Otto Maass was cosmopolitan. He studied under McIntosh at McGill, Richards at Harvard, and Nernst at Berlin. From Harvard University he received the degree of Doctor of Philosophy in 1916. Dr. Maass joined the staff immediately after graduation and is at present Macdonald Professor of Physical Chemistry and Chairman of the Department. In the former position he succeeded his instructor, Dr. McIntosh; in the latter his colleague, Dr. Johnson. His talents as a director of research have been outstanding. During the past twenty-five years no fewer than a hundred graduate students have come to look back with pride upon their terms of apprenticeship with him. Through his talents the fame of the McGill Graduate School in Chemistry has become international. Any layman can appreciate the versatility of his work: only a scientist can appreciate its true value. Following the lead of McIntosh, Maass continued his investigations of the phenomenon of molecular association between hydrogen halides and organic compounds, particularly the olefins. For this work it was necessary first to develop the most refined apparatus and techniques for the accurate measurement of such physical properties as freezing points, boiling points, vapour pressures, vapour densities, surface tensions, and gas viscosities. Some of the constants determined for hydrogen peroxide, carbon dioxide, and sulphur dioxide have become the accepted standards. This work led to fundamental studies of molecular structure in the critical state, and to the development of special methods for determining specific heats through adiabatic calorimetry. Dr. Maass' interests have been sufficiently catholic to include industrial as well as academic problems. Since the formation in 1927 of the Pulp and Paper Research Institute of Canada in association with McGill University, he has given an increasing proportion of his time to problems arising from the technical operations of the paper industry. Among these may be mentioned a physicochemical investigation of the nature of the pulping liquors and of the cohesive forces existing between the cellulose fibres in papers. All of these investigations have necessarily been interrupted by the more pressing problems of the present war. His abilities have been recognized by his appointment to posts of responsibility in the Canadian Pulp and Paper Association, the National Research Council, and the Department of National Defence. In 1938 Dr. Maass was elected to the presidency of the Canadian Institute of Chemistry and in 1940 to fellowship in the Royal Society of England, a most signal honour.

Walker had resigned as Professor of Organic Chemistry in 1912. His duties were shared by V. J. Harding who had joined the staff in 1910 as a Lecturer and by V. K. Krieble who now joined it. Both of these men remained at McGill, however, only during the war years. Soon after the late Professor Harding became Professor of Pathological Chemistry at Toronto University; Professor Krieble became Head of the Department of Chemistry at Temple University.

It was not until after the uncertain period of the last war that the teaching of and research in Organic Chemistry flourished at McGill with the coming of Whitby, Hatcher and Hibbert.

George S. Whitby, after a brilliant record as a student in England, had at the time of the last war become chief chemist of an English rubber company and migrated to Malaya. Soon after joining the staff of the Department of Chemistry at McGill in 1920 he published a book on the chemistry and testing of rubber, which marked him outstanding in his chosen field. During the next nine years he rose to international fame and the Department flourished in his reflected glory. He was an outstanding teacher and investigator. As the latter he made fundamental contributions to our knowledge of the structure of rubber and of the nature of its vulcanization. He was one of the first chemists on this continent to attempt the preparation of a synthetic rubber. Whitby was favourably regarded in the industry and when in 1929 the National Research Laboratories were established in Ottawa, he resigned from McGill to become the first Director of the Division of Chemistry. But such was his reputation that nine years later he became Director of Chemical Research, Department of Scientific and Industrial Research, London. He has now returned to his first love, rubber chemistry. Recently he was appointed Professor of Rubber Chemistry at Akron University in the United States and Chief Technical Adviser of the Polymer Corporation in Canada. As such he has and will continue to have much to do with Canada's synthetic rubber programme.

George Stafford Whitby left a two-fold mark for good upon McGill University. He created a tradition for a high standard of teaching in Organic Chemistry and he created a tradition for the continued investigation of high polymers. It is a measure of the man that, when the Canadian Chemical Association was formed in Toronto in 1928, he became its first president.

THREE HEADS OF CHEMISTRY DEPARTMENT
Left to Right: Dr. R. F. Ruttan, Director of Department of Chemistry, 1912–1927;
Dr. F. M. G. Johnson, 1927–1937; Dr. Otto Maass, since 1937

W. H. Hatcher became a Lecturer at the same time as Whitby. Nineteen Fourteen had found him an undergraduate at McGill in the B.A. Honours in Chemistry course. After graduation he entered the Graduate School and became the first and only student in Chemistry to undertake war research, assisted with funds from the newly-formed Council for Scientific Research, but without receiving any academic credit. What a contrast with the present war when the entire Graduate School in Chemistry is devoted to the advancement of the war effort through research! On joining the permanent staff in 1920 he embarked upon a special study of the characteristics of hydrogen peroxide and of the nature of organic oxidation, and made notable contributions. In recent years, however, he has given more and more of his time to teaching and administrative duties for which he has special talents. In this regard it may be said he has perpetuated the tradition of his chief, Ruttan. That his talents have been recognized has redounded to the advantage of the University. He has been chosen to hold innumerable positions of influence both at his Alma Mater and in the community. Until recently under the revised statutes he held the post of Chairman of the Physical Sciences Group. As such three years ago he initiated a movement which has resulted in a thorough revision of both the undergraduate and graduate curricula in Chemistry. With the return of peace these changes will be implemented and, we hope, his ambition will be sustained, to maintain the high reputation of the Department of Chemistry.

Harold Hibbert was trained in Britain and Germany but he had had experience in the United States before coming to McGill in 1925 to be the first occupant of the E. B. Eddy Chair of Industrial and Cellulose Chemistry. From the beginning he devoted himself to the research programme of the newly-created Canadian Pulp and Paper Research Institute, a co-operative effort between government, industry and university agencies. Before his retirement this year, he had established for himself, and for McGill, a world-wide reputation as an authority on wood chemistry, especially in the fields of cellulose and lignin chemistry. His contributions have been outstanding. His achievements both in theoretical and applied chemistry were recognized recently in the granting to him of an honorary degree by the University of British Columbia and of honorary membership by the Society of Chemical Industry.

Down the years friends of the University have been kind to the Department of Chemistry. In the Eighteen Nineties Sir William Macdonald gave the necessary money to build the present Macdonald Chemistry and Mining Building, which houses the Departments of Chemistry, Geology, and Mining and Metallurgy, and to endow two professorships. Someone has said that the life-expectancy of a science building is forty years. If this be true, the Chemistry Building was due for replacement five years ago. As a matter of fact the necessary funds were appropriated in the late Nineteen Twenties, but the Depression adversely affected them. Again during the Principalship of Lewis Douglas plans were actually drawn but these are still held in reserve.

One of the memorable features of the Chemistry Building is the Baillie Library of Chemistry, presided over for many years by the gracious and kindly Miss

Jessie Henderson. The Library was endowed in 1922 by Mr. John Baillie as a memorial to his son, Lieutenant George Irvine Baillie, a student in chemistry who was killed in action during the first World War; it has since been maintained through the generous donations of Mr. Archie F. Baillie. It is well supplied with the newer textbooks, but its special feature is the unbroken runs of scientific journals available there.

A fair number of scholarships and prizes have been established. First to be mentioned are the famous National Research Council Scholarships which are competed for by young chemists and scientists throughout Canada. The Department of Chemistry is proud to think that, during the coming session, no less than twenty-six such scholarship holders will be proceeding to post-graduate degrees. Also designed to assist students to finance their postgraduate training are the Canadian Industries Limited, the International Nickel Company of Canada, the Canadian Pulp and Paper Association, and H. L. Blachford Scholarships. The Dr. T. Sterry Hunt Research Scholarship and the Nevil Norton Evans Scholarship are awards given in recognition of outstanding ability in postgraduate Chemistry or Chemical Engineering and in undergraduate Chemical Engineering, respectively. The latter scholarship was intended by its donors, the past students of N. N. Evans, to perpetuate the memory of the 44 years of service rendered by him to the University. Evans was a native of Montreal and entered McGill University in 1886. After a period of postgraduate study in Germany under Ostwald—it was he who established this tradition among McGill chemistry instructors—he returned in 1892 to become Lecturer and principal assistant to Harrington. That association was to determine his future career. Until his retirement in 1936 after a half-century spent in his beloved profession, the teaching of general and analytical chemistry was to be his responsibility. Professor Evans was specially gifted in the art of teaching and the art of friendship. His textbook of elementary chemistry, used for many years by high schools throughout the country, bears testimony to his flair for expressing difficult concepts in simple language. The pleasant memories that many McGill graduates retain of their association with him in classroom and laboratory and in the more informal atmosphere of his office bear testimony to his sympathetic understanding. Always he followed with interest the careers of "his students" and, indeed, his carefully-kept records proved of great value to the Graduates' Society on its formation.

Such was the influence of Ruttan that during the late Nineteen Twenties he was able to provide for the appointment of a number of young instructors to assist in carrying the increasing teaching duties. One of these was E. W. R. Steacie, appointed in 1928. He had recently graduated in Chemical Engineering and in Physical Chemistry. During the next eleven years he devoted himself to teaching and research in Physical Chemistry. Following the lead of Hinshelwood in England he investigated the chemical kinetics of reactions in the gas phase and, following the lead of Rice in the United States, he investigated the mechanisms of free radical reactions, especially those initiated by photosensitization. But he was a leader as well as a follower in his contributions to our knowledge of the "how and why" of chemical reactions. It was a distinct loss to McGill when Steacie in 1939 accepted the post of Director of the Division of Chemistry of the National Research Council as successor to Whitby.

Another of these young men was C. F. H. Allen. Allen was an American trained under the late Dr. E. P. Kohler of Harvard University. His appointment as Assistant Professor to succeed Whitby and to be responsible for the teaching of advanced Organic Chemistry was a most happy one. Whitby trained in Britain, Hatcher trained in Canada, and Allen trained in the United States have left a lasting impression upon the teaching of Organic Chemistry in this University. Allen's teaching methods and research problems reflect his training under Kohler. It is with delight that the author remembers listening to his lectures, which were at once clear and well-organized, forceful and rich in information. He possessed, too, the happy faculty of inspiring his graduate students to become well-informed and to investigate all avenues of approach to the solution of their problems. He was especially interested in the reactions of conjugated systems, such as the unsaturated ketones and esters, in the synthesis of aromatic compounds, of which the synthesis of rubrene is an outstanding example, and in the development of analytical procedures, of which the determination of nitrogen is well-known. That Allen had established for himself an international reputation while at McGill was made evident in 1937 on his appointment as Assistant Superintendent of the Eastman Kodak Company in charge of the newly-created department of Synthetic Organic Chemistry. He was succeeded by Dr. P. G. Stevens who remained but three years at McGill.

The third member of this group is Dr. J. H. Mennie who joined the Department in 1930 after a brilliant career at the Universities of British Columbia, Oxford, and McGill. He has since made himself an authority in analytical procedures and is responsible for the teaching of Analytical Chemistry.

The fourth member is Dr. W. H. Barnes who was also appointed in 1930. Dr. Barnes was trained first at McGill, and later at the University of London, where he studied under Professor W. H. Bragg. His first staff appointment at McGill was in the Department of Physics. Though hampered by lack of equip-

VICTORIA SKATING RINK, MONTREAL, BUILT 1862

McGill Contributions to the Origin of Ice Hockey

By
E. M. ORLICK

ON SEPTEMBER 14TH, 1943, there appeared an announcement in the press stating that Kingston, Ontario, had been chosen as the site of the proposed Hockey Hall of Fame on historical and geographical claims. The historical claims are pure fiction—the geographical claims poor fact.

The historical claims are based on the 'evidence' uncovered in a 'thorough investigation' conducted by an 'official committee' appointed by the C.A.H.A. to determine the Origin of Ice Hockey. This 'evidence' was published in an authoritative-looking document in April of 1942. This document is a conglomeration of contradictions and unsubstantiated statements. It contains many dogmatic assertions and conclusions but little or nothing in the way of authentic first-source facts. It is not a report of an investigation on the origin of ice hockey, it is a poorly camouflaged presentation of the Kingston claims.

These statements may seem strong but no statements can be strong enough to condemn the hoax which the Kingston claimants have perpetrated on the sports loving public of Canada.

The C.A.H.A. report makes only hearsay reference to the Halifax claims and gives no evidence to support them. The C.A.H.A. Report makes only hearsay reference to the Montreal claims and again presents no evidence in support. It accepts 1879 as the date that the first Ice Hockey game was played in Montreal. My humble research which was by no means a 'thorough' one, uncovered more than 10,000 words of authentic, printed, first-source evidence about games played in Montreal before this date. At no time did the C.A.H.A. investigators, or anyone representing them, see, or even ask to see, the authentic first-source records which were in the possession of McGill University at the time of the so-called investigation. At no time did anyone representing the C.A.H.A. or the N.H.L. see, or ask to see, the mass of documentary evidence which my research uncovered after the 'investigation' had taken place. Finally, when the decision as the location of the 'Hall of Fame' was made, neither the Halifax nor Montreal claimants were

EMANUEL M. ORLICK, B.A. (Univ. of Western Ontario), M.A., Dip. M.S.P.E., is Assistant Physical Director of McGill University.

HOCKEY CUP

Won by McGill in 1883 in a league in which Quebec City and the Montreal Victoria Skating Club were represented. On the McGill Team were: J. A. KINLOCK (Captain); P. L. FOSTER, R. W. SMITH, W. L. MURRAY (Forwards); J. ELDER and P. D. GREEN (Defense); A. LOWE (Goal).

invited to be present with the result that only the Kingston claims were given a hearing.

No amount of eye-wash, back-wash, or white-wash can convince any individual who has seen the evidence in my possession that Kingston has even the slightest shred of an historical claim either to the origin of ice hockey or the proposed Hockey Hall of Fame.

As for the geographical claims, these boil down to one ridiculous but nevertheless true fact, namely, that 'Kingston is halfway between Montreal and Toronto.' So what! Dneiperopetrovsk is halfway between Kharkov and Odessa, and for that matter Montreal is halfway between Quebec and Kingston.

If I were choosing the city in which to build the Hockey Hall of Fame, my choice would be that city which could prove by authentic documented evidence that it had contributed more to the origination and early development of this game than any other city in the world.

If I were choosing the actual site within that city upon which to build this Hockey Hall of Fame, my choice would be that site which by associated dignity, great hockey tradition and early hockey history would be more appropriate than any other that could be named.

On the basis of all the *authentic* evidence which has so far been unearthed on the origin and early development of ice hockey, there is only one city in the world where a Hockey Hall of Fame could justifiably be built, namely Montreal, and, likewise, only one site in this city which could possibly meet the stipulated requirements, namely, the McGill University Campus.

My choice of both city and site is motivated neither by any personal feeling of attachment to Montreal nor by any special loyalty to McGill. If I could completely ignore many reams of irrefutable evidence, I could think of no better place for a Hockey Hall of Fame than that little beehive of sports activities, the beautiful city of Hamilton, Ontario. However, with the finger of historical truth pointing accusingly at my intellectual honesty, I am forced to make an objective decision based on cold, hard facts. By no stretch of the imagination could that decision be any other than the one which I have made.

To anyone who has made any attempt whatsoever to trace the origin of Ice Hockey it should be perfectly obvious that this game was no brain-child conceived in the night and put into practice the next day.

There is in the National Museum in Athens a well preserved *bas relief* dating back to the 5th Century B.C., showing a group of ancient Greeks playing a game of field hockey. There is evidence that shows this game was played at a much later date in France under the name 'hoquet.' In Ireland where the game is called 'hurley' it can be traced back to 1272 A.D. In Scotland where it became known as 'shinty' or 'shinney' it has been played for many centuries.

When ice skating came into being in the 17th Century and spread from continental Europe to Great Britain, the field games of 'hurley' and 'shinney' were adapted to ice. There is evidence which suggests that 'hurley' on ice was played in Montreal, Canada, as early as 1837. There is also evidence that 'shinney' was brought to Canada by British soldiers and first played by these soldiers, who were garrisoned at Halifax and Kingston, in the year 1855. There is also evidence which suggests that the same game or some modification of it was played in the New England States at about the same time or a little later.

The question is not when the games of field hockey, hoquet, hurley or shinney started, but rather, when and where did hurley or shinney develop into the game of Ice Hockey as we know it today?

On the basis of all the evidence so far unearthed the answer to this question is that Ice Hockey started in the city of Montreal in the year 1875 and gradually evolved here into its present form. This is not a dogmatic assertion; it is a considered answer based on authentic first-source facts. It is possible that a similar development took place elsewhere but up to the time of the writing of this article no evidence of any kind whatsoever that even suggests this possibility has been brought to light.

— — —

Before presenting the Montreal-McGill contributions I would like to clear up two important points. (1) Kingston makes two historical claims:—(1) that 'shinney' was played in Kingston as early as 1855 and perhaps even as early as 1846-1847. As mentioned before we are not looking for the origin of 'shinney' and if we were, we could trace it back to Scotland where it was played many centuries before it was played in

Kingston. (2) that the first organized league hockey in the world was played in Kingston during the season of 1885-1886. My authentic records show that organized league hockey was played in Montreal some years prior to this earliest date. (II) Two ex-McGill students, R. F. Smith and W. L. Murray have stated independently that they, together with W. F. Roberston, another ex-McGill student, invented the game of Ice Hockey in 1879. I have irrefutable evidence totalling more than 10,000 printed words about earlier games in which McGill students participated.

Montreal-McGill Claims

(1) The first game of Ice Hockey, which is definitely called Ice Hockey and distinguished from 'shinney' and 'hurley,' of which there is any authentic historical record, was played in Montreal at the Victoria Skating Rink on March 3rd, 1875. The evidence suggests that the men who took part in this game had played the game before but there are no records available pertaining to any earlier games.

The captains of the two teams which played the above game, namely, F. W. Torrance and J. G. A. Creighton, were both McGill students. Three other players including Henry Joseph of Montreal, who is still living, were also McGill students. In addition four other names appear in the line-ups which are similar to names of men who were at McGill about the same time but it has not yet been possible to prove they were the same men.

(2) Owing to the fact that the above-mentioned game was played on indoor ice it was necessary to limit the number of players. The number chosen was nine to a side. This is a far cry from the old shinney game such as played at Kingston where often more than two hundred players were on the ice at one time. The number of nine to a side was the rule until 1884 when the Victoria Rink Carnival Committee officially reduced the number to seven. This change from an unlimited number of players to a limited number is a developmental feature for which Montreal deserves full credit and in which McGill students definitely warrant a share.

(3) In the old game of shinney the playing object was usually a hard rubber ball. This object was found unsuitable in the indoor game of 1875 because the playing area was surrounded by unprotected spectators. The hockey players, including the McGill men mentioned, partially solved the problem and materially reduced the danger to the spectators by inventing and using for the first time a "flat circular piece of wood" similar in size and shape to the present day puck. The new Ice Hockey object did not have the same tendency to leave the surface of the ice as did the hard rubber ball. To Montreal and McGill must go the credit for inventing and first using the type of puck in use today.

Notman, Montreal

HENRY JOSEPH

Prominent Montreal business man, now in 89th year, who played with other McGill men in the first game of Ice Hockey of which there is any authentic record, March 3rd, 1875. Mr. Joseph states that he and other McGill men started playing the game first in 1873 when James G. A. Creighton (later a McGill graduate in Arts and Law) suggested a game on skates with ball and sticks patterned after English Rugby and using similar positions, goals, rules and officials.

(4) Regular goals, giving the height, as well as width, of the scoring area, were devised and first used in the game of Ice Hockey in Montreal. This feature was borrowed from the old game of Lacrosse, with similarity in structure, area and use of poles and flags. McGill students captained, and were among, the eighteen men who were responsible for introducing this important developmental feature. In shinney and hurley when goals were used at all, they consisted of two stones or other objects placed on the ice.

(5) A 'goal-keeper' was introduced into the game of Ice Hockey in Montreal. McGill students participated in the game in which goal-keepers were first used. McGill teams continued to use a goal-keeper even though some of the teams against which they later played did not. There is no evidence to show that goal-keepers were ever used in the Canadian game of shinney.

(6) Playing uniforms were introduced into the game of Ice Hockey in Montreal. The fact that the game was played on indoor ice had something to do with

this, but the points emphasized were the greater ease and comfort of playing in uniforms than in ordinary street clothes. McGill students took part in the game in which uniforms were first used. The use of distinguishing uniforms facilitated team work and officiating.

(7) The use of definite playing positions and even the names of these positions was introduced into the game of Ice Hockey in Montreal. Credit for this must go to the Montreal Foot Ball Club, whose members were so accustomed to playing definite positions in their own game that they carried these, together with the names, and even their system of playing, on to the ice. McGill students participated in the game in which definite playing positions were first named and used. In the old game of shinney, such as played at Kingston, it was impossible to name or play any definite position because the number per team varied, and at times, reached as many as one hundred per side.

(8) The use of an organized system of playing, involving team work, was introduced into the game of Ice Hockey in Montreal and McGill students took part in the game in which this was introduced. In the game of shinney, again because of the large numbers involved, any semblance of team-work was impossible.

(9) The first Ice Hockey Association in the world, of which there is any historical record, was organized in Montreal. McGill students were members of the first two teams which belonged to this Association.

(10) The first codified set of Ice Hockey Rules in the world was drawn up and put into use in Montreal. McGill students were members of the teams which first played under these rules. In the old game of shinney there was, so far as the records show, only one rule—"shinney on your own side."

(11) Hockey Officials, in the form of two umpires to a game, were introduced into the game of Ice Hockey in Montreal. McGill students were members of the teams which played the first officiated game of Ice Hockey.

(12) Within a year of the playing of the first recorded game of Ice Hockey there were in Montreal at least five organized Ice Hockey teams. One of these five teams was a representative McGill University Ice Hockey Team. The number of teams increased rapidly in the next few years.

(13) Ice Hockey was introduced to Kingston, Ontario, by E. T. Taylor in 1879. Mr. Taylor graduated from McGill in Arts in 1878 and had been an active member of the McGill Ice Hockey Club from its inception. On graduating, he went to the Royal Military College in Kingston where in 1879 he introduced the new game of Ice Hockey to the students there.

Ice Hockey was introduced to Ottawa, Ontario, by Dr. P. D. Ross who graduated from McGill in Applied Science in 1878. Like E. T. Taylor, Dr. Ross had also been an active member of the McGill Ice Hockey Club. Ice Hockey started in Ottawa in the early '80s.

Other McGill men were responsible for the spread of Ice Hockey to the United States and other parts of Canada.

(14) McGill University is the first College in the world to have a representative Ice Hockey Team.

(15) McGill University is the first College in the world to promote and conduct inter-faculty Ice Hockey competition.

(16) The McGill University Ice Hockey Club was the first Ice Hockey Club in the world to be organized. President was A. D. Taylor; Captain, Harry Abbott; Secretary-Treasurer, R. J. Howard; Committee, Fred Torrance, Lorne Campbell, and W. Redpath.

(17) The McGill University Ice Hockey Club is the oldest continuously existing Ice Hockey Club in the world and it is still functioning.

(18) The oldest history of Ice Hockey in the world was written and published in Montreal more than half a century ago. A copy of this rests on the shelves of the McGill Redpath Library.

(19) Unlike shinney, which completely died out in Halifax, Kingston and elsewhere, Ice Hockey in Montreal has been played every year since the first recorded game of 1875. McGill students have been among those who have played the game ever since its inception.

(20) According to investigations made by the Canadian Amateur Hockey Association, goal nets were invented and first used in the game of Ice Hockey in Montreal.

(21) The name 'puck' as applied to the playing object in the game of Ice Hockey was first used in Montreal in a game in which McGill students participated.

(22) The oldest Ice Hockey Championship Cup in existence was won by a McGill University Hockey Team and is now in the possession of the McGill Department of Physical Education.

(23) The oldest Ice Hockey stick in existence was used by a McGill Ice Hockey player and is now in the possession of the McGill Department of Physical Education.

(24) The oldest picture of an Ice Hockey Team in existence is a picture of a McGill Senior Ice Hockey Team and is now in the possession of the McGill Union.

(25) The first organized league Hockey in the world was played in Montreal and a representative McGill Ice Hockey Team not only participated in this, but actually won the championship.

(26) McGill students played an important part in the development of the rules of the game of Ice Hockey. In 1879, R. F. Smith, W. L. Murray and

W. F. Roberston all of McGill re-wrote the rules of the game. In 1886, Charles Swabey, Secretary of the McGill Hockey Club represented McGill at a Rules Committee meeting at which were present representatives from all of the major Ice Hockey clubs in Montreal. "The McGill rules were adopted almost without exception." Later, in the same year, a Dominion-wide Hockey Association was for the first time formed. The Montreal-McGill Rules thus became the back-bone of Ice Hockey Rules throughout Canada.

— — —

In a treatise of this length, space prevents me from presenting the factual proof for the statements which I have made, but I am prepared to place my evidence before a panel of recognized historians at any time that Kingston or Halifax or any other interested city or group, cares to challenge them and is prepared to do likewise. In my research I accepted only authentic, printed, first-source facts. I completely disregarded all statements by old-timers, all hearsay evidence, all second or third source newspaper stories and all of the previous so-called investigations such as conducted by the C.A.H.A. in 1942.

In order that historical truth may be preserved, and that the overwhelming contributions made to the game of Ice Hockey by Montreal citizens and McGill graduates, be suitably recognized, I would urge that the McGill Graduates' Society make every effort to have the Kingston decision revoked and a new decision made, in favor of Montreal as the city, and, if our Governors are willing, the McGill Campus as the site, of the proposed Hockey Hall of Fame. Since the original plans for the Sir Arthur Currie Memorial Gymnasium-Armoury already call for the erection of a McGill Hockey Arena there is both place and purpose for such a Hall.

Should the National Hockey League and the Canadian Amateur Hockey Association refuse to reconsider their hasty Kingston decision I would urge that the Graduates' Society take the following steps to preserve both truth and tradition, not only for Montreal and McGill, but also for the sports-loving public of Canada:—(a) set up a research committee to complete the present investigation; (b) let the public know the facts about the origin and early development of Ice Hockey and the part that McGill has played in it by publishing the ultimate findings; (c) if and when a McGill Hockey Arena comes into being let the entrance to this constitute the 'McGill Hockey Hall of Fame.' Here through plaques, pictures, frescoes or other suitable media the development of the game of Ice Hockey can be depicted; here can be listed the names of original Montreal and McGill players; here can be shown the early cups, trophies, sticks,pictures, etc.,in our possession; here can be kept a copy of all of the evidence on the game of Ice Hockey which has been uncovered; here can be shown the Montreal-McGill contributions to the origin and development of the game of Ice Hockey; here can be placed all other historical materials pertaining the game of Ice Hockey which the research committee is able to obtain either in Montreal or elsewhere.

Killed and Missing Since Founder's Day, 1942

AT the annual meeting of the Graduates' Society held in the Sir Arthur Currie Memorial Gymnasium-Armoury on October 6, 1943, Lt.-Col. J. M. Morris, M.C., Commanding Officer of the McGill C.O.T.C., read the roll of honour of McGill men reported killed, dead on active service, or missing, during the period from Founder's Day, October 6, 1942, to Founder's Day, 1943, those present standing in respectful attention.

The list follows:—

FACULTY OF AGRICULTURE

ARCHER, Squadron Leader Philip Leslie Irving, D.F.C.,
Royal Canadian Air Force,
Killed in Air Operations Overseas

BIRKETT, Pilot Officer John Evelyn Wreford,
Royal Canadian Air Force,
Killed on Active Service in Labrador

HORN, Lieut. John D'Arcy,
Princess Patricia's Canadian Light Infantry,
Killed in Action in Sicily

MacLENNAN, Flight Sergt. Charles Grant,
Royal Canadian Air Force,
Killed in Air Operations Overseas

MAY, Flight Sergt. David Merriman,
Royal Canadian Air Force,
Killed in a Flying Accident at Markland, Nova Scotia

PHILLIPS, Flight Sergt. Neil Seymour Hunter,
Royal Canadian Air Force,
Killed in Air Operations Overseas

SCOTT, Air Cadet Eugene Claude,
U.S. Army Air Corps,
Killed in a Flying Accident at San Antonio, Texas

SCHOOL OF ARCHITECTURE

MICHAELS, Sergt. John Lewis, M.M.,
Royal Worcestershire Regiment,
Killed in Action in the Middle East, 1941

FACULTY OF ARTS AND SCIENCE

ARCHBOLD, Lieut. Godfrey Thomas Alfred Sissener,
Royal Canadian Naval Volunteer Reserve,
Missing, Believed Killed in the Sinking of H.M.S. *Itchen*

McGILL U.A.T.C.
"E" Flight No. 13, S.F.T.S.
June 1, 1943

McGILL C.O.T.C.
Ceremony of Retreat—Fort Niagara, N.Y.
May, 1943

McGill's Military Training Programme

McGill C.O.T.C.

By Lieut.-Col.
J. M. MORRIS, M.C., V.D.

DURING the winter 1942-43 McGill undergraduates continued their pre-officer and basic training in the McGill C.O.T.C., under the command of Lt.-Col. J. M. Morris, M.C., V.D.

Three Camps were held in the spring of 1943. The first, under the command of Major J. C. Hope, was held in the Sir Arthur Currie Memorial Gymnasium-Armoury from 25 April to 8 May for eighty-four cadets of the Faculty of Engineering. Using the Gymnasium-Armoury as a barracks was an innovation which worked out exceedingly well and gave the Cadets much invaluable experience.

The Second, and largest, Camp, for four hundred and sixty Cadets, from 12 May to 25 May at Niagara-on-the-Lake, was under the command of Major E. deL.Greenwood. In spite of extremely wet weather, which caused the Cadets to coin the name "Niagara-under-the-Lake," a great deal of very interesting and effective training was carried out. Apart from the regular training of the Cadets, an opportunity was given many of the Officers to qualify as drivers of trucks and carriers.

This Camp was honoured by visits from nearly all the Senior Officers of M.D.2 Toronto, the Commandant and Senior Officers of Fort Niagara, N.Y., Col. A. A. Magee, C.B.E., D.S.O., E.D.; Lt.-Col. T. S. Morrisey, D.S.O., E.D.; and Lt.-Col. J. M. Morris, M.C., V.D.

One of the most interesting events was a visit to Fort Niagara, N.Y., by a picked guard of Cadets and the Contingent Pipe Band. Taking their own flag pole and Union Jack they demonstrated the ceremony of "Retreat" in the presence of about three thousand American officers and soldiers.

Another much appreciated feature of this Camp was the trip to Niagara Falls, when the entire personnel of the Camp were the guests of "A" Wing.

The third and final Camp, held at Farnham, Que., for about two hundred Cadets, from 28 May to 12 June, was under the command of Major G. F. Savage. Training was carried on according to the regular syllabus, much time was spent on the ranges and in map work, and as many Cadets as possible received instructions in driving and maintenance of Army vehicles.

At the conclusion of this Camp, Major G. F. Savage was appointed G.S.O. Farnham Camp in charge of all training for the remainder of the Summer. With him were five of the McGill C.O.T.C. Instructors, A/R.S.M. Gregory, W., and C.S.M. Small, F. M., Gardiner, J. E., Tyler, J. E. G., and Collet, D. J.

During the period under review 370 members of the C.O.T.C. left the University for Active Service.

Many changes in the officer personnel have taken place. Major G. G. D. Kilpatrick, D.S.O., the Contingent Chaplain, was promoted to the rank of Colonel and appointed Director of Education of the Canadian Army with Headquarters at Ottawa.

Major D. B. Rexford, Second-in-Command, was appointed to the Directorate of Education at Ottawa with Col. Kilpatrick.

Major E. deL. Greenwood, formerly Adjutant, and latterly in charge of instruction in map reading and

LIEUT.-COL. J. M. MORRIS, M.C., V.D. is commanding officer of the McGill C.O.T.C.

engineering, was appointed Second-in-Command, to replace Major Rexford.

Major J. C. Hope, Officer Commanding "B" Wing, was appointed Officer Commanding the Canadian Army University Corps at McGill.

Capt. E. G. Charters was transferred to the 2 (R) Medium Regiment R.C.A., promoted to the rank of Major and appointed to the command of a battery.

Capt. R. M. Curry, Adjutant, was transferred to H.Q., Military District No. 4 and appointed to "A" Branch. Capt. Curry was replaced as Adjutant by Capt. K. J. Doig, formerly of the 2 (R) R.M.R.

Capt. W. K. W. Baldwin, Second-in-Command "B" Wing, was transferred to the C.A. (B) T.C. No. 48 at St. Johns, Que.

Lieut. W. M. Ford was transferred to the 2 (R) Medium Regiment R.C.A., promoted to Captain and appointed Adjutant.

The following officers have all left for active service: Lieuts. C. F. Dumaresq, V. E. Fryer, G. K. Wright, C. F. Wood, F. K. Doody, R. E. Havill, B. J. Archambault, H. M. Cross, W. T. Stewart, P. B. Stewart, C. M. Patch, D. Diplock, S. C. M. Hawkins, P. H. Higgins, G. J. A. Perrault, E. D. Price, K. C. Simms, J. E. Swift, W. R. Trudeau, W. M. Wood, A. R. Kuntz.

By October, 1943, conditions in the Army had changed considerably, and nowhere was this more apparent than in the requirements for officers. Now Cadets from University C.O.T.C. do not necessarily obtain admission to Officer Training Centres as a result of their training, except in certain technical branches. Latitude has been granted in C.O.T.C. training, a result of which has been a more practical instruction in weapons, field craft, map using, compass work, etc. This training will tend to decrease materially the basic training required when the cadet enters the Services.

The old division between pre-officer and basic training has disappeared. All Cadets are in one organization in which training is arranged on a progressive basis under the direction of Majors G. F. Savage and E. C. Morris.

U.A.T.C. Training at McGill

By SQUADRON LEADER C. H. CARRUTHERS, R.C.A.F.

NO. 5 (McGill University) Squadron of the University Air Training Corps has begun its second year of activity, and Air Force training is now in full swing on the campus. The initial organization of the unit in 1942 was in the capable hands of Flt.-Lt. G. A. Firby, whose efficiency and understanding put the Squadron into successful operation.

The Squadron has a double function to perform: to provide training to satisfy University commitments and Government regulations regarding the service of undergraduates, and to encourage those students whose special interest is in Air Force service, thus providing a reservoir of aircrew candidates for the R.C.A.F. on the termination of their university career. It was, therefore, felt desirable that the Squadron should be under the command of a member of the University staff, who would have an understanding of the problems of the undergraduates, and the Principal nominated for the post, Dr. C. H. Carruthers, Professor of Classical Philology, who had been on the strength of the C.O.T.C. Dr. Carruthers was commissioned in the R.C.A.F. in March, 1943, with the rank of Squadron Leader, and appointed to be Commanding Officer of No. 5 Squadron.

SQUADRON LEADER CLIVE HARCOURT CARRUTHERS, R.C.A.F., commanding officer of the McGill University Air Training Corps is Professor of Classical Philology at McGill University.

The U.A.T.C. is a part of the R.C.A.F.—its fifth component. It was established by Order-in-Council in May, 1942, to give Air Force training to students while engaged in their academic education. Since that time 23 squadrons have been established at universities and colleges throughout Canada. Last year No. 5 (McGill) Squadron was one of the largest and most successful.

The Air Force staff was assisted in the instruction of the more scientific subjects by members of the University staff, who contributed their services voluntarily. These included Mr. T. H. Matthews, University Registrar, who acted as chief instructor in navigation, assisted by Dr. F. F. Osborne, Dr. J. E. Gill, Dr. W. B. Ross and Dr. G. Pall, and Prof. C. M. McKergow, who instructed in theory of flight. This session Mr. Matthews has continued as chief instructor, assisted by Dr. Ross and Dr. Pall, and three Air Cadet officers, who are High School instructors in navigation.

The U.A.T.C. syllabus provides for two years of progressive instruction. This year, therefore, the Squadron is divided into an advanced and an elementary group. The advanced group receives instruction in meteorology and theory of engines, as well as further work in navigation, signals, armament and other Air Force subjects. The first-year members follow the syllabus in force last year.

The complete training, which is spread over two university sessions and two camp-periods at an R.C.A.F. station, is essentially the same as that given in an Initial Training School, and covers nearly all pre-flight training. The U.A.T.C. graduate is enabled to pass quickly and easily through the period of instruction in the Air Force prior to actual flying.

The camp period in the spring, at the end of the University term, is particularly interesting and profitable for the members of the Squadron, as they obtain experience of actual service conditions, familiarization with the working of an R.C.A.F. station, and spend some time in the air.

During the session arrangements have been made for group-visits to Air Force stations in the neighbourhood of Montreal, and air-minded students are quick to take advantage of these opportunities.

On November 14th, No. 5 Squadron, attended by an R.C.A.F. band, participated in a combined Church Parade of the McGill training units, at which the chaplain was Sqdn. Ldr. W. S. Dunlop of No. 3 Training Command. Many favourable comments were heard on the good showing of the airmen.

The strength of the Squadron at present is slightly more than 250. Last year the greatest strength was 323 men, of whom over 200 attended the summer camp. The difference is due to two factors. One is the large number of men who have transferred to active service. The Squadron has the proud record of sending about 100 men into the active armed forces. The other is the increased stringency of recruiting requirements. The U.A.T.C. is now permitted to enlist only men of aircrew medical fitness, and the severity of this test eliminated a large number of applicants for enlistment this autumn. Undoubtedly, in its present set-up, the unit is a credit to the University and a useful adjunct to the R.C.A.F.

McGill U.N.T.D.

By Lieut.-Commander (S.B.),
V. C. WYNNE-EDWARDS, R.C.N.V.R.

A YEAR AGO plans were being completed for the formation of University Naval Training Divisions in the larger centres across Canada. For some time the universities had been the largest single source of Volunteer Reserve officers, and in some cities students were regularly attending night classes at the Reserve Divisional headquarters.

It was then too late to undertake a full training program in 1942-43. It was decided, however, to make a start. Through the co-operation of the C.O.T.C. and U.A.T.C., students who intended to join the Navy were released from those units in April in order to enlist in U.N.T.Divisions.

Thirty-five McGill students were accepted by recruiting and medical boards, and given three weeks active service training in May and June. The first week was spent at H.M.C.S. *Montreal*, Reserve Division Headquarters on Mountain Street. The students, now Ordinary Seamen, were kitted and given the rudiments of naval instruction. They were then drafted to H.M.C.S. *Cornwallis*, the new naval training establishment near Digby, N.S. For a day or two the U.N.T.D.'s were lost in the crowd, but in due course their special training got under way. Their time was fully occupied—in the gun battery with 4.7-inch and A.A. guns; in the seamanship school with bends and hitches, boats and signals; out on the Annapolis Basin pulling whalers and cutters; and on the Bay of Fundy in H.M.C.S. *Renard*, learning about asdic, depth-charges, sounding machines and seaboats, and all taking their trick at the wheel.

Of these thirty-five, eighteen are now on active service. The remainder are the "old hands" in the Division, whose present strength is eighty.

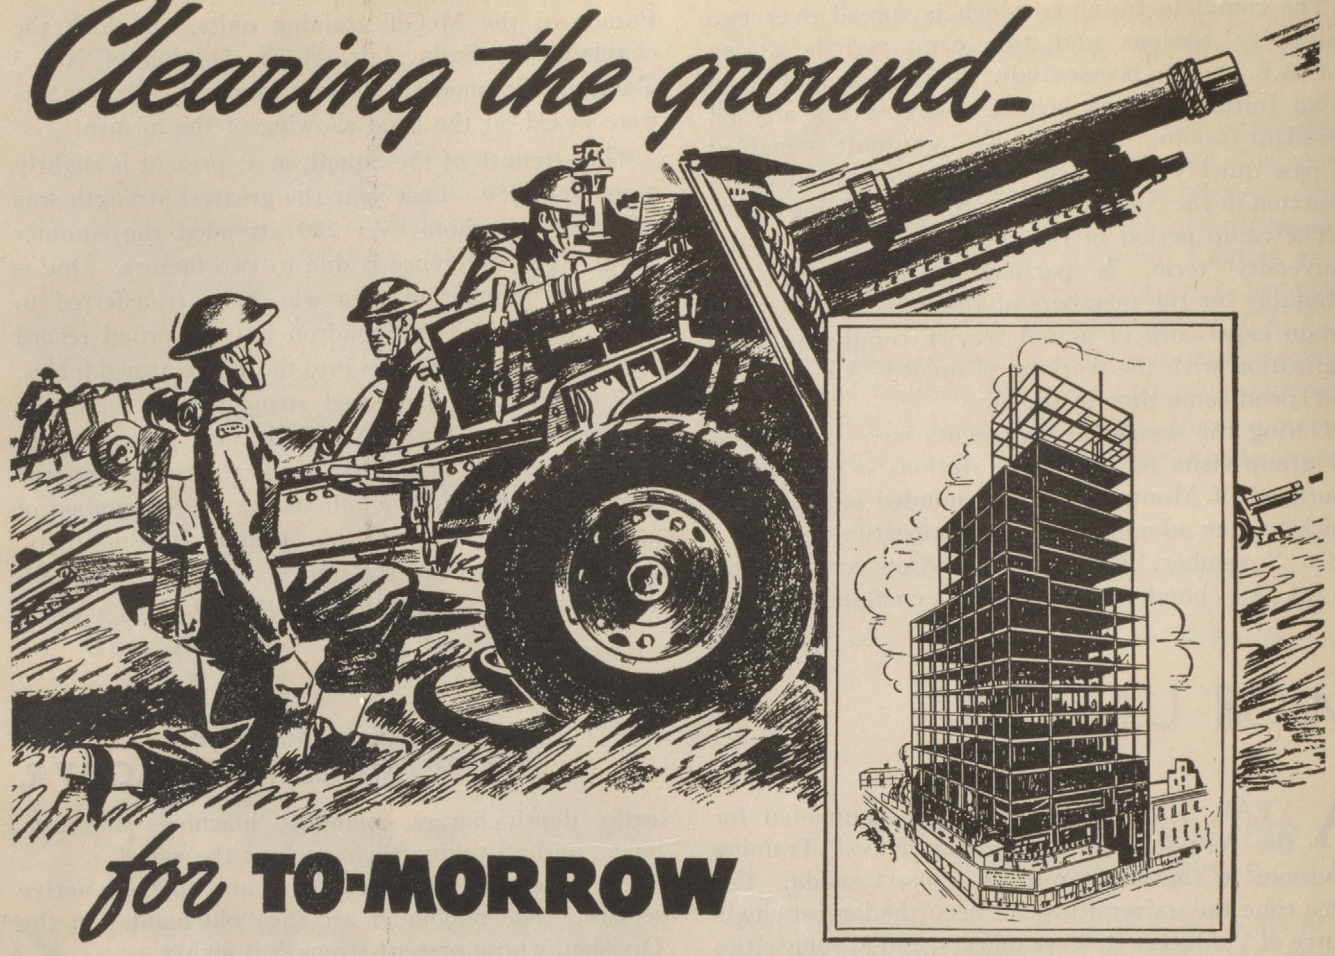

The medical requirements for students are the same as for active service ratings. Engineering students are offered special training at H.M.C.S. *Cornwallis*, and are entered as Stokers 2nd class. All others enter as Ordinary Seamen, except a limited number who, because of defective eyesight, can be admitted only as Telegraphists. They are all attested as members of R.C.N.V.R., but remain on "divisional strength" (that is, on reserve) except when undergoing spring training at the coast. Their uniforms are the same as those of active service ratings.

Training is now being done on Monday evenings in the McGill Gymnasium and on Wednesday evenings at H.M.C.S. *Donnacona* (formerly H.M.C.S. *Montreal*). A schedule has been drawn up, based on the old Reserve Divisions officers' course, but with much added material never previously taught in Canada. A great deal of thought has been given to U.N.T.D., because, though "officer candidates" as such are no longer being recruited, it is expected that a high proportion of U.N.T.D. ratings will attain commissions after they go on active service on leaving the university.

Next May, the Divisions will again be drafted to H.M.C.S. *Cornwallis* for two weeks active service training. The full programme is designed to cover three years.

LIEUT.-COMMANDER (S.B.) V.C. WYNNE-EDWARDS, R.C.N.V.R., commanding officer of the McGill University Naval Training Division, is Assistant Professor of Zoology at McGill.

Clearing the ground—

for TO-MORROW

THAT'S what our fighting forces are doing today—clearing the ground of poisonous Axis influence—ripping apart the whole vicious psychology of war, so that we can proceed to build a finer Canada.

For over sixty years Dominion Bridge Company Limited has been prominent in heavy construction. War has brought new skills, new techniques and new efficiencies to this already versatile organization.

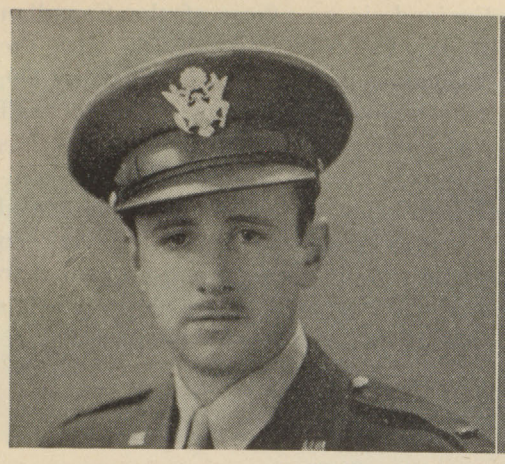

Thus equipped you will find us ready to meet the demands of post-war construction. Let us plan together now.

McGill University War Records—VIII

By
R. C. FETHERSTONHAUGH

THREE HUNDRED AND THIRTY-SEVEN new names have been entered in McGill University War Records since August 20, bringing the total number of cards on file on November 20, 1943, to 4,973. As in the previous three months, the increase was almost entirely in the Active Service categories, with the Army and the Royal Canadian Air Force predominating. A smaller group of cards represented enlistments in the Royal Canadian Naval Volunteer Reserve and the Women's Services. Forty-nine cards were added to the United States Armed Forces file, bringing the total to 377. Most of the American enlistments were in the Medical and Dental Corps of the United States Army and United States Naval Reserve, but, from among the American undergraduates registered at McGill in Arts, Science, or Engineering, a number enlisted for training in the U.S. Army Air Corps.

Though the total of McGill men killed and missing had increased by November 20 to 138, five officers, reported missing at different times, had previously been transferred from the Killed or Missing file. Two were restored to the General Active Service file, and three were docketed among the Prisoners of War. This was the most satisfactory transfer from the Killed or Missing file in any three months' period since the war began.

In addition to the reports of new enlistments, much information reached the War Records regarding the Active Service of McGill men and women all over the world. Through the Graduates' Society and other channels, many of those serving in the Armed Forces advised us of promotions or new appointments; and additional information was gathered by our honorary correspondents from the Montreal and out-of-town press. As usual, a summary of the information gathered in this way appears in the *On His Majesty's Service* section of this issue.

Once more, we invite the help of those who read the News in keeping the University's service records up to date. News about McGill men and women in all branches of wartime service is wanted. Photographs, either finished photos or glossy prints, are invited for the University's permanent war collection. These, and all correspondence, should be addressed to The McGill News, 3466 University Street, Montreal, or to

WAR RECORDS,
Registrar's Office,
McGill University.

At either address, photographs or letters from McGill graduates or undergraduates on Active Service, or news about them from their friends or next of kin, will receive a cordial welcome.

CHRISTOPHER VOKES, D.S.O.

B.Sc. '27

Throughout the operations of Canadian troops at Valguarnera, Leonforte, Agira, and Sciarone in Sicily, it was clear from press despatches that the 2nd Cana-

R. C. Fetherstonhaugh, Vice-Chairman of the Editorial Board of the McGill News and Editor of the "On His Majesty's Service" section, is in charge of McGill University War Records.

McGILL UNIVERSITY WAR RECORDS *Can. Army photo*

Decorated for Gallantry in Sicily

dian Infantry Brigade had enjoyed leadership of a high order, but it was not until September 23, when Brigadier Christopher Vokes was awarded the D.S.O., that McGill learned who had commanded the brigade, or of the gallantry the commander had shown, particularly in the hard fight for Leonforte on July 21st and 22nd. Here, when one company of his brigade was disorganized by enemy fire and by the flames of burning crops, Vokes personally reorganized the position, disregarding shell fire, which was intense, and the equally deadly covering fire by German mortars and machine-guns. In the words of the D.S.O. citation, "his forceful drive and aggressive spirit were a tremendous inspiration to his men and resulted in the final clearance of the strong enemy positions at Leonforte, inflicting heavy casualties on the enemy." Brigadier Vokes, a graduate of the Royal Military College of Canada, of McGill, and of the Staff College, Camberley, England, is an officer of the Canadian Permanent Force. He crossed to Britain with the 1st Division, Canadian Active Service Force, in 1939, and served for more than two years as a General Staff Officer at Divisional Headquarters in England. His promotion to Brigadier and his appointment to command the 2nd Can. Infantry Brigade were announced in June, 1942. Since he won the D.S.O., he has been promoted to Acting Major-General and appointed to the command of a Canadian Division in Italy. His photograph appears on the cover of this issue.

GEOFFREY WALSH, D.S.O.

B.Eng. '33

In many ways the Sicilian campaign was an engineering battle. Much of the fighting was in a type of country where quick and effective road-building and bridging operations provided the only key to

success and where the enemy, taking advantage of the terrain, had developed the science of demolition and road-obstruction to a point hardly equalled previously in military history. South of Leonforte, Lieut.-Col. Geoffrey Walsh, Commanding the Royal Canadian Engineers of the 1st Canadian Division earned the D.S.O. for his part in the bridging operations which contributed vitally to the victory the Canadians won. He took personal command of the work, which was carried out at night, and saw that the job was completed, despite the fire of German machine-guns and mortars from positions less than one hundred yards away and the threat of three German tanks, whose crews, aware of the important work in progress, tried in vain to smash the working-party's defences. A graduate of the Royal Military College of Canada, as well as of McGill, Lieut.-Col. Walsh had previously won distinction as Commander of the Royal Canadian Engineers who took a notable part in the Spitzbergen expedition in 1941.

ROWAN CORRY COLEMAN, M.C.
B.A. '36

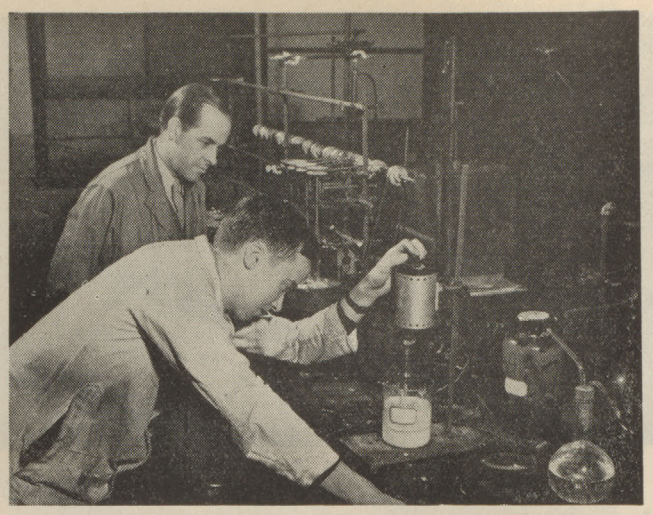

Contributing to the traditional association of the University and a famous regiment was the award of the Military Cross to Major R. C. Coleman, Princess Patricia's Canadian Light Infantry, for gallantry in the fierce fighting at Leonforte, Sicily. There, as a correspondent wrote, the Patricias "did a magnificent job." Describing the action, the Canadian Press representative cabled on July 25: "Through shattered streets of this mountainside town, the Canadian troops fought their grimmest battle of Sicily. Bloody and confused fighting raged all day in boiling heat. By nightfall German resistance had ended. The first company into the town was commanded by Major Rowan Coleman, of Montreal, who served with the British First Army in Tunisia last winter. On the main street and down sinister alleys, there was evidence later of the no-quarter struggle. Piles of German dead at street corners were awaiting burial." Major Coleman, who won his M.C. in this stricken town, is a son of D. C. Coleman, Montreal, President of the Canadian Pacific Railway, and went to the Patricias as a reinforcement officer after qualifying with the McGill Contingent, C.O.T.C. He took his Arts degree at McGill and a Law degree at Dalhousie University, Halifax.

WILLIAM KENNETH HERON, M.C.
Sci. 1935-'38

Fourth on the list of McGill men granted immediate awards for gallantry in Sicily was Lieut. W. K. Heron, Royal Canadian Engineers, who won the Military Cross for his rescue of a group of Canadian tanks, caught in a German tank-trap near Dittaino Station, south of Assoro. The tanks had run into the trap, one had been blown up, and three, unable to move because of the encircling mines, were stranded in the open, in immediate danger of destruction. Under heavy mortar fire, which killed a brother officer, Heron led a platoon to the rescue and, in two hours of dangerous work, cleared a path through which the tanks lumbered to safety. Lieut. Heron, whose home is in Asbestos, P.Q., had enlisted in the ranks of the Royal Canadian Engineers, had gone overseas as a sergeant in June, 1940, and had won his commission in England. He is now serving with the R.C.E. in Italy.

ROLPH JOHN DOEHLER, M.B.E.
B.Eng. '40

Membership in the Military Division of the Order of the British Empire has been granted to Flying Officer (now Flight Lieut.) R. J. Doehler, Royal

McGILL UNIVERSITY WAR RECORDS *National Film Board photo*

R.D.X. RESEARCH AT McGILL

DR. BOYER Watches an Interesting Experiment

Canadian Air Force, for the courage and devotion to duty he displayed during a serious fire at an R.C.A.F. Station in England. The fire started when the bomb load of an aircraft standing in the dispersal area detonated. Soon a second aircraft caught fire and its bomb load exploded. Flying Officer Doehler was running to help deal with the first explosion when the second hurled him to the ground. Badly shaken, but still capable of brave and decisive action, he got to his feet and climbed into a third aircraft, which he taxied to safety. In the opinion of those who later considered the scene and the circumstances of the fire, his action prevented the destruction of the third aircraft and almost certainly saved the lives of a number of the station personnel. Since the incident in which he won the M.B.E., Flight Lieut. Doehler served for a time in North Africa and the Central Mediterranean area, but returned to England in mid-November. His promotion to Flight Lieut. was reported at that time.

RICHARD J. McCOMBE, G.M.

Sci. 1921-'22; App.Sci. 1924-'25

Sharing with Flying Officer Doehler and others in the gallant work of rescue during the fire at a Canadian Air Station in Britain, mentioned above, Flight Lieut. (now Squadron Leader) R. J. McCombe, Armament Branch, Royal Canadian Air Force, won the George Medal for his bravery. On a previous occasion, he had shown "great calmness" when an aircraft caught fire near a 4,000-pound bomb, and in this instance, too, his cool and determined action was of immeasurable value. Though thrown to the ground by the explosion of one plane, he quickly recovered and joined with the Medical Officer of the station in the rescue of two injured airmen. After these had been taken to hospital, McCombe loaded other wounded into his car and drove them to safety, "remaining unperturbed and thinking only of those he had rescued," despite a further shattering explosion, which drove two great fragments of metal through the door of his car. The award to him of the George Medal was announced by R.C.A.F. Headquarters, Ottawa, November 12, 1943.

MASSEY WILLIAMSON BEVERIDGE, D.F.C.

B.Com. '40

In recognition of his long and effective service as a Fighter Pilot, Squadron Leader M. W. Beveridge, R.C.A.F. was awarded the Distinguished Flying Cross, November 12, 1943. As far back as October, 1942, he was described in press despatches from a Fighter Squadron base in England as one of the two remaining originals of the first R.A.F. Night Fighter Squadron, and last May a Canadian press release carried the news of his transfer to a different unit, with particulars of his success in damaging three enemy aircraft during an intruder patrol over Northern France. Referring to the work of Beveridge and his observer (Sergt. Bays, of the R.A.F.), the D.F.C. citation noted: "As pilot and observer, they have undertaken many successful sorties against enemy airfields. During a recent operation, they shot down two enemy aircraft, one of them after a long pursuit. Their skill and tenacity were highly commendable. Sqdn. Leader Beveridge is a most efficient flight commander who has set a fine example of devotion to duty."

JAMES SCHOLES THOMSON, D.F.C.

Sci. 1939-'41

Just as this issue is going to press, word has reached us of the award of the Distinguished Flying Cross last September to Pilot Officer J. S. Thomson, of Vancouver, who left McGill to join the Royal Canadian Air Force in February, 1940, and for the past two years has been serving overseas. Full details of the award have not yet been received, but it is known that the cross was granted for "exceptional skill as a pilot, who can always be relied upon to press his attacks with the utmost vigour." Pilot Officer Thomson is a brother of Capt. Robert Key Thomson (B.Com.,'41), who is also serving overseas.

R.D.X.

For many months we have eagerly awaited the time when it would be possible with propriety to mention in these columns the part taken by McGill chemists in developing the devastating explosive known as "Research Department Explosive," or, simply, as "R.D.X." A secret for more than two years, recent public references to the subject by Ministers of the Crown and in the press have removed R.D.X. from the list of forbidden topics, with the result that readers of the NEWS may at last, without breach of censorship

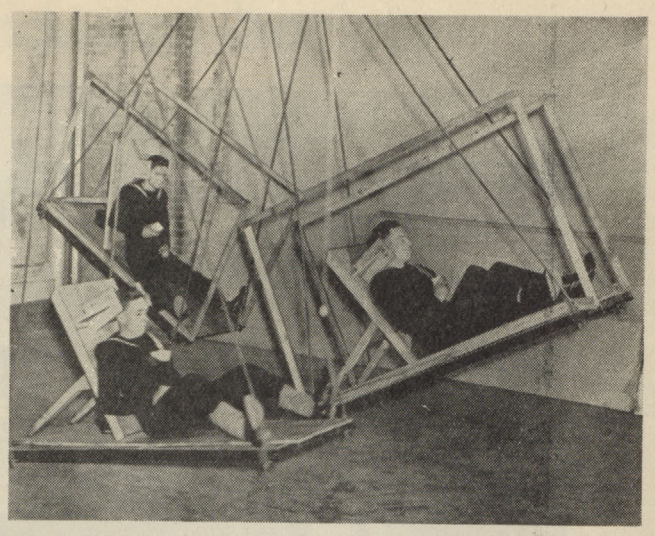

regulations, be told of a great contribution by McGill to the Allied Nations' cause.

In its Canadian phase, R.D.X., which is far more powerful than T.N.T., dates back to a time early in the war, when Dr. James Hamilton Ross (B.Sc.,'20), Lecturer in Chemistry, undertook for the National Research Council and the Department of Munitions and Supply the task of developing at McGill production methods for super-explosives. After some months, with the help of Dr. Raymond Boyer (B.A., '30; Ph.D., '33), Lecturer in Chemistry, Dr. R. W. Schiessler (M.Sc., '41), Dr. H. S. Sutherland (M.Sc., '29; Ph.D., '31), and others, a reaction was evolved which seemed promising as the basis of an industrial process for R.D.X. production. It was, however, so different from older processes that some doubt arose as to the actual character of the product.

In these circumstances, a comparison with the British equivalent of R.D.X. became essential, and there was no time to lose. Accordingly, Ross and Sutherland started for Britain by air, taking a twenty-pound sample of the McGill product with them. In Newfoundland, they were told that the remainder of the trip would have to be flown at a height where freezing temperatures must be expected. What would frost do to their explosive? And how would the stuff act when the plane coasted down from a great height to the warmer temperature at ground level?

When dealing with a new explosive, whose oddities of behaviour are unknown, such questions as these are vital, quite literally so when, as on this occasion, the explosive was being carried in a plane with passengers and crew whose lives would depend upon the answers. Unable to state positively what the consignment of R.D.X. might do, if subjected to the sudden changes of pressure and temperature now foreseen, Ross and Sutherland decided to reduce the risk, to the extent the circumstances would permit, by providing the explosive with the heat their own bodies could supply. Hugging or lying on the packages of explosive, therefore, they set out on the aerial voyage; and the fact that R.D.X. is now produced by the new method in Canada, Britain, and the United States may be taken as proof of the memorable success their courage attained.

Improvements in the new method of producing R.D.X. now stand to the undying credit of scientists in the Universities of Toronto and Michigan, but the proud basis of the work rests solidly at McGill. When an account of the University's scientific contribution to the victory of freedom may be written, and the time for that is not yet, the work of Ross, Boyer, Sutherland, Schiessler, and their associates will find a place, not unrivalled, it is true, but deserving of commendation beyond the usual. In the King's Birthday Honours List last July 2, Ross was awarded the M.B.E. No particulars could be given

SEA-SICKNESS RESEARCH AT McGILL

Naval Ratings Tested on the Sickness—Producing Swing at the Montreal Neurological Institute

at that time, though it was widely realized that the citation "for valuable public service in the field of scientific research" covered work of great distinction. The details given above are summarized from accounts which have already appeared in the Montreal press. McGill will be proud indeed when the whole story can be told.

RESEARCH IN SEA-SICKNESS

Soon after McGill's part in the development of R.D.X. was revealed, the Royal Canadian Navy released the story of another investigation in which the scientific staff of McGill took a leading part. As a result of the research, which continued for many months, a simple remedy for sea-sickness was evolved and proved to be effective in approximately seventy-five per cent of the large number of persons tested. In view of the amphibious warfare for the Allied Nations which clearly lies ahead, the importance and timeliness of this result can hardly be exaggerated. Those who witnessed or shared in the misery of the troops during some of the summer landings in Sicily have told how vital in such operations the control of sea-sickness might be.

Under Dr. Wilder Penfield, C.M.G., Professor of Neurosurgery and Director of the Montreal Neurological Institute, the McGill phase of the research involved at one time or another many of the University's physicians, surgeons, chemists, and scientific personnel, while a similar group, under Surgeon Capt. C. H. Best, R.C.N.V.R., co-discoverer of insulin, joined in the study at the University of Toronto. At McGill, the first steps in the concentrated application of available talent to the problem were taken by Dr. W. J. McNally, Lecturer in Oto-Laryngology, and

IN FRIENDLY OLD QUEBEC

Annual Meeting of Graduates' Society

THE Annual General Meeting of the Graduates' Society was held this year in the Officers' Mess Room of the Sir Arthur Currie Memorial Gymnasium-Armoury on Founder's Day, October 6, at 8.15 P.M., about 110 members being present, including the following:—

Fraser Keith, president; Dr. F. Cyril James, principal and honorary member; J. B. Woodyatt, vice-president; Hugh Crombie, G. McL. Pitts, and Gordon Gale, graduates' representatives on the Board of Governors; Dr. A. D. Campbell; R. E. Stavert; Dr. C. J. Tidmarsh, president, Montreal Branch; Miss Dorothy M. Roberts, president, Alumnae Society; Alex Stalker, president, Students' Council; George C. MacDonald; Lt.-Col. J. M. Morris; Geo. MacLeod; F. W. Cowie; Dr. A. T. Bazin; Walter Hunt; Leslie Buzzell; James S. Cameron; Professor O. N. Brown; Professor G. J. Dodd; H. E. Herschorn; Miller Hyde; Allison Walsh; Dr. A. S. Lamb; F. I. Ker, president, McGill Society of Ontario; E. G. McCracken, secretary, McGill Society of Ontario; Dr. C. K. P. Henry; Mrs. Buchanan; James MacLeod, editor-in-chief, McGill Daily; and the following officers of Faculty undergraduate societies: Engineering—James Maclure, president, Rex M. Freeman, vice-president and Robert Campbell, secretary; Arts and Science—David M. Armstrong, president; Medicine—John I. Bates, president, Bob Boright, vice-president; Law—Lloyd McClintoch, president, Maurice Godbout, vice-president; Dental—Robert H. Graves, president, Angus M. MacQueen, vice-president; Architecture—A. Ortega, president, J. L. David, vice-president; Theology—W. J. Bishop, vice-president; McGill Union—James H. Darragh, vice-president, Jack Pye, secretary; Mr. and Mrs. John Rhind; H. B. MacLean; David C. Munro; Thomas R. Townsend; Gordon D. Hulme; Dr. Harvey Angrove; Captain Melborne Doig; W. T. May; Mr. and Mrs. R. N. Coke; W. G. Wilson; James McL. Packam; Paul G. Gauthier; Dr. Lewis Eric Reford; Phil Giers; Miss Anna Denton; Hugh Leitch; Lewis Moore; Buddy Jewett; E. C. Duff; A. J. Livinson; Miss Kathleen Flack; Mrs. Charters; Miss Dorothy Weir; Douglas England.

Principal James gave the Founder's Day address, calling attention to McGill's great tradition and the fact that the Faculty of Arts and Science began 100 years ago. He referred to the rapid growth of the University and said that since 1930 alone the Sir Arthur Currie Gymnasium-Armoury had been constructed as well as the Douglas Hall residence for male students, some improvements had been made in the Physics Building, the Allan Memorial Institute of Psychiatry had been set up through the co-operation of the University and the Royal Victoria Hospital, and the School of Physiotherapy opened to train technicians essential for the rehabilitation of wounded men returned from overseas. In addition Stoneycroft Farm had recently been acquired at Ste. Anne de Bellevue enabling the expansion of research at Macdonald College, and a pension plan had been instituted covering all full-time members of the University staff.

Referring to McGill's continued needs the Principal mentioned increased endowment funds in order to establish a higher scale of salaries for some of the outstanding chairs as well as to increase the teaching staff in several over-worked departments. More scholarships and bursaries are also wanted, he said, and the extension of the Redpath library which greatly needs increased space is a pressing problem. A new Mining and Geology building is needed and both the Engineering and Chemistry buildings require reconstruction to equip the laboratories and worskshops with the many modern facilities being developed. Greater residential accommodation for students is also needed, and it is hoped that some day a swimming pool and extension to the gymnasium can be built, Dr. James continued.

Referring to the need for trained scientists as well as those filled with the traditions of the humanities, wise in the knowledge of men and of history, to search out solutions to the problems of national and international political organizations in the difficult post-war period, he pointed out that it will be the responsibility of the universities to train successive generations of students capable of solving these problems.

The Principal was pleased to be able to announce that a Special Committee composed of Governors and members of the Senate under his own Chairmanship had been set up to survey McGill's needs and prepare a statement of what things should be done now so that the University would be ready to make a maximem contribution to the development of Canada during the years of reconstruction that will follow the war. A Finance Committee under the Chairmanship of Mr. J. W. McConnell had also been established to explore ways and means of providing funds to meet the University's needs.

Principal James was introduced by Fraser S. Keith, President of the Graduates' Society who occupied the Chair, and was thanked by Past President Gordon McL. Pitts.

In opening the meeting Mr. Keith referred to the absence for over three months of the hardworking executive-secretary, Gordon B. Glassco, due to illness, stating that he was now convalescing, however.

The various reports of the Society were then read and may be summarized as follows:—

Honorary Secretary's Report for the Year

The annual report of the Honorary Secretary by F. J. Cunningham was read by Leslie Buzzell. In this report the activities of the Society during the past year were reviewed, with reference being made to the Leacock booklet; the five radio broadcasts entitled "Science at War"; the sending of the "News" to all graduates on active service; the commemoration of the Centenary of the Arts Faculty by a special edition of the "News"; the establishment of two new branches, Sudbury and Trail, and the revival of the Halifax Branch; the election to Honorary Membership of General A. G. L. McNaughton, B.Sc. '10, M.Sc. '12, LL.D. '20, and P. D. Ross, B.Sc. '78, LL.D. '36, and to Emeritus Membership, Dr. H. S. Shaw, M.D. '94, Jeffrey Fiske, B.C.L. '68, McGill's oldest living graduate, and J. C. Simpson, B.Sc. (Arts) '07; the loss sustained by the University by the death of the Chancellor, Sir Edward Wentworth Beatty, G.B.E., and of the chairman of the Editorial Board of THE

Statement No. 1

The Graduates' Society of McGill University

BALANCE SHEET AS AT 31st AUGUST, 1943

ASSETS

Cash on hand and in bank	$932.07	
Due from Branch Societies	90.00	
Accounts Receivable	14.25

Approved on behalf of the Executive Committee:
(Signed) A. A. TOUSAW,
Honorary Treasurer.

AUDITORS' REPORT TO THE MEMBERS

We have examined the books and accounts of The Graduates' Society of McGill University for the year ended 31st August, 1943, and we have obtained all the information and explanations which we have required. We have been furnished with audited financial statements of The Endowment Fund, which was not examined by us. A summary of such financial statements is included in the above Balance Sheet.

In our opinion, the above Balance Sheet is properly drawn up so as to exhibit a true and correct view of the state of the Society's affairs, according to the best of our information and the explanations given to us and as shown by the books of the Society.

(Signed) McDONALD, CURRIE & CO.,
Chartered Accountants.

MONTREAL, 28th September, 1943

Statement No. 2

The Graduates' Society of McGill University

COMPARATIVE STATEMENT OF REVENUE AND EXPENDITURE

For Year Ended 31st August, 1943

REVENUE

REVENUE FROM MEMBERSHIP DUES:			
Montreal Branch Society—			
Parent Society's share at $2.00 per member		$2,537.00	
Branch Society's allotment to Parent Society for clerical services at 50c per member		635.00	
		3,172.00	
Alumnae Society—			
Parent Society's share at $2.00 per member	346.00		
Less: Allotment to Alumnae Society in lieu of clerical services at $1.00 per member	173.00		
		173.00	
Other Branch Societies—			
Parent Society's share at $2.00 per member		1,730.00	
Members with no branch affiliation—			
Parent Society's share at $3.00 per member		2,925.00	
			8,000.00
Interest on investments and bank interest			576.12
McGILL NEWS:			
Subscriptions and sales to other than members			15.70
Advertising revenue		5,665.50	
Deduct: Proportion of salaries applied to advertising	1,200.00		
Advertising agent commissions	317.55		
Expenses incurred re advertising	10.42	1,527.97	4,137.53
PREMIUM ON U.S. FUNDS			157.70
TOTAL REVENUE			$12,887.05

EXPENDITURE

SALARIES	$7,223.54		
Less: Proportion allocated to McGILL NEWS	1,700.00		
	5,523.54		
Less: Contribution from McGill University	210.00		
		5,313.54	
McGILL NEWS:			
Cost of publishing	4,551.13		
Proportion of salaries applied to publishing	500.00		
		5,051.13	
Printing, Stationery and Office Expense		1,022.96	
Postage		454.14	
Provision for depreciation of furniture and fixtures		53.05	
Expenses incurred on behalf of McGill Associates		96.28	
Cost of distributing McGILL NEWS to graduates on Active Service		430.66	
Value of space in McGILL NEWS used for Graduates' Endowment Fund		84.00	
Miscellaneous expenses		95.72	
Production of motion pictures		23.96	
Publicity		1,163.07	
Travelling		—	
Bank charges		97.88	
Founders' Day Dinner expense		—	
War Records		19.98	
Radio broadcasts		285.44	
Annual general meeting		33.17	
			14,224.98
EXCESS EXPENDITURES OVER REVENUE			$1,337.93

McGill News, Professor Wilbert G. McBride; the appointment of Society representatives on various boards and the deep appreciation to Dr. A. T. Bazin for his contribution to his Society. On motion by Leslie Buzzell, seconded by Professor G. J. Dodd, the report was adopted.

Honorary Treasurer's Report for the Year

The Honorary Treasurer's report prepared by A. A. Tousaw, was read by James S. Cameron. This report made a review of the financial situation, the members present having in their hands a printed auditors' statement of assets and liabilities and revenue and expenditure for the year ended August 31st, 1943. The total revenue for the year amounted to $12,887, an increase of $1,173 over the previous year. The expenditures for the year amounted to $14,224, an increase of $2,240, of which the publicity account was responsible for $1,161, largely represented by the publication of "My Old College". Another item responsible for the increase was the radio broadcasts. Assets showed a total of $145,102, represented by investments of $17,100, Memorial Library Fund $10,868, Gymnasium Building Fund $18,226, and the Endowment Fund $98,906. On motion by James S. Cameron, seconded by Dr. C. K. P. Henry, the report was adopted.

Membership Committee

Report of the Membership Committee, presented by the chairman, Dr. A. D. Campbell. In this report Dr. Campbell referred to the continuous efforts to increase the membership, including the issuance of "My Old College" by Dr. Stephen Leacock, which was sent to all graduates whether members or not. The membership showed an increase of 625, bringing the total to 3,639, the largest membership on record. The McGill News is being sent to 1,711 graduates and past students in the services, indicating direct communication with 5,350 McGill men and women. On motion by Dr. A. D. Campbell, seconded by Miss Dorothy M. Roberts, the report was adopted.

McGill University Graduates' Endowment Fund

This report, as prepared by D. C. Abbott, K.C., and read by J. B. Woodyatt, quoting the auditors of the Fund, showed capital assets of $96,299. Revenue received during the year amounted to $4,160, from which a donation of $3,000 was made towards the maintenance and cost of the Sir Arthur Currie Memorial Gymnasium-Armoury. As a result of war conditions no appeal was made for donations during the year, but subscriptions from graduates totalled $592.85. On motion by J. B. Woodyatt, seconded by Dr. C. J. Tidmarsh, the report was adopted.

Board of Governors of the University

The report of the Graduates' representatives on the Board of Governors, by Hugh Crombie, in which he reviewed the activities of the Board of Governors for the past year, referred to the expiration of Dr. A. T. Bazin's term of office and the election of G. Gordon Gale for a term of three years. George Currie and Dr. Lewis Douglas tendered their resignations as members of the Board, and J. C. Newman, G. W. Spinney and Ross Clarkson were made members. Reference was also made to changes in the staff, and the course in personnel management with the collaboration of the Federal Department of Labour; also a course for radio mechanics, and, in collaboration with the R.C.A.F., facilities were provided for certain special and secret research and for nutritional laboratories. The University Air Training Corps was organized as well as a Navy Training Unit. Douglas Hall was taken over for the accommodation of 250 men undergoing training in the University Army Training Course. There was a bequest from Miss Isabella McLennan of her residence on Ontario Ave., which was converted into dormitories. The C.W.A.C. now occupy a large part of the buildings at Macdonald College. Stoneycroft Farm, adjoining Macdonald College, was purchased. Ravenscrag, adjoining the Royal Victoria Hospital on Pine Avenue, was converted into an Institute of Psychiatry. A joint hospital committee was created for co-ordinating the work of the two. On motion by Hugh Crombie, seconded by Geo. C. MacDonald, the report was adopted.

Editorial Board of "The McGill News"

This report, by Allison Walsh, referred to the severe loss suffered in the sudden death of the chairman of the Board, Professor W. G. McBride. The cost of publication of the "News" exceeded the budget figure, despite every possible economy. This was partly due to the necessity of printing more copies of the special anniversary number to commemorate the centenary of the Arts Faculty. The "On His Majesty's Service" and "War Records" sections by R. C. Fetherstonhaugh, continued to be a feature. Tribute was paid to the able work of T. H. Matthews as editor of the Book Review section, and to the unfailing interest of H. R. Morgan of Brockville, as well as Mrs. Murray of the Royal Victoria College, R. W. Jones and R. I. C. Picard of Toronto, who contribute largely to the Personals, Births, Marriages and Deaths items. A call was made for suggestions for improvement of the "News". On motion by Allison Walsh, seconded by R. E. Stavert, the report was adopted.

Advisory Athletics Board

This report was presented by the Society's representative, H. E. Herschorn. In accordance with the agreement of the Canadian Universities, only local competitions were participated in. A hockey team was entered in the National Defence Hockey League, consisting of Navy, Army, Air Force and McGill C.O.T.C. A basketball team was entered in the Montreal Basketball League. The football team played three exhibition games with the Army, Air Force and Verdun Grads. Intramural activities provided keen competition in every branch of sport. A ski house was provided for the M.O.C. members at Shawbridge. In addition to the regular use of the Stadium by the students, the facilities have been used by many organizations. The tennis courts were in constant use. On motion by H. E. Herschorn, seconded by Dr. A. S. Lamb, the report was adopted.

Alumnae Society

The president complimented the Alumnae Society on the excellence of the report given by the President, Miss Dorothy M. Roberts. The regular monthly meetings were held. The usual annual quota towards the Travelling Scholarship was met by holding a book fair. The Alumnae Red Cross group, under the chair-

manship of rs. E. P. Hoover, completed over 5,000 articles. The Scholarship fund was increased by over $3,000, through the generosity of the late Dr. Helen R. Y. Reid, enabling the Society to grant three $100 scholarships annually. Six bursaries were also awarded during the session. Bursaries of an annual value of $100 each for the B'Nai Brith Women's Auxiliary and The Local Council of Jewish Women are still administered by the Society; the Eliza Reid Memorial Scholarship was also awarded for the Montreal Women's Club. Annual grants were made to the University Settlement, the Ste. Anne's Military Hospital and the Montreal Children's Library. The Society was brought into contact with many branches of philanthropic work, through affiliation with the Local Council of Women, of which Mrs. Allan Smith is president, and the Canadian and International Federation. Nine Alumnae members attended the Ninth Tricennial meeting of The Canadian Federation of University Women held in Quebec in August, of which Miss Elizabeth Monk was re-appointed treasurer and Miss Catherine Mackenzie was elected second vice-president. Membership was increased by forty during the year. The Graduates' Society was thanked for the presentation of the Stephen Leacock booklet. Appreciation was expressed of the work being done by members of the Alumnae Society now on active service. On motion by Miss Dorothy Roberts, seconded by Mrs. Buchanan, the report was received.

Reports by Branch Societies

(a) *Ottawa Valley Graduates' Society*

The report, signed by the Honorary Secretary-treasurer, Gerald E. Rickwood, was read by G. Gordon Gale, in which reference was made to the inactivity of the branch because of war activities. The death of Brigadier-General H. F. McDonald, former president, was recorded. On motion by G. Gordon Gale, seconded by Professor O. N. Brown, the report was received.

(b) *McGill Society of Ontario*

The report of the McGill Society of Ontario, prepared by E. G. McCracken, secretary, was read by him. It showed that the McGill Society of Ontario is the most active branch of the Graduates' Society. Meetings are held in various districts and regular meetings held by the Toronto group from September to May inclusive on the third Friday of each month. A committee of members of the Society was formed to study, and so far as they were able, to assist in planning Post-War Economic and Social Reconstruction, of which sub-committees were appointed as follows: Social Studies—J. Nutter; Industrial—T. M. Moran; Natural Resources—P. D. P. Hamilton; Agriculture—J. H. McOuat; Construction—R. M. P. Hamilton; International—K. S. LeBaron; Fiscal—J. R. Frith; and general committee officers elected: Chairman—K. LeM. Carter; Vice-Chairmen, A. H. Galley and E. G. McCracken; Secretary, Graham Gore. Each of the sub-committees held meetings during the summer, and commencing in October the Society will hold a meeting each month, at which time one of the sub-committees will take charge and discuss its subject, the intention being to co-ordinate various sub-committees in order to gain a knowledge of the entire problem. Already considerable headway has been made. On motion by E. G. McCracken, seconded by F. I. Ker, the report was received.

(c) *Montreal Branch Society*

The report of the Montreal Branch was presented by the president, Dr. C. J. Tidmarsh. Owing to war activities and increasing pressure on the members, no formal meetings were held. Plans were made to have dinner on Founder's Day, but owing to hotel difficulties this was found impractical. The Membership Committee, under the chairmanship of A. A. McNaughton, did excellent work. During the year 222 new members were added, the Committee co-operating with the Membership Committee of the Parent Society. The finances of the Branch were in good condition. On motion by Dr. C. J. Tidmarsh, seconded by F. W. Cowie, the report was received.

* * * *

Additional Branch Society reports were also before the meeting, including New York Graduates' Society, Vancouver and District Branch, St. Maurice Valley Branch, Winnipeg Branch, Sudbury Branch and the McGill Graduates' Society of Great Britain. There were no reports from Chicago, Detroit, Noranda, Quebec, Rochester, Saskatchewan, St. Francis District, Victoria and Edmonton.

(d) *New York Graduates' Society*

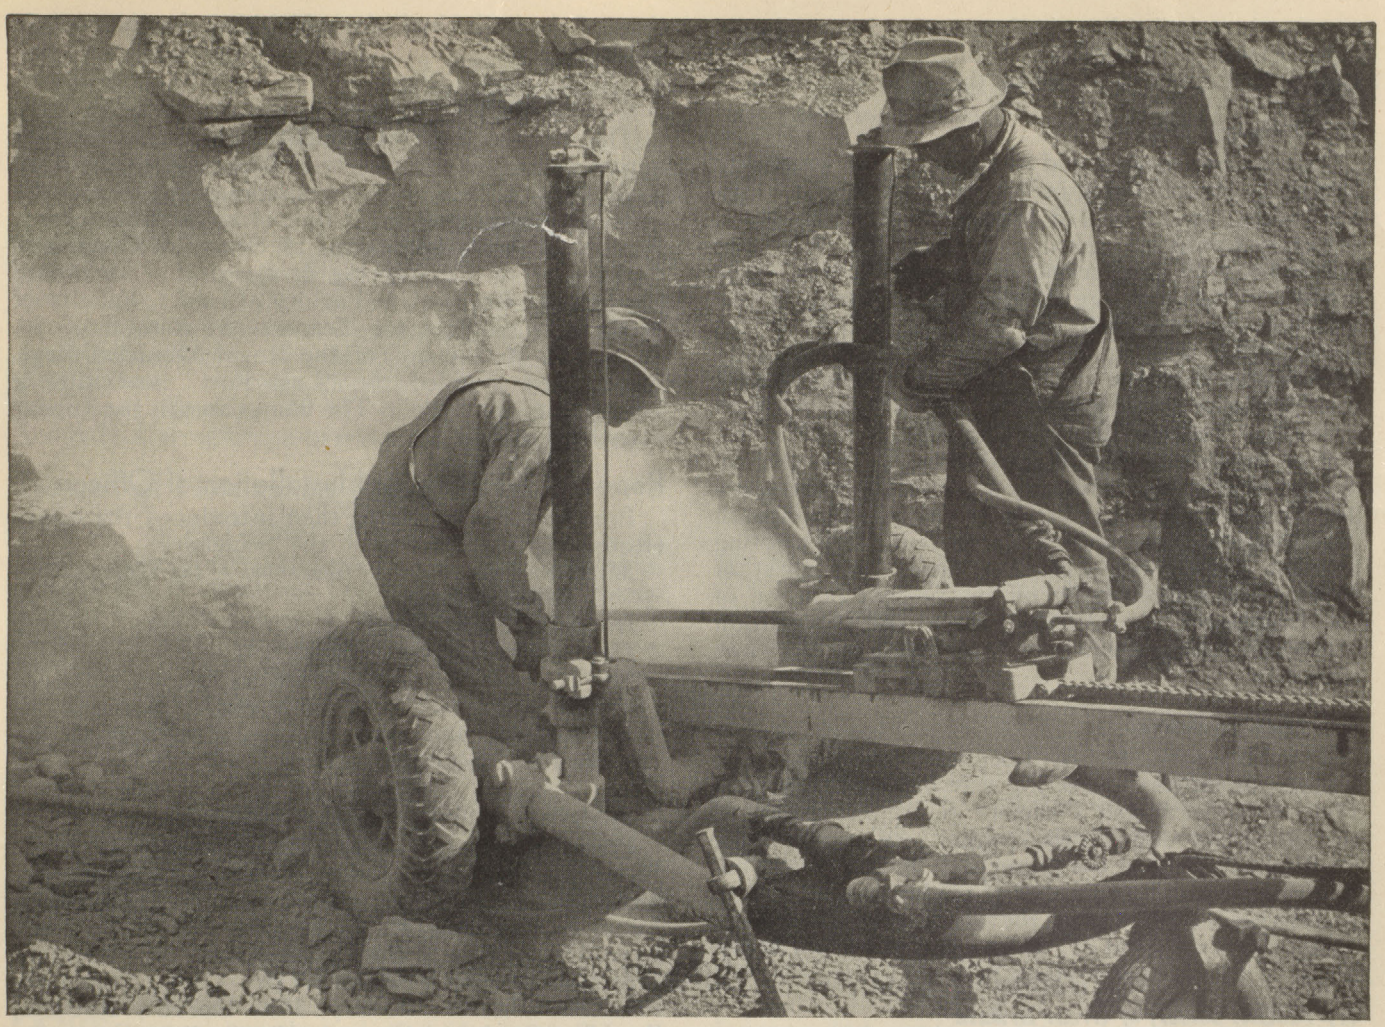

The report of the New York Graduates' Society was prepared by E. P. Aikman, Secretary-Treasurer, which shows considerable activity although this has been curtailed considerably during war years. The annual meeting held in November was attended by about 70 members. Several meetings of the Board of Governors were held to discuss Society affairs. At a luncheon meeting on November 14th, 1942, Principal Cyril James was guest of honour. Officers elected were: Mr. Douglas Cole, president; Mr. Otto Schmidt, first vice-president; Colonel F. E. Gendron, second Vice-President; Dr. E. P. Aikman, Secretary-treasurer. A $50 contribution to the Maple Leaf Fund was acknowledged at a recent meeting of the Board of Governors. Another meeting will be held in the near future.

(e) *Vancouver and District Branch*

The report of the Secretary, W. D. Leckie, stated that the Society had not been able to hold any special meetings, but that considerable interest was shown in the B.C. Medical Association this fall, when three members of the Medical Faculty of McGill went to Vancouver to take a leading part in the proceedings—Dr. D. Sclater Lewis, president, Canadian Medical Association; Dr. R. R. Struthers, and Dr. R. Gavin Miller. Reference was made to the honour paid Mr. Geo. Walkem, past president, when he was made a life member of the Professional Engineers Association of B.C.

(f) *St. Maurice Valley Branch*

The annual meeting of the Branch was held at Grand'Mère on March 27th, with 26 McGill men in attendance. According to a report sent in by A. H. Watier, Honorary Secretary-treasurer, a curling match was held in the afternoon of this meeting. Newly elected officers are: President, Dr. G. Kaine, Shawinigan Falls; Vice-President, H. T. Dawe, Grand'Mère; Vice-President, A. W. Peters, Trois Rivières; Secretary-Treasurer, A. H. Watier, Shawinigan Falls. A

meeting is to be held at the Laurentide Inn on Saturday, October 16th, at which Professor Ernest Brown, Doctor of Engineering, will be the guest speaker.

(g) *Winnipeg Branch*

Twenty-one women and ninety-five men constitute McGill graduates living in Winnipeg and the immediate vicinity, according to the report of G. M. Hutt, secretary-treasurer. Nearly half of the Winnipeg graduates hold engineering or science degrees, while medicine and arts are largely represented. These members are leaders in one or other activity in the community. The armed services have drawn many McGill men from the vicinity, and the Government is making use of many graduates. McGill has made an important contribution in educational institutions, and at present 15 McGill graduates are devoting all or part time in the University of Manitoba. Many are devoting much time to wartime activities. The Branch averages two dinner meetings each year. At a meeting held on April 27th, Principal James was guest of honour and spoke briefly on the present position of the University, its contributions to the prosecution of the war, and preparations being made for post-war activities.

(h) *Sudbury Branch*

The Secretary, D. R. Lochhead, submitted the report. A luncheon meeting was held on December 12th, 1942, at which Professor R. V. MacEwan of the University staff was the speaker. An acquaintance meeting was held in the home of J. F. Robertson before this meeting. A number of graduates gathered to spend a pleasant hour with the late Professor McBride. Active members total 34. Regret was expressed at the illness of Mr. Glassco.

(i) *McGill Society of Great Britain*

The report of the McGill Society of Great Britain was represented by a telegram forwarded by G. E. Bell, secretary, of Birmingham, which read:—

> "Your letter September eighth received today stop regret activities our branch suspended during war stop send best wishes to all McGill and Parent Society".

Report On War Records and Tribute to McGill Men who have made the Supreme Sacrifice

Dr. A. T. Bazin expressed the feelings of The Graduates' Society towards McGill men and women who are engaged on active service, and paid tribute to those who will not return. "The names of many are enrolled, and as the years of conflict roll on the number becomes more and more impressive. Many others are doing their bit without recognition. In mounting degree the sacrifice is endured by those enlisted men and women who are sent to distant fields and are separated from wives and families. Nor would we forget—in our tribute—the sacrifice made by the wives and children left behind. But how shall we speak of those who will not return—those who have made the supreme sacrifice! The sacrifice of the few for the freedom of the many! No feeble words can repay the debt we owe to these honoured dead—and their grieving loved ones. Every casualty list should make us humble, and resolved to do all in our concerted power to maintain and perpetuate that "freedom of the individual" for which they fought, and, in fighting, died."

Roll of Honour

The Honour Roll of McGill men killed, died on active service or missing, was then read by Lt.-Col. J. M. Morris, those present standing—it includes the Faculty of Agriculture 7, School of Architecture 1, Faculty of Arts and Science 19, School of Commerce 9, Faculty of Engineering 6, Faculty of Graduate Studies and Research 1, Faculty of Law 1, Faculty of Medicine 9, School for Teachers 3—a total of 56. Bugler K. A. Piersey, of the Royal Montreal Regiment, then sounded the "Last Post", and after a brief pause "Reveille". The names on this list appear elsewhere in this issue.

Report of Elections and Installation of Officers

President Fraser Keith then introduced the newly elected representatives of the Society:—

Member of the Board of Governors of the University—G. Gordon Gale.

Honorary Secretary—F. J. Cunningham.

Honorary Treasurer—James S. Cameron.

For Executive Committee—Dr. G. Stuart Ramsay, who was unable to be present; Kenneth B. Roberton, and Alex Stalker, President of the Students' Society, ex-officio.

Executive Committee as Constituted

President, Fraser S. Keith; Past President, G. McL. Pitts; Vice-President, James B. Woodyatt; Honorary Secretary, F. J. Cunningham; Honorary Treasurer, James S. Cameron; R. E. Stavert, Dr. A. R. MacLean, Dr. G. Stuart Ramsay, Kenneth B. Roberton; President Montreal Branch, Dr. C. J. Tidmarsh; President Alumnae Society, Miss Dorothy Roberts; President Students' Council, Alex Stalker; Executive Secretary, Gordon B. Glassco.

Vote of Thanks to Retiring Officers

The services of the retiring officers were eulogized by Hugh Crombie, who expressed the thanks of the Society to them, including: Dr. A. T. Bazin, representative on the Board of Governors; Dr. T. H. Leggett, Second Vice-President of the Executive Committee; A. A. Tousaw, Honorary Treasurer; Dr. A. D. Campbell, Member of the Executive Committee; and Miss J. Grace Gardner, Member of the Executive Committee.

Undergraduate Members Presented

At a meeting of the Executive, held previous to the Annual Meeting, Mr. Keith advised that he had invited to be present at the Annual Meeting, besides the chairman of the Students' Council Alex Stalker, James MacLeod, editor-in-chief of the McGILL DAILY, James H. Darragh, vice-president, McGill Union, the office of the president being vacant, Jack Pye, secretary, McGill Union, and the presidents and vice-presidents of all the Faculty undergraduate societies, including Engineering, Arts and Science, Medicine, Law, Dental, Architecture and Theology, and the secretary of the Engineering Society. They were elected to full membership status and were all present with one exception, Edward Ballon, vice-president of Arts and Science. After announcing that these men were present, the president called upon Dr.

Campbell to introduce them to the meeting, which he did in an interesting ceremony by calling all of them to the front of the hall, introducing them as follows: Alex Stalker, chairman, Students' Council; James MacLeod, editor-in-chief, McGill Daily; and the following officers of Faculty undergraduate societies: Engineering, James Maclure, president, Rex M. Freeman, vice-president, Bob Campbell, secretary; Arts and Science, David M. Armstrong, president; Medicine, John I. Bates, president, Bob Boright, vice-president; Law, Lloyd McClintoch, president, Maurice Godbout, vice-president; Dental, Tobert H. Graves, president, Angus M. MacQueen, vice-president; Architecture, A. Ortega, president, J. L. David, vice-president; Theology, W. J. Bishop; McGill Union, James H. Darragh, vice-president, Jack Pye, secretary.

Election of Nominating Committee

On motion by G. McL. Pitts, seconded by Dr. C. K. P. Henry, three members were elected to membership in the Nominating Committee for three years: Dr. A. T. Bazin, Dr. J. O. O'Neill and Colonel T. S. Morrissey, with the following as alternates in order named: E. Winslowe Spragg, Douglas Bremner, Shirley Dixon, K.C., and Mr. Justice MacKinnon.

Appointment of Auditors

On a motion by Dr. A. T. Bazin, seconded by G. McL. Pitts, the firm of McDonald, Currie & Company were appointed auditors for the ensuing year.

Annual Founder's Day Address

Principal James, now being present, was introduced and gave the address already referred to.

Vote of Thanks to The McGill Contingent C.O.T.C.

The president then asked Dr. C. J. Tidmarsh to take the chair, as the social part of the evening was under the jurisdiction of the Montreal Branch, which also provided refreshments. Dr. Tidmarsh first thanked Lt.-Col. J. M. Morris for his kindness in placing at the disposal of the Society the quarters so admirably suited for an annual meeting.

Sing-Song

Dr. Tidmarsh introduced Dr. A. S. Lamb, who led the singing, with Dr. Harvey Angrove at the piano. The members entered most heartily into this feature of the evening's programme, Dr. Lamb having provided slides whereby the audience could follow the words in every case.

Adjournment

Dr. Tidmarsh then invited the members present to partake of the refreshments supplied and enjoy a social hour for better acquaintance. The meeting adjourned at 10.30 p.m.

Montreal Branch Holds Annual Meeting

THE annual meeting of the Montreal Branch Society was held this year in the Grill Room of the McGill Union on October 19, at 8.15 p.m., the President, Dr. C. J. Tidmarsh being in the Chair, and the attendance including the following:—

Professor C. V. Christie, J. P. Anglin, T. M. Atkinson, C. S. Lyman, J. H. Holden, W. McG. Gardner, O. N. H. Owens, A. J. Livinson and G. B. Glassco, acting Secretary.

Mr. Buzzell's report as Honorary Secretary was read in his absence by Mr. Glassco. It referred to a membership increase from 1,163 to 1,351 members, giving credit to the Leacock "My Old College" booklet and to A. A. Macnaughton, Chairman of the Membership Committee.

In the absence of Mr. Macnaughton, the Honorary Treasurer, his report was read by Mr. Atkinson and duly adopted. It was decided to invest a portion of the surplus in Victory Bonds.

Dr. Tidmarsh in reporting on the year's work referred to the subjects discussed at the annual meeting in the previous year, such as the establishment of a Benefactor's Day and the choice of graduates in the selection of representatives on the City Council by the University. The successful dinner which was held to mark appreciation of the work done by Principal James, was reported. At a special meeting of the Executive Committee of the Parent Society called at the suggestion of the Montreal Branch Society's President, General A. G. L. McNaughton was elected an Honorary Member of the Society on January 20th, 1943, and in accepting this honour, General McNaughton said he will come to McGill to receive it in person on his next visit to Canada. The suggestion that higher degrees for graduates of the Faculty of Engineering be made available for extra-mural work had been studied and a report by Professor Christie and correspondence from the Dean of the Faculty of Graduate Studies were referred to in detail. In regard to the celebration of Founder's Day this year, it was planned by the Executive Council to hold a wartime informal dinner at which it was hoped the new Chancellor of the University (in case he should be appointed in time), would be the guest speaker. However, no appointment had as yet been made and great difficulties were encountered with the hotels in regard to holding a dinner under present conditions, so the celebration of Founder's Day in this method was considered impracticable; instead, the Montreal Branch had undertaken to provide entertainment and refreshments at the Annual Meeting of the Society, which was held on Founder's Day and was addressed by Principal James.

In closing his review, Dr. Tidmarsh thanked the members of his Executive Council for their assistance and loyalty during the year.

Mr. Holden, Chairman of the Nominating Committee reported the following nominations for the term of two years, and as no further nominations had been received they were declared elected:—

Vice-President, Mr. L. N. Buzzell; Honorary Secretary, Mr. T. M. Atkinson; Executive Council, J. P. Anglin, Dr. W. C. Bushell, Prof. Gordon Sproule, A. E. Sargent, S. Boyd Millen.

Mr. Holden's vote of thanks to the retiring officers was heartily accorded to the following:—

Vice-President, W. Taylor-Bailey; Honorary Secretary, L. N. Buzzell; Members of the Executive Council: J. P. Anglin, C. L. Brooks, J. G. Porteous, L. H. Timmins, Dr. T. R. Waugh; Chairman of the Nominating Committee, J. H. Holden; Members of the Nominating Committee, W. McG. Gardner, G. H. Fletcher.

On motion by Mr. Lyman, seconded by Professor Christie, the following were unanimously elected members of the Nominating Committee for the regular term of two years:—

Mr. W. Taylor-Bailey, Mr. C. L. Brooks, Dr. T. R. Waugh.

It was pointed out that as Professor Sproule has become a member of the Executive Council, it is desirable that a substitute for him as a member of the Nominating Committee, be elected for one year, being the unfinished portion of his term. Thereupon Mr. Holden nominated Mr. O. N. H. Owens as Member of the Nominating Committee for a term of one year which was seconded by Mr. T. R. Atkinson and unanimously carried.

To enable nominations for the Montreal Branch Society to be made at a more suitable time the action of the Executive Council, at its meeting on April 15, 1943, in amending By-law VI was approved, and a motion by Mr. Holden, seconded by Mr. Gardner, "That the word "June" in the second sentence of By-law VI be changed to read "Autumn" " was unanimously carried.

Mr. Livinson suggested that to overcome the lack of interest of McGill men in the Society, suitable documentary films be obtained from the Government or elsewhere and shown. It was suggested by Mr. Atkinson that the Executive Council obtain full information on the effect which the McGill Associates is having on the attitude of the Montreal graduates towards the Graduates' Society. This was followed by a discussion on the McGill Associates, in which information pertaining to them was given by those present, who were able to do so. Mr. Livinson suggested that the University be asked to allot one of its buildings now in use as a dormitory, after such time as it may not be used as such, for use by the Society as a McGill Club. He also suggested that those graduates who had replied to the questionnaire sent out by the Montreal Branch two years ago, be convened, with a view to ascertaining which of the suggestions might be carried out, and that the Society endeavour to recognize the Fiftieth Anniversary of the opening of the Redpath Library in some tangible way, such as asking each graduate if he would give at least one book to the Library, with a suitable inscription of his own wording. It was felt that many graduates would give more than one book.

Winnipeg Branch Annual Report

We are in receipt of the following report of the work of the Winnipeg Branch, submitted by its Secretary-Treasurer, G. M. Hutt:—

McGill graduates known to be living in Winnipeg and the immediate vicinity number 21 women and 95 men, a total of 116. This does not include those members of the various Services who have been stationed elsewhere, nor those whose activities in war industries have compelled temporary residence away from Winnipeg.

Nearly half of the Winnipeg graduates hold Engineering or Science degrees. There is always a large number of Medical and Arts graduates, and other courses are represented. Many of these men and women are leaders in one or other activity in the community, and most of them are taking responsible parts in building up this section of the Dominion. McGill is well represented in the Medical, Dental, Engineering, Legal and Theological professions. The Armed Services, too, have drawn many McGill men, and the University has also supplied several executive officials of important industrial enterprises, many of which are directly concerned with war production. Government, too, makes use of our graduates. At least 15 McGill graduates are devoting all or part of their time to the University or to related educational institutions, and through them McGill has contributed importantly to the building up of that high ranking seat of learning.

Most of the more recent graduates in this area are engaged in professional work that necessitates long absences from the city; their Winnipeg addresses are for mailing purposes only. A fairly large proportion of the graduates of longer standing are devoting much time to wartime activities. These two factors militate against the holding of frequent meetings of the Winnipeg Branch and make for a small attendance at such meetings; yet, the Branch averages about two dinner meetings per year and these provide a welcome and diverting means of the graduates getting together. At these gatherings, they have the chance of discussing McGill affairs with University and Society officials, with whom the Society has made arrangements for a Winnipeg engagement.

One meeting was held in 1943. On April 27th, the Principal was guest of honor at a luncheon meeting and spoke briefly on the present position of the University, its contributions to the prosecution of the war, and preparations being made for post-war activities.

Vancouver and District Branch Election

The annual meeting of the Vancouver and District Branch of the Graduates' Society was held on October 13, in conjunction with Mr. K. M. Cameron's visit and the following officers were elected:—

Honorary President, Dr. R. E. McKechnie; *President*, Dr. T. R. Nelles; *Vice-President*, Mr. Lemuel Robertson; *Secretary*, Mr. Alex Ree; *Treasurer*, Mr. W. W. Southam.

EXECUTIVE COMMITTEE

Medical Representatives: Dr. Gordon Mathews, Dr. H. C. Graham, Dr. E. E. Day.

Science Representatives: Mr. Gordon Darling, Mr. S. J. Crocker, Mr. J. Robertson.

Other Faculties: Mr. J. A. Wickson, Mr. Harry Boyce Mr. G. D. Leckie, Mr. Reg. Arkell.

We both like *Apple Pie and Cheese!*

● We of Canada and the United States are the world's outstanding example of "good neighbours".

We are unique in our understanding of one another, in our mutual confidence, in our fellowship.

And the things which make us good neighbours are as basic as our common liking for apple pie and cheese.

We speak the same language.
We enjoy the same jokes.
We sing the same songs.
We play the same games.
We work and worship to the same ends.

One of us flying the Union Jack, the other the Stars and Stripes, we both nourish deep in our hearts the same concept of freedom, the same human ideals. And we share an indomitable determination that no one shall ever take them from us.

★ ★ ★

Today our soldiers fight side by side in all parts of the world. And our citizens work shoulder to shoulder to supply them and support them in their grim task. We of The House of Seagram are proud that our great plants in Canada and the United States are manned by thousands of Canadians and Americans working together . . . engaged 100% in the production of high-proof Alcohol for War.

THE HOUSE OF SEAGRAM

Alcohol for War is used in the manufacture of Explosives, Synthetic Rubber, Navigation Instruments, Shatterproof Glass and many other products

McGill Society of Ontario Undertakes Notable Work

A MOST ambitious programme has been mapped out by the McGill Society of Ontario which has formed a series of seven sub-committees on Post-War Reconstruction and is undertaking a detailed study of the problems involved.

This work was favourably commented upon in an editorial in the Toronto *Globe and Mail* on October 21, which pointed out how important it is for Canadians to study the issues facing the nation and their solution and said in part, "In its inception and its development of its subject matter for study the McGill Society of Ontario is performing a most useful function."

The whole project is under the Chairmanship of K. LeM. Carter, with E. G. McCracken and A. H. Galley as Vice-Chairmen and Graham M. Gore as Secretary. The outline of studies sent to members declares that "the main principle and guiding thought is the idea that we Canadians must, by our own efforts, maintain a vigorous nation with opportunity and security for all—and that this committee believes that it can best be done under a system of free enterprise." Sub-committees are designated as follows:—Social, Industrial, Natural Resources, Agriculture, Construction, International, Fiscal. Each sub-committee will take over one of the monthly meetings of the Society this year.

The Social sub-committee is headed by Jack Nutter, and Jack Little, T. M. Fyshe, Bert Bishop, George H. Kingston and David Tough are members of it. This Committee plans to review the reports of Beveridge, Marsh, the Educational Committee of Canada and Newfoundland, and the report of the American Association for Social Security.

Chairman of the Industrial sub-committee is Tom Moran, and Walter Fowler, Clarence H. Fraser, R. (Dick) Richards, H. Eberts, A. B. Armstrong, W. J. Shortall, R. E. L. Johnson and E. M. Martin are members of it. Its scope includes study of post-war planning subdivided into governmental, industrial and international measures. Stress will be laid at first on industrial measures on the principle that "the role of industry is to continue its endeavour to produce as cheaply and efficiently as possible while showing its sense of social responsibility wherever it can." The industrial research will be subdivided into the following topical groups, (*a*) Product Research, (*b*) Plant and Equipment, (*c*) Manpower, (*d*) Distribution, (*e*) Financial.

The Natural Resources sub-committee is under P. D. P. (Phil) Hamilton, aided by P. D. Dalton, J. C. Hall and W. Wyse. It will study its subject under the following headings: (*a*) What Natural Resources should be exploited? (*b*) Priority of developments, (*c*) Rate at which the specific development should be prosecuted, (*d*) Jurisdiction under which the project should be undertaken (private enterprise, federal or provincial control, or a combination), (*e*) Conservation.

The Agriculture sub-committee is headed by J. H. McOuat and members are M. J. McHenry, Jack Ross, E. H. McLean, James Kirkpatrick and Rees Tapwell. It will study the history of Canadian agriculture, the causes of the ebb and flow of the agricultural population, immigration, production credit systems, rural education, developments in the field of nutrition, rural developments, the use of agricultural products in industry, exports, the optimum size of farms and farm marketing conditions.

R. M. P. (Bob) Hamilton leads the Construction sub-committee, assisted by J. R. Bradfield, K. Muir and R. Skelton as members. This committee has ascertained that 20% of average Canadian employment is attributable to the construction industry and therefore it should be made an important factor in smoothing out unemployment cycles in the future. Specific problems to be studied include (*a*) financial (public funds, private credits, industrial capital), (*b*) public construction, (*c*) private construction.

The International sub-committee chairman K. S. Le Barron has W. S. Ewens, Eric Crawford, A. A. Pitts, Rupert Reid, Reg. Shortford and David Duff on his committee. This group proposes first to study the causes of recent wars to secure the proper background for examining the various proposals made for handling world affairs in the future. A list of suggested readings has been prepared for the members with this in view. The examination of future problems will include peoples and standards of living, international administration, trade and economics, international finance, and proposals for federal unions.

The Fiscal sub-committee chairman is J. R. Frith, and its members are Bruce Spears, Gordon Nairn, Harvey Cotnam, and Major F. N. (Red) Reid. It will study the fiscal position of Canada, the work of the Bank of Canada, the national income and the effect of changes in it on government policy, and the effect of various post-war proposals, and will endeavour to obtain authentic information on the financial and monetary position of the Dominion for use by the other sub-committees as desired.

This committee intends to consult with the Social Committee concerning the probable cost of social security measures, giving consideration to the effect of social security on the government budget.

It will be seen from the above brief summary that the McGill Society of Ontario has undertaken some very valuable and serious war work and deserves great credit for so doing. We will await the reports of the committees on the results of their studies and the conclusions arrived at with great interest.

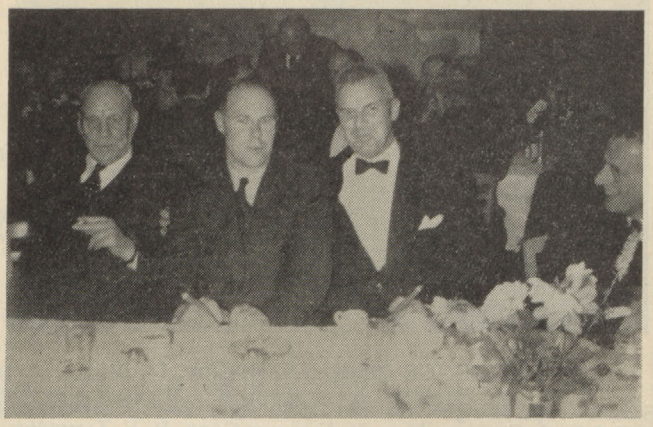

Victoria and District Branch Elections

At the annual meeting of the Victoria and District Branch of the Graduates' Society held on October 20, 1943, the following officers were elected:—

President, Harry L. Smith, B.A., '12; M.A., '26; Vice-President, G. M. Irwin, B.Sc., '19; Secretary-Treasurer, Dorothea Hay, B.A., '24; Executive Committee: Dr. Hermann Robertson, M.D., '97, J. B. Clearihue, B.A., '11, R. S. O'Meara, B.Com., '21, T. H. Johns, D.D.S., '25, Kenneth Reid, B.Sc., '26.

Dr. Robertson, the retiring President, reported on the activities for the year, and the Secretary-Treasurer, Alan H. Maclean reported a favourable bank balance of $136.97.

Kenneth M. Cameron Visits Western Branches

DURING the month of October, Kenneth M. Cameron, M.Sc., M.E.I.C., Chief Engineer of the Dominion Government Department of Public Works, and President of the Engineering Institute of Canada visited several of the western branches of the Graduates' Society in conjunction with a tour which he was making for the Engineering Institute. His first visit was at Winnipeg on October 5, where he was entertained at a luncheon given by the Winnipeg Branch in the Hudson Bay Company dining room. Owen C. Trainor, M.D. '20, the President was in the chair, and Mr. Cameron gave an outline of the work being done by the University during war time, much of which information was a revelation to the Winnipeg graduates. Thirty-one persons attended, including the following:—

Mrs. Norman Young, née Miss H. Moody, B.A. '20; Miss Edna Greer, B.L.S. '35; Dean E. P. Fetherstonhaugh, B.Sc. '99; Prof. A. E. Macdonald, M.Sc. '22; Walter M. Scott, B.Sc. '95; Lt.-Col. Geo. E. Cole, B.A. '02, B.Sc. '06; N. M. Hall, B.Sc. '07; A. B. Rosevear, K.C., B.A. '16; T. H. Kirby, B.Sc. '13; H. C. D. Briercliffe, B.Sc. '11; Alex Campbell, B.Sc. '24, M.Sc. '26; F. H. Doherty, B.Sc. '29; Lt.-Col. J. H. Edgar, B.Sc. '03; Rev. C. W. Finch, B.A. '90; W. A. Gardner, B.A. '98, M.D. '02; H. W. Huntley, B.A. '07, M.A. '10; R. W. Kenny, M.D. '03; Rev. John L. McInnis, B.A. '12; Daniel S. Mackay, M.D. '01; T. E. Price, B.A. '07, B.Sc. '10, and Mrs. Price; R. F. Rorke, M.D. '93; F. P. Alward, B.A. '27, M.A. '28; I. W. Beverley, B.Sc. '18; Archdeacon D. T. Parker, B.A. '03; K. G. Chisholm, B.Sc. '29; Dr. D. G. Bowie.

At Regina on October 7 a joint luncheon with the Canadian Club was held in the Hotel Saskatchewan. In a letter to Mr. Keith, President of the Graduates' Society, written immediately following the luncheon, A. W. Blair, Radiotherapist and Associate Medical Director of the Saskatchewan Cancer Commission expressed the appreciation of the local members at Mr. Cameron's visit. Several of the medical graduates met him following the meeting.

The next stop was at Vancouver on October 13, where a dinner meeting was held in the Hotel Vancouver for Mr. Cameron in conjunction with the Annual Meeting of the Vancouver and District Branch. About sixty-five members attended and heard an interesting address on "A Review of Old McGill" as well as some of the highlights of Mr. Cameron's previous speech before the Engineering Institute. While in Vancouver Mr. George Walkem arranged to have Mrs. Cameron sponsor the launching of the first tanker made in his shipyard.

On October 15 at Victoria a joint dinner meeting was held with the Engineering Institute at the Empress Hotel, about sixty members of the two bodies with their ladies attending. Kenneth Reid, M.E.I.C., presided at the meeting and G. M. Irwin, city engineer, thanked Mr. Cameron. Dr. Hermann Robertson, President of the local branch of the Graduates' Society also spoke briefly.

The last stop of the tour was made at Edmonton on October 19 when a dinner meeting was held at the Macdonald Hotel with the Engineering Institute. Among the McGill men attending were G. H. MacDonald, B.Arch. '11, M.R.A.I.C., G. Wilson and Dr. Allin.

During his tour, in addition to telling the graduates about the work McGill is doing at present, Mr. Cameron spoke on the problems of post-war reconstruction with special reference to those facing engineers. As chairman of the building and construction section of Principal James' post-war reconstruction committee, Mr. Cameron is especially conversant with the difficulties to be overcome. He pointed out that after the war 1,750,000 persons in the armed services or war industries will have to be put to work producing goods other than those they are now producing and cited another speaker to the effect that "our two main post-war problems will be to provide employment for those who can work and to provide adequate social security for those unable to secure for themselves a minimum standard of subsistence and medical care."

Mr. Cameron was warmly received everywhere in the west by McGill graduates who appreciated the opportunity his visit afforded them of keeping in touch with developments at McGill.

23RD SCIENCE '14 DINNER, Nov. 13, 1943

Seated — *left to right*: SQUADRON LEADER GEO. C. DRAPER, R.C.A.F., J. CHARLES DAY, R. NORMAN COKE, R. E. JAMIESON, W. TAYLOR BAILEY, A. J. LAWRENCE, W. R. SANDISON, FRANK PARKINS, J. L. S. MARTIN.

Standing — *left to right*: R. C. GLITTON, C. O. MONAT, N. M. SCOTT, ARTHUR PATTERSON, MAJOR GENERAL HOWARD KENNEDY, Q.M.G., N.D.H.Q., CAPT. J. S. BRISBANE, R.C.O.C., O. A. BARWICK, M. L. BOSWELL.

Also present: J. S. GORMAN, JULES BAUSET, R. K. ROBERTSON.

Science '30 Annual Reunion

The annual reunion of the Class of Science '30 was held at the Queen's Hotel, Montreal, on Saturday, October 23rd. W. J. O'Connell of Larder Lake, Ontario, was chairman and Professor G. J. Dodd was the guest of the class. Prof. Dodd's short talk was most interesting and as Russ McCabe remarked, we were, for the time, carried back to our undergraduate days, expecting to be told at any time "Now gentlemen, take notes!"

Those attending were: W. J. O'Connell, Larder Lake, Ont.; Gordon Sutton, Three Rivers; Russ McCabe and Russ Neville of Sherbrooke; Keith Wallace, Farnham; Tom Morrison, Tom Brown, Jack Godfrey, Ritchie Timm, Bob Manson, Ben Berger, Jim Hartney, John Francis, Shed Bowles, Tom Jopling, Les Bernstein and Dick Yeomans, of Montreal.

To those members of the class who did not receive notices regarding the class dinner, the Secretary has to state that your correct addresses are not on file. A letter would be appreciated from you, addressed to R. H. Yeomans, 5453 Earnscliffe Ave., Montreal.

Those present at the Dinner extend their wishes for the best of luck to all the class members in the Armed Forces both abroad and in Canada.

Newman Club Alumni Form Group

Former Catholic students of McGill University will note with interest that a new organization, known as "The Alumni of the Newman Club at McGill University," an outgrowth of the Newman Club itself, is now in operation.

Although the Alumni Club is an independant group, it is working in close co-operation with the Newman Club, holds joint meetings with them, has approximately the same aims and purposes, attends their social functions, and in addition will have dances, and parties exclusively for its own members. The first of these will be a Christmas party, which is tentatively set for December 29.

Membership in the new organization is open, firstly, to any Catholic graduate of McGill or any other college or university who is now studying at McGill, and secondly, to any Catholic who ever attended McGill but is not now doing so, regardless of whether he or she was a partial student or a degree student who did not pursue his studies to graduation. The first category, of course, includes graduates who are not now studying.

The executive of the Alumni is composed as follows: President, George F. Bourke, B.A.; Vice-Presidents, Maurice Roche, B.Eng., and Miss Patricia Hanrahan, B.Sc.; Secretary, Miss Patricia Coonan, B.A.; Treasurer, Eugene Gareau, B.A., B.Eng.; and the chaplain is the Reverend Father G. Emmet Carter.

The Alumni of the Newman Club is at present conducting an intensive membership campaign. Only one meeting has been held so far, and 35 members were enrolled. The minimum objective is 50 members, and the executive feels confident that this quota will be far exceeded. "A mailing list has been compiled dating back to graduates of 1939," stated Miss Hanrahan, "but it becomes increasingly more difficult to trace earlier graduates, and we should be most grateful to hear from them or of them."

Meetings are held regularly on the first and third Sundays of the month at 10 a.m., in the chapel of the Convent of the Sacred Heart, 3635 Atwater Ave. Communion breakfast is followed by entertainment, a short speech by a student, and an address by a guest speaker. Attendance is usually about 150, and all former Catholic students are cordially invited to attend the meetings.

Anyone desiring further information about the Alumni of the Newman Club at McGill University may obtain it by writing to Mr. Bourke at 320 Redfern Ave., Westmount, or by telephoning him at Fitzroy 0769.

Principal Visits St. Maurice Valley Branch

On Friday, November 19th, a joint meeting of the St. Maurice Valley Branch of the Graduates' Society of McGill University and the Canadian Club of Shawinigan Falls was held. The guest speaker of the meeting was Principal F. Cyril James of McGill University, who spoke on our responsibilities of post war reconstruction. The meeting was attended by 112 of which about 75% were McGill graduates or past students.

Dr. James received an enthusiastic reception at the meeting, and to him and Mrs. James was extended the hospitality of McGill men and women in the city.

After being met at Trois Rivières by Jocelyn Smith and A. H. Watier, who drove them to Cascade Inn for luncheon, they were conducted through the Shawinigan Chemicals Limited plant, including the carbide and stainless steel divisions. A cocktail party was held at the home of H. S. Reid, where Mrs. James was entertained at dinner, together with a number of wives of McGill men.

On Saturday, they were taken on a tour, including The Shawinigan Water & Power Company's power house, Canadian Industries Limited cellophane plant, and after lunching at the Cascade Inn, were driven to Trois Rivières to catch the train to Montreal.

This visit was greatly appreciated by members of The St. Maurice Valley Branch and stimulated the strong McGill spirit already existing in this district.

One Million Passengers Say: Please, Mr. Motorist,

prepare now!

"Motor Vehicles Stalled On Track" Caused 81.5% of ALL DELAYS

The following is the record of delays in the period from February 24th to March 9th last winter.

Total of all occasions when a street-car was held stationary for 3 minutes or more.

Cause	No. of Delays	Total Time Lost
Overhead wires	3	1 hour — 41 min.
Street-cars derailed	5	2 hours — 05 min.
Miscellaneous	6	— 54 min.
Funerals and Parades	10	— 57 min.
Fires	10	3 hours — 23 min.
Street-cars disabled	15	2 hours — 53 min.
Railway crossing gates	30	4 hours — 36 min.
Collisions and Accidents	39	7 hours — 58 min.
	118	24 hours — 27 min.
Motor vehicles stalled on track	**521★**	**78 hours — 42 min.**
Total	639	103 hours — 09 min.

★81.5% of all delays from *ONE CAUSE ALONE*
"MOTOR VEHICLES STALLED ON TRACK"

Therefore, in the coming winter we ask all motorists and truck operators to equip their vehicles with chains, immediately road conditions are bad.

By so doing, you will permit the work of the men and women who serve the war effort to continue without unnecessary interruption.

AU-2-43

The Late Col. D. S. Mackay, M.D. '01

After a last look at his "boys" at a Winnipeg reunion of the 196th Western Universities Battalion, which he organized in the first Great War, Col. (Dr.) Daniel S. Mackay, 65, outstanding physician and commanding officer in two wars, retired early on the night of Tuesday, October 26th. He was taken ill suddenly during the night and was rushed to the Winnipeg General Hospital, where he died quietly, shortly after noon the following day.

Dr. Mackay had been in Winnipeg since 1905. His distinguished professional record was not less brilliant than his long military one.

He was born in 1878 at Reserve Mines, near Sydney, N.S., the son of Hon. William Mackay, a member of the Canadian Senate and a well known doctor in the Maritimes. He received his early education in local schools and at Pictou Academy. Later he studied at McGill, graduating in 1901. At the University he was a member of the senior rugby team. He undertook postgraduate work at London, Liverpool, Edinburgh and Glasgow. He obtained his L.R.C.P. from Edinburgh in 1902, his L.R.P.S. from Glasgow in 1903 and his F.R.C.S. from Edinburgh in 1904.

On returning to Nova Scotia in 1904 he practised for a short time with his father, later going to California, and reaching Winnipeg in 1905.

In 1909 he was appointed to the surgical staff of the new Children's Hospital, holding this appointment until 1911, when he became gynaecologist at the Winnipeg General Hospital. In 1913 he was made a lecturer at the Manitoba Medical College. In 1928 he became head gynaecologist at the Medical College and in the same year professor and head of the Department of Obstetrics and Gynaecology at the Medical College. He retired from active university life in 1939 and was made professor emeritus.

Dr. Mackay's army record spanned nearly 50 years. His career began as a gunner in the artillery. In Winnipeg he became one of the original officers of the 16th Field Ambulance. On the organization of the Queen's Own Cameron Highlanders in 1910 he transferred to that unit and became a company commander. A year later he commanded a special battalion of Highlanders at King George V's coronation at London. On the outbreak of war in 1914 he volunteered for active service and spent a year and a half with the infantry in Belgium and France. He preferred to serve as a combattant officer rather than as a doctor.

In 1916 he returned to Canada, organized the Western Universities Battalion and led it to the front. He was gazetted colonel in recognition of his war record. It was only a few years ago that he retired as officer commanding the 1st battalion of the Queen's Own Cameron Highlanders. In 1942 he retired as Officer commanding the 7th Infantry Brigade.

Dr. Mackay became in 1934 a foundation fellow of the College of Obstetricians and Gynaecologists of London. He was provincial commissioner of the St. John Ambulance Brigade. He was an energetic member of the Winnipeg Branch of the Graduates' Society.

His affable disposition, his ability to mix with people of all kinds and his wide knowledge of international affairs gave him a wide circle of friends. His interest in education was great, and it may truly be said of him that he was indeed one of the builders of Manitoba.

He was married in 1912 to Miss Agnes Brydon. His wife died in 1936. Surviving is a son, Squadron Leader W. A. F. Mackay.

He was buried on October 30th with full military honors.

Reaction to Leacock Booklet:

Among the many favourable reactions resulting from Dr. Stephen Leacock's booklet "My Old College" distributed by the Graduates' Society last year we reproduce the following lyrical outburst by C. Davis Goodman, Architecture '22. It might be added that Mr. Goodman who graduated 22 years ago sent his cheque for $66.00 to cover his $3.00 membership dues from the time of his graduation—a very tangible and much appreciated way of showing the effect the booklet had on him.

JE ME SOUVIENS

"Your booklet entitule 'My Old College' *was mos delite to reed,*
Me, I was weep all over, wen I see wat OLD McGILL she deed,
Mus confess I was negleck longtime my deer 'OLE ALMA MATER',
An always poot off for sen subscription, jus a leetle later.
Now I'm mos ashame myself dat I leev many year sleep bye,
So I hop very mooch by enclos check, I'll now be regula guy.
I want for to pay back twenty-two year, which mak me up to date,
For to receive de 'McGill News' *now, I trus I'm not too late.*
An from to-day mak promise shoor, to never no more stan still,
So for crying out loud, I geev tree cheer, an root for OLD McGILL.

BONHOMME

(C. Davis Goodman, Architecture, '22)

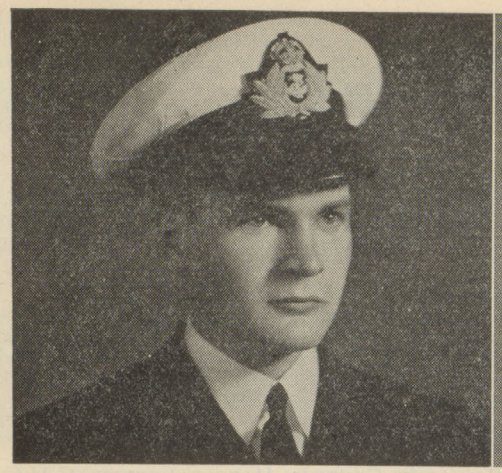

Undergraduates' Committee of Graduates' Society Formed

At the annual Meeting of the Graduates' Society a number of student leaders on the campus were made members, as stated elsewhere in this issue. Subsequently an Undergraduate Committee was formed by the students to promote closer union between the Graduates' Society and the undergraduates.

Alex Stalker, president of the Students' Council was elected Chairman of the Committee, and Jim MacLeod, Editor of the *McGill Daily* was elected Secretary. Mr. Fraser Keith, President of the Graduates' Society, is an *ex-officio* member of this committee.

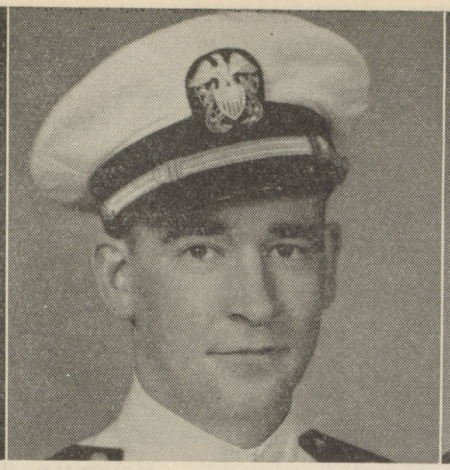

New Graduates' Directory Approved

At a meeting of the Board of Governors on October 13, Principal James' recommendation that the University pay the cost of publishing a new directory of all McGill graduates was approved. The Graduates' Society will undertake the clerical work involved in the preparation of the material for publication.

On His Majesty's Service—XVII

Edited by
R. C. FETHERSTONHAUGH

IN this issue we present in the form now well established the news of McGill men and women on Active Service which has reached us in the seventeenth quarter-year of the war. Again we thank those who have contributed information and, by so doing, have made the maintenance of this section possible. Many letters from overseas have advised us that the wartime news we are able to present has been most warmly welcomed. The policy of the Graduates' Society in forwarding the News free to all graduates on Active Service whose addresses are known has been particularly appreciated.

As our news-gathering facilities continue to be limited, we once more invite information appropriate for publication in these columns. News of McGill active service enlistments, appointments, promotions, and honours is requested. We emphasize that news of undergraduates and past students, as well as of graduates, is welcome. News of graduates and past students in the forces of the United States and in the Women's Divisions of our own forces is definitely requested. The correction of errors noted in the items below is also invited. Work in gathering material for the March issue of the News will begin the day this issue goes to press. It will be well under way before this number appears. Items for the March issue should, therefore, be forwarded at once, though it will be possible to accept any received before mid-February, 1944. Please address your letters to

THE McGILL NEWS,
3466 University Street,
Montreal.

We remind our readers that the general dates added to notices in this section, such as "October, 1943," show merely when the information given was received, or when it was known to be valid; the precise dates attached to other notices need no explanation. All notices in this section are written to conform with the regulations of the Press Censors for Canada. Notices in the General Service sub-section cover the period from August 15 to November 15, 1943. The casualty and honours lists record news that reached us from August 25 to November 25, 1943. A supplementary list of general items, received too late for classification in this issue, will be found at the end of this section.

Casualties

WE deeply regret to record the following casualties, reported in the period, August 25 to November 25, 1943.

Killed in Action

Horn, Lieut. John D'Arcy (Agr. 1939-'40), Princess Patricia's Canadian Light Infantry, Killed in Action in Sicily. So reported in the Canadian Army Casualty List, September 9, 1943. Lieut. Horn was a son of Mrs. Eva Horn, Finchley, London N3, England.

Killed in Air Operations

Conway, Pilot Officer Robert Warren (Com., 1934-'36), Royal Canadian Air Force, in Air Operations Overseas, August 23, 1943. His body was recovered at sea from the wreckage of his plane and was buried with military honours in Bath Regional Cemetery, Bath, Somerset, England. Pilot Officer Conway was a son of Mr. and Mrs. H. Roy Conway, 141 Percival Avenue, Montreal West, P.Q.

Killed on Active Service

Good, Squadron Leader Edgar A. (Sci., 1934-'35), Royal Canadian Air Force, previously for seven years an officer of the Royal Air Force, Killed on Active Service, Overseas, November 13, 1943. Buried at Bircham, Norfolk, England, November 18, 1943. Squadron Leader Good was the son of Mr. and Mrs. Joseph Good, 17 Queen's Road, Valois, P.Q. His wife and infant son are living in England.

Sproule, Pilot Officer David Leigh (Sci., 1937-'39; Eng., 1939-'40), Royal Canadian Air Force, in Northern Ireland, October 16, 1943. Pilot Officer Sproule was a son of Gordon St. George Sproule (B.Sc., '08; M.Sc., '09; Associate Professor of Metallurgy, McGill University) and of Mrs. Sproule (Helen

Louise Freeze, B.A., '04), 39 Thornhill Avenue, Westmount, P.Q., and was a brother of Flight Lieut. Robert Stanley Sproule (B.Eng., '37), Royal Canadian Air Force, overseas.

Killed in Flying Accident

DUNCAN, FLIGHT LIEUT. ROBERT BRYSON (B.A., '40; M.D.,'41), Royal Canadian Air Force, Medical Branch, attached Eastern Air Command, R.C.A.F., in a Flying Accident at Sydney, Nova Scotia, October 3, 1943. Flight Lieut. Duncan was the elder son of Dr. J. W. Duncan (M.D., '01; Clinical Professor of Obstetrics and Gynaecology, McGill University) and of Mrs. Duncan, Saraguay, P.Q. He was the husband of the former Miss Kathleen Hall, 4274 Western Avenue, Westmount, P.Q.

Died of Wounds

BEGOR, LIEUT. (J.G.) FAY BROUGHTON (M.D., '41), Medical Corps, United States Naval Reserve, wounded by a Japanese bomb, September 4 or 5, 1943, while attending casualties during landing operations in New Guinea; died of wounds, September 9, 1943; buried with full military honours in the American Military Cemetary, Buna, New Guinea. Lieut. Begor was a son of Mr. and Mrs. Charles Begor, Moriah, N.Y., U.S.A., and is survived also by his wife, the former Katherine Anne Savage, and by an infant daughter, 130 Brock Avenue, South, Montreal West P.Q.

Missing at Sea, Believed Killed

ARCHBOLD, LIEUT. GODFREY THOMAS ALFRED SISSENER (Arts, 1934-'35), Royal Canadian Naval Volunteer Reserve, serving with the Royal Navy, in the loss while on convoy duty in the North Atlantic of the frigate, H.M.S. *Itchen*, as announced by the Admiralty, October 1, 1943.

RIDGE, LIEUT. (E) DERRICK (B.Eng., '41), Royal Canadian Naval Volunteer Reserve, in the sinking while on convoy duty in the North Atlantic of the destroyer, H.M.C.S. *St. Croix*, as announced by Naval Service Headquarters, Ottawa, October 1, 1943. Lieut. Ridge is a son of Mr. and Mrs. F. K. Ridge, 5612 Queen Mary Road, Hampstead, P.Q. His wife is living at 5588 Queen Mary Road, Hampstead.

ROSS, LIEUT. CHARLES ALEXANDER (B.A., '38; M.A., '39), Royal Canadian Naval Volunteer Reserve, in the sinking while on convoy duty in the North Atlantic of the destroyer, H.M.C.S. *St. Croix*, as announced by Naval Service Headquarters, Ottawa, October 1, 1943. Lieut. Ross is a son of Mr. and Mrs. Charles H. Ross, 3440 Grey Avenue, Notre Dame de Grace, Montreal, and is the husband of the former Mona J. Robinson (B.A., '40), 126 South Street, Halifax, N.S.

Presumed Dead

ARCHER, SQUADRON LEADER PHILIP LESLIE IRVING, D.F.C. (B.Sc. [Agr.] '40), Royal Canadian Air Force, previously reported "Missing in Air Operations Overseas," reported to the International Red Cross by German authorities as "Killed in Air Operations, June 17, 1943." Squadron Leader Archer, who was awarded the Distinguished Flying Cross, September 11, 1942, was a son of Mrs. F. L. Archer, Clovelly, 8th Avenue, Belleville, Barbados, British West Indies.

BACHELDER, SERGT. ALLEN LELAND (Diploma in Agriculture, 1940), Royal Canadian Air Force, reported Missing while serving as Co-Pilot of a Sterling Bomber in Air Operations Overseas, August 7, 1942, listed "For Official Purposes Presumed Dead," R.C.A.F. Casualty List, August 29, 1943. Sergt. Bachelder was a son of L. W. Bachelder, Macdonald College, Ste. Anne de Bellevue, P.Q.

CUNNINGHAM, FLYING OFFICER ELSON WRIGHT (Sci., 1937-'38; Com., 1938-'39), Royal Canadian Air Force, reported March 8, 1943, "Missing After Air Operations Overseas," listed "For Official Purposes Presumed Dead," R.C.A.F. Casualty List, September 9, 1943. Flying Officer Cunningham was a son of Mr. and Mrs. Cyril Cunningham, 3434 Harvard Avenue, Notre Dame de Grace, Montreal.

FALLS, FLYING OFFICER TOM MONTAGU (Arts, 1938-'40), Royal Canadian Air Force, reported Missing after Air Operations in Tunisia, February, 1943, listed "For Official Purposes Presumed Dead," R.C.A.F. Casualty List, September 9, 1943. Flying Officer Falls, a former Non-Commissioned Officer of the McGill University Contingent, C.O.T.C., was the son of Mr. and Mrs. R. H. M Falls, 108 Blenheim Place, Westmount, P.Q.

GLICKMAN, PILOT OFFICER BERTRAM WILLIAM (Com., 1940-'41), Royal Canadian Air Force, Missing in Air Operations in the Eastern Mediterranean Area, December 11, 1942, listed "For Official Purposes Presumed Dead," October 14, 1943. Pilot Officer Glickman was the son of Mr. and Mrs. Nathan Glickman, 4051 Marcil Avenue, Notre Dame de Grace, Montreal.

MARTIN, FLIGHT SERGT. HUGH JOSEPH MACDONALD (Science, 1934-'35), Missing after Air Operations in Tunisia, December 18, 1942, listed "For Official Purposes Presumed Dead," October 16, 1943. Flight Sergt. Martin was a son of Mrs. Philip Martin, 4602 Hingston Avenue, Notre Dame de Grace, Montreal.

PETHICK, FLYING OFFICER THOMAS MELVILLE (Sci., 1940-'41), Royal Canadian Air Force, reported "Missing after Air Operations Overseas," June 22, 1943, listed "For Official Purposes Presumed Dead," R.C.A.F. Casualty List, November 14, 1943. Flying Officer Pethick was a son of Mr. and Mrs. L. M. Pethick, 132 Strathearn Avenue, Montreal West, P.Q.

Died

MCDONALD, BRIGADIER-GENERAL HAROLD FRENCH, C.M.G., D.S.O. (B.Sc., '07), Chief Executive Assistant to the Minister of National Defence for Air, at his home in Banff, Alberta, September 2, 1943. General McDonald is survived by his wife, the former Marjorie Gilmour, of Winnipeg, and by one married daughter.

Missing

CANDLISH, FLIGHT LIEUT. JOHN MUIR (Teacher's Diploma, '37), Royal Canadian Air Force, Missing after Air Operations Overseas. So reported in press notice, November 16, 1943. Flight Lieut. Candlish is a son of the late Robert F. Candlish and of Mrs. Candlish, 10670 St. Urbain Street, Ahuntsic, P.Q.

GARDINER, FLYING OFFICER WILLIAM AUSTIN (Sci., 1940-'41), Royal Canadian Air Force, Missing on Active Service after Air Operations Overseas, September 3/4, 1943. Flying Officer Gardiner is a son of A. A. Gardiner, Assistant General Passenger Traffic Manager, Canadian National Railways, Montreal, and of Mrs. Gardiner, St. Lambert, P.Q.

GRINDLEY, PILOT OFFICER WILLIAM EDWARD (B.Com., '34), Royal Canadian Air Force, attached Bomber Command, Royal Air Force, Missing in Air Operations Overseas. So reported in R.C.A.F. Casualty List, October 11, 1943. Pilot Officer Grindley is a son of Mr. and Mrs. E. W. Grindley, 474 Grosvenor Avenue, Westmount, P.Q.

NUSSBAUM, FLYING OFFICER LAMBERT RICHARD (B.Sc., '41), Royal Canadian Air Force, after Air Operations in the Middle East (North African) Area, June, 1943. Flying Officer Nussbaum is a son of Mr. and Mrs. Herbert L. Nussbaum, 100 Rosedale Heights Road, Toronto.

Prisoner of War

DAVIS, FLIGHT LIEUT. HENRY FRANCIS (B.C.L., '35), Royal Canadian Air Force, Missing in Air Operations Overseas. So reported in press notices, September 27, 1943. Officially reported to be a Prisoner of War in Germany, November 5, 1943. Flight Lieut. Davis is a son of the late M. P. Davis and of Mrs. Davis, 11 Blackburn Avenue, Ottawa.

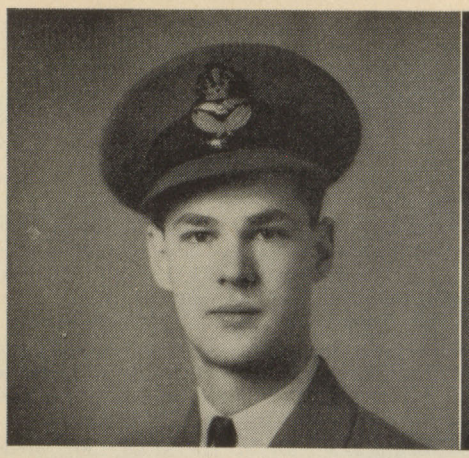

PALIN, PILOT OFFICER GORDON KERLE (Arts, 1938-'40), Royal Canadian Air Force, unreported in Java in the Spring of 1942 and listed officially as "Missing," May 29, 1943, reported by the International Red Cross to be a prisoner of war in the hands of the Japanese, September 17, 1943. Pilot Officer Palin is a son of Mr. and Mrs. C. G. Palin, 4481 Madison Avenue, Notre Dame de Grace, Montreal.

WOOTTON, CAPT. TOM ALEXIS (B.Sc., '39), Royal Canadian Artillery, previously listed as "Missing in Sicily," is known to have been captured by the enemy and now to be a prisoner of war in Germany. Capt. Wootton is a son of Mrs. Frances Wootton, 19 Campbell Avenue, Montreal West, and is the husband of Jean Ligny Scrimger (B.A., '40), now serving in the Mechanized Transport Service in England.

Wounded

MCLEAN, CAPT. DOUGLAS WILSON (B.A., '34), Princess Patricia's Canadian Light Infantry, "Wounded (Remaining on Duty) in Sicily," Army Casualty List, August 30, 1943. Capt. McLean (now Major), returned to Canada on duty, November, 1943.

QUAYLE, LIEUT. JAMES THOMAS BOULTON (Sci., 1941-'42), Canadian Armoured Corps, Wounded (Remaining at Duty), in Italy, Canadian Army Casualty List, November 22, 1943.

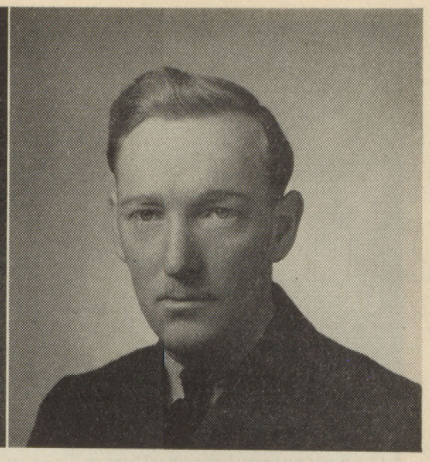

McGill University War Records

Rutherford, Major Gordon Anderson (B.Com., '34), Royal Canadian Artillery, during the operations of the Canadian Forces in Sicily—Army Casualty List, September 2, 1943. Major Rutherford was reported to be convalescing from his wounds in a hospital in North Africa, October, 1943.

Honours and Awards

WE congratulate the following McGill men upon the honours awarded to them, as noted, in the period August 25 to November 25, 1943. Further reference to a number of these awards will be found in the *McGill University War Records* Section of this issue.

Distinguished Service Order

Vokes, Brigadier (now Major-General) Christopher (B.Sc., '27), Royal Canadian Engineers, for exceptional service while in command of the 2nd Canadian Infantry Brigade in Sicily. Award announced, September 23, 1943.

Walsh, Lieut.-Col. Geoffrey (B.Eng., '33), Commanding, Royal Canadian Engineers, 1st Canadian Division, for gallant service in the campaign in Sicily. Award announced, September 23, 1943.

Member of the Order of the British Empire (Military Division)

Doehler, Flying Officer Rolf John (B.Eng., '40), Royal Canadian Air Force, November 12, 1943, for gallantry in dealing with exploding bombing planes during a fire at a station of the R.C.A.F. in Great Britain. His promotion to Flight Lieut. has since been reported.

McCombe, Flight Lieut. (now Squadron Leader) Richard J. (Sci., 1921-'22; App.Sci., 1924-'25), Royal Canadian Air Force, Armament Branch, for gallantry in the rescue of personnel from bursting bombing planes during a fire at an R.C.A.F. Station in England, and for courage and calmness during a similar incident on a previous occasion. Award announced, November 12, 1943.

Military Cross

Coleman, Major Rowan Corry (B.A., '36), Princess Patricia's Canadian Light Infantry, for gallantry in the operations of the 1st Canadian Division at Leonforte, Sicily. Award announced, September 23, 1943.

Heron, Lieut. William Kenneth (Sci., 1935-'38), Royal Canadian Engineers, for gallantry in the clearing of land mines during the Canadian operations in Sicily. Award announced, September 23, 1943.

Distinguished Flying Cross

Beveridge, Squadron Leader Masey Williamson (B.Com., '40), Royal Canadian Air Force, November 12, 1943, "for gallantry as a pilot in many successful sorties against enemy airfields," in France and occupied Europe.

Thomson, Pilot Officer James Scholes (Sci., 1939-'41), Royal Canadian Air Force, for "exceptional skill as a pilot." Award announced, September 14, 1943.

Mentioned in Despatches

Gentles, Lieut. Roy Allan (Com., 1940-'41), Royal Canadian Naval Volunteer Reserve, serving aboard the destroyer, H.M.S. *Broadway*, for his part in a convoy action against enemy submarines in the Caribbean Sea in May, 1943. Award announced in press despatches, September, 1943.

Canadian Efficiency Decoration

Gordon, Major Charles Athol Robertson (Arts, 1913-'14), R.C.A.M.C., Overseas, October 30, 1943.

Renouf, Lieut.-Col. Edward T. (B.Sc., '23), R.C.A., Can. Artillery Training Centre, Shilo, Manitoba, September 18, 1943.

Sutherland, Brigadier Ronald Douglas, M.C. (B.Sc., '14), N.D.H.Q., Ottawa, October 30, 1943.

Civilian Honours

Officer of the Netherlands Order of Orange-Nassau

Puddicombe, Dr. John Francis H. (M.D., '26), for his services to the Royal Family of the Netherlands in attending the Princess Juliana in the birth of her third daughter, Princess Margaret Francisca, in Ottawa, January 19, 1943.

General Service Record

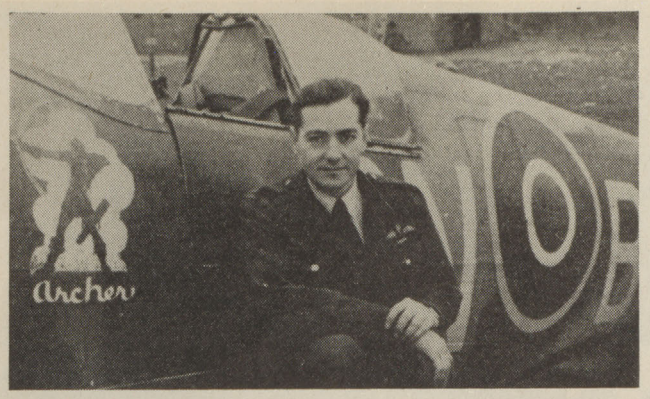

United States Forces

Baker, 2nd Lieut. John Hodge (Sci., 1937-'38; Com., 1938-'39), has graduated and received his commission in the U.S. Army Air Corps at the U.S.A.A.C. Pilot School, Marfa, Texas, October, 1943.

Ball, Capt. Franklin Percival (M.D., '27), Medical Corps, U.S. Army, 56th Station Hospital, serving in North Africa, September, 1943.

Bloomfield, Corporal Morton Wilfred (B.A., '34; M.A., '35), U.S. Army, address P.O. Box 1142, Alexandria, Virginia, October, 1943.

Caldwell, Lieut.-Col. John Ewait (M.D., '24), Medical Corps, U.S. Army, 98th Evacuation Hospital, Advanced Communication Zone, Pacific Area, September, 1943.

McGILL UNIVERSITY WAR RECORDS

SQUADRON LEADER PHILIP LESLIE IRVING ARCHER,
D.F.C., R.C.A.F., B.Sc. [Agr.] '40

Presumed Dead

CANO, 1ST LIEUT. MARCO BALERIO (D.D.S., '42), Dental Corps, U.S. Army, Station Hospital, Camp Polk, Louisiana, November, 1943.

Full information will be gladly sent on request to the Headmaster

PHILIP A. C. KETCHUM, M.A. (CAMB.) B. PAED.

A NATION OF 'CAPITALISTS'

"Capital . . . is simply . . . 'saved labour'. A man doesn't spend all he earns, and capital, which always starts in a small way, comes into being."

"Anyone who has a savings account or owns a home, a share or a bond, or a life insurance policy, is a capitalist, and a better citizen for it, since he has a stake in the country . . . we are a nation of 'capitalists' . . ."

"We provide for those who bring their investments to us for management, a helpful service in safeguarding for them the fruits of their labour during their lifetime, and a sound administration of their estates after their deaths, to best assure the security of their dependants."

From the President's address at our Forty-third Annual Meeting.

COPPING, MAJOR GORDON ALLAN (M.D., '30), R.C.A.M.C.

FYSHE, CAPT. THOMAS GREGOR (B.A., '31; M.D., '36), R.C.A.M.C.

HALPENNY, MAJOR GERALD W. (B.Sc., '30; M.D., '34), R.C.A.M.C.

HERMAN, MAJOR (Principal Matron) BLANCHE GERTRUDE (School for Graduate Nurses, '30), R.C.A.M.C.

HOWARD, MAJOR R. PALMER (B.A., '32; M.D., '37), R.C.A.M.C.

MCDOUGALL, CAPT. J. E. RANKIN (Arts, 1931-'33), Public Relations Officer.

MCNAUGHTON, MAJOR ERIC A. (M.D., '26), R.C.A.M.C.

NESBITT, MAJOR JAMES AIRD (Macdonald College, 1927-'28), Can. Infantry.

United States Forces

EIN, MAJOR WILLIAM BERNARD (M.D., '23), Medical Corps, U.S. Army, retired from Military Service, July 25, 1943, and has now resumed private practice as an Orthopedic Surgeon in Newark, N.J.

HAVEN, LIEUT. GILMAN WARD (D.D.S., '42), Dental Corps, U.S. Army, Camp Butner, North Carolina, was promoted to Capt., October 27, 1943.

LARCHE, LIEUT. HERVE L. (Med 1939-'40), U.S. Naval Reserve, serving in England, November, 1943.

MCNAMARA, PRIVATE HARRY C. (Dent., 1942-'43), U.S. Army, stationed Fort Devens, Mass., pending transfer to a Medical School to complete his professional training, November, 1943.

REIF, LIEUT. ROBERT WILLIAM (Com., 1941-'42), U.S. Army Air Corps, has recently been posted to duty overseas, November, 1943.

SMYTH, CAPT. DUNCAN CAMPBELL (M.D., '40), Medical Corps, U.S. Army, Station Hospital, Fort Lewett, Maine, November, 1943.

TAYLOR, LIEUT. SETH H. (Sci., 1941-'42), U.S. Army Air Corps, has been awarded Pilot's Wings on completing the course at the U.S.A.A.C. Advanced Flying Training School, Williams Field, Chandler, Arizona, November, 1943.

VOSBURG, CADET FREDERICK (Arts, 1941-'43), was struck off the strength, McGill University Contingent, Canadian Officers' Training Corps, on enlisting for active duty in the U.S. Army, November 15, 1943.

Women's Services

FINDLAY, SECTION OFFICER GRACE DEARBORN (Teacher's Diploma, '25), is one of nine officers of the R.C.A.F. (W.D.) taking a Photographic Interpreters' Course in Britain. The course is the first in which Canadian personnel have taken part.

FREEMAN, 2ND LIEUT. MARY CATHERINE (B.H.S., '41), Dietitian, R.C.A.M.C., was promoted to Lieut. (Dietitian), Military Hospital, Kingston, Ontario, August 17, 1943.

ROSSITER, SERGT. MARYELLEN (B.A., '41; M.A., '42), Sergt. Examiner, Army Examiner's Office, C.W.A.C., Montreal, November, 1943.

Civilian Services

JACOBSEN, ERIC R. (B.Sc., '29; M.Eng., '32), formerly Personal Assistant to the Director-General, Commonwealth of Australia War Supplies Procurement, Washington, D.C., was promoted to Deputy Director-General of the organization, September, 1943.

McGill Receives Valuable Grants

A number of valuable grants have recently been made to McGill University, including the sum of $150,000 payable $30,000 yearly for five years by the Rockefeller Foundation to support a department of psychiatry. The sum of $25,000 was left as a legacy by Arthur C. Tagge to found a scholarship. Gelatin Products Ltd. and Frank W. Horner Ltd. are making a total of $50,000 available over a period of three years to assist the research work of Dr. Hans Selye, Associate Professor of Histology on the functions of the adrenal cortex.

Dr. Hendell Writes Article for "Fortune"

We were very pleased to receive a copy of an article written by Dr. C. W. Hendel, Emeritus Dean of the Faculty of Arts and Science at McGill University, now Chairman of the Department of Philosophy at York University, appearing in the magazine "Fortune." This article entitled "Agenda for Philosophers" is an informal outline of the philosophers' project of finding contemporary answers to the basic questions. Dr. Hendel is Secretary of the Commission on the Function of Philosophy in Liberal Education set up by the American Philosophical Association and financed by the Rockefeller Foundation, "to reexamine thoroughly the nature and function of philosophy both in higher education and in general culture; and further, to study the ways and means of reorganizing the teaching of philosophy in order to make the contribution of philosophy to the post-war work most effective."

We would have liked to reproduce Dr. Hendel's very interesting article here, but unfortunately space restrictions prevent our doing so, and we must content ourselves with referring our readers to the original.

Prof. Brown Addresses St. Maurice Valley Branch

The St. Maurice Valley Branch of the Graduates' Society held a meeting on Saturday, October 16, at the Laurentide Inn, Grand'Mère, at which Dr. Ernest Brown, former Dean of Engineering, spoke on "Reminiscences of Old McGill". Forty-one members attended. Dr. Gerald Kaine, President of the branch was in the chair. R. J. Clarke, of Three Rivers, proposed the toast to sister universities, and J. S. Whyte, a graduate of Queen's University replied. D. B. Foss, Grand'Mère, toasted the Armed Services and read a telegram from Fraser S. Keith, President of the Graduates' Society, expressing his sorrow at being unable to attend the reunion. L. B. Stirling introduced the speaker who told of the extensive military training being given at McGill and the war work carried on there.

On Sunday, the day following the meeting, Prof. Brown was taken around Shawinigan Falls to see new developments at the Shawinigan Chemicals and Aluminum Company. After dinner at Dr. Kaine's he was driven to Three Rivers to take the train to Montreal. His visit was greatly enjoyed by the members of the St. Maurice Valley Branch.

Dean Macmillan Convocation Speaker

Dean Cyrus Macmillan of the Faculty of Arts and Science delivered the main address at the Founders Day Convocation held on October 6, at the Sir Arthur Currie Memorial Gymnasium-Armoury. This convocation also marked the Centenary of teaching in the Faculty of Arts and Science and this was dealt with in Dr. Macmillan's speech.

Greenshields Memorial Prize Given

A gift of $1,000 has been given to the McGill Faculty of Law by Mrs. R. A. E. Greenshields for the purpose of establishing a prize in criminal law in memory of her husband, the late Chief Justice R. A. E. Greenshields, a former dean of the Law Faculty.

McGill Graduate Prominent Aircraft Designer

The work of I. M. Laddon, B.Sc., '15, executive vice-president of Consolidated Vultee Aircraft Corporation, San Diego, California, is outlined in an article entitled "Design for Flight" appearing in "Plane Talk" the very attractive publication of that company.

The introduction to the article says in part,

"Designing a great airplane is today a huge joint operation. Hundreds of expert workers are organized to do the job.

The design division of engineering in an aircraft plant could well be likened to an army.

As the Army has its Chief of Staff, so has the engineering department.

At Consolidated Vultee, he is I. M. Laddon, executive vice-president of the company."

Mr. Laddon is designer of the famous Liberator, Catalina, and Coronado planes.

Extension Course on Canada in the Markets of Tomorrow

A number of expert lecturers have been obtained for the extension course on Canada in the Markets of Tomorrow being given by the School of Commerce in cooperation with the Advertising and Sales Executive Club of Montreal. Applications for this course exceeded the capacity of Moyse Hall, where the lectures are being given, by over 300. Principal James gave the opening lecture pointing out the necessity for extended international trade after the war, and the problems involved, stressing the need for the creation of an international monetary system.

School of Physiotherapy Opened

This autumn McGill commenced giving a course in Physiotherapy owing to the great demand for physiotherapists by the armed forces as well as by hospitals and other civilian institutions. The course is of two year's duration followed by a hospital interneship of six months and entitles the student to a diploma on completion of it. Dr. Guy Fisk has been appointed Director.

Memorial to Dr. Frank Adams Unveiled

At an unveiling ceremony performed by Principal F. Cyril James on November 7, a tablet in Christ Church Cathedral, Montreal, was dedicated by the Right Rev. John Dixon, Lord Bishop of Montreal, to the memory of the late Dr. Frank D. Adams, and his wife. Prof. Adams, who died on December 26, 1942, was Logan Professor of Geology at McGill University for many years, as well as having served as Emeritus Vice-Principal and Dean of the Faculty of Applied Science and Graduate Studies.

Redpath Library Celebrates Fiftieth Anniversary

On October 31, fifty years ago, the Redpath Library was officially opened.

In the Realm of Literature

Edited by
T. H. MATTHEWS

BY WATER AND THE WORD, *by Mrs. F. P. Shearwood. Macmillan. 215 pp., $2.50.*

THIS IS a vivid and memorable account of the work of Bishop and Mrs. Newnham in the missionary diocese of Moosonee during the years 1891-1904. It is based upon the Bishop's diaries written as he travelled by canoe or dogsleigh through the great wastes around Hudson Bay, or sat in his York boat waiting for the returning tide to float him off some desolate shoal. To the end of his long life the Bishop, as his friends will remember, remained a voluminous and lively correspondent, and his descriptions of scenes and persons, white, Indian, or Eskimo in his huge diocese add fresh interest to the printed page.

Jervois Arthur Newnham belonged to the heroic race of missionary pioneers who in the second half of the 19th century did so much to open up and Christianize the Canadian North. Born in England, educated at McGill and the Diocesan Theological College, he left his Montreal Rectory in 1890 to become a C.M.S. missionary in Hudson Bay. His acceptance by the Society involved a journey to London and return to Moose Factory by sailing ship across the Atlantic and through the ice of Hudson Strait. The return trip from Scotland took 59 days. Next year he was married in St. George's Church, Montreal, to the daughter of Principal Henderson of the Diocesan College and took his youthful bride by canoe to her new home in Moose Factory: and in 1893 became the second Bishop of the vast territory known as the diocese of Moosonee. Here with his courageous and devoted wife he spent eleven years travelling, preaching and building the Church among the scattered communities of his diocese in conditions of hardship and peril which in the age of aeroplane and the radio are fast becoming legendary.

Moose Factory where his "palace" was situated was four hundred miles north of the Canadian Pacific Railway at its nearest point: once in the depth of winter the Bishop travelled the whole distance on snowshoes. To Churchill, one of the outposts of the diocese, it was six hundred miles by the direct route along the coast of the Bay, but navigation was so difficult that the usual method of making the journey was by a huge detour on land which occupied between two and three months. Missionary work in such a territory called for constant travel, and the Bishop was often obliged to entrust his work at Moose Factory to an assistant clergyman while he was away: the care of the home—with a growing family and constant calls for hospitality—fell upon Mrs. Newnham. Between them they left a lasting mark upon the life of the great North country, and laid the firm foundation of a Christian and more civilized society among its scattered people, as later witnesses have often acknowledged. It is pleasant to record the constant help and support given them by the officials and medical men of the Hudson's Bay Company. Though the Canadian Church can hardly again be faced with the peculiar difficulties which confronted the early missions to the North, yet the spirit of hardihood and devotion which inspired such men as Bishop Newnham in their great adventure must not die nor be forgotten.

W. A. FERGUSON.

MINUTES OF THE HUDSON'S BAY COMPANY 1671–1674, *pp.* LXVIII + 276, *edited by E. E. Rich, with an introduction by Sir John Clapham, and published by the Champlain Society in an edition limited to the subscribers to the Hudson's Bay Record Society. 1942.*

THIS volume, besides being of permanent value to the historian, cannot fail to be of interest to Canada. Canadians will always be interested in that group of men who were chartered in 1670 as the Governor and Company of Adventurers of England trading into Hudson's Bay. It was a group which blended, as Sir John Clapham says, the courtier's curiosity, the imperialist's enthusiasm, and common business shrewdness. The enterprise was essentially a private one, though having State approval, and the adventurers had to await fourteen years for their first dividend.

The period covered by this volume covers completely the round journey of only one venture: that of the *Prince Rupert*, the *Imploy*, and the *Messenger*, which vessels sailed in 1672 and the two former reached English ports again in October 1673, but the minutes touch on the affairs concerned with the return of the *Prince Rupert* and *Wivenhoe* from the 1670 venture, and the arrangements in contemplation of the 1674 voyage of the *Prince Rupert* and *Shaftesbury*. The period however, is of peculiar interest because it was during this time that the affairs of the Company were put, from somewhat informal and sketchy beginnings, on to a sound business-like footing, largely through the work of Lord Shaftesbury and the briske blade Sir James Hayes, the secretary to Prince Rupert.

Sir John Clapham's long introduction will be, to the general reader, the most interesting part of the volume. He gives the background necessary to the appreciation of the minutes and analyses and interprets them, with comments on the matters of particular interest to the economic historian. The ships appear to have been well-provisioned; the allowance of beer was three quarts per man per day. The rates of pay are also ascertainable, that of an able seaman being between thirty and forty shillings a month.

Our Reviewers

DR. W. A. FERGUSON, is Principal of the Montreal Diocesan Theological College.

JOHN PERCIVAL DAY, B.A., B.Sc. (Lond.), D.Phil. (St. Andrews), is R. B. Angus Professor of Economics at McGill University.

JOHN P. HUMPHREY, B.Com.; B.A.; B.C.L., is Associate Professor of Law and Secretary to the Faculty of Law. He is particularly interested in international affairs.

The seamen were on half-pay from the time they were engaged until the ship sailed, but it is not clear to me whether they were paid again after embarkation or had to wait until the completion of the return journey. In any case, whatever was due to the seamen from the voyage which finished at Plymouth or Portsmouth in October 1673 was not paid, in many instances, until February of the following year. The Company had constant trouble through their servants trading on their own account, which practice was not adequately curbed until they appointed a Mr. Robert Holmes as 'husband.'

There are seven Appendices to the volume. Appendix A gives the Royal Charter with its well-known stipulation that two elks and two black beavers should be paid 'whensoever and as often as we and our heirs or successors shall happen to enter' the granted territories. The last appendix contains full and interesting biographical notes on twenty-five of the more important personages concerned. These include, besides Radisson and Groseilliers (Mr. Gooseberry), the Earl of Craven, that loyal friend of the Winter Queen, the Quaker Governor Bayly whom Beckles Willson called stupid and choleric, the Boston sea-captain Zachariah Gillam, and several of Pepys' acquaintances.

J. P. Day.

U.S. FOREIGN POLICY: SHIELD OF THE REPUBLIC, *by Walter Lippmann. Little, Brown and Company (Boston, 1943). 177 pp. $2.00.*

THE first thing that must be said about this book is that it is brilliantly written. It also bears evidence of original thinking; and it contains much wisdom. But with all that it must also be said that Mr. Lippmann is on the wrong track.

Mr. Lippmann's formula for the future world order is a nuclear alliance between the United States, the British Commonwealth of Nations, Russia and China. Such an alliance, he says, is necessary in the interests of the United States. He arrives at this position by a process of reasoning that begins with an examination of the bases of foreign policy. Mr. Lippmann's test of a good foreign policy is its ability to bring into balance, with a comfortable surplus of power in reserve, a nation's commitments and a nation's power. Now the United States does not itself possess the power to balance its extensive foreign commitments. It follows that it must look to friendly nations for help. In the circumstances of contemporary international politics, these friendly nations are the various members of the British Commonwealth of Nations, Russia, and China.

It can be admitted that the foreign policy of the United States, or its lack of foreign policy, since the Spanish-American War has not been adapted to the needs of that country. Mr. Lippmann has ably demonstrated its failure. But it does not follow that the policy recommended by him is the best policy either for the United States or for the world.

Ability to balance national commitments and national power may be the test of a safe foreign policy in a world of power politics made up of sovereign, independent States each of which is a law to itself. Indeed, it is precisely because of its association with that kind of a world that it is both inadequate and dangerous for the future. To balance the commitments of States by power has been the chief occupation of statesmen in the past; and the resulting conflict is one of the facts of history. In the twentieth century, we have had two world wars, mainly because rival nations and rival "nuclear alliances" were trying to bring their respective commitments and power into balance. Mr. Lippmann apparently thinks that this conflict can be avoided by bringing all the principal United Nations into the alliance. Perhaps, if the alliance could last. Victorious nations have been able to impose their hegemony in the past. But there is no guarantee that the alliance would be permanent. There is a risk, to say the least, that sooner or later one of the contracting parties might withdraw from the alliance and associate itself in a new nuclear alliance with States that Mr. Lippmann's scheme would disenfranchise. It is of the nature of alliances that they depend upon the continuing consent of the contracting parties.

But the chief thing that is wrong with Mr. Lippmann's thesis is that his test of foreign policy assumes that if a foreign policy is to be realistic it must be possible to justify it by reference to unilateral national interests—or, to put it more bluntly, that in the ultimate analysis it must be nationally egoistical. To begin with an assumption like that is, it is submitted, to get away to a bad start even if, like Mr. Lippmann, you also assume that the basic, fundamental interests of your own country correspond with the best interests of all other countries. This kind of thinking is incompatible with any real concept of world community. It is also largely responsible for the theory and fact of State sovereignty which more than anything else has prevented the organization of the international community. If disaster is to be avoided in the future, statesmen must concern themselves with something more than balancing national commitments and national power.

If the present system of independent, sovereign States is to be retained after the war, then, by all means, let us have a nuclear alliance of the United Nations. But do not expect too much from it. The world has reached a stage in its evolution where something much more solid than any alliance is required if peace is to be maintained. What is required is nothing short of international government. Unless workable international institutions are created and provided with the power to enforce their decisions, Mr. Lippmann may as well resign himself to another world war within his lifetime. It is towards the creation of those institutions that the foreign policy of the United States and the foreign policies of all right thinking peoples must apply themselves.

But if both the premises and conclusions of Mr. Lippmann's book are inadequate, his recommendations are nevertheless miles ahead of the position reached by the great majority of his countrymen in the period between the two wars. And what is more, his pattern is much more likely to be followed by the men who will make the decisions at the end of this war than are the patterns that the present reviewer would propose.

John P. Humphrey.

Received for Review

PROBLEMS OF SCHOOL YOUTH IN WARTIME, *by John A. B. McLeish, B.A. Quality Press Ltd., Montreal. 79 pp.*

The McGill Chemistry Department

(*Continued from Page 12*)

ment, he has made some notable contributions in a special field of Chemistry, x-ray diffraction methods, which leads to a knowledge of chemical substances through physical properties. As a teacher he has been equally successful, his duties involving instruction in General Chemistry, Physical Chemistry, and the History of Chemistry. At present Dr. Barnes is Assistant to the Chairman of the Department of Chemistry.

The present writer will not attempt here a description of the duties and contributions of the remaining members of the Department, Dr. C. A. Winkler, Dr. J. H. Ross, Dr. Raymond Boyer, Mr. J. H. Holden, Dr. A. S. Ross and Dr. R. V. V. Nicholls. That task must await another and more disinterested spectator.

How shall we sum up the last thirty years? By reminding the reader that during the last war the Department of Chemistry graduated one honours student, three chemical engineers, and one graduate student per year, while during the present war it is graduating six honours students, twenty-five chemical engineers, and twenty graduate students per year. These are the statistics. When asked for details about its wartime teaching and research programme, one can only reply by quoting the words of Dr. Roger Adams, in charge of university research in chemistry for the National Defence Research Council of the United States, "We are doing what you would expect us to be doing."

It is desired here to acknowledge the author's debt to Miss Gwendolyn Floud for her assistance in the preparation of the manuscript.

McGill Football Team Active Again

McGill returned to senior football competition for the first time since the war this year when a team was entered in the Quebec Rugby Football Union league along with teams from the Army, Navy, Air Force and Verdun Grads. The McGill players, coached by Doug Kerr, made a very creditable showing, defeating Army soundly, and losing to the other three teams by very close margins, one game in the last few plays.

McGill Gives Honorary Degrees

Sir Eugene Fiset, Lieutenant-Governor of the Province of Quebec, and the Right Reverend John Dixon, Lord Bishop of Montreal, were receipients of the honorary degree of LL.D. at the McGill fall convocation.

McGill University War Records

(*Continued from Page 27*)

Capt. E. A. Stuart (M.D., '33), R.C.A.M.C. Assistant Demonstrator in Oto-Laryngology, who searched the literature of medicine and collated the information on sea-sickness recorded by observers of the past. One solemn humourist had undoubtedly found a cure, but his remedy—to rest for an hour under the boughs of a living oak—hardly met the requirements of the present time.

No attempt could be made in the space available here to describe the research in detail, even if all the particulars were known. Nor would it be possible to list all those who took part. Dr. McNally, as mentioned, led in the historical research, and, with Dr. Boris P. Babkin, serving a post-retirement term as Professor of Physiology, carried out much research in the balance mechanism of humans and animals lying in the ear, which scientists for many years have believed to be the primary source of sea-sickness. Dr. André Cipriani (B.Sc., '32; M.D., '40) contributed to the work by designing the sea-sickness-producing swing installed at the Montreal Neurological Institute and shown in our illustration. Hundreds of "guinea-pigs" submitted themselves to the workings of this machine, and the results it produced, before and after the administration of the curative tablets eventually evolved, were checked at sea by a group of Surgeon-Lieutenants, R.C.N.V.R.

Further study with a view to improving the success already attained is proceeding. Meanwhile, the achievement already reached gives promise of another triumph for Canadian research and, in a very special measure, for the medical and scientific staffs of McGill.

Summer Number Appreciated

We were pleased to receive the following letter from Wilbur H. Cherry, Arts '07, now a practising attorney at Minneapolis, Minn., expressing appreciation of our special Arts Centennial Anniversary Issue published last summer:—

Gentlemen:

Your excellent Summer Number found me strongly inclined to tell you how very much one of your readers had enjoyed "The Arts Gallery" and Mrs. Vaughan's account of Mme. Puech. Now that I have your addition to these portraits of those who meant so much to me as a McGill student in the article on John Macnaughton, it is high time that I give expression to appreciation of your publication.

For one who lives far from McGill, and whose contacts with it are rare—as is my case—these accounts of the great people of his far-away student days are a great pleasure. Please accept my thanks for them.

I am writing Mrs. Vaughan about her account of Mme. Puech.

Sincerely yours,

WILBUR H. CHERRY, Arts, '07.

Personals

THE McGILL NEWS *welcomes items for inclusion in these columns. Press clippings or other data should be addressed to H. R. Morgan, Recorder Printing Company, Brockville, Ontario; or to The Graduates' Society of McGill University, 3466 University Street, Montreal. Items for the Spring issue should be forwarded prior to Feb. 1.*

*__Abbott, Douglas C., K.C., M.P.,__ B.C.L., '21, has been made a member of the Corporation of the University of Bishop's College, Lennoxville.

Bercovitch, Abram, M.D., '06, one of the founders of the Woman's General Hospital, Montreal and its chief surgeon since its establishment in 1927, has resigned as its managing director after eight years' service in that capacity.

*__Brais, Hon. F. Philippe,__ B.C.L., '16, Montreal, has been elected vice-president of the Canadian Bar Association.

Brough, Frank S., B.Sc., '23, has been appointed plant superintendent of the Bell Telephone Co. for its Ottawa district.

*__Brow, Raymond G.,__ M.D., '20, F.R.C.P. (C.), prominent heart specialist, has been made acting physician in chief of the Royal Victoria Hospital during the absence of Dr. J. C. Meakins, on leave as Deputy Director of Medical Services, R.C.A.M.C.

Brownstone, S. Louis, Past Student (Sci., 1918-'19; Com., 1919-'20), an employee of Canadian Propellers, Ltd., won an Individual Merit Award in a nation-wide competition for time-saving ideas and speed operations developed by aircraft workers.

*__Cameron, Kenneth N.,__ B.A., '31, has been promoted to Assistant Professor of English at Indiana University, and is writing a book on Shelley.

Carson, Elmer F., Past Student, is with the Northern Electric Co. in Toronto.

Church, Harcourt B., M.D., '17, of Aylmer, Que., has been elected president of the Quebec division of the Canadian Medical Association.

*__Cunningham, A. J.,__ B.Sc., '14, has been in Montreal, on a visit from duties at Chaguaramas Terminals in Trinidad.

Dauphin, Mrs. Perry (Helen R. Hobbs, Phys.Ed., '31), has been appointed assistant director of physical education at the University of British Columbia.

Du Boyce, R. M. H., B.A., '28; B.C.L., '33, has been appointed Montreal representative of the legal division, Wartime Prices and Trade Board.

*__Everett, H. S.,__ B.A., '20; M.D., '23, of Saint John, N.B., has been elected president of the New Brunswick Medical Society.

Ferguson, A. J., B.Sc., '35; Ph.D., '39, returned on October 1 from England where he served for five months as Chief Liaison Officer for the National Research Council, and worked on additional five months in a war laboratory in Worcestershire.

*__Fetherstonhaugh, H. L.,__ B.Arch., '09, of Montreal, has been elected an academician of the Royal Canadian academy.

Fiset, Sir Eugene, LL.D., '43, Lieutenant-Governor of the Province of Quebec, has received the honorary degree of Fellow of the Royal College of Physicians and Surgeons of Canada.

Froomess, Leo E., M.D., '10, until recently of Elizabeth, N.J., has now opened a practice at Lowville, N.Y.

Gates, Reginald R., Ph.D., B.A., '06, has been created, by vote of the University Senate, a professor emeritus of the University of London. He recently re-visited his former home at Middleton, N.S.

*__Goddard, Harold O.,__ B.Sc., '28, is with Foster Wheeler, Limited, St. Catharines, Ont.

*__Goldenberg, H. Carl,__ B.A., '28; M.A., '29; B.C.L. ,'32, Director-General of Economics, Department of Munitions and Supply, has been in Britain discussing war production problems with officials.

*__Hall, George,__ M.D., '05, has been made an honorary member of La Société Médicale de Montréal, in recognition of his eminent service to the medical profession.

Henderson, Kenneth, B.Com., '25, is now serving as executive chairman of the management committee National War Finance Committee, under its general chairman, Graham F. Towers, B.A., '19.

*__Hutchison, Colonel Paul Phelps,__ B.A., '16; B.C.L., '21, Commanding Officer of the Black Watch, Montreal, was mentioned prominently in an article in the Montreal Gazette recently dealing with the history of that regiment.

*__James, Principal F. Cyril,__ was the guest speaker at a joint dinner of the Eastern Townships Associated Boards of Trade and the Granby branch of the Canadian Manufacturers' Association held at Granby on November 5.

Johnson, Walter H., B.Sc., '33, has been appointed to the staff of the department of zoology at the University of Western Ontario, London, Ont.

Lamont, Rev. Thomas, B.A., '39, assistant minister at Erskine-American church, Montreal, has accepted a call to Old Bergen Church, Reformed Church in America, Jersey City, N.J.

The Graduates' Endowment Fund

Established 1921

Amount contributed to date, Aug. 31, 1943	$67,444
Interest and Profits made on invested funds	65,953
Total	$133,397
Grants authorized by Board of Trustees	$29,420
Cost of collection and investment service	5,070
Amount on hand in cash and investments	98,907
Total	$133,397
Amount contributed during year 1942-'43	$593

OBJECT: The Assistance and Advancement of McGill University.

The Graduates' Gymnasium Building Fund

Established 1935

Amount collected to date, Aug. 31, 1943	$206,464
Grants from Graduates' Endowment Fund	12,500
Revenue from McGill Cigarettes and Interest	7,981
	$226,945
Granted to McGill University for the construction of the Gymnasium	$195,628
Cost of collection and administration	20,922
Amount on hand in cash and investments	10,395
	$226,945

OBJECTIVE: To complete the original plan of the Gymnasium Project by the addition of a Swimming Pool. (Estimated cost, $125,000).

*__Livinson, Abraham Jacob,__ B.A., '11; M.A., '16, has been elected Honorary Secretary of the Canadian Jewish Historical Society. He was recently appointed Chairman of "The Ezekiel Hart (1770-1843) Centenary Commemoration Committee, 1843-1943." Captain Ezekiel Hart was a leading citizen of Les Trois-Rivières, Lower Canada and its representative in the Legislative Assembly in 1807 and 1808. He was the first Jew to be elected to Parliament in the British Empire.

*__Lynch, W. H., K.C.,__ B.C.,L., '99, of Sherbrooke, Que., has been appointed Chancellor of the Anglican diocese of Quebec.

MacLean, John D., M.D., '05, of Ottawa, has been re-appointed chairman of the Canadian Farm Loan Board for a further period of three years.

*Member of The Graduates' Society of McGill University.

Personals—*Continued*

***MacMillan, W. J. P.,** M.D., '08; LL.D., '35, Conservative leader in Prince Edward Island, has been elected to the Legislature of that province in 5th Queen's.

Mauffette, Pierre, M.Sc., '41, has been appointed instructor in mineralogy and geology at the Polytechnical School of Montreal.

McDougall, D. H., B.Sc., '22, has been appointed general plant manager, eastern area, Bell Telephone Co. of Canada, with headquarters at Montreal.

McNaughton, General A. G. L., B.Sc., '10; M.Sc., '12; LL.D., '20, has been elected an honorary member of the American Society of Engineers.

NEVER before have such heavy demands been made on capital and income by Succession Duties and Income Taxes. Never before has greater care been required of anyone making a Will.

Plan your Will in the full knowledge of present-day taxes, and how they effect your own estate.

We shall be glad to discuss your problems with you.

NATIONAL TRUST COMPANY LIMITED

225 St. James St. West MA. 9431

EXECUTORS ▸ TRUSTEES ▸ FINANCIAL AGENTS

DECIDE NOW

how you want your estate to be divided. Many men thoughtful in other matters, leave their financial affairs in a muddle when they die without making a WILL. The courts are called upon to straighten out matters when the property becomes involved. Have you made your WILL?

Woolhouse—At Halifax, N.S., on October 1, to Surgeon Lieutenant-Commander F. M. Woolhouse, M.D., '36, and Mrs. Woolhouse, a son.

CORRECTION

Due to an unfortunate error there appeared in the Autumn Number of THE McGILL NEWS the announcement of the birth of a daughter on July 9 to Lieut.-Commander Philip Hasken Hughes, Mus.Bac., '25, and Mrs. Hughes. Actually the father was Lieut.-Commander (E) Philip Bernard Hughes, B.Sc., '26, R.C.N.V.R. We regret the misunderstanding and apologize to all parties concerned.

RIDLEY COLLEGE

ST. CATHARINES, Ont.

Canadian Residential School for Boys

FOUNDED 1889

A LARGE number of valuable Entrance Scholarships, Bursaries and Leonard Awards are available every year in both Upper and Lower Schools. Courses leading to Pass and Honour Matriculation, and The Services. A special course for boys entering business life. Small classes ensure individual attention. Lower School for boys 8 to 14; Upper School for boys 14 to 18. Beautiful Memorial Chapel. New gymnasium, swimming pool, squash courts, tennis courts, covered rink and spacious grounds offer unusual facilities for splendid physical development. A prospectus and full information sent on request.

H. C. GRIFFITH, M.A., LL.D., Headmaster

One way to help!

Men who fight for Canada on sea or land or air, lead a hard life . . . harder than most civilians can imagine. The little luxuries mean a lot to these men and the little luxuries are not easily come by in war-torn Europe. That's why we appeal again for your support of:

The Overseas League Tobacco Fund
Keefer Building, Montreal

$1 to them means 400 cigarettes delivered to a sailor, soldier or airman who really needs them. Send a subscription—as large as you can make it, today!

Soper—In Montreal, on September 18, Miss Isabel Jean Bulloch, and Warren Young Soper, B.A., '42.

Tencer—In Montreal, on November 9, Miss Frances T. Tencer, B.A., '42, and AC1 William Joseph, R.C.A.F.

Thompson-Schofield—In Montreal, on September 4, Miss Marjorie Louise Schofield, Past Student, and Alan Gibb Thompson, M.D., '43, R.C.A.M.C.

Thompson—In Montreal, on September 25, Miss Catherine Reikie, and Allan Lloyd Thompson, Ph.D., '43.

Tweedie—In Toronto, on November 6, Miss Mary Elizabeth Gall, and Surgeon Lieutenant Frederick John Tweedie, M.D., '40, R.C.N.V.R.

Viger—In Huntington, W.Va., on September 3, Miss Virginia May Hoy, and Surgeon Lieutenant-Commander Roland J. Viger, M.D., '33, R.C.N.V.R.

Waugh—In Victoria, B.C., on November 20, Miss Sonia Millicent Everest, and Captain Douglas O. W. Waugh, M.D., '42, R.C.A.M.C., son of Oliver S. Waugh, M.D., '08, and Mrs. Waugh, Winnipeg.

Weldon—At Montreal West, on November 12, Miss Alison Hamilton Brown, daughter of the late F. Baylis Brown, B.Sc., '03; M.Sc., '05, and of Mrs. Brown, and Lieutenant Richard Dale Weldon, B.A., '38; B.C.L., '41, R.C.N.V.R.

Weston—At Neepawa, Man., on October 29, Nursing Sister E. M. E. Weston, Graduate Nurses, '38-'39, R.C.A.F., and Flight-Lieut. David L. Green, R.A.F. of Bewdley, Worcestershire, England.

Willis—In Westmount, Que., on September 13, Miss Margaret Elaine Prince, and 2nd Lieutenant Robert Stewart Willis, B.A., '41, Royal Montreal Regiment.

McGill Graduate Returns from Japanese Internment

H. F. Collier, B.Sc., '11, and Mrs. Collier who were imprisoned in Hong Kong near which city they were serving as missionaries at the time of the Japanese occupation in 1941, have recently returned to Canada on an exchange ship.

Mrs. Collier's brother, Christopher Willis, B.Sc.,'11, his wife and sister, Helen Willis, B.A., '14, are believed to be interned at Shanghai.

Dr. R. L. Noble Named McGill Assistant

Dr. R. L. Noble, lecturer in Endocrinology at McGill University has been promoted to Assistant Professor and phychologist to the Institute of Endocrinology. He is at present engaged in research on seasickness.

Think Big

...when you plan for Canada's future

CANADA, when this war is ended, will stand on the threshold of a splendid and challenging opportunity. The need will be there, the time will be ripe, for vast, unprecedented development. Willing hands will be there a-plenty accumulated wealth will be there, national resources and the power to convert them to the general good will be there. Let us plan courageously when we figure out Canada's future.

Let us plan for lovelier, more labour-saving homes . . . plan for spacious and beautiful towns. Let us plan for wider, safer highways, well-graded and well-lit . . . for modernized railroads, for greater electrification . . . for new bridges, new clover-leafs. Let us plan the spread of rural electrification until its benefits reach every farm and every hamlet.

Let us plan with vision for a richer cultural life. Let us plan new centres of science and art . . . colleges, laboratories, dramatic-centres, galleries. Let us plan, for leisure and health, new open spaces in our cities and towns . . . new sports bowls, new swimming pools. Let us plan the modernization of our factories, offices and stores, by re-equipment and reorganization. Let us plan for lighter work yet greater productivity . . . for increased speed yet greater safety. Let us plan for fuller living, greater opportunity, economic security.

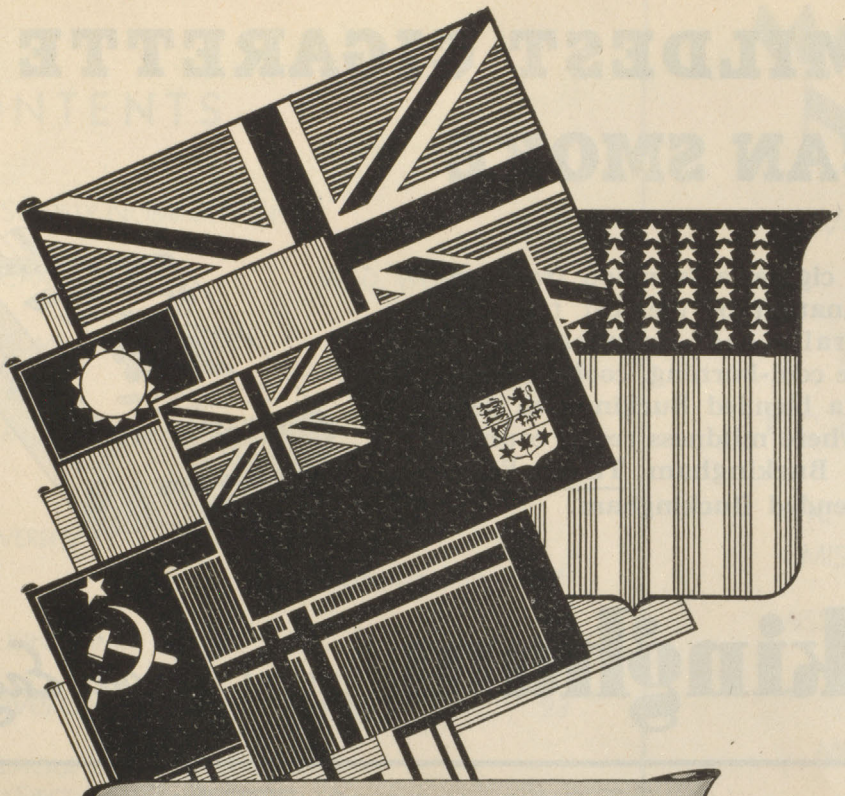

While there must not be the slightest relaxation of our all-out efforts to win the war — we must plan and we must start planning now. We have had our lesson in unpreparedness. We must not gamble with peace as we gambled with war.

Many governmental municipal and industrial groups already are planning. Many individuals are planning. But not enough. More planning, much more planning is needed. Whether we are houseowners, business operators, farmers, civic leaders — let us *all* plan for Canada's postwar future . . . let us plan with confidence, with courage —

For by planning today, we prepare ready-made markets for tomorrow, markets which will absorb our fullest productive effort and thus create gainful employment for everyone.

CANADIAN GENERAL ELECTRIC CO. LIMITED

UNITED WE STAND

DIVIDED WE FALL

This is a simple and eternal principle which, in the sacred name of freedom, has brought together the banners of peoples far apart in locale and tradition, yet having but one single objective — that of overthrowing an infamous enemy who would enslave the world. The collective force and determination of thirty United Nations is an unbeatable alliance which will become a permanent guardian of that higher civilization all men of good will seek for themselves and their children's children.

It is this same principle of collective co-operation which more than 70 years ago drew together those who founded the Sun Life Assurance Company of Canada, for they knew that men, like nations, can best protect each other by pooling risks and uniting resources to meet them.

SUN LIFE OF CANADA

Assures Security

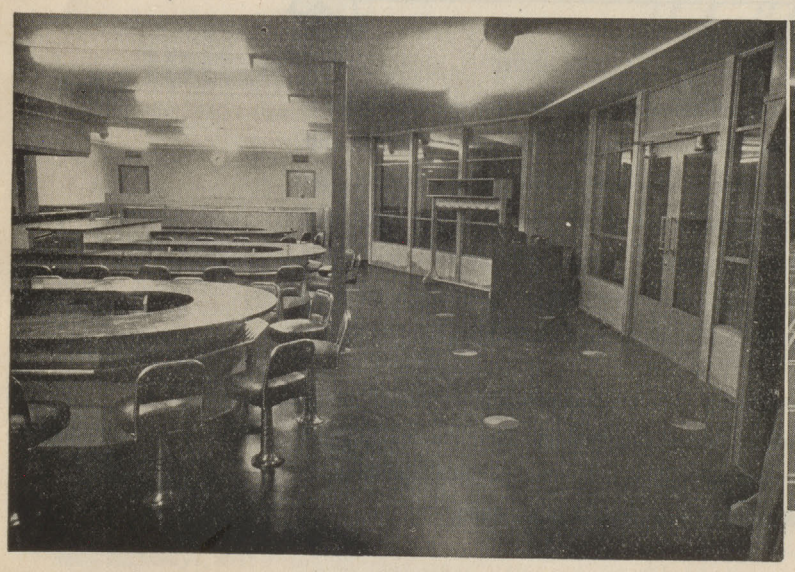

THE MILDEST CIGARETTE YOU CAN SMOKE

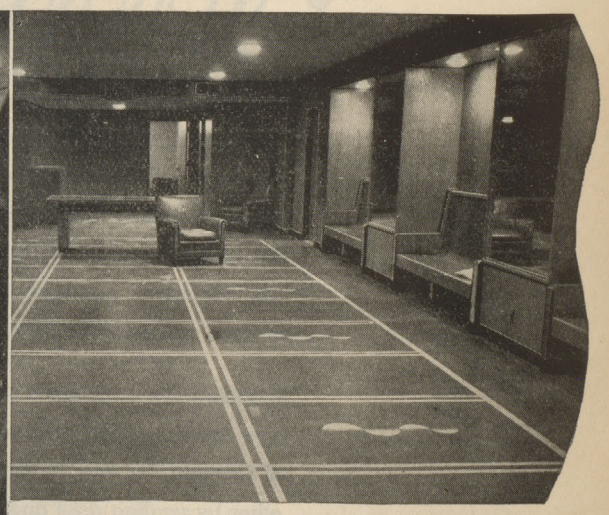

A Buckingham cigarette is made from an exclusive combination of blended tobaccos that are naturally cool-burning—cool-smoking. These cool-burning, cool-smoking tobaccos make a blended Buckingham definitely milder where mildness really counts. They make a Buckingham Throat Easy. . . . Smoke a blended Buckingham.

Buckingham THEY'RE *"Throat Easy"*

Where traffic is heavy . . .

ILLUSTRATED above are two of the many public rooms and offices in the new Canadian National Central Station in Montreal, floored with Marboleum and Dominion Battleship Linoleum. These floors will be easy on thousands of feet and pleasing to thousands of eyes—and will last for years, too. :

ELECTRONICS

CONTINUES TO PERFORM NEW WONDERS

"Electronics," long familiar to the electrical engineer, has made possible many important applications of electricity during the past half century.

Radio is an electronic device . . . X-ray . . . Talkies . . . "Radar". A few of the Westinghouse developments in the field of electronics include the Ignitron, the Sterilamp and the Precipitron. These and many other new achievements will be among the contributions which Westinghouse engineers will make to the "Electronic Age."

Westinghouse

The Name that means Everything in Electricity

ARCHIBALD D. CAMPBELL, M.D., '11
Nominated for First Vice-President

Graduates' Society Nominations

AS required by article XV of the By-Laws of the Society, nominations for offices which will fall vacant at the end of the Society's year are now published in accordance with the report received by the Honorary Secretary from the Nominating Committee. Except for those offices where single nominations are allowed by the By-Law, nominations for double the number of vacancies to be filled have been made and are arranged in alphabetical order.

For President of The Graduates' Society. Term, two years.

ERIC A. LESLIE, B.Sc., '16.
Vice-President and Comptroller, Canadian Pacific Railway Company. Honorary Treasurer of The Graduates' Society, 1939-'41.

For Member of the Board of Governors of the University, representing The Graduates' Society. Term, three years.

F. GERALD ROBINSON, B.A., '05.
Vice-President, Canadian International Paper Co. Ltd., Montreal. Executive Council, The Montreal Branch of The Graduates' Society, 1936-'38, and President, 1938-'40. Executive Committee of The Graduates' Society, 1940-'41.

CHARLES F. SISE, B.Sc., '97.
President, The Bell Telephone Company of Canada, Montreal. Honorary Treasurer of The McGill University Graduates' Endowment Fund and Chairman of its Investment Committee since the inception of the Fund, 1922-1944.

For First Vice-President. Term, two years.

ARCHIBALD D. CAMPBELL, M.D., C.M., '11.
Associate Professor of Obstetrics and Gynaecology, McGill University. Chief of the Gynaecological Department, Montreal General Hospital. Member of the Graduate Council of The Graduates' Society, 1934-'36, of the Executive Committee, 1941-'43, and Chairman of the Membership Committee, 1941-'43.

For Second Vice-President. Term, one year.

OWEN CONNOLLY TRAINOR, M.D., C.M., '20.
Clinical Pathologist, Misericordia Hospital, Winnipeg. President, The Winnipeg Branch of The Graduates' Society, 1940-'44.

For Members of the Executive Committee. Two to be elected. Term two years.

FRANCIS G. FERRABEE, B.Sc., '24, (Dip. R.M.C., Kingston). Vice-President and General Manager, Canadian Ingersoll-Rand Co. Ltd., Montreal. Vice-President and General Manager, Sherbrooke Pneumatic Tool Co. Ltd., Sherbrooke, P.Q. Vice-President, Circo Employees Securities Corporation. Director, Wartime Prices and Trade Board. Commanding Officer and Major, No. 4 Reserve Divisional Ordnance Workshop, 1941-'43.

PHILIP N. GROSS, B.Sc., '26.
Vice-President and General Manager, Anglin-Norcross Corporation Ltd., Montreal.

S. BOYD MILLEN, B.A., '27; B.C.L., '30.
Vice-President, John Millen & Son. Ltd., Montreal. President, The Students' Society, 1929-'30. Undergraduates' Representative on the McGill Athletics Board, 1926-'30, and Graduates' Representative, 1930-'33. Executive Council, Montreal Branch of The Graduates' Society, 1930-'32 and 1943-'45, and member of its Nominating Committee, 1938-'40.

CLARENCE J. TIDMARSH, B.A., '16; M.A., '22; M.D., C.M.,'24.
Lecturer in Medicine, McGill University. Practising physician, Montreal. Executive Council, Montreal Branch of The Graduates' Society, 1938-'40, Vice-President, 1940-'42, and President, 1942-'44.

Summers in Camp

By
W. D. WOODHEAD

IN THE Summer of 1942 I found myself somewhat unexpectedly engaged to visit the Army Training Centre at St. Jérôme. My task was to help in the teaching of English to young French-Canadians who were qualifying for commissions in the Canadian active army. Before leaving for Brockville all such candidates were expected to possess an adequate acquaintance with the English language, and lessons in this subject were part of the regular training schedule.

When my companion, Professor Robert George, and I first went to the camp, we had little idea of what to expect. We did not know how we would be received by the officers, to whose mess we were attached, how much cooperation we might expect from them, or how ready we should find our pupils to acquiesce in our instruction. It was an entirely novel adventure—two civilians invading the army, two English-Canadians sojourning in a French-Canadian camp—and we went into it with all the valour of ignorance. But we were very soon to discover that everybody was eager to do everything to make our stay as happy and comfortable as possible. All the officers were well versed in English and displayed no reluctance in speaking it: they treated us despite our grey hairs as messmates and boon companions, and their courtesy and hospitality made us feel completely at home from the moment of our arrival.

Our pupils normally spent two months at the camp, during the first half of which period they were known as Candidates. After successfully passing through the first stage, they became Cadets: and after graduating they passed on to Brockville. As might be expected, there was the utmost variety in their knowledge of English. Some of them were perfectly bilingual, and we arranged to have these excused from the classes in order that they might improve their studies in other fields. The majority had quite a fair knowledge, but needed some practice in conversation and particularly in pronunciation. A few, but only a few, had a very small acquaintance with the language.

Our greatest difficulty was to secure regularity in our lessons. A platoon for which we were waiting in the classroom would be found to be away on a route march; or a three day scheme would suddenly rob us of a whole company. But we realized that such interruptions were inevitable, and made the best of the time really available. We did not follow any textbook systematically, but rather sought to encourage our young officers to read aloud intelligibly and to write and deliver brief speeches on various topics. Occasionally we organized a debate: and one such debate, on the dangerous subject of conscription, was carried through with the maximum of good temper and decorum.

In those days everything in the camp was done at the double. The boys would come breathless into the room, loaded down with all their equipment, and were glad to find a space of three quarters of an hour when they could sit down and get at least some physical rest. For fifteen minutes every Wednesday morning they all had to wear their gas respirators: and I shall never forget the curious spectacle they then presented. With their goggle eyes and black snouts they looked for all the world like pathetic poodles: and their voices would sound infinitely remote. Their breath would come in curious wheezes, and every sound they made was transformed into something rare and strange.

We allowed them to select as topics for their little speeches any subject that they liked: for our one object was to encourage them to talk English. Some would give a lecture on gas warfare or the rifle, some would speak of their first impressions of St. Jérôme camp, many would describe the work which they were doing before they enlisted, work of the most various kinds from lumbering to journalism. The climax came when one boy (evidently an expert on the subject) wrote a brief speech on the problem, "Why do people close their eyes when they kiss?" We had quite a lively debate on that subject.

How far we succeeded in our mission of teaching these boys English it would be hard to determine. Undoubtedly some of them made very real progress. But we both felt, Professor George and I, that we ourselves learned very much. It was the atmosphere which prevailed throughout the camp that really impressed us most. We were, as it were, a liaison between French and English Canada. We were living, the guests of our French friends, in their home; and they made us feel that it was ours.

The officers themselves were our constant companions at meals and of evenings in the Mess, and we found them delightful company. The C.O., Lt.-Col. Francœur, was a man of tremendous vitality, who

---

WILLIAM DUDLEY WOODHEAD, B.A. (Oxon), Ph.D. (Chicago), is Hiram Mills Professor of Classics and Chairman of the Department at McGill University, and a member of the Editorial Board of the MCGILL NEWS.

took a Puckish delight in springing something unexpected upon the men under his command. He was untiring himself and expected all his men to be untiring. There was nothing formal about his relations with his officers or ourselves, and nobody could have been more approachable. It was a very happy family over which he presided, all of them of French-Canadian origin except two English-Canadian officers from Montreal, who were thoroughly delighted with their work and their surroundings. Three of the officers were married during the summer, and I was invited to and attended all the weddings. One officer, a man almost as broad as he is long, was married in St. James' Cathedral in Montreal. The service was held in one of the side chapels of the church, and throughout the ceremony could be heard the strains of the Dead March, as a funeral service was taking place in the main body of the church: but my friend was blissfully unaware of it. I found all the officers, without exception, delightfully 'teasible'—a quality which I have always loved, since it makes immediately for the friendliest of relations.

The Padre, Capt. the Rev. J. A. Lalonde, was a grizzled veteran of 60 who had been a renowned athlete in his youth: and he was a tower of strength on the Officers' Softball team. We were not at all certain at first how he would take us, for he is not a man who wears his heart on his sleeve: but he very soon became one of our closest friends. He is tall and thin, and carries himself straighter than many a soldier. His expression is austere, but there is a delightful twinkle in his eye, and he has a master's gift of telling and acting a story. He proved, too, a man of many accomplishments, and startled us all by undertaking to train a band. He informed me that the regular word for Band is Fanfare, and that the French word, Bande, meant a number of people who did not necessarily know anything about music—which, I replied, was a tolerably accurate description of his own band. But he told me to wait and see: and certainly in the short space of three weeks he had worked marvels with his men, only two of whom even knew how to read music when they came to him. He was extraordinarily kind in helping me to practise my French: and here he had me at his mercy. I could only retaliate by insisting that his favourite words in French seemed to be Baseball, Catcher, Pitcher, and Maudit. We got along famously together. He loved to tease and be teased: and I have found that he writes a most amusing letter.

I have tried to give something of a picture of life in that camp: but there are all kinds of little trivialities which occur to me as I think back: the stalwart lieutenant, who snored in the key of G flat minor and could be heard throughout our hut; the little black dog which adopted the camp as its mascot, a little creature which had tried so hard to be a black cocker spaniel and could not quite make it: he always accompanied the men on their route marches, and knowing his place and his worth, would walk directly behind the officer in the lead, but in front of the men: the cadets swinging back from a long route march, singing lustily as they entered camp. It was a happy, happy time, in the friendliest of atmospheres: and when the time came to leave after fourteen weeks of residence, I could tell them quite truthfully that the place had been a second home to me.

My second venture was a direct result of the first. For Col. Francœur had now become a Brigadier in command of the 21st infantry brigade at Valcartier: and it was he who asked once more for our services to help in the teaching of English to his troops. This was a venture of an entirely different kind, for the scheme in prospect was the teaching of English to a whole brigade of drafted men, not officers, and the numbers involved promised that it would be a formidable task. Dean LeMesurier of the Faculty of Law at McGill was chosen as the Field Counsellor to whom I was subordinate: and in the middle of May, 1943, we both paid a visit to Valcartier in order to discover the nature of the work.

When we heard what was contemplated, we realized that here was a scheme which would require the services of a corps of civilian teachers, a real invasion. But here as before the Canadian Legion Educational Services came to our help, and we obtained permission from the Brigadier and the Legion to secure the assistance of a number of professional teachers from the schools of the province.

The time at our disposal was short: we had to get in touch immediately with a band of men willing to undertake the work: and moreover we could not inform them offhand of the terms of appointment. But we succeeded in obtaining from the Protestant and the English-speaking Catholic schools of Montreal, and from the French Catholic schools of Quebec city, some twenty teachers, most of whom could promise to stay at Valcartier for the months of July and August.

Dean LeMesurier and I went to Valcartier on June 21st to make all the necessary preparations for the reception of the teachers; and on July 1st a procession consisting of a jeep, two battle-wagons, and an army truck drove the eighteen miles to Quebec to pick up the teachers and their baggage. The units of the Brigade stationed in camp at the time were a battalion each of the Régiment de Lévis, Régiment de Maisonneuve, and Fusiliers Mont-Royal, together with units of the R.C.E., R.C.A.M.C., and R.C.A.S.C.: and after shuffling thoroughly we dealt out the teachers as required. They messed and had their sleeping quarters with the units to which they were assigned, while Dean LeMesurier and myself were billeted upon Brigade Headquarters.

Once these dispositions were made, things began to happen with lightning speed. The Fusiliers started off on a three weeks' scheme to Murray Bay, and the teachers, neatly clad in khaki, went with them, the youngest member of the group of four actually marching the whole way with the men. Throughout the scheme the teachers kept up a regular schedule of lessons and succeeded in creating a very good impression. The other units remained in camp for the present, and plunged straight into their task.

The recruits responded well to the experiment and seemed without exception eager to learn. Companies were divided into three groups, those who knew no English, those who had a little, and those with a fairly advanced knowledge: and the teachers grappled manfully with the novel work. It was interesting to watch the different ways in which they conducted the classes. Some of them started their men off right away singing English songs, and it was quite an experience to enter a classroom and find the men singing "Old Macdonald had a farm." The Legion texbooks were supplied to all the troops and were used as a basis for instruction.

Odd and somewhat humorous situations were constantly occurring. We had been at work for a couple of weeks before we were informed that authorization had not yet been secured for the teachers to receive their meals and quarters at the various messes. It would have been a serious expense if they had had to find money for the payment for such privileges, and in any case we had been assured that this would be arranged for. It was half-seriously suggested that the teachers should be classified as Salvation Army—the classification which, apparently, is generally accorded to travelling entertainers and concert parties when they visit camps. But after a long delay the authorization came through, and the teachers rejoiced to discover that they were not being fed at the expense of the officers in their messes—or at their own.

I think it may be said that, in nearly every case, the teachers were surprised and delighted with the way in which they were received in the Officers' Messes to which they were attached. They found the same courtesy, the same hospitality which I had already experienced at St. Jérôme; and they spoke of it in glowing terms. They liked the men with whom they met in the instruction periods, and were glad to discover that these men were anxious to learn. They were invited to parties by men and officers, and they very soon felt themselves thoroughly at home. Of one thing we soon became certain, that, whatever success the teachers might achieve among the men, they themselves would learn much that would be of the greatest value as a result of their summer adventure. And I am sure that they would agree with this statement.

Brigade Headquarters Mess, to which LeMesurier and I were assigned, was a small mess: and consequently we had an opportunity of getting to know our officer friends very well. I was delighted to find there two officers whom I had known well already at St. Jérôme. others were scattered through the various units: and there were also many boys whom I had taught as cadets and who had since become officers.

We found a tower of strength in the Army Examiner, a man of infinite resource and ever ready to put himself and his advice at our disposal. He was a man with the smoothest and most benignant of brows and a most pugnacious chin, features which combined to give him an air of what can only be described as benevolent ferocity. I think he had seldom been teased before in his life, and at first he was somewhat puzzled by these elderly gentlemen who rejoiced in pulling his leg. But he soon came to delight in our good-natured teasing, and he proved the staunchest and most loyal of our supporters. His English was very fluent, but occasionally he made the strangest of blunders, as when he spoke of the young lady who fell down 'unconscientious,' and of the use of 'desecrated' food in the army. But he was well aware that I at least was capable of similar blunders in French, and fortified himself with the story of the English officer who offered his cigarette case to a French officer with the words "Etes-vous fumier, monsieur?" We owed the Army Examiner a great debt of gratitude for all that he did to make our task easy.

The first batman assigned to us was a young fellow named Bernier, a tall, good-natured youth who spoke not a word of English. He evidently found some difficulty about the spelling of my name, for when I asked him to send some shirts to the laundry, they all came back marked with the name Audet, the nearest phonetic spelling he could achieve for Woodhead. We were amused, too, when LeMesurier, who was in uniform, wanted to have the buttons on his tunic polished: he asked Bernier, "Voulez-vous nettoyer, frotter mes boutons?"and the boy, after looking blank for a moment, beamed and said, "Ah, SHINER!" We discovered that the batmen were aware of world-shaking events before anybody else at H.Q., for it was one of them who first informed us that Roosevelt and Churchill were to meet at Quebec, a week before it was mentioned by any of the officers. They were willing boys, those batmen, always ready to do anything for us, always cheerful.

Classes usually ended at mid-day on Fridays, and it was an easy and inexpensive matter to run in to Quebec (there was often a jeep handy), and occasionally the longer journey to Montreal was undertaken. It was from one of our teachers who had gone away for such a week-end that we received a telegram one day saying that he was sick and would not be able to

return until Monday evening. As a matter of fact, he did not get back until Tuesday morning. I happened to be in the mess to which he belonged on the Tuesday afternoon, when an officer requested him to go out for a moment: and I looked from the window to see him solemnly escorted to the Guard-house. He was ushered into a cell, where he spent a quiet quarter of an hour. I was only sorry that the mock court-martial, which was to try him for being A.W.O.L., had to be abandoned at the last minute. But the incident is an indication of how friendly were the relations between teachers and officers, and how ready they were to enjoy fun together.

In the camp the troops themselves were always a matter of great interest to us. In an English camp the boys would be taller and slimmer: but here we saw very few that were tall. They were for the most part sturdy young fellows, with fine chests and well-developed legs, a breed that could march and fight and would not tire easily. Nothing in fact impressed us more at Valcartier than the fine, healthy physique of these young French-Canadians, and their unvarying good humour.

I have endeavoured in these pages to give an impression of life in somewhat unfamiliar surroundings, to paint a picture from memory of what I saw in two camps which in many ways were very different. Valcartier is enormous, St. Jérôme relatively quite small. But in both camps I lived among French-Canadians. I visited both with a perfectly open mind, absolutely unaware of what awaited me, only anxious to do what I could in the task which I had undertaken. I went to teach: but, like those who went with me, I realized in almost no time that I was there to learn, and that what I learnt might prove of inestimable value to me. And it is because my experiences made such a deep impression upon me that I have written this brief account of them. I should like, by way of conclusion, to say something of what I learnt.

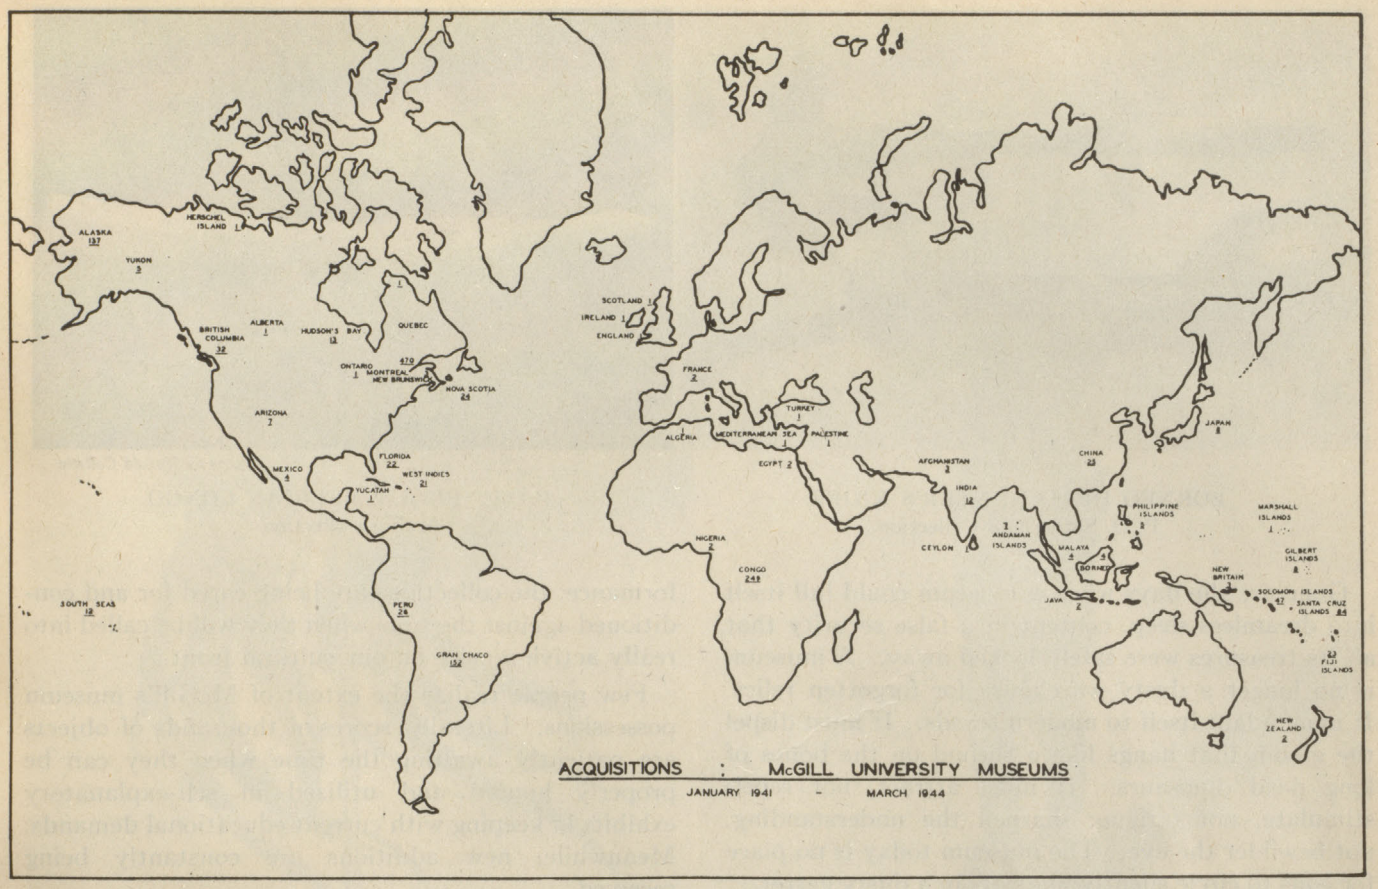

We must let no obstinate prejudices blind us to the fact that, for better or for worse, French and English Canadians are destined to live together. It is only when we realize and accept this situation that we can begin to study seriously the means whereby peace and harmony between the two races can be secured. The French language and culture are a very real asset to the Dominion, and the last thing in the world that sensible people should expect is the abandonment of that culture. It is here to stay, and antagonism merely adds strength to it. It is desirable, of course, that French-Canadians should also have English: but I believe that the best way to achieve this end is to be able to speak French ourselves. Even an endeavour, a readiness to speak their language is important, as everybody knows who has made the experiment. Moreover, it is impossible to understand them, their point of view and their way of life, without some knowledge of their language. We must not wait stolidly within our lines and ask them to come forward to meet us: we must both learn to move.

The important thing, as I have learnt during the last two summers, is the personal contact, and the sooner such contacts begin, the better. They should begin in childhood, and that is what we should all aim to secure. It is useless to stand apart and insist that in this and in that *we* are not to blame. We must make it clear that we are not engaged in any nefarious conspiracy against their religion, their language, their way of life. I do not for a moment mean to suggest that all blame for the present state of affairs rests with us: I would only insist that such speculations are negative and lead nowhere. That French and English can live together on terms of real friendship was abundantly proved to me during the past two summers. But they have to meet, to know each other, to understand and respect each other. Charles Lamb once remarked to a friend, "How I hate those Blanks." "But you have never seen them," his friend replied. "No," said Lamb, "that's just it. That's why I hate them. I can never hate anyone that I've once seen." There is a very real truth in this point of view. We need not, of course, carry it to extremes and believe that we have only to see Himmler to love him. But most hates and dislikes arise from ignorance; and once the clouds of ignorance are dissipated, the hatreds vanish. We must not be misled by noisy extremists, either among ourselves or among the French-Canadians. But we must realize, amid all the talk of reconstruction and of a better world in the days after the war, that here, right before us, is the most pressing problem of all, the unity of Canada. It is a problem fraught with dangers, and it is of no use to close our eyes to it. For it must be solved. "A house divided against itself cannot stand."

Graduates' President Addresses Message to Students

The importance of the loyalty of its graduates in the future of the university was stressed by Fraser Keith, President of the Graduates' Society, in an article addressed to the students, appearing in the McGill Daily recently.

The article traced the history of the Graduates' Society, calling attention to the fact that it had sponsored the founding of the McGill C.O.T.C. in 1912, at that time the first of its kind on the continent, and later assisted it in recruiting, equipping, and training seven companies, one battalion of infantry, and other units. It had also promoted the construction of the Molson Stadium and the Sir Arthur Currie Memorial Gymnasium-Armoury, the article stated.

A total of 1429 objects were added to the collections of the Ethnological, McCord and Redpath Museums of McGill University between January, 1941, and March, 1944. The figures on the above world map indicate the number of objects received from each locality.

McGill Museums Face A Crisis

By
ALICE E. JOHANNSEN

A GROUP of small boys stood on tiptoe before a deep cabinet in the Redpath Museum. One had his hand on an electric switch.

"Push it, George, the one that says 'ultra-violet light'. " George obeyed and there was a chorus of exclamations.

"Gee whiz!" said one.

"They're beautiful."

"What makes them do that?" asked a third. "When you push the 'ordinary light' button the stones look just plain. Now they're all lit up inside."

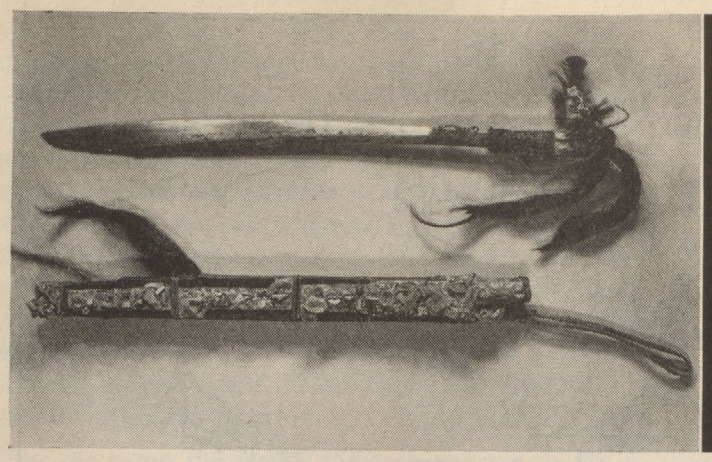

The boys examined the label. "Invisible light" from a hidden bulb, it said, in striking these specially selected minerals causes them to give off a radiance of their own. "You wouldn't believe anything could be so beautiful if you didn't see it yourself," marvelled George. "This sure is an interesting place."

And that was praise indeed. The museum had passed an acid test.

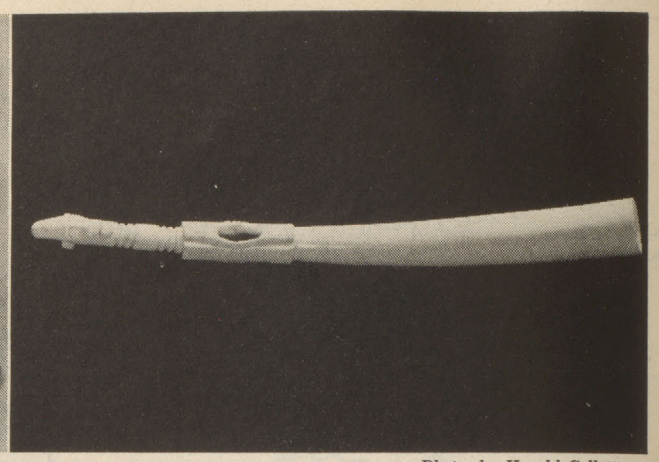

ALICE E. JOHANNSEN, B.Sc., '34, is Assistant Curator, McGill University Museums.

When people ask, "What use are museums in time of war? Who is interested in fossils and mummies when the world is in such a mess?," the museologist wonders at their lack of vision. One might as sensibly question the value of churches, schools and libraries, declaring them useless since they do not actively destroy the enemy. For museum, library, church and school are constructive agencies in a world destruction bent. Not without reason may we ask ourselves, "What shall it profit a man if he shall gain the whole world and lose his own soul?." These institutions are the very agencies we fight to save. They will be scant comfort if they perish in the salvage.

So let us look to our museums. Gathered within their walls are facts and objects. These have a hidden power, invisible in ordinary light, perhaps, but strangely glowing when seen in proper setting with sympathetic interpretation. Then fossils and mummies can indeed be made to stir, and history can be made to move in vivid pageant.

Gone are the days when a museum could lull itself into dreamless sleep, content in a false security that all its treasures were safely locked away. A museum is no longer a dusty warehouse for forgotten relics. It must adapt itself to modern trends. It must dispel the gloom that hangs like a shroud on the bones of long dead dinosaurs. It must attract, not repel; stimulate, not fatigue; sharpen the understanding, not bewilder the eye. The museum today is no place for eons to circle silently like bats in a dusty garret.

A successful museum, like a successful theatre, must echo the living. It must help the beholder to feel that *he* is part of the stream of life, part of a ceaseless drama. These vast bones should conjure up the tread of might, beasts. That stony leaf should recall the day when, green and glistening, it drifted down some Carboniferous stream among the shadows of gigantic ferns. A museum should give us broadened vision, a telescopic view of time, which should place in proper perspective the teeming events of our own day. Too often we live so close to the present that we cannot focus. The significance blurs in our myopic eyes.

In the light of modern trends in the museum field the present situation at McGill may appear rather drab. Dearth of funds and lack of staff have made it necessary to close two of the four main University collections: the Ethnological Museum with its background of primitive cultures from six continents, and the McCord National Museum of Canadiana. The History of the Book in the Redpath Library and the Natural Science material in the Redpath Museum alone remain open to the public. And the Redpath Museum, though the last word in museum technique at its inauguration in 1882, could by no stretch of the imagination be classed today as a modern, living institution.

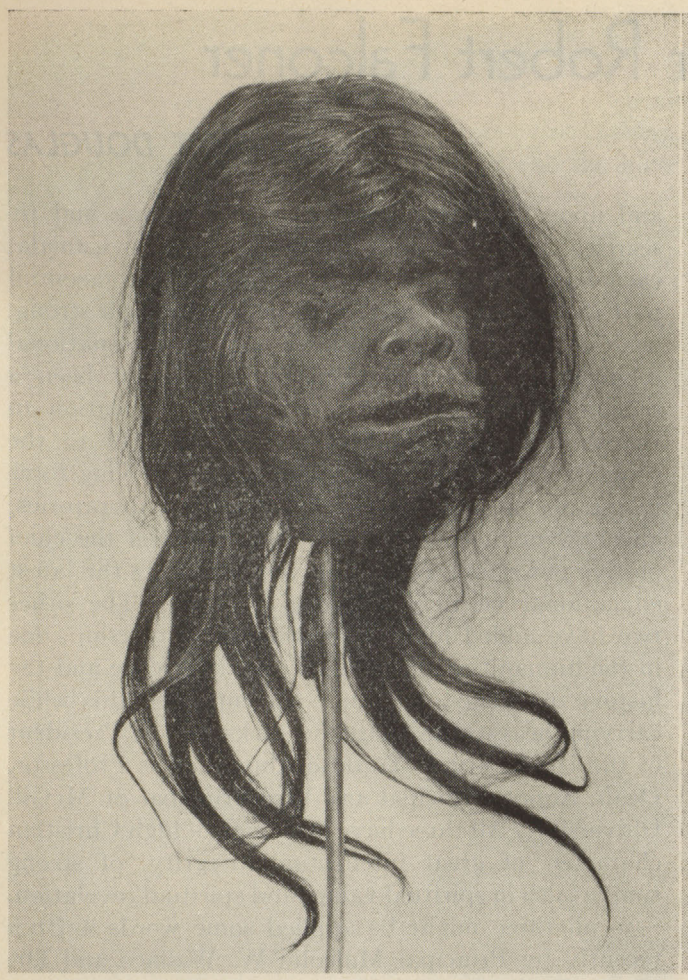

There is, however, one supremely encouraging thought. The scope for improvement is limitless. While it is necessary for the moment to suspend performance, the collections are being cared for and conditioned against the time when they will be called into really active service on our cultural front.

Few people realize the extent of McGill's museum possessions. Literally, scores of thousands of objects are patiently awaiting the time when they can be properly housed and utilized in self-explanatory exhibits in keeping with current educational demands. Meanwhile, new additions are constantly being received.

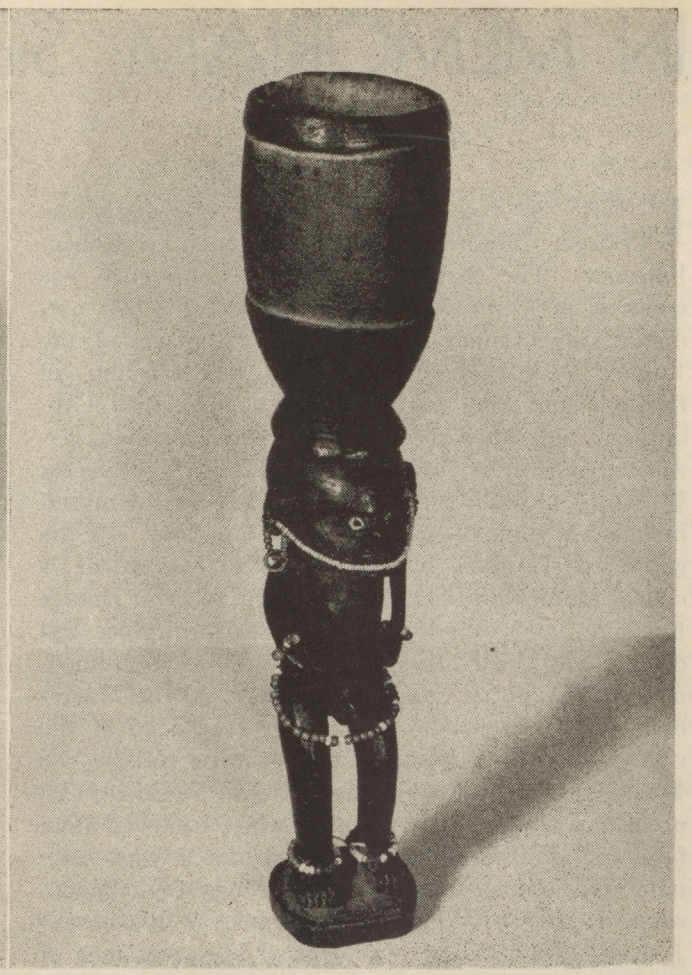

During the past five years' acquisitions have come from the four corners of the globe, from the Yukon to South Africa, from India to the South Seas. Some of the most numerous items are fruits of the 1938-1939 McGill-Congo Expedition led by Mr. Duncan Hodgson of Montreal with the sanction of the Belgian government. Prize specimen is a huge mountain gorilla which stands today, powerful and defiant, challenging all who enter the Redpath Museum. Jungle birds, brilliant butterflies, and the host of ethnological specimens also brought back by this expedition are necessarily stored for the present but will someday be suitably exhibited as a background of life in this important but little known country which straddles the equator.

Supplementing this Congo material is the collection assembled a quarter of a century ago in the same area by Mr. W. H. Mullin of Montreal, a former employee of the Belgian government. These 250 objects, acquired last year through the generosity of Mr. Hodgson, include finely wrought knives of native iron, poisoned arrows, war drums and elephant ivories. Added to the astonishing variety in the J. L. Todd and Frank W. Read African Collections, this material forms an interesting contrast to the extensive North American objects already in the museum.

The excellent Molson Collection of North American Baskets has had numerous recent additions from the late Mrs. James Peck and the late Mrs. James C.

Simpson. The Hayter Reed Indian Collection and several impressive groups of Indian and Eskimo material, lent through the generosity of Dr. J. L. Todd of Senneville and Major Hiram Steele of Montreal, have also been housed in the museum for a number of years. To these objects was added last year a collection of Eskimo articles acquired 25 years ago by Mr. R. G. Oliver of Westmount when shipwrecked off Cape Prince of Wales in Alaska.

An important group of textiles has come from Mr. John Arnott, a former medical missionary now with the Royal Canadian Air Force. During sixteen years with the Indians of the Gran Chaco, Mr. Arnott made a notable collection of woven girdles, bags and ponchos illustrating the ingenuity and skill of the primitive people who inhabit that much disputed region where Bolivia, Paraguay and the Argentine merge.

With every day of warfare in the Pacific the museum's South Sea specimens achieve new importance. Latest additions have been some 200 weapons and ornaments collected in 1881 in the Fiji and Solomon Islands and presented last year by Mr. Mostyn Lewis of Montreal, nephew of the collector. Most recent large presentation is the P. D. Sutherland Collection of Far Eastern Arms which throws light on hand-to-hand fighting methods in India, Java, Borneo and the Philippines.

Many of the museum's gifts, however, are isolated objects picked up in the past by world travellers. Some, like the Japanese armour given by Mr. Cleveland Morgan, have come via the auction room. Others, like the costume bought by Mr. Harry Rethoret of Westmount "from the back of an inebriated Indian," were acquired at the source.

A mounted musk-ox given by Mr. A. J. Alexandor, an eight-foot Florida sailfish caught and presented by Major Victor Whitehead, and a seventeen-foot Congo python shot by Mr. W. H. Mullin, together with shells from the Andaman Islands and numerous fossils, birds, and minerals from other sources, have swelled the already crowded facilities of the Redpath Museum.

Costumes and accessories worn in Montreal in the 19th century have reached the McCord Museum

IN MEMORIAM: Sir Robert Falconer

By
A. VIBERT DOUGLAS

IT WAS in the Fellows' Garden of Magdalene College, Cambridge, that I first met Sir Robert Falconer. The British Universities Conference was meeting in Cambridge that summer of 1921, and distinguished university men from all parts of the Empire were gathered there. I was working all through that long vacation in the Cavendish Laboratory and, knowing several of the Canadian delegates,—Dr. F. D. Adams, Dr. H. M. Tory, Professor William Caldwell, Sir Arthur Currie,—found myself included in some of the Conference functions. At the garden party given by the Master of Magdalene, a college founded in 1542, I was introduced to Sir Robert Falconer, whose kindly courtesy, beautiful voice and diction, and cordial friendliness impressed me immediately. He and his son were the guests of the Master of Trinity, Sir Joseph Thomson. He spoke of the rich experience of living in that historic college, the Master's Lodge of which is a Royal Residence on occasions, and so many rooms of which are even more famous because of the undergraduates who once inhabited them—Isaac Newton, Macaulay, Thackeray, Tennyson, Whewell. He spoke of his host—J. J. to all who knew him—one of the great men of Cambridge, kindly, whimsical, and full of anecdote and reminiscence. He spoke of the beauty of "the Backs," where the little river Cam runs through the College grounds; but it appeared that he had never been on the Cam, had never seen the Colleges from a punt or canoe on this lovely stream that wanders past eight ancient colleges and under nine bridges in a three-quarter mile stretch.

It so happened that I had hired a canoe for the entire summer and was in the habit of spending an hour or more almost every evening paddling up and down the Cam, so I knew and loved every yard of the way from Chesterton Road locks to the Mill Pool. Sir Robert welcomed the idea of coming to tea on the following Sunday and then paddling up through "the Backs;" and so it was that three of Canada's great educators—Sir Robert, Dr. Tory and Dr. Adams—forgathered on a hot summer day in student "digs" on the Chesterton Road opposite Jesus Green.

Of these three outstanding Canadian-born educators, two are gone from us. Different in many ways as these men were, they have had much in common. Throughout the last half century, each has poured out his energies unstintingly upon Canadian youth and upon Canadian institutions of learning and research. Each has had unswerving faith in Canada; each had a vision of its future and of the essential part that education must play in developing a strong, healthy awareness of national and of international relationships and responsibilities. One has been a pioneer all his years, carrying higher education to British Columbia, to Alberta, and in 1918 to the Canadian Army overseas. He was the driving force in establishing the National Research Laboratories; and now in these latter years, he has been the chief motive power in establishing and launching the latest educational venture, Carleton College. The other two have added lustre to Canadian scholarship, one in the humanities and religion, one in science and the history of science; and they accomplished this while carrying heavy administrative tasks, one as President of the University of Toronto, the other as Professor, Dean, Acting-Principal and Vice-Principal of McGill University. All three have been men of high Christian character, of great intellectual integrity, of strong simple faith in spiritual values and spiritual revelation,—to all three might be applied some words written recently by Principal Malcolm W. Wallace and Dr. W. R. Taylor in their tributes to Sir Robert: "There are those who never cease to grow," whose religion "acquired by assent must be re-won by an effort of the mind and will," whose passion it is "to understand more clearly the enigma of life," "who by sheer power of personal worth keep strong our faith in moral and spiritual values."

After tea on that hot, quiet Sunday afternoon, we walked over to Crowe's Boat-house. Sir Robert was interested to hear about old Crowe and his son. The latter was unable to enlist in 1914 because of severe deafness, but the father, though over age, got himself accepted and served in the Army until a fall led to a broken limb and his discharge. He had then returned to his boat-house, his punts and canoes. Great was his satisfaction in his own army record and his pride in the position of trust held by his son, who had become technician in the Cavendish under Sir Ernest Rutherford, preparing for him and for all of us who worked in his laboratory the sources of radio-active discharge which were needed in our work.

Sir Robert took his place in the centre of the canoe, his son took the stern paddle, I the bow paddle, and we set off upstream, past the ivy-clad walls of Magdalene, with its memories of Pepys who contributed towards a new library and bequeathed to the College all his own books and his red oak bookcases. Passing

---

A. VIBERT DOUGLAS, M.B.E., M.Sc., Ph.D., F.R.A.S., for many years Lecturer in Astrophysics at McGill, is now Dean of Women at Queen's University, Kingston.

under Magdalene Street bridge, we came to the narrow part of the river flowing between the walls of the old and new buildings of St. John's College. These buildings are connected by the covered arched bridge known as the Bridge of Sighs. Beyond this the view of the next two bends of the river opens up with ivied walls, college buildings, towers and turrets on the left, and grey stone bridges giving access to the green lawns, lovely trees, weeping willows and flower gardens on the right. We talked of some of the sons of this college—William Wordsworth, Matthew Prior, Samuel Butler, Sir John Herschel, William Wilberforce, Henry Martyn—as we paddled under St. John's Bridge and on between the green lawns of Trinity College where the arcades and Grecian stateliness of Sir Christopher Wren's Library held our gaze. Then skirting the walls of Trinity Hall which had nurtured Lord Howard of Effingham, and Clare College with its greystone bridge, we approached the lawns and gardens of King's College, whose stately chapel rises to the glory of God and as a monument to two Kings of England,—Henry VI, who founded the College and planned the erection of the Chapel and Henry VII, who provided the funds for its completion. We passed under King's Bridge, watched undergraduates sitting on the river bank as they fed the ducks that frequent that stretch of the river, viewed the buildings of St. Catherine's College and then paddled along by the red brick walls of Queens', and under its wooden "mathematical bridge" whose every timber is set tangential to the curve which it and all its fellows envelop. Here one inevitably thinks of Erasmus, who held the chair of Greek at this College about 1510, and so as we paddled on into the mill pool, the talk was of reformation by restatement as opposed to reformation by revolution.

Beyond Silver Street bridge, a sharp turn to starboard brought us into a dark, narrow bit of the river between a wooded island and the walled garden of Lady Darwin, widow of Sir George of Trinity College, the son of Charles Darwin of Christ's. Over the stone retaining wall, hung the silvery olive green leaves of sweet lavender and, from the canoe, one could always pluck a fragrant blossom or two in passing.

The fragrance of sweet lavender—this perhaps is as good a metaphor as any, when recalling memories of that Sabbath afternoon, twenty-two years ago. The years that followed brought further happy contacts on a few occasions,—tea in Sir Robert's own garden when the British Association held its 1924 meeting in Toronto, and some friendly gatherings at times of conferences. I think, too, of a masterly address at the McGill Union on the League of Nations, of a scholarly and inspiring address at a meeting of the Bible Society in Montreal, and of the charm, grace and sincerity of his vote of thanks to Dr. G. S. Brett after the latter had delivered his presidential address some years ago to Section II of the Royal Society of Canada. I have long thought that, as a speaker, Sir Robert had no peer in this country. The music of his voice, the polish and balance of his sentences (so well described as "distinguished English"), the quality of his thought, and the conviction that lay behind all he said—this combination is all too rare.

It was a book by the late Master of Magdalene, Dr. A. C. Benson, which brought to my attention the words of a chapter-heading in the Book of Proverbs, "a sincere and kind familiarity with wisdom." This phrase seems right and fitting, and comes unsought into my mind as I venture to pay this tribute to the memory of Sir Robert Falconer.

John Jeffrey Fiske, McGill's Oldest Graduate, Reaches 100

ON February 22, John Jeffrey Fiske, McGill's oldest living graduate, celebrated his 100th birthday at his home, 87 Arlington Avenue, Westmount. In honour of the occasion, Principal F. Cyril James accompanied by Fraser S. Keith, President of the Graduates' Society, called on Mr. Fiske to offer the congratulations of his alma mater and of the Society. A copy of a resolution of congratulation passed at the last meeting of the Society and a plaque bearing the McGill crest were presented by them to Mr. Fiske. Last year on attaining his 99th birthday, he had been made an emeritus member of the Graduates' Society.

Mr. Fiske was born in Abbotsford, Que. on February 22, 1844, and obtained the B.C.L. degree from McGill University in 1868. He practised in Montreal with his cousin, the late Hon. Sir John J. C. Abbott, a McGill graduate of the class of 1854, who was Prime Minister of Canada 1891-92. In 1888, Mr. Fiske retired from legal practice when he became manager of the Coaticook Penman Mills from which he retired in 1907.

Mr. Fiske is a keen bridge player and plays nightly. He has never smoked nor used alcohol and attributes his longevity to "moderation in everything." He has never been in hospital. He recently showed great interest in the newspaper accounts of the 100th anniversary of Sir William Mulock, whose birthday is in January and who, therefore, is a month older than Mr. Fiske. Until recently, Mr. Fiske was a regular worshipper at St. Matthias Anglican Church.

McGill University War Records—IX

By
R. C. FETHERSTONHAUGH

ONE hundred and fifty-seven new cards added to the existing files of McGill University War Records in the past three months and a special file of 193 cards opened on February 1 for the Army Course men remaining in the course at that time brought the total number of cards on file on February 20, 1944, to 5,323. Of these, 4,281 represent McGill men and women on Active Service, including 408 in the United States Forces, three in the Polish Army, one in the Polish Navy, one in the Royal Netherlands Navy, and one at present in the Air Force of the Fighting French, though awaiting British citizenship and a subsequent transfer to the R.A.F. The Active Service total does not yet include the new file of Army Course men, though these, being "General Service" troops, will be transferred into the Active Service total upon the completion of their studies at McGill. The total does, however, include the University's list of killed and missing, which has grown to 153, and the list of prisoners of war, which stands at 33. It also includes 180 McGill women, in the Active Service formations of the Royal Canadian Navy, the Canadian Army, and the Royal Canadian Air Force.

Though no such claim can be made, as figures for comparisons are unavailable, it is believed that McGill's 408 officers and men in the forces of the United States represent a contribution to the American effort unsurpassed, and, quite possibly, unequalled, by any other non-American university. The majority of these men are officers in medical or dental units of the U.S. Army, the U.S. Army Air Corps, or the U.S. Naval Reserve. A substantial minority are combattant officers in the Air Corps, and a few are specialists in such organizations as the Branch of Chemical Warfare or the Service of Supply. Six McGill men in the American Forces have been killed in action or have died of injuries or wounds.

As usual, a summary of the news reaching us through regular channels of the University's personnel on Active Service is included in the *On His Majesty's Service* section of this issue. In addition, through replies to the Principal's recent letters of enquiry, we have had news of some hundreds of those who, having interrupted their courses at McGill to join the Active Forces, are now scattered throughout the land in training, or are already in combat overseas. For a time, we planned to include the particulars about these undergraduates in the regular *O.H.M.S. Section* of this issue, but the number of the replies proved too great for the space we could spare. All details have, accordingly, been entered in the War Records files and the question of printing them has been left for future consideration.

In the work of the War Records in the past three months, help, as usual, has been given by many friends and correspondents. Through the Principal's interest, as already mentioned, our files covering the Active Service of former undergraduates have been strengthened; and through the uninterrupted co-operation of the Graduates' Society many graduates' cards have been brought up to date. In all this work, the staffs of the Registrar's and Graduates' Society's offices have given most generous assistance.

Though space forbids a listing of those outside the University to whom we are indebted for photographs or information, and to whom our thanks must accordingly be all too inadequately expressed, we should like once again to mention the help given by H. R. Morgan, of Brockville, Ontario, also that afforded by Major W. H. Carling, Commanding Officer, No. 4 Vocational Training School, Montreal. By watching the Ontario and New York State press, Mr. Morgan provided us with many clippings giving news of graduates in those areas; and Major Carling furnished information unobtainable elsewhere regarding the Army Course personnel. We are grateful indeed for the help and courtesies thus shown.

In presenting this installment of the War Records section, we renew our request for photographs of McGill men and women on Active Service and for news of their enlistments, honours, promotions, and appointments. Photographs and correspondence may be addressed to the Graduates' Society of McGill University, 3466 University Street, Montreal, or to

WAR RECORDS,
Registrar's Office,
McGILL UNIVERSITY.

As the next issue of THE McGILL NEWS will be a special Convocation Number and will be published in May, instead of in June, as usual, Active Service items intended for that issue should be forwarded as soon as possible. At either of the addresses noted above, they will be warmly welcomed.

R. C. FETHERSTONHAUGH, author of six volumes of Canadian Military History, also of a History of the Royal Canadian Mounted Police, is Vice-Chairman of the Editorial Board of THE McGILL NEWS and is in charge of McGill University's War Records.

It was with deep regret that we learned in December last that Lieut.-Gen. A. G. L. McNaughton had found it necessary to retire as General Officer Commanding the Canadian Army Overseas, though the regret was tempered by pride in his immense achievement. Called back to military duty from his post as President of the National Research Council in 1939, he assumed command of the 1st Division of the Canadian Active Service Force and stood with that formation in 1940 as a bulwark of Britain against invasion. Together with the Royal Navy, which held the sea approaches, and the Royal Air Force, which battled the would-be invader in the skies, the 1st Division constituted the strongest single unit of defence that Britain could muster to meet the attack which was hourly expected. Gradually, as that danger passed, McNaughton welded the superb weapon which became the Canadian Corps and later the First Canadian Army. In Sicily and Italy, the temper of one corps of that weapon has already been tried. Before these lines appear in print, the full quality of both corps may be even more impressively proven. More than any other, McNaughton has been responsible for the status the Canadian Army has already won; to none will belong a greater share in the glory that is yet to be. To Andrew McNaughton, soldier, scientist, and distinguished son of Old McGill, Canada's debt is immense. We are proud, even in the few words that space here permits, to welcome him home and to express, however inadequately, gratitude for the service he has rendered and confidence in his success in whatever duty Canada shall now call upon him to perform.

MAURICE ARTHUR POPE, C.B.
B.SC. '11

Veteran of the Great War, in which he won the Military Cross, Major-General M. A. Pope, Commanding the Canadian Army Staff in Washington, D.C., was appointed a Companion of the Order of the Bath in the King's Canadian Honours List, promulgated January 1, 1944. Previously decorated by the Belgian Government, which, in November, 1942, awarded him the Croix Militaire Belge for his assistance to Belgian troops training in Canada, Major-General Pope received the C.B. for his efficiency and success in the numerous staff appointments he has held since the war began. Director of Military Operations and Intelligence at National Defence Headquarters in Ottawa in 1939, he went overseas with the rank of Colonel and served at Canadian Military Headquarters in England until 1941, when he returned to Canada, becoming Assistant Deputy Chief, later Vice-Chief, of the Canadian General Staff, and still later Chairman of the Canadian Joint Staff in Washington and Representative there of the Canadian Chiefs of Staff. To all the intricate negotiations between the Canadian Forces and those of the United States, and in the solution of many of the complex problems of military co-operation, Major-General Pope's knowledge and ability proved of impressive worth. We congratulate him warmly on the recognition his services have won.

HOWARD KENNEDY, C.B.E.
B.SC. '14

In our Autumn, 1943, issue we congratulated Major-General Howard Kennedy, M.C., upon a promotion in rank and upon his appointment as Quartermaster-General of the Canadian Army. We again offer warm congratulations, this time upon his appointment as a Commander in the Military Divi-

sion of the Order of the British Empire, announced in the King's Canadian List of New Year's Honours, issued in Ottawa, January 1, 1944. A veteran of the Great War, in which he won the Military Cross and was severely wounded, General Kennedy volunteered for Active Service on the outbreak of the present war and went overseas in 1939 as a Major with No. 3 Field Company of the Royal Canadian Engineers from Ottawa. Later, he was appointed to command the Engineers of the 1st Canadian Division overseas and held that appointment until August 5, 1941. Holding a number of subsequent appointments at National Defence Headquarters, Ottawa, he became Quartermaster-General, May 7, 1943, and has since served in that capacity. The C.B.E. was in recognition of the success he has attained in his varied and responsible duties since 1939.

HARRY McLEOD HAGUE, D.S.O.
B.C.L. '21

Though news of the award of the Distinguished Service Order to Lieut.-Col. H. M. Hague, Royal Canadian Artillery, had reached us from the Central Mediterranean area before our Winter Number went to press, we were unable to record the honour, pending its official announcement, which was made by National Defence Headquarters in Ottawa on December 23, 1943. According to the citation published at that time, Lieut.-Col. Hague, while in command of a Field Regiment of Canadian Artillery in Sicily in July, 1943, carried out a daring reconnaissance in the Nissoria area, after the capture of Leonforte, and returned with information vital to the success of the intensive fighting in which troops of the 1st Canadian Division were engaged. Since then Lieut.-Col. Hague has been wounded during the advance of the Canadian elements of the British Eighth Army in Italy, but it is believed that his wounds, though involving the loss of his right hand, are not of a dangerous nature. He is a son of H. J. Hague, K.C., (B.A., '82; B.C.L., '85), and Mrs. Hague, of Montreal; a brother of Major Edward Cousins Hague (B.Sc., '23), Royal Canadian Artillery, Overseas, and Lieut. Helen S. Hague (B.A., '19; M.A., '28), Canadian Women's Army Corps, Montreal; and a grandson of the late George Hague, who was a Governor of McGill during the Principalship of Sir William Dawson. His wife and three children are living in Westmount, P.Q.

SYDNEY SHULEMSON, D.S.O.
SCI. 1932-'33

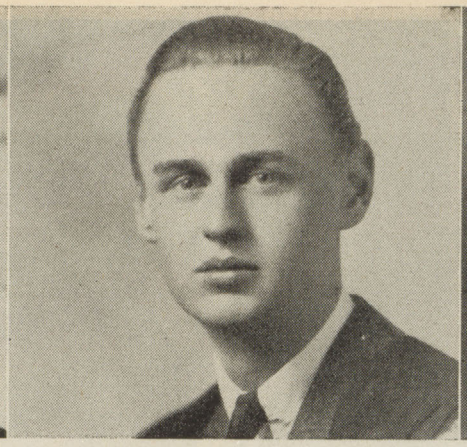

The announcement in London in mid-February of the award of the Distinguished Service Order to Flying Officer Sydney Shulemson, Royal Canadian Air Force, clearly indicated, in view of the recipient's junior rank, services of an unusual nature. Nor did the indication prove misleading. Describing this officer's feats later, the official citation mentioned a series of operations in which, as pilot of a Beaufighter plane of the R.A.F. Coastal Command, Shulemson, "a skilful, courageous, and determined leader whose example has inspired all," took part in daring attacks on enemy shipping. "In January, 1944," the citation continued, "he participated in attack on a convoy consisting of enemy merchant vessels and four armed ships. In the face of considerable anti-aircraft fire, the attack was well pressed home and a medium sized merchant vessel and two small merchantmen were set on fire. Hits were also obtained on two of the escort ships, one of them appearing to blow up. As course was set for home, one member of the formation was attacked by a fighter and damaged. Flying Officer Shulemson immediately turned and joined the fight. By skilful and daring tactics, he drew away the attacker, thus enabling his comrade to fly

clear. He then flew on to base and landed safely, in spite of a burst tire on one of the landing wheels. Throughout the sorties, this officer displayed inspiring leadership, great skill, and courage."

DOUGLAS WILSON McLEAN, M.C.
B.A. '34

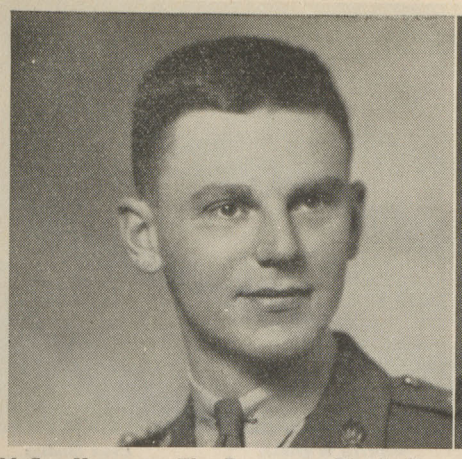

It was during the attack by a Canadian infantry brigade on Leonforte, Sicily, July 21, 1943, that Capt. and Acting Major D. W. McLean, Princess Patricia's Canadian Light Infantry, carried through a series of operations which won for him the Military Cross and, in the words of the official gazetting of the honour, commanded "the admiration of all those who witnessed his resolute action." At the time, ammunition in the forward areas was badly needed to enable the attack to continue. In command of the brigade ammunition reserves, McLean found through a personal reconnaissance that the only approach to the front lay along the main road, which was under intense artillery and mortar fire. Explaining to his drivers that the ammunition *must* get through, he courageously took his stand at an exposed point where he could best appreciate the timing of the enemy's fire, which he gauged so successfully that all his vehicles, obeying his clear signalling, dashed in succession through the zone of concentrated fire without incurring casualties or losses. Major McLean was one of the reinforcement officers who were furnished to the Patricias by the McGill University Contingent, C.O.T.C., early in the war. He was wounded during the campaign in Sicily and returned to Canada in November, having been appointed to take No. 8 Canadian War Staff Course at the Royal Military College of Canada in Kingston. He was attending this course when the award to him of the Military Cross was officially announced, December 23, 1943.

WILLIAM RICHARD WRIGHT, D.S.C.
B.A. '40

For gallant service as an officer of H.M.C.S. *Louisburg*, sunk by enemy air attack in the Mediterranean, as announced by Naval Service Headquarters on February 16, 1943, Lieut. W. R. Wright, Royal Canadian Naval Volunteer Reserve, was granted the Distinguished Service Cross in the list of operational awards included in the King's Canadian Honours List, January 1, 1944. Now serving in Halifax, Lieut. Wright suffered severe wounds in the sinking of the *Louisburg*, but despite his injuries, which included the loss of one eye, helped in the rescue of other men of the crew in a manner commanding high commendation. Upon recovering from his wounds in hospital in Algiers, he returned to Canada and in the summer of 1943 was appointed to duties in Quebec, and later was transferred to Halifax. He is a son of Major Harry P. Wright (M.D., '14), R.C.A.M.C., Lecturer in Paediatrics, McGill University, and Mrs. Wright, and is a brother of Lieut. Henry Hume Wright (Arts, 1939-'40), formerly of the Black Watch of Canada, Montreal, and now of the 4th Reconnaissance Regiment (Princess Louise Dragoon Guards), Canadian Army Overseas.

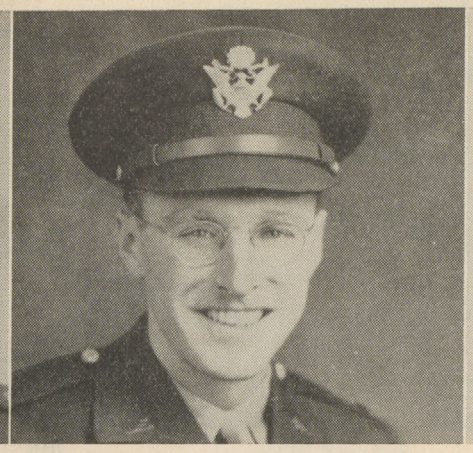

KENNETH STUART MILLER, D.F.C.
B.A. '40

Just as this issue goes to press, particulars have reached us of the award of the Distinguished Flying Cross to Flying Officer K. S. Miller, Royal Canadian Air Force, first announced in press despatches from London in mid-February. As a member of a Beaufighter Squadron of the Royal Air Force stationed in Scotland, first as a Sergeant, later as a Pilot Officer, and recently as Flying Officer, Miller took part in many operational sorties against enemy shipping and other targets. During all these operations, to quote his official citation, "his determination to attack the

enemy was outstanding." Referring to two flights against enemy convoys, the citation states that both "were pressed home courageously in the face of persistent anti-aircraft fire from shore batteries and escort vessels." Flying Officer Miller, the statement concludes, "has also led formations which have accompanied torpedo-carrying aircraft and has never failed to display the greatest resolution on this dangerous task." He is a son of Capt. S. C. Miller and Mrs. Miller, Westmount, P.Q., and was married on August 26, 1943, in Birmingham, England, to Jean Laurenda Brander, Women's Royal Naval Service, youngest daughter of Mr. and Mrs. N. C. E. Brander, of Calcutta, India.

GEOFFREY SPRINGLE McDOUGALL, O.B.E.
ARTS 1919-'20

Awarded a "Commendation" in the King's Canadian Honours List, January 1, 1943, Wing Commander G. S. McDougall, Royal Canadian Air Force, formerly attached to the Royal Air Force Ferry Command, Dorval, P.Q., and more recently Liaison Officer for the R.C.A.F. at the Headquarters of the Royal Air Force Transport Command in England, was awarded the O.B.E. in the British Honours List published in London, January 1, 1944. As an assistant to Air Vice-Marshal Bowhill, Wing Commander McDougall's work took him back and forward across the Atlantic by air on many occasions while he was stationed in Montreal and in his new appointment his travels by air have been even more extensive. The award of the O.B.E. was in recognition of the valuable services to the R.A.F. and R.C.A.F. he had been able to render.

Civilian Honours

Though the King's Canadian List of New Year Honours included fewer civilian awards than the Birthday List in June, 1943, a number of the appointments announced were most gratifying to McGill. These included the appointment as Companion of the Order of Saint Michael and Saint George of the Chancellor of the University, Morris W. Wilson, President of the Royal Bank of Canada and formerly Chairman of the British Supply Council in North America; the similar honour conferred on Lieut.-Col. George Selkirk Currie, D.S.O., M.C. (B.A., '11), Deputy Minister of National Defence, and on Graham Ford Towers (B.A., '19), Governor of the Bank of Canada; and the appointment as Commander of the Order of the British Empire of James de Gaspé Beaubien (B.Sc., '06), Joint Chairman of the National War Savings Committee. As the work of all these men has been of national significance and, being known to all in Canada, needs no description here, it remains for us only to note the honours in this brief way and to add to the congratulations already expressed from far and wide the warmest of congratulations from McGill.

Memorials

Indicating how the memories of the Great War will eventually merge with those of the present conflict; until, in years to come, the traditions born of the two will be as one, were three University announcements in recent weeks. First was the announcement to Senate on January 19, that the medals and trophies won by the late Capt. Percival Molson, M.C., whose name the Stadium bears, had been donated to McGill by the Molson family and will be housed in perpetuity in the Sir Arthur Currie Memorial Gymnasium-Armoury. Comprising nearly ninety athletic awards, the collection represents a tribute to perhaps the finest athlete in McGill's long story, while the Military Cross and the Service Medals tell, though inadequately, of the officer of Princess Patricia's Canadian Light Infantry, serving with distinction and with

singleness of heart and mind until, at Avion, France, on July 5, 1917, he was killed in action.

Simultaneously, with the announcement of the Molson family's gift, came the news that Albert G. Baker, Limited, and C. Gwyllym Dunn, of Quebec, had endowed a scholarship at McGill in memory of Sergt. Gunner Stuart Dunn, Royal Canadian Air Force, killed in a flying accident in England, July 30, 1941. Stuart Dunn, who interrupted his course in Commerce to join the R.C.A.F., in May, 1940, was killed before he had attained his twentieth year. At McGill, as at the preparatory schools where he studied, he left a memory of enduring worth. It was not without insight that Professor John Hughes wrote in tribute to him the poem, "Rest, Valiant Heart," which expressed so warmly the sense of pride and loss that the news of his death on Active Service brought to all who had known him at McGill.

More impersonal than the tributes to Percival Molson and Stuart Dunn, but charged with memories that have for years contributed to the University's tradition of service in time of war, was the presentation to McGill of a bronze plaque, commemorating the 7th Canadian Siege Battery, recruited at the University in the spring of 1916 and officered and staffed in a large measure by McGill personnel. Accepting the plaque at a ceremony in the Sir Arthur Currie Memorial Gymnasium-Armoury on February 19, the Principal said it would be given a place of honour on the armoury walls, where it would become an enduring part of the fabric of the University and a reminder for all time of the responsibilities McGill men had assumed in the era of the Great War. Presented by Douglas Abbott, K.C., M.P., a former member of the unit, acting on behalf of the Battery Association, the plaque was designed by Harold Little, architect and former Battery Sergt.-Major. The religious service was conducted by the Reverend Elton Scott, also a former Battery member. The Hon. Cyrus Macmillan, now Dean of the Faculty of Arts and Science, and Professor W. D. Tait, now Chairman of the Department of Psychology, were among the original officers of the unit who attended the ceremony.

The Art of Using Time

By
O. A. BATTISTA

THE SHORTEST distance between two points is a straight line, and yet there are many of us who map our daily routines out in circles with the result that we too often end up, like flies darting on the still water of a little lake, exhausted, and nowhere!

For example, I recently scanned through some of my business correspondence that was several years old and ranted because of the stark inefficiency displayed by most of the letters. Half of the letters should never have been written, and those that should have been written would have served their purposes better if they had been much shorter. I have a bulging file-holder in which I have stored multi-colored rejection slips from almost every magazine listed in every market list I could purchase or otherwise procure. These hundreds of rejection slips demonstrate only one thing to me now—my past inefficiency.

I had confused myself about the merits of quantity over quality. Like the man who thinks a book is good, before reading it, because it sold so many thousands of copies or the publisher boasted about its tenth printing on the first page, I was disillusioned too, and thought I could make an author out of myself by typing out so many manuscripts. Alas, like the heat coming from the fireplace before me, ninety per cent of my expended energy, and time, had gone up the chimney with draughts of warm air.

I look up the rows of books that form a sacred bodyguard circumventing my den, and I am reminded as I scan some of their titles, of the advice of Abbe Dimnet: "Do not read good books—life is too short for that. Only read the best." Disillusioned again, I thought that I could become a well-read man just by devouring so many books. It was the number that counted! And when I exhibited them to friends I could gasp with them!

Quantity, quantity, and more quantity! This is the sensate mania that has seeped into so many phases of modern culture. We publish enough books, magazines, and million-word newspapers each year to startle a brazen statistician, and think we are doing unprecedented things. We are, but it is a matter of opinion as to whether, in our mass-production of literature, we have lost our sense of values and an appreciation of the fact that the only thing that makes literature worth the paper it is printed on is its quality.

Great paintings, immortal music and literature, cannot be produced in quantity. We cannot adapt

ORLANDO ALOYSIUS BATTISTA, B.Sc., '40, Cellulose Research Chemist, American Viscose Corporation, Claymont, Delaware, is a regular contributor to many American publications.

"mass-production" techniques to the arts as we have to the jeeps, the tanks, and the liberty ships. Once Mona Lisas start coming off the assembly line at so many per, they are no longer masterpieces. Similarly, the speed at which our printing presses may turn out books is no advance assurance that these books will be outstanding and should be read! Verily, in our day the advice to "Read an old book when a new one comes out" is worth heeding, even if it means that you will find yourself reading some of the old books more than once. Good literature must crystallize slowly out of the depths of hard work; and the hard work must be manipulated by a skilled artist.

With the innumerable distractions at hand in our day it is no easy matter to channel our time in such a way that we will make the best use of it. In particular, it is becoming more and more difficult to allocate the time we should to the reading of the best literature. Literature receives little attention, for example, from people who race about in high gear, work and eat in high gear, try to relax in high gear, people caught in a modern pandemonium, a mood that keeps them jittery, flinging little thoughts and worries through their minds at express train speed. At no time has the application of efficiency methods to the use of our time been more important than today. We must take good care to fill in the short spaces of time, the in-between-times of each day, with the little jobs we have to do. By striving to condense a normal week into a busy day, we make every minute more than a blank page in our lives and preclude the danger of idling hours away into oblivion.

"True happiness," says Addison, "is of a retired nature, and an enemy to pomp and noise; it rises, in the first place, from the enjoyment of one's self; and in the next from the friendship and conversation of a few select companions." To many of us, "select companions" might well mean the best in literature; our happiness is in no small measure related to the efficiency with which we sort out what we want to read from what we have no time for.

I have yet to find a more reliable criterion of an individual's happiness,—even integrity, than an evaluation of his respect for and use of time. We need not look about us—we need only question ourselves, to be reminded of the truth of Seneca's famous expression, "We are always complaining that our days are so few and acting as though there were no end to them." Need it be asked, "Are there many first-rate books that you have been wanting to read but have never found time for them?" On many occasions, I have snatched wandering five minutes of time to indulge in the re-reading of short marked passages by great writers, and consider such applications of the efficient use of time an indispensible part of my contentment.

A disregard of the value of short spaces of time is responsible for much of our literary and cultural apathy; so many people live under the impression that they cannot get anything done unless they have free hours to do it in. The whole secret of living life to the full consists in treating short spaces of time as though they were precious gifts, gifts that may be enjoyed only if they are used. If we train ourselves to put stray minutes to good use, we will never have to worry about how to spend our hours. It is only in this way that we may ever hope to get all the things done which we want to do.

People who concentrate on the immediate, on what they will have to do in the next five minutes or the next hour are too busy to waste time. They never become bogged down by the reverberations of an hundred yesterdays or the qualms of a thousand unborn tomorrows. The very substance of living is within their reach day in and day out, and they are the people who will go the farthest and get the most out of life.

C. B. Kingston, LL.D., Dies in England

A prominent McGill graduate, Charles Burrard Kingston, B.A., '87; B.Sc., '92; LL.D., '30, died at Forest Row, Sussex, England, on January 31. In the course of his career he held appointments in mines in Canada, the United States and Australia, before going to Johannesburg where he was associated with the firm of Lewis Marks before becoming consulting engineer to the Anglo-American Corporation of South Africa. After the Great War, he took part in the development of copper mining in Northern Rhodesia, and from 1929-43 was consulting engineer to various mines in Rhodesia. In 1938-39 he was president of the Institute of Mining and Metallurgy.

When the degree of LL.D. was conferred on him in 1930 by McGill University, the citation read as follows:—

> Charles Burrard Kingston, B.A.; B.Sc., "eminent authority in the field of mining engineering; initiator and director of great engineering projects; constructive investigator, whose vivid imagination under the guidance of a scientific mind, has led him forth like the pioneers of old to discover and develop the sources of mineral wealth in far countries; seeker of life's satisfaction in forgetfulness of self-interest, whom we have called back home from across the ocean in order that we might do honor to the vital service he has rendered to the Empire and the world."

McGill Receives Capt. Molson's Trophies

THE collection of medals, trophies and decorations won by the late Captain Percival Molson has recently been given by the Molson family to McGill University where it will be kept in the Sir Arthur Currie Memorial Gymnasium-Armoury. As older graduates will remember, Captain Molson, who was killed in the Great War, was one of Canada's greatest athletes as well as being a good scholar and natural leader. The Percival Molson Stadium perpetuates his name, and the donation of the present collection will still further enshrine his memory and remind future generations of students of the example he set for them to follow.

While at McGill Percival Molson for three successive years won the Governors' Individual Trophy for the highest aggregate score in the annual University Athletic Meet. This in itself established a record which has never been equalled or approached. In football and hockey he was a top-ranking player. After graduation from McGill, he continued his athletic activities with the Montreal Amateur Athletic Association playing the game for its own sake, hard and cleanly and with great enthusiasm. His success as an athlete did not affect his innate modesty nor prevent him from maintaining a high academic standing.

At the outbreak of the first World War, he enlisted in the 2nd University's Company which became part of the famous Princess Patricia's Canadian Light Infantry, and his courage and devotion to duty won him the Military Cross and promotion to the rank of Captain. Unfortunately, he was killed at the height of his career during operations at Avion, near Vimy Ridge, in July, 1917.

The Committee nominated by the Board of Governors of McGill University, to study the problem of displaying the Percival Molson Trophies and other Memorial Tablets in the Sir Arthur Currie Memorial Gymnasium-Armoury, is as follows:—Mr. W. M. Birks, Chairman; Dr. C. W. Colby, Mr. G. C. McDonald, Mr. Walter Molson, Dean Macmillan, Dr. F. J. Tees, Dr. A. S. Lamb, Mr. H. L. Fetherstonhaugh, Mr. John Bland, Mr. Rex Freeman, President of the Students' Athletic Council.

It is intended to publish a fuller account of the late Captain Molson's career and of the trophies now donated to McGill in a forthcoming issue of THE McGILL NEWS when the Committee has met and reached a decision as to the placing of the trophies.

Memorial Plaque Commemorating 7th Canadian Siege Battery Presented to University

ON Saturday afternoon, February 19th, at four o'clock, a bronze plaque commemorating the services of the 7th Canadian Siege Battery during the first great war was presented to the University on behalf of the 7th Canadian Siege Battery Association, by Douglas C. Abbott, K.C., M.P., a member of the Battery. The plaque was accepted by Principal James and the religious part of the ceremony was conducted by the Reverend Elton Scott, Professor of Divinity at Bishop's University, who was a member of the Battery in France. It was designed by Mr. Harold Little of the firm of Luke and Little, who was the battery sergeant-major, and will be placed on the walls of the Sir Arthur Currie Memorial Gymnasium-Armoury, with other trophies and memorials.

This battery was recruited in the spring of 1916 at McGill University. Its first Major was W. D. Tait, now Professor of Psychology at the University; the second in command was Cyrus Macmillan, now Dean of the Faculty of Arts and Science. The battery undertook its preliminary training in Canada and proceeded to England in September, 1916, going to France in March, 1917, shortly before the battle of Vimy Ridge; it took part in all the principal engagements of that year and the summer battles around Arras and Lens. In October, it was moved to the Ypres salient and was there for 3 months and took part in the Passchaendaele campaign in the following spring after which it was stationed again in the Lens area and took part in the advance into Belgium. At the time of the Armistice it was stationed near Mons and it returned to Canada in the spring of 1919.

In accepting the plaque, Principal James commented that though McGill was too young to have the traditions of Oxford or Harvard, Paris or Padua, nevertheless its history and legends are growing. Generations of present and future students would look upon this memorial with pride recalling the magnificent contribution the battery had made during the years of conflict in the Great War, together with other famous McGill units. There will be other names and exploits to remember and to serve as an inspiration following the present war, he said, and it is a fundamental truth that the University, like all great Universities, is a company of those whose days are individually numbered but whose fame endureth for ever.

Wrens Take Over Presbyterian College

The 75-year-old Montreal Presbyterian College on McTavish Street, is to be taken over by the Women's Royal Canadian Naval Service as a barracks for personnel stationed in Montreal. It is expected to ultimately provide accommodation for about 125, and to be ready for occupation in the spring.

POLISHED
Like a Piece of Jewellery

Highly specialized apparatus — a part of which is illustrated above — is produced by Dominion Bridge Company Limited for the explosives industry in Canada and U.S.A. The techniques of manufacture had to be specially developed as all parts are of stainless steel, and the operations include forming (with die forming), welding, grinding, machining and polishing—this last to the mirror-like finish indicated in the above photograph.

The versatility of our technical staff was an important factor in the success of this work, while the willingness of the Dominion Bridge Company Limited to battle with difficult and unusual jobs—jobs sometimes far outside the ordinary run of our customary operations—has made a great contribution to victory.

The reward is largely in new skills, new techniques and new efficiencies. The benefit of this war-gained experience is at your service and we urge you to consult us when planning for post-war developments.

On His Majesty's Service—XVIII

Edited by
R. C. FETHERSTONHAUGH

FOLLOWING the pattern used since the opening of the war, we present herewith the eighteenth quarterly installment of *On His Majesty's Service*, giving in condensed form and as precisely as security regulations permit the news of McGill men and women that has reached us in the past three months. As always, we have been helped in gathering information by many correspondents, to whom our thanks cannot be too warmly expressed, and have been encouraged in the work by the interest in it shown by those in the Forces for whom it is specially designed. The free copies of the News sent with the compliments of the Graduates' Society to all McGill graduates on Active Service whose precise military addresses are known have been given a rousing welcome. No other medium, we have been told, brings to McGill men on the widely scattered fronts and in the training establishments of this war as satisfactory a budget of news about other McGill men on Active Service and about the events of home from the University point of view.

In order that the value of this section may be maintained, we again invite information appropriate for presentation in these columns. News of enlistments, promotions, transfers, appointments, and honours and awards are particularly required. The correction of errors noted in the items below will also be appreciated. Please address information of this nature to

THE McGILL NEWS,
3466 University Street,
Montreal.

or telephone it to the Graduates' Society's office, MArquette 2664. As our next issue will be published in May, instead of in June, as usual, please forward your news items without delay. Preparation of the next issue will be well advanced before these lines appear in print.

To increase the value of the notes below, we have again added dates, in some instances precise dates, which require no explanation; in other instances general dates, such as "December, 1943," or "February, 1944," which indicate only when the news in the item reached us, or when it was known to be valid.

The general service items in this issue cover the period from November 15, 1943, to February 15, 1944; and the casualties and honours lists the period from November 25, 1943, to February 25, 1944. A supplementary list of general items will be added at the end of this section, to include news received too late for classification, but before we actually go to press. As usual, all items in the regular and supplementary lists are written in conformity with the security regulations promulgated by the Press Censors for Canada.

Casualties

WE deeply regret to record the following casualties, reported in the period, November 25, 1943, to February 25, 1944.

Killed in Action

Brain, Major Donald (Arts, 1936-'39), Princess Patricia's Canadian Light Infantry, formerly 2nd Lieut., McGill Contingent, C.O.T.C., Killed in Action in Italy, December 10, 1943. British Forces

Butterworth, Sub-Lieut. Charles Edgar (Sci., 1941-'42), who joined the R.N.V.R. at Dartmouth, N.S., May, 1942, and received his naval training in England, was among the candidates who received Wings and Commissions in the Fleet Air Arm, R.N.V.R., at a graduation of trainees at Pensacola, Florida, November, 1943.

Chown, Flying Officer Thomas Lambert (B.Com., '42), who has served in the past year in the United States, Greenland, and Labrador, was stationed with No. 45 (Atlantic Transport) Group, Transport Command, Royal Air Force, Montreal Airport, Dorval, P.Q., January, 1944.

Foster, Capt. George Edward (M.D., '38), Royal Army Medical Corps, Prospect, Bermuda, February, 1944.

Gascoigne, Lieut. Thomas Guthrie (B.A., '34), 224/31 Light Anti-Aircraft Regt., R.A., Central Mediterranean Force, February, 1944.

Godet, Lieut. (Special Branch) Thomas Martin du B. (Sci., 1922-'28), R.N.V.R., Examination Service, British Naval offices, St. George's, Bermuda, February, 1944.

Haslett, Capt. Henry G. (Agr., 1928-'29; Arts, 1932-'33), East Yorkshire Regiment, who served with the Scots Guards and East Yorks in France in 1939-'40 and with Commandos and the East Yorks in the Middle East and Western Desert, where he was twice wounded, was invalided to England, September, 1943. He was reported recovering from wounds in the Royal Masonic Hospital, London, England, November, 1943.

McDougall, Coll Lorne (App. Sci., 1924-'26), was taken Prisoner of War while serving with the British Army at Dunkirk in 1940, according to reports which reached us recently. As our information is far from precise, we should appreciate hearing from any reader who can send us reliable particulars regarding Mr. McDougall's rank, unit, and present status. Please write without delay if these details are known to you. Address your letter to War Records, Registrar's Office, McGill University.

Medine, Lieut.-Col. Meyer Marvin, O.B.E. (M.D., '36), Royal Army Medical Corps, who was decorated for his services with the British forces in the Anglo-Egyptian Sudan and served later with the Eighth Army in the Western Desert, was promoted to his present rank some months ago and has returned to duties with the R.A.M.C. in the Middle East, February, 1944.

South African Forces

WYKES, LIEUT. ERIC ROBINSON (B.Sc., '30; M.Sc., '31), who served with the South African Forces in the Middle East, has recovered from a knee injury suffered there and is reported to be serving in Johannesburg, January, 1944.

FOSTER, BRIGADIER HARRY WICKWIRE (App. Sci., 1921-'22), who commanded the Canadian Force in Kiska, Aleutian Islands, returned to Canada when the force was withdrawn and has now been reappointed to duties in England, February, 1944.

THE GREAT BRITAIN YOU TRULY ARE

◆ They have said she is isolated by the enveloping sea. But she has used it to join the hands of millions.

They have said she is fortified only by ships. They err. She is fortified by the strong hearts of her sons.

Proud in arms, with a mighty heart, Great Britain has withstood a thousand storms and will again. For hers is the strength of millions whose valour springs from a birthright of freedom.

Mother of parliaments, they call her . . . champion of justice and right.

We of her soil and of her blood and of her tutelage say this today: the world is in her debt for the part she has played in yesterday's eras of peace and progress. It will be so in the peace and progress to come.

We of Canada salute the *Great* Britain you truly are!

THE HOUSE OF SEAGRAM

We of The House of Seagram are proud of the part we are playing in supplying Great Britain with vital weapons of war. Every Seagram plant in Canada and the United States is engaged in the production of high-proof alcohol for smokeless powder, synthetic rubber and many other war-time products.

HACHEY, LIEUT.-COL. HENRY BENEDICT (M.Sc., '25), Directorate of Operational Research, N.D.H.Q., Ottawa, February, 1944.

MCDOUGALL, CAPT. ERROL KLOCK (B.A., '36; B.C.L., '39), to be Legal Officer, Can. Military H.Q., London, England, August 22, 1943. (*Canada Gazette*, January 15, 1944).

DUFFY, CAPT. IGNATIUS LOYOLA (D.D.S., '37)

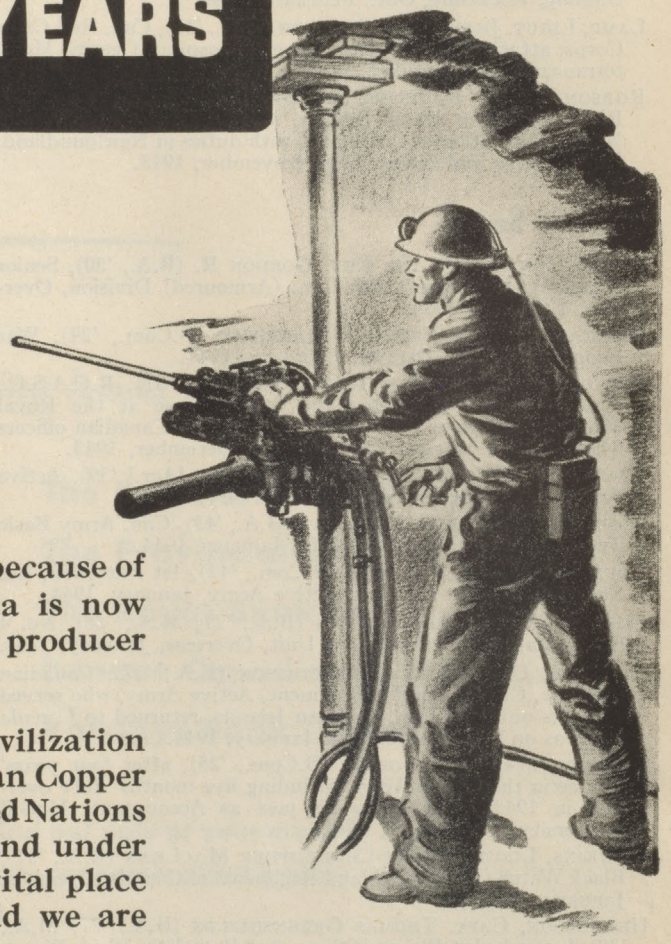

GUILBOARD, MAJOR THOMAS IVAN (D.D.S., '36)

OLIVER, CAPT. HOWARD THOMAS (D.D.S., '38)

SUGDEN, CAPT. GEORGE WILLIAM (D.D.S., '26)

KUPROS* The Link That Spans 3,000 YEARS

THE Cyprian of 1000 B.C. and the Canadian miner of 1944 have a link in common—they both "dig" copper. The fame of the island of Cyprus spread throughout the ancient world because of its wealth in copper—just as Canada is now known far and wide as an important producer of the red metal.

Copper has aided the progress of civilization for thousands of years. Today, Canadian Copper fights with the armed forces of the United Nations on land, in the skies, on the oceans and under the seas. Tomorrow, it will hold its vital place in the peaceful and progressive world we are fighting and working for.

"Ingersoll" or "Rand" drills were used in opening Canada's first copper prospects, and today Canadian Ingersoll - Rand Compressors, Drills, Hoists, Pumps, Blowers and Air Tools are at work . . . in the mines, smelters and fabricating plants.

**Cyprus is the English version of the Greek word Kupros, or copper.*

PARK, CADET LEONARD V. (Arts, 1), to Active Army, October 12, 1943.

PLUTA, CADET JOSEPH S. (Engineering, 1), to R.C.N.V.R., December 17, 1943.

SHEAHAN, CADET JOHN A. (Science, 2), to R.C.A.F., December 18, 1943.

A Chartered Bank is

ONE WHICH COMPETES WITH NINE OTHERS

for your business

These ten competing banks are:

Bank of Montreal
The Bank of Toronto
The Canadian Bank of Commerce
The Dominion Bank
Imperial Bank of Canada
The Bank of Nova Scotia
The Provincial Bank of Canada
The Royal Bank of Canada
Banque Canadienne Nationale
Barclays Bank (Canada)

A chartered bank is the custodian not only of your money on deposit but also of your secrets concerning that money.

A CHARTERED bank is an institution where the details of your bank account are kept secret.

It is called **"chartered"** because its **permission** to do business and the conditions and restrictions under which it **may do** business, are contained in a **charter** granted and kept up-to-date by parliament, the finest democratic free institution of government that man has yet devised. This charter is an Act of Parliament laying down all of the conditions which safeguard your money.

Ten competing chartered banks are the very opposite of a State Monopoly such as would come about if all the banks were rolled into one by nationalization. Under State Monopoly, if you failed to get accommodation at the one bank, you could not go to any one of nine others to seek it. **You can today.**

THE CHARTERED BANKS OF CANADA

University Air Training Corps

THE following aircraftmen, No. 5 (McGill University) Squadron, U.A.T.C., have been struck off the strength on proceeding, as shown, to active service.

REID, AC2 WARREN M. (Science, 1), to No. 1 Manning Depot, R.C.A.F., Toronto, January 18, 1944.

ROSS, AC2 JAMES G. (Graduate Studies), to No. 3 Manning Depot, R.C.A.F., Edmonton, effective November 9, 1943.

ROWAT, AC2 CAMERON A. (Science, 2), to No. 1 Manning Depot, R.C.A.F., Toronto, February 1, 1944.

RUDNICKI, AC2 KASMER VINCENT (Science, 2), to No. 1 Manning Depot, R.C.A.F., Toronto, February 1, 1944.

SOLOMON, AC2 FREDERICK L. (Engineering, 1), to No. 1 Manning Depot, R.C.A.F., Toronto, December 2, 1943.

WILKINSON, AC2 PETER F. F. (Arts, 2), on transfer to the Active Army, January 11, 1944.

Civilian Service

AMBRIDGE, DOUGLAS WHITE (B.Sc., '23), formerly Director-General of Naval Shipbuilding, Dept. of Munitions and Supply, was appointed Director-General of the newly combined Naval and Cargo Shipbuilding Branch of the Department, January 20, 1944.

DEWAR, CHARLES LEONARD (B.Sc., '21; M.Sc., '22), who was granted leave of absence by the Bell Telephone Company of Canada to join the staff of Wartime Merchant Shipping, Limited, July 7, 1941, was appointed President of that company, December 27, 1943.

NOTMAN, KEITH CLAXTON (B.Sc., '14), retired as Vice-President of the Crown-controlled Citadel Merchandising Company, Montreal, dealing in machine-tools, January 1, 1944, and resumed the duties, from which he had been granted leave of absence in 1940, as a Director, Williams & Wilson, Machinery Brokers, Montreal.

PIERCE, SYDNEY DAVID (B.A., '22; B.C.L., '25), formerly Director of Controls, Washington, D.C., Office of the Department of Munitions and Supply, was appointed Director-General of the office, January, 1944.

SCHIPPEL, HENRY FREDERICK (B.Sc., '12), has been credited with a major part in the development at Akron, Ohio, of a device which, through setting in motion the landing-wheels of high speed aircraft before the plane touches the ground, reduces the wear on the tires and, by so doing, nearly doubles their period of effective service.

SHAPIRO, LIONEL S. B. (B.A., '29), who returned to Canada in November after covering the Sicilian campaign and the landing at Salerno as accredited war correspondent for the *Montreal Gazette*, has recrossed to Britain to act as accredited war correspondent for *Maclean's Magazine*. His first report in his new capacity appeared in the issue of the magazine dated February 1, 1944.

TAYLOR, EDWARD PLUNKET (B.Sc., '22), who has served the Government in a number of important posts since April, 1940, resigned, January 1, 1944, as Canadian Member of the Combined Production and Resources Board, Washington, D.C., to resume his industrial and financial duties in Toronto.

Supplementary List

THE following items have been received since February 15, too late to be included in the regular sub-divisions of this section

Navy

SMAILL, CAPT. STANTON SUTHERLAND (D.D.S., '37), No. 50 Coy., C.D.C., attached R.C.N., Halifax, N.S.

SMITH, LIEUT. LLOYD WOOD (B.Com., '38), Royal Rifles of Canada, Active Army.

STETHEM, MAJOR JOHN ERIC HOLT (B.Sc., '24), H.Q., Royal Electrical and Mechanical Engineers, a Can. Division, Central Mediterranean Force.

STUART, CAPT. WILLIAM WALLACE (B.Com., '40), No. 1 Can. General Reinforcement Unit, Overseas.

SUTHERLAND, CAPT. WILLIAM HENRY (M.D., '41), R.C.A.M.C., No. 5 Can. Field Ambulance, serving in North Africa.

TAYLOR, MAJOR WILLIAM BRUTON (M.D., '39), R.C.A.M.C., Military Hospital, Nanaimo, B.C.

TELFORD, CAPT. KENNETH MUNRO (M.D., '40), R.C.A.M.C., Active Army, Military Hospital, Vernon, B.C.

WALLACE, MAJOR REGINALD HENDERSON (B.Sc., '26), 1st Survey Regt., R.C.A., Central Mediterranean Force.

WALSH, LIEUT.-COL. GEOFFREY, D.S.O. (B.Eng., '33), formerly Commanding, R.C.E., 1st Canadian Division, in Italy, has been promoted to Acting Brigadier and appointed Chief Engineer of a Canadian Corps, according to the announcement made in Ottawa by National Defence Headquarters, February 25, 1944.

WATSON, LIEUT. JOHN HOWARD (B.A., '43), R.C.A., A-1 Can. Artillery Training Centre, Petawawa, Ont.

WEBB, LIEUT. DWIGHT (B.A., '32), formerly of the Queen's York Rangers (1st Americans), Active Army, now Anti-Tank Officer, a Can. Infantry Training Battalion, Camp Debert, N.S.

WINKLER, CAPT. ISRAEL (B.A., '36; M.D., '39), R.C.A.M.C., No. 1 Can. General Reinforcement Unit, Overseas.

British Forces

RODGER, MAJOR DAVID EDWARD (M.D., '35), R.A.M.C., 49th (West Africa) General Hospital, India Command.

United States Forces

ARCHER, THE REV. RUSSELL CLIFTON (B.A., '33), Pittsburgh, Pa., has been appointed a Chaplain in the U.S. Army. Rank and particulars of service not yet reported.

CALLAHAN, LIEUT. (Junior Grade) JOHN JOSEPH (M.D., '42), U.S. Naval Reserve, U.S. Naval Hospital, Bremerton, Washington.

CHARLESON, MAJOR DONALD RICHARD, M.C. (B.Sc., '14), U.S. Army, Umatilla Ordnance Depot, Ordnance, Oregon.

HELD, MAJOR ALBERT EDWARD (B.A., '26; M.D., '30), Medical Corps, U.S. Army, 37th General Hospital, serving in North Africa.

HUGHES, LIEUT. THEODORE JAMES (M.D., '37), Medical Corps, U.S. Naval Reserve, Naval Hospital, Corona, California.

IMBLEAU, DR. JOSEPH E. LORRAIN (M.D., '22), of Union Township, N.J., has been commissioned as Lieut.-Commander in the Medical Corps, U.S. Naval Reserve, and has reported for Active Duty.

LAPOINTE, CAPT. ROLAND EDWARD (M.D., '32), Medical Corps, U.S. Army, 7th Station Hospital, c/o Army Post Office, New York, N.Y.

LIVA, CAPT. GIUSTO ALBIN (M.D., '30), Medical Corps, U.S. Army, attached, an Anti-Aircraft Artillery Gun Battalion, U.S. Army, serving in the Central Mediterranean area.

NEACE, CAPT. LEWIS CHARLES (M.D., '39), Medical Corps, U.S. Army Air Forces, Harris Field, Cape Girardeau, Missouri.

TRIMINGHAM, LIEUT. HUGH GERALD LOCK (M.D., '37), Medical Corps, U.S. Naval Reserve, Naval Hospital, Corona, California.

Women's Services

BIGLEY, NURSING SISTER BERNICE (B.A., '38), R.C.A.M.C., serving in Italy.

LANGFORD, SECTION OFFICER ELEANOR S. (B.H.S., '32), R.C.A.F. (W.D.), serving in Newfoundland.

WADSWORTH, WREN EDITH PAULINE (Phys.Ed., '41), W.R.N.S., Seaman Torpedo Wren, H.M.S. *Nightjar*, c/o G.P.O., London, England.

Civilian Services

HARDING, THOMAS ERNEST WHITE (M.D., '26), formerly Demonstrator in Radiology, McGill University, is serving under the Dept. of National Health as Radiologist, Ste Anne's Military Hospital, Ste. Anne de Bellevue, P.Q.

HEBERT, MAJOR CHARLES PIERRE (B.A., '21), formerly of the 1st Battalion, Fusiliers Mont Royal, Overseas, is now a Civilian Affairs Administration Officer in Italy, according to a statement by the Minister of National Defence in Ottawa, February 14, 1944.

LETENDRE, GERARD (B.Eng., '32), Director of the Department of Mines and Metallurgy, Laval University, Quebec, P.Q., has been appointed Consulting Metallurgist to the Inspection Board of the United Kingdom and Canada.

Active Service Mail-Bag

THE following extracts are quoted from a few of the letters reaching us in recent weeks. We hope to make such extracts a feature of our O.H.M.S. Section in future issues.

S.W. Pacific Area

"THE MCGILL NEWS is appreciated in these distant outposts of Empire. I found news of many old friends of whom I had not heard for years."

—Science, '12

Fort Bragg, N. Carolina

"To date I have not received the Winter copy of the NEWS and I have wondered if same has been lost in the post. By this you can see how much importance we place on this publication and how much we count on it to keep us informed about those we know and University happenings."

—D.D.S., '42

R.C.A.F. Overseas

"In the past two months I have received two copies of THE MCGILL NEWS, also a copy of *Founder's Day Speeches*, for all of which I would like to thank you ever so much. They are indeed a pleasant gift to receive, giving an up-to-date summary of the activities of one's college friends."

—B.A., '41

Can. Army Overseas

"Your magazine is enjoyed very much, both by myself and other members of the mess. It is about the only way we can keep track of our friends in other branches of the Service."

—B.Com., '36

Active Can. Army

"We are very grateful for the work you are doingduring these difficult war years, and I personally look forward to receiving each copy of THE MCGILL NEWS with great anticipation."

—B.Com., '39

Can. Artilery, Italy

"Just a few lines to acknowledge, with my appreciation, the Graduates' Society's card of greetings. There are lots of McGill boys in this part of the world who may not be wearing a red sweater but a similar-coloured divisional patch. Wishing the Graduates' Society a very successful year."

—D. R. F. (B.A. '38, M.A. '39)

R.A.M.C., India Command

"I have just received the Autumn, 1943, number of the NEWS and, as always, have been very much interested in the O.H.M.S. section. . . . Canadians are few and far between out here and I have seen no McGill grads. I am always looking for one, however."

—L. P. C. (B.A. '38, M.D. '40)

Can. Artilery, Italy

"Outside of the many McGill men in this theatre, the NEWS is the only link we now have with Old McGill and is appreciated indeed. Would you please amend your record of my address as shown."

—W. M. M. (B.Com. '34)

American Forces, N. Africa

"Last night I had the good fortune to run into a classmate of mine, who gave me the Autumn, 1943, edition of THE MCGILL NEWS to read, and I enjoyed it very much. I would appreciate it very much if you could put my name on your maling list . . . as I should like to be favoured with copies of the NEVS in future.

—G. A. L. (M.D '30).

Can. Artilery, Italy

"From time to time we come across copies of THE MCGILL NEWS and you may be sure that we read it with great interest. We have in this regiment several graduates of McGill and it gives us an extra bond of friendship."

—N. J. K. (B.A. '38)

Montreal

"Attached is a picture of my brother, which I said I would send along when I received one. . . . Again may I take this opportunity to congratulate you on your excellent War Records of McGill men. It is a marvellous record."

—T. K.

The late Professor Alfred Stansfield

Dr. Alfred Stansfield Dies

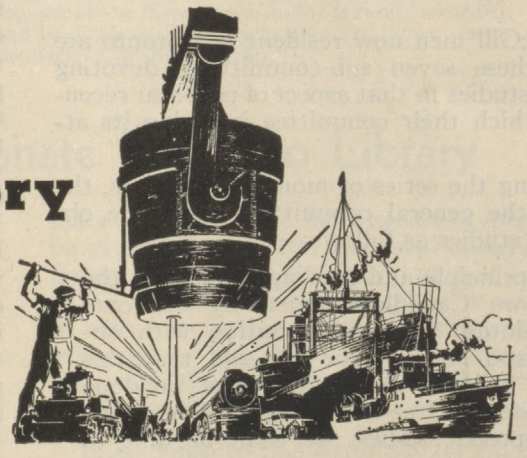

On Saturday, February 5, Dr. Alfred Stansfield, F.R.S.C., A.R.S.M., Emeritus Professor of Metallurgy at McGill University, died at his home in Westmount in his 73rd year. Professor Stansfield had taught at McGill for thirty-five years and many of his former students have now attained prominent positions in the mining world.

He was born at Bradford, England, and studied at the Royal School of Mines where he also did post-graduate work and began his teaching career, subsequently winning a Carnegie Research Fellowship.

In 1901 Dr. Stansfield came to McGill as Professor of Metallurgy and held this post until his retirement in 1936. He attained world-wide renown for his work in electro-metallurgy and his knowledge of electric furnaces. He was the first editor of Iron and Steel of Canada, was vice-president and a life member of the Electrochemical Society and also of the Engineering Institute of Canada, and of the Canadian Institute of Mining and Metallurgy. He was also a member of the British Association, the British Institute of Metals, the Iron and Steel Institute, and the London Society of Arts.

The late Professor Stansfield is survived by one daughter, Ethel Stansfield, of Westmount, and by four brothers and two sisters. His wife, the former Ethel E. Grubb predeceased him some years ago.

STEEL for Victory

STEEL—for ships, tanks and a thousand tools of war—flows through mills where thousands of Canadians unceasingly fight the battle of production. To all ranks of these and other workers the Bank of Montreal offers helpful banking co-operation.

McGill Men of Ontario Study Post-War Reconstruction

By
T. M. MORAN, B.Eng. '23

ON THE evening of November 19th, some fifty members of the McGill Society of Ontario met at the University Club in Toronto to consider and discuss the industrial aspects of postwar reconstruction. This was the second in the 1943-1944 monthly meetings devoted to the problems of converting war economy to one of peacetime pursuits. The first meeting in October had ushered in the general theme. In December and early in 1944 meetings, other aspects are being dealt with, including Natural Resources, Agriculture, Construction, International, Fiscal. This general program was initiated in the summer of 1943, at which time a general committee was formed and given the name "The Reconstruction Committee of the McGill Society of Ontario." Members of this general Committe are:—

Chairman, K. LeM. Carter, *Vice-Chairmen*, E. G. McCracken, A. H. Galley. *Secretary*, Graham M. Gore

with Chairmen of seven sub-committees devoted to various aspects of postwar reconstruction, namely:

Social, Clarence Fraser; *Industrial*, T. M. Moran; *Natural Resources*, P. D. P. Hamilton; *Agriculture*, J. H. McOuat; *Construction*, R. M. P. Hamilton; *International*, K. S. LeBarron; *Fiscal*, J. R. Frith

Over forty McGill men now resident in Toronto are members of these seven sub-committees, devoting themselves to studies in that aspect of post-war reconstruction to which their committee is giving its attention.

In announcing the series of monthly meetings, the executives of the general committee stated the objectives of the studies as follows:—

"The main principle and guiding thought is the idea that we Canadians must, by our own efforts, maintain a vigorous nation with opportunity and security for all—and that this committee believes that it can best be done under a system of free enterprise. As the result of the proposed studies, we shall be able to more wisely form opinion as to the various solutions that will be brought forth from time to time, by governments, business and labour organizations. Possibly, we shall be able to give constructive assistance and issue thoughtful expressions of opinion as to these proposals."

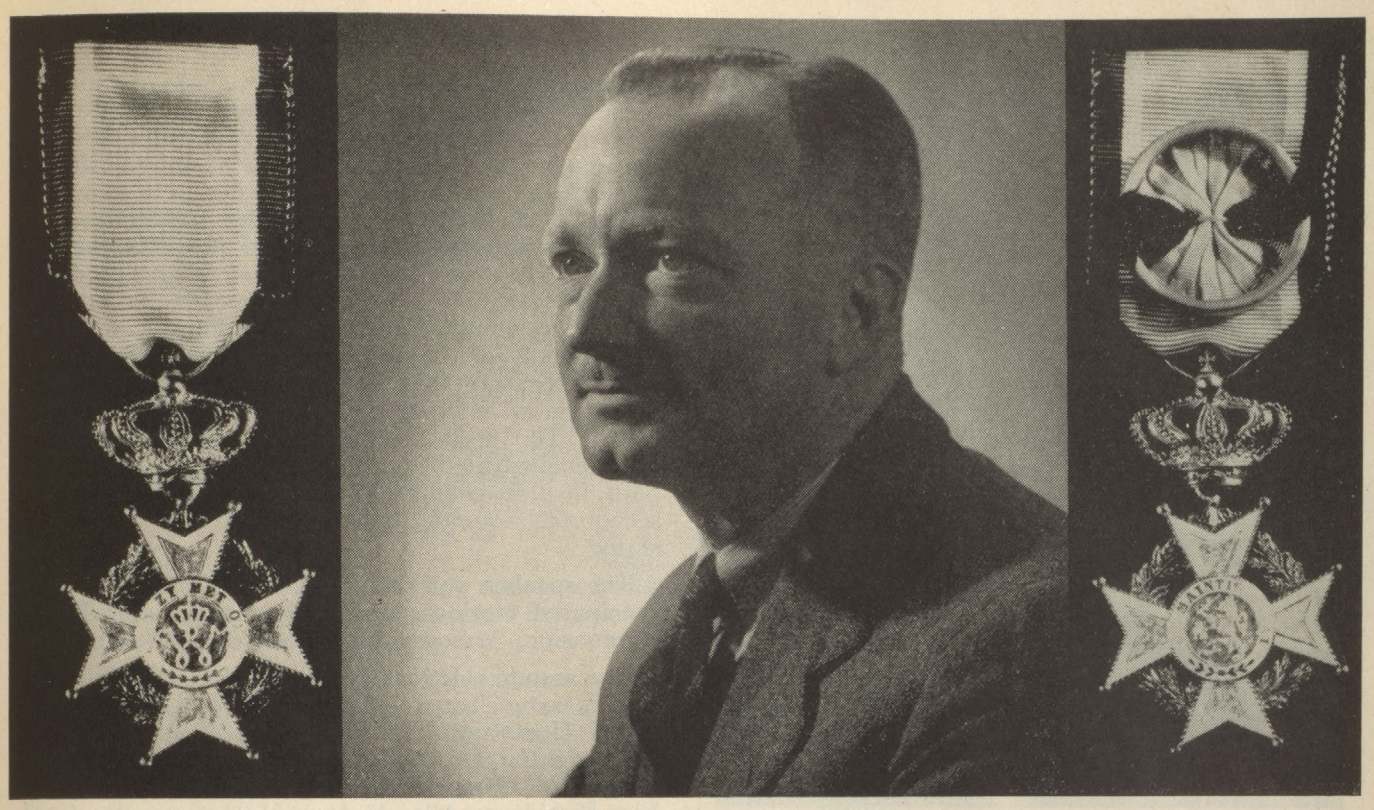

INDUSTRIAL RECONSTRUCTION

In following out this line of thought the members of the Industrial Sub-committee prepared, by private study and committee meetings, to present to the main body the gist of its current studies for the general monthly meeting of the Society on November 19th. Using the Lever Brothers report, "The Problem of Unemployment" as a common point of reference, they took from that report this keynote as the role of industry—"to continue to endeavour to produce as cheaply and efficiently as possible, while showing its sense of social responsibility wherever it can." They decided to present three related themes,—namely, manpower planning, engineering planning, and the planning of wage rate structures and levels, so that the general discussion could focus on these key factors in industrial post-war reconstruction. Arranging itself as a panel, the sub-committee prepared to deal with any aspect of these subjects that arose. The Chairman, Tom Moran (Engineering '23), introduced the general theme and asked the audience to limit its discussion to the Canadian situation and to methods and techniques of practical industrial application in relation to the three topics mentioned. The subject "Manpower Planning" was introduced by Clarence Fraser (Arts '23), who gave a general review of the current manpower situation in Canada, and in the armed forces, and indicated in broad terms the policies, organization, and procedures necessary to place between one and one and a half million persons back in civilian tasks. Techniques that had proved effective in building up manpower in a principal war plant, were described by H. G. Kettle, to illustrate how the same techniques could be used in postwar reconstruction placement. The subject "Engineering Planning" was presented by Dick Richards (M. Engineering '34), who sketched briefly the work of developing product and process specifications for post-war manufacturing by individual industrial units, or by industrial associations. He related such engineering planning to markets and sales planning in keeping with estimated post-war requirements, and showed how an ideal master plan could be converted to a practical working plan. The subject "Wage Rate Structures and Levels" was introduced by Bob Johnson (Engineering '32), who dealt with the use of Job Classification and Job Evaluation in relating pay rates to Job Classifications. He then demonstrated by a chart, how the actual wage rate level could be moved up or down without disturbing internal relationships between job rates, in order to satisfy the just claims of labour within the limits imposed by the economic structure. In presenting these particular topics, the speakers referred to the work of the General Electric Company (U.S.A.) in pos-twar planning and the reports of the Canadian Chamber of Commerce and the Canadian Manufacturers' Association, as useful reference sources.

The three topics as presented were summed up by Herman Eberts (Engineering '29), who pointed the discussion toward basic principles as they would apply to the Canadian scene, to specific measures and to the three topics offered for discussion. An animated and general discussion followed.

Daughter of Graduate Wins Scholarship

The annual scholarship given by The District of Bedford Branch of The Graduates' Society has been awarded this year to Catherine M. Draper, Arts, '47, of Bedford, Que., the daughter of Dr. F. Erle Draper, M.D., '12. This scholarship is awarded to a matriculated student, proceeding to the degree of B.A., whose parents reside in the District of Bedford, Que.

DR. JOHN PUDDICOMBE

John F. H. Puddicombe, M.D., '26, vice-president of the Ottawa Valley Graduates' Society, was recently made an Officer of the Order of Orange-Nassau by Queen Wilhelmina of the Netherlands in recognition of his services to the Netherlands Royal Family in attending Princess Juliana on the birth of her third daughter, Princess Margriet Francisca in the Ottawa Civic Hospital, January 19, 1943. The decoration was presented by G. W. Boissevain, Netherlands Chargé d'Affaires at a luncheon, September 3, 1943, at the Netherlands Legation in Ottawa. The Order of Orange-Nassau is a decoration established in the 19th century for unusual service to the House of Orange. There are various ranks of the Order, that of Officer being one of the higher ones, and it is rarely awarded. This is probably the first time that a Canadian has received this Order. Front and back views of the decoration are shown above. The front reads "Je maintiendrai" and the back "God Zy Met Ons."

Montreal Branch Members Donate Books to Library

TO REMEMBER the generous donors who have given personal help and needed funds in its difficult days is the duty of every worthy institution, but the remembrance is the more gracious and welcome when it represents a spontaneous recognition on the part of its graduates.

The Redpath Library, which has now provided half a century of service to students, staff ,and graduates, was presented in 1893 by Peter Redpath, then Senior Governor of the University, who died on February 1, 1894—fifty years ago. It is, therefore, a doubly fitting and gracious act that the Montreal Branch of the McGill Graduates' Society should of their own initiative decide to mark these dates by an invitation to all members of the Montreal Branch to contribute to the Library.

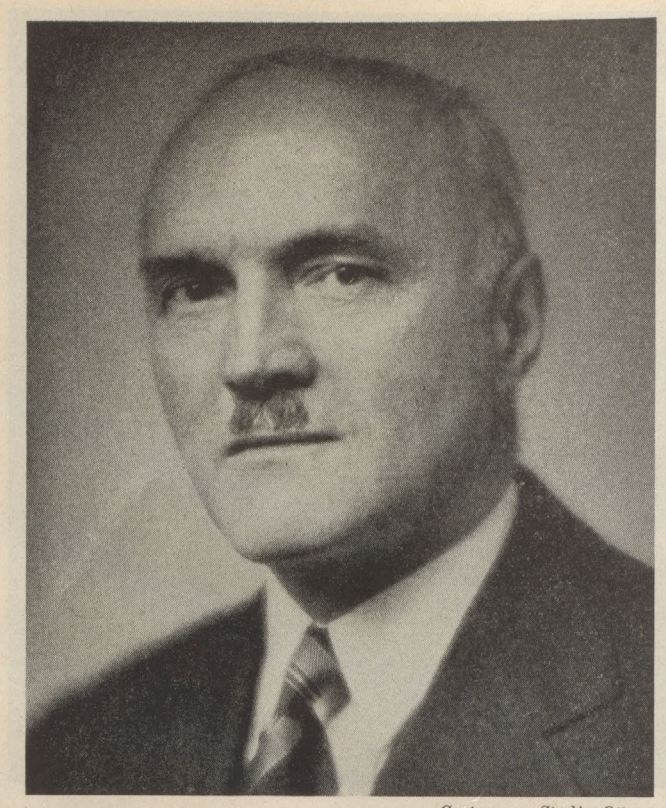

Under the signature of Dr. C. J. Tidmarsh, President of the Society, Mr. G. B. Glassco, its Secretary, sent to 1400 members of the Montreal Branch a letter in which he wrote:

"To mark the achievement of fifty years of splendid service to the University by the Library, it is suggested that you respond to this invitation to send it one or more of the surplus books in your library, with your name as donor written on the enclosed bookplate . . . While the more serious types of books will be of the greatest use, there will always be a need for fiction and general literature, or text books of recent date. If duplicates of the same book reach the Library in response to this invitation, they can be used for exchange or for restoring in some measure the devastated libraries in England and Scotland, many of which have been partially or totally destroyed."

In response to this letter $90.00 have thus far been received and 377 volumes, including current events, biography, science, history, archaeology, and other subjects. The generally useful character of the books thus donated may be inferred from such sample titles as "Great Events of the War" (7 vols), "Great Events of the Great Historians" (22 vols.), Bourget's Works (7 vols.), and such biographies as Osler, Mark Twain, Madame Curie, Burns, and Andrew Jackson.

Most of the books will be useful for the intended purposes, but generous as the response has been on the part of individuals, the volumes represent only 76 graduates who have thus far responded. May we not remind the others of the closing words of Dr. Tidmarsh's letter:

"Will you share in making this a really memorable anniversary by responding to our invitation?"

Castonguay Studio, Ottawa

L. A. G. STEWART, M.D. '16
President, Ottawa Valley Graduates' Society

Vancouver Alumnae do Useful Work

The Vancouver Branch of the McGill Alumnae sent over five hundred pounds of Christmas parcels including 125 individually wrapped gifts as well as trimming for a Christmas tree this year to R.C.A.F. men at isolated posts in the North. Last year two hundred pounds was sent and this year, with the help of McGill alumni, the quantity was doubled. On the committee were Mrs. Alex Ree, President, and Mrs. J. A. C. Harkness, Mrs. W. Bonnycastle, and Mrs. C. A. Ryan, while the parcel packing took place at the home of Mrs. G. S. Raphael.

The annual donation to the McGill Alumnae Scholarship Committee was also made. Meetings are held three or four times yearly.

Brig.-General H. F. McDonald Commemorated

On December 9, 1943, the new Col. Belcher Hospital was opened in Calgary, Alberta, by Hon. Ian Mackenzie, Minister of Pensions and National Health, who stated that a new wing would soon be added to be named the Harold McDonald wing, in memory of the late Brig.-General H. F. McDonald, former chairman of the Canadian Pensions Commission and chief executive assistant to Air Minister Power. Brigadier-General Harold French McDonald, C.M.G., D.S.O., graduated from McGill in 1907 with the degree of B.Sc., and died at Banff, Alberta, on September 2, 1943.

Ottawa Valley Graduates' Society

Some 120 members of the Ottawa Valley Graduates' Society attended the annual meeting held at the Chateau Laurier on January 25, 1944, under the chairmanship of the President, Dr. A. P. Davies. Principal F. Cyril James was the guest speaker. He spoke first of McGill at war; of the graduates on active service and of the war work being carried on within the University. He then turned to reconstructions problems, in particular that of education, and described how, even in the midst of war, Great Britain was discussing educational reform and hoping shortly to pass an act greatly increasing the opportunity for all to attain an improved education within a democratic framework. The need for Canadian educational reform was demonstrated and the responsibility of McGill, both in this connection and providing worthwhile acceptable courses for the demobilized men, was stated.

The speaker was thanked by G. Gordon Gale and a coloured motion picture showing the new McGill Gymnasium-Armoury in use was then shown.

The annual elections then took place, the following officers being elected:—Honorary President, Dr. P. D. Ross; Honorary Vice-Presidents, Gen. A. G. L. McNaughton, Dr. T. H. Leggett, Dr. G. S. McCarthy, Dr. H. M. Tory; President, Dr. L. A. S. Stewart; Vice-Presidents, Allan K. Hay, H. R. Cram, Dr. C. M. Geldert, Dr. J. F. H. Puddicombe, Hon. Sec.-Treas., Gerald E. Rickwood; Hon. Ass't Sec., H. Heward Stikeman; Executive Committee, Mrs. F. R. Crawley, C. R. Westland, Dr. R. L. Gardner, N. A. Thompson, Col. A. F. Duguid, C. Maxwell Taylor, Alex Graham Garvock; Representatives to Graduates' Council, Dr. W. S. Lyman, Dr. A. P. Davies; Historian, R. C. Berry.

McGill Red Cross Active

The McGill Branch of the Canadian Red Cross Society has again had a very active year, providing hospital supplies for use on the second front, civilian clothing for England and Greece, and items such as bath towels, socks and turtle-neck sweaters for inclusion in parcels sent to prisoners-of-war. At the annual meeting, held in the ballroom of the Faculty Club, Mrs. Walter Vaughan presided, and reports were read by the convenors of the various committees —Mrs. R. de L. French, cutting committee; Mrs. Walter Lyman and Mrs. R. Noble, sewing, and Mrs. E. L. Clarke, knitting.

A total of 10,770 bias bandages, operation sheets, surgical box linings, tape sponges, and nurses veils were made during the year. Garments sewn for civilians amounted to 1109 and 1183 articles were knitted during the year. A grant total of 13,807 articles were completed.

Officers elected were as follows:—Honorary President, Mrs. F. Cyril James; Honorary Vice-President, Dr. Muriel Roscoe; President, Mrs. Walter Vaughan; Vice-Presidents, Mrs. Fraser Gurd, and Miss Mildred Robertson; Secretary, Miss Ellen Stansfield; Treasurer, Mrs. W. W. Roy.

Death of Archdeacon F. G. Scott, LL.D. '26

ONE of Canada's best-loved citizens in the person of Hon. Lieut.-Col. the Venerable Archdeacon Frederick George Scott, M.A., D.D., LL.D., D.C.L., C.M.G., D.S.O., V.D. died at Quebec on January 19 in his 83rd year after an illness of several weeks. Full military honours were paid to the beloved Great War chaplain known to thousands of veterans as "Canon" Scott, in funeral services at Quebec and subsequently at Montreal where the body was brought for burial in the family lot.

The late Archdeacon Scott who was given the Honorary LL.D. degree by McGill University in 1926, is the father of Frank R. Scott, B.C.L., '27, Professor of Civil Law at McGill and of W. B. Scott, B.C.L.,'12, K.C., prominent Montreal lawyer, as well as of Elton S. Scott, formerly of St. Columba Church, Notre Dame de Grace, and now Professor of Theology at Bishop's College, Lennoxville and Arthur E. P. Scott, Quebec Notary. Archdeacon Scott's father was the late William E. S. Scott, M.D., who was Professor of Anatomy at McGill for forty years.

Archdeacon Scott was equally distinguished as a churchman, lecturer, writer, poet and humanitarian. As senior chaplain of the Canadian Expeditionary Force in the Great War he became the most beloved figure among the men bearing Canada's colours in that conflict. He hated war but recognized its necessity both in 1914 and 1939, and had no sympathy for slackers. One of his sons, Henry Hutton Scott, was killed in the First World War, and he himself suffered severe battle wounds.

His indelible memories of it were the basis of innumerable poems and other writings including a volume entitled "In the Battle Silences and Other Poems"; a book on "The Great War As I Saw It"; and a recent book of verse "Lift Up Your Hearts", published in 1941.

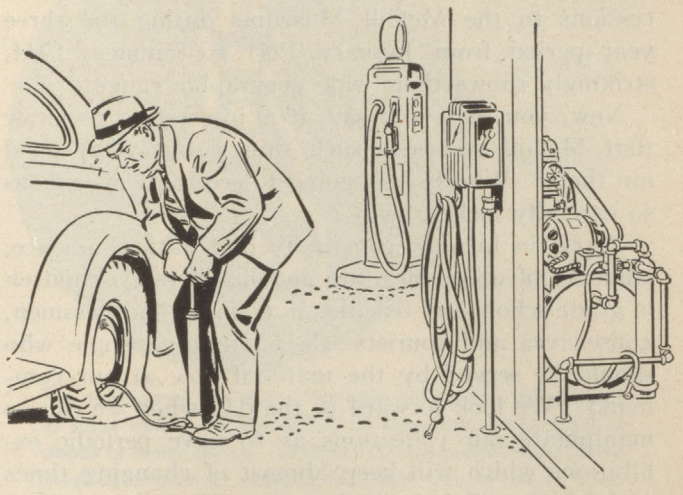

After the war, he gave his energies to the championing of veterans' rights, to penal reform in his capacity as a director of the Canadian Prisoners' Welfare Association, and to social insurance, serving as a member of the Quebec Social Insurance Commission appointed in 1932 by the Quebec Legislature. In 1936, he returned to France with some 6000 Canadian Corps members for the unveiling of the Vimy Memorial, playing an important part in the ceremony.

McGill Receives Large Grants

Among the recent grants to McGill University were an anonymous donation of $5000 for the work of Dr. D. Ewen Cameron, in the Institute of Psychiatry, and the sum of $3500 given by the House of Seagram for a fellowship in the department of agricultural chemistry for research in the chemistry of fermentation.

Mrs. J. R. Fraser donated $1200 to maintain the Clara Law Fellowship. The family of the late Max Strean granted $2000 to the endowment of a W. W. Chipman Medal for students with the highest standing in obstetrics and gynaecology in their final year. The Consolidated Mining and Smelting Company gave $1200 towards a fellowship and equipment for a study of the uses of ammonia.

Look behind you, Mr. Newberry!

JUST reach for the air hose—it will pump your tire up pronto!

If you look at what's behind that hose, you'll find an air compressor with its piping system. Looking further, you'll see how piping is used in the dispensing equipment for gasoline . . . how piping is necessary for water supply at the car washing floor and in the rest rooms found in up-to-date service stations wherever water is available.

Yes, the garage owner is dependent on piping, fittings and valves as very necessary equipment in his plant. And because you depend on *him* for fuel and service, you as a motorist depend on piping too. Whether it is a foot or a mile long, piping conveys fluids to work.

A TIP FOR TODAY—Provide a valve cap for each tire. Be sure they are always in use. They will keep dirt out of your tires and help to maintain air pressure and safer driving.

McGill Museums Face A Crisis

(*Continued from Page 13*)

through Miss Winifred Sims. Other gifts, running the gamut from samplers to bear traps, help to round out the picture of life in Canada in other times.

The accompanying sketch map, summarizing accessions to the McGill Museums during the three year period from January, 1941, to January, 1944, strikingly shows their wide geographic range.

Now, you may well say, it is interesting to know that McGill possesses such things, but what good are they? Who is ever going to see these specimens so carefully locked away?

Pupils in history, geography and natural science, students of economics, art and handicrafts, children in grade school and teachers in training, businessmen, housewives and tourists: these are the people who should be served by the material now at our command. We look forward to the day when we can so manipulate our collections as to have periodic exhibitions which will keep abreast of changing times and which will help to interpret life in Canada in terms of the rest of the world.

We will do this eventually by means of seasonal scientific exhibits; special exhibits for historical occasions; pertinent, practical displays illustrating economics of the plant and animal and mineral kingdoms; exhibits which will inspire students of design and makers of handicrafts; exhibits which will stir the imagination, lead to further study, open up a new world of understanding.

Meanwhile, lack of staff and lack of funds prevent these objects from playing their rightful role. We have, one might say, the plot and a skeleton cast, but no proper theatre and a disinterested audience, for many McGill students, past and present, and the general public, too, are unaware of the possibilities.

We are, however, not without plans. We have plenty of raw material from which to construct "stage sets." We also have friends who would be glad to help with the work, given the opportunity. And after the war we hope to see realized the long cherished dream of a central, specially designed McGill Museum where all these objects will be properly dramatized. Such an institution cannot fail to fill an educational, an emotional and a recreational need.

But while the war still goes on let us not forget the amazing fact that in England today museums are flourishing. Enemy bombardment and rising taxes have not swept away museums but have actually increased their suport. We in Canada, though still far removed from actual conflict, are more near-sighted than those where bombs are falling.

Mr. Arthur C. Parker, Director of the Rochester Museum of Arts and Sciences and Vice-Chairman of the New York Committee for the Conservation of Cultural Resources, says, "A nation that gives up its culture, its institutions, its pursuit of ideals is indeed defeated, and all attempts to diminish the strength of the cultural fabric inevitably lead to national decay." He goes on to point out that all the great civilizations of the world—the empires of Assyria, Babylon, Egypt, Greece and Rome, the Incas, the Mayas and the Aztecs—each of these collapsed never to come back when their cultural institutions crumbled. Let us remember this strikingly repeated evidence when people question the wartime value of museums.

We pride ourselves on our home front. It can be kept an effective front only by constant strengthening of all those institutions of enlightenment and understanding upon which our homes and our national culture are built.

Professor H. E. Reilley Promoted

Professor H. E. Reilley, associate professor of physics at McGill University, has recently been promoted to the position of professor of physics. He has been on the staff of the physics department since 1910, and at present is also lecturing in the army university course being given at McGill.

Recent Donations to University

Recent donations to McGill University include the sum of $5000 by Walter M. Stewart, to Macdonald College, on the 113th anniversary of the birth of the founder, Sir William Macdonald, $1800 from Hoffman-La-Roche Limited, for research in anatomy and in the university medical clinic, $2500 from Mrs. Harvey Gordon, for neurology and neurosurgery, $1000 from Abraham and Aaron Shacter, to the Redpath Library to purchase books, and $1000 from the Rockefeller Foundation to Associate Professor A. B. Currie, for the study of recent developments in liberal education.

Miss Elizabeth Douglas Dies

Miss Elizabeth Douglas, aunt of former principal Lewis W. Douglas, and daughter of the late James Douglas, LL.D., prominent engineer and donor of Douglas Hall at McGill University, died recently in New York.

Dr. A. B. Currie Awarded Fellowship

Dr. A. B. Currie, associate professor of education at McGill University has been granted a $1000 fellowship by the Rockefeller Foundation which he will use for six months research, study, and contact with American scholars and education leaders at Harvard, Yale, Princeton, and the University of Chicago, the theme of his research being "Recent Developments in Liberal Education."

Graduates View Special Films

A substantial number of Montreal graduates have taken advantage of the invitation of the McGill Film Society to attend the special films shown by them at regular intervals in Moyse Hall this year. This Society was organized by the undergraduates for the purpose of showing documentary and other films of an educational character and graduates were granted Associate Membership without fee.

At the first meeting, on November 24, the "Wedding of Palo," a Danish film produced in Greenland, with musical score by the Royal Conservatorium of Music at Copenhagen, and "World of Plenty" a recent British documentary film, were shown.

On January 13 the films were "The River" by Pare Lorentz, "The Archbold Arizona Expedition," in colour, promoted by the American Museum of Natural History, and "Pearls of the Crown," by Sacha Guitry, an historical romance linking the courts of Europe.

The afternoon of January 17 at 5 o'clock was chosen for the showing of "Man the Enigma," by the Woodard brothers (Academy Award Winners), and "Sponge Fishers of the Gulf of Mexico," in colour.

On the evening of February 8, three films were screened, "Crisis," a graphic representation of Czecho-Slovakia, with commentary by Vincent Shean, "Sultan Pepper," a Soglow animated cartoon, and "Voyage of the Discovery II," a release from the British Colonial Office depicting the exploration of, and whaling in, the Antarctic.

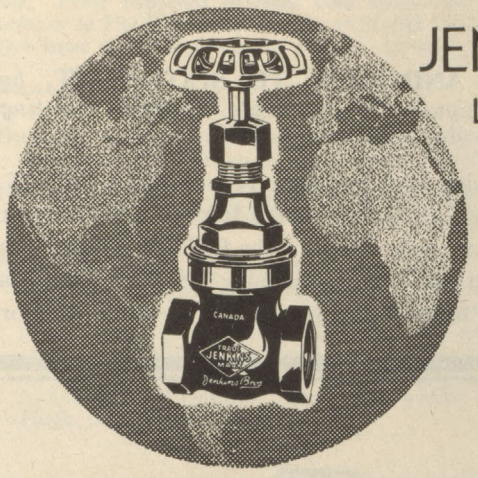

March 13 saw the showing of "Forgotten Village" by Joseph Steinbeck, and "West Wind."

An average of 150 graduates have attended the evening screenings, and much favourable comment has been heard, and interest aroused. It is hoped that this project will be continued next year.

Dr. Gallay Develops Plastic Glue Process

Dr. Wilfred Gallay, B.A., '27; M.Sc., '28; Ph.D.,'30, chief of the colloids and plastics laboratory in the chemistry division of the National Research Council, Ottawa, has recently announced the results of tests of a new hot-setting plastic glue process enabling timber of any size to be joined together by applying electric current which is carried by a conducting agency in the glue, ensuring even distribution of it and a completed join as strong as the wood in from five to ten minutes. Previous laminating processes required twenty-four hours in presses and a week of conditioning and the size of wood which could be used was limited. The conducting element is acetylene black. With this process Dr. Gallay made an airplane propeller, taking five minutes for the glueing of the wood sections of the blade, a process originally taking 28 days, and more recently, with the use of synthetic glue, 8½ days By this method the use of wood in construction and other work can be greatly increased, and steel braces, bolts, and nails can be frequently eliminated. Dr. Gallay stated: "We believe this new process will revolutionize the manufacture of laminated timber and its utilization. It provides economy and upholds quality."

IN A POST-WAR WORLD

JENKINS' LOW-COST SERVICE WILL COUNT

The opening of new and wider post-war markets will depend to some extent on the ability of manufacturers to produce goods at lower prices. Jenkins low cost performance on the production lines of industry will help you to reduce costs. Convincing data on Jenkins Valves gladly supplied. Jenkins Bros. Ltd., 617 St. Remi St., Montreal, Canada.

INFLATION AND HOW TO SCOTCH IT, *by J. E Le Rossignol. 22 pp. State Journal Printing Company, Lincoln, Nebraska.*

THIS amusing and informative pamphlet by J. E. Le Rossignol, B.A., '88; LL.D., '21, eminent McGill graduate, now Dean of the College of Business Administration at the University of Nebraska, is written in the form of a monologue by one Professor MacAndrew Cantlie to his dog Sandie. In this light and palatable form designed to appeal to the reader with no training in economics it explains the A.B.C. of inflation, its causes, effects and cure. Needless to say, in a 22 page pamphlet the treatment is not exhaustive, and the views outlined are the orthodox ones; the merit of it lies not in what is said, but in the manner of presentation, which is at once clear, concise, and interesting.

Professor Le Rossignol outlines the dangerous spiral brought about by the increase in national income while at the same time the production of consumer goods is necessarily reduced, leading inevitably to higher prices, higher wages, and inflation. He points out the inequalities brought about and the danger to those whose income is fixed, if inflation occurs. The conclusion is, of course, that not only must taxation be increased, but the public must be encouraged to increase their purchases of war bonds so as to decrease their buying power; prices and wages must be controlled, and at the same time rationing must be resorted to in order to ensure a fair distribution of those commodities which are scarcest and most essential.

He comments favourably on the Canadian system of compulsory saving. He disapproves, however, of the O.P.A. proposal to follow the Canadian policy and roll back the retail prices of meat, butter, coffee, and other products, onto the manufacturer and pay him subsidies, saying this is an effort to control the effects of inflation, rather than the causes.

Controls are necessary and inevitable in war time and the period following until normal conditions are restored, but Dr. Le Rossignol believes that, when the law of supply and demand operates again, high prices will cure themselves by encouraging production which will automatically bring them down, and that after the war we may hope to have balanced abundance which will lay the spectre of inflation, unless we make the mistake of reviving it by debasing our money. He feels that, on the whole, inflation has been reasonably well controlled during the war, though less completely in the United States than in Canada, because the controls there were established later and are not as comprehensive.

In conclusion he ventures the guess that the danger of inflation will be greater after the war than it is today because the controls are likely to be relaxed and buying power released.

A.A.M.W.

Stevenson, George, Past Student, in Montreal, December 23, 1943.

Stewart, Rev. Robert, B.A., '82, at Windsor, Ont., January 4, 1944.

Wilkes, Alfred Burton, B.A., '13; M.D., '15, in England, December 29, 1943.

Presbyterians Veto Divinity Faculty

The Montreal Presbytery of the Presbyterian Church in Canada at a recent meeting turned down by a majority vote the proposal to create a faculty of divinity at McGill University because the church would allegedly lose control over the appointment of professors and ultimately over the new faculty.

Births

Allo—At Arvida, Que., on December 15, to Gordon F. Allo, B.Eng., '33, and Mrs. Allo, a son.

Ball—At Kingston, Ont., on November 17, to W. L. Ball, B.Sc. (Arts) '31; Ph.D., '35, and Mrs. Ball, a son.

Prominent Medical Graduate Dies

William Frederick Drysdale, M.D., '94, veteran city medical health officer of Nanaimo, B.C., and a jubilee medal recipient of the Canadian Medical Association and the British Columbia Medical Association, died at the home of his daughter in Carthage, Montana, on Christmas day, 1943, at the age of 75. He attended the births of more than 10,500 babies in Nanaimo and district which is believed to constitute a record. Dr. A. T. Bazin, Dr. A. G. Nicholls, and Dr. Harry S. Shaw were among his classmates at McGill.

McGill Enrolment Increased

Enrolment at McGill University increased by 178 to a total of 3,572 taking university courses, which total includes, however, 250 students in the army university course, according to final figures for the session 1943-44 released recently. The total is made up of 2,260 men and 1,312 women. Among those taking courses are 277 students from 26 foreign countries. A gain of 46 students registering for the B.Sc. degree (exclusive of army course students), and of one in household science is shown, and registration in the Faculty of Law remains the same; otherwise every course shows a loss if the army course students are not counted.

In Time of War...Prepare for Peace

Just how soon or how suddenly this war will end is anyone's guess. Just how long or how short the road to Victory will be no one can foretell. But one thing is as sure as sunrise — we cannot begin too early to plan for the post-war world! Long before the ink is dry on the treaties of peace, we must be ready to deal with *problems* of peace . . . for peace depends upon more than paper. Peace depends upon human contentment. Peace depends upon every man and woman being free to live fully and to live usefully.

Let us face up to it, now. There must be no fruitless searching for employment in this country in the years that follow Victory. There must be no wanton wastage of human material and initiative. There must be a place in our national scheme of things for every willing man and woman. There must be work, worthy work and gainful work, for every person who seeks it. There *must* be. And there *can* be.

For look at the mighty possibilities of this great country of ours. Look at the things that need doing—and the means that lie at our hands to do them. Look at the need for better homes—for healthier homes, for lovelier homes . . . Look at the need for worthier towns—for planned, convenient towns, without ugliness, without slums. Look at the need for railroad development—for modernized rolling stock, for widespread electrification. Look at the great bridges that should be built—the cloverleafs that could make road travel swifter and freer from danger. Look how the benefits of electricity might be spread to remote farms and hamlets . . .

And that isn't half the story. In every home, in every factory and store and warehouse and theatre there will be modernization and improvement to be made. New extension and refurnishing . . . new furniture . . . new equipment . . . new machines . . . new elevators. In every field of transportation there will be work to do . . . new automobiles to be built . . . new trucks and tractors . . . new street cars, new buses, new planes. In every civic centre there will be the need for new recreational and entertainment facilities . . . new parks and arenas, new theatres, new swimming pools. In every town and city finer and worthier cultural centres and health centres will be required . . . enlarged universities, schools, libraries, hospitals, laboratories and clinics.

There is no need to ask where post-war work shall be found. But every one of us now should be studying *how* this work shall be done. We should be studying the changes and improvements we mean to make in our homes . . . the re-planning and expansion of our factories . . . the re-fitting and remodelling of our stores and offices, of our restaurants and theatres . . . the needs of our communities—planning better housing, better streets, better lighting, better civic centres and cultural centres, better parks, better transportation, better hospitalization. While there must not be the slightest relaxation of our all-out efforts to win the war—we must plan and we must start planning now.

Many governmental, municipal and industrial groups already are planning. Many individuals are planning. But more planning is needed; more is possible. Don't think this doesn't concern you. It does. Whether you're a home-maker, a plant operator, a farmer or a storekeeper or a civic leader—start figuring for the future, and start *now!* For by planning today, we prepare ready-made markets for tomorrow—markets which will absorb our fullest productive effort and thus create full and gainful employment for everyone.

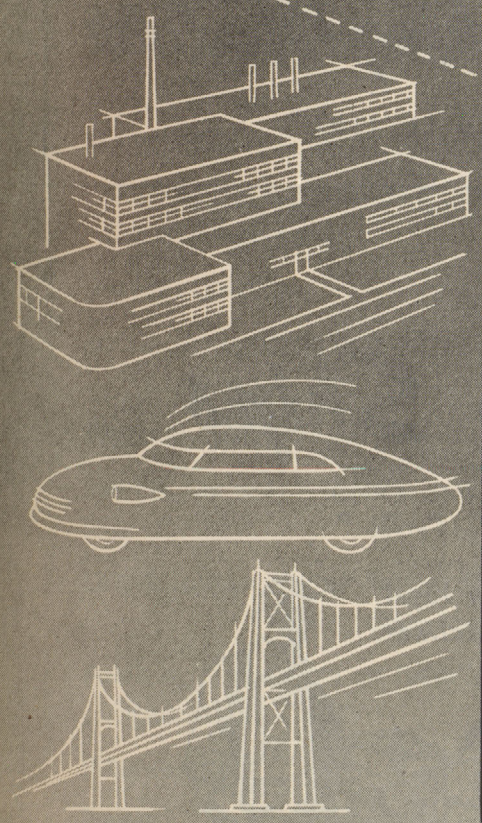

CANADIAN GENERAL ELECTRIC CO. LIMITED

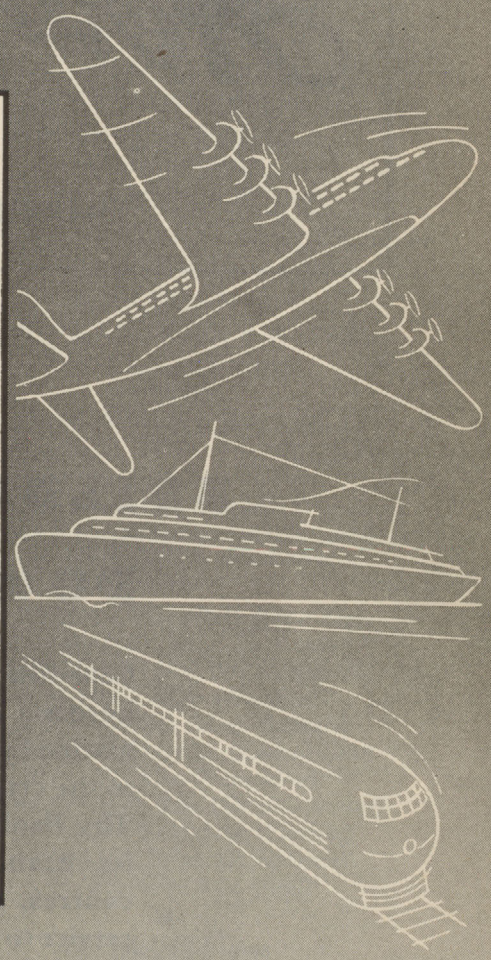

"FAIRBANKS-MORSE..."

A Name to Remember

WHEN TOOLING UP FOR

A POST-WAR WORLD

New and improved models in the Tools of Production will be available as soon as war restrictions are lifted. Inquiries invited:

MACHINE TOOLS
TOOLS—PNEUMATIC & ELECTRIC
SHOP SUPPLIES
RAILWAY & CONTRACTORS EQUIPMENT
SCALES
ENGINES—DIESEL & GASOLINE
PUMPS
TRANSMISSION EQUIPMENT
COAL STOKERS
TRUCKS—HAND & POWER
REFRACTORIES
WOODWORKING MACHINERY
BELTING
WELDING EQUIPMENT
ABRASIVES
VALVES AND STEAM GOODS
CHAIN BLOCKS
AUTOMOTIVE EQUIPMENT
MOTORS AND GENERATORS

F 403

● Lower production costs will be an important factor in creating new and larger POST-WAR markets. And that will call for new machinery with top-flight efficiency.

Your plant equipment will be war weary after playing its part in the Battle of Production, and one of today's urgent steps in preparing for PEACE and the tasks of RECONSTRUCTION, is a complete and searching survey of all your Tools of Production.

You may need some entirely NEW machines adapted to new POST-WAR products you have in mind. Or as straight replacements of worn-out machinery.

Call on Fairbanks-Morse "the Departmental Store for Industry" for your requirements. This old established national organization is a happy combination of resourceful men and large resources in machinery, tools and shop supplies.

Commuting by air is being planned by men who think of tomorrow

Tomorrow's Helicopter Commuter! . . . Step from your office building terrace into your Helicopter and commute to your hunting lodge on a mountain lake 200 miles away! That's more than a commuter's dream, for the Helicopters already designed will make it possible for you *Tomorrow!* You can take off and land vertically . . . and fly so fast that your own hide-out in the woods will be only minutes away!

Yes — the Helicopter Commuter, promising a broader and more enjoyable way of life, is only one of the many wonders being planned today by MEN WHO THINK OF TOMORROW.

- All these things will be ours some day. But, there's one all important job that comes first—*winning the war.*
- Only when the war is won can we expect our gallant sons and daughters home and enjoy with them the great things envisioned for our future by MEN WHO THINK OF TOMORROW. So, let's intensify our war effort... keep up production rates... buy more and more Victory Bonds and War Savings Certificates . . . do everything we can to help speed this war to a quick, victorious end. Let's *all* be MEN WHO THINK OF TOMORROW.

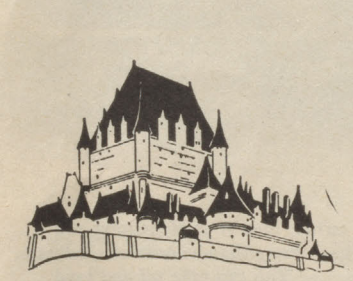

THE HOUSE OF SEAGRAM

All Seagram plants in Canada and the United States are engaged in the production of high-proof alcohol to help speed this war to a victorious end. High-proof Alcohol for War is used in the manufacture of Smokeless Powder, Compasses, Navigation Instruments and many other wartime products.

A Message to The Graduating Class of 1944

Stephen Leacock

YOU are going out from McGill into what is commonly called the "rude world" under very special circumstances and at a very critical period. For just at present the world is particularly rude, and it is going to be the work of you and your generation to try to make it better. Make a real job of it in the best traditions of honour, courage and decency.

There are great tasks in front of you and you will learn as you set your hands to them how great is your debt to the Alma Mater *that has equipped and trained and inspired you to cope with them. A college is a queer place, full of freak characters and odd activities, with alternating aspects of drowsy inefficiency and alert effectiveness: a queer place, but it gets there just the same. If all the world did its work as well as the college does, then the world in the words of the old song "would go very well then." You are a product of the college: see to it that what you do justifies what the college has done.*

You carry away a parchment—keep it. In the time being its utility is small although even now you can use a McGill degree as constructive evidence of mental sanity, barring any direct evidence to the contrary and even now you will find that your degree is accepted practically everywhere as absolving you from any test for illiteracy except as a mere matter of form.

But as the years go by your McGill parchment will take on a deeper meaning and will seem to breathe forth from the wall on which it hangs a magic wealth of memories, of wistful regrets and abiding and justifiable pride. It will serve to remind you that you have not really left college: no true graduate ever does. In the first eagerness of life's struggle the college seems left behind and but little thought of: but as

the years pass and the foreground of life loses its colour and its interest in favour of the deeper background, your memory of college will rise before your mind in an outline as deep and firm as that of some ageing picture which a garish illumination confuses and a softened light revives.

There is a Latin motto which says that wherever we go we still carry with us our affections for the things we leave behind. I will not attempt to quote it, the more so as there seems to be a Latin motto for all the best things we ever want to say. But take it to mean that in going out from McGill your fellowship in all that it means remains unbroken.

Dr. Leacock's letter of transmittal, to the President of the Graduates' Society, of his message to the Graduating Class of 1944. He was then very ill.

Dear Fraser

I sat down to obtain that the state of my health forbid me to write more than a couple of sentences, — but I found that like all professors I couldn't be brief if I tried

Send back this: there's no copy: it's right off the pen, the only way to write things...

Stephen Leacock

Shell-Out Campaign for Greek, Russian and Chinese Relief.

The Student Year (1943-44)

By
JAMES G. MacLEOD

FOR the majority of McGill students of the session 1943-'44, college life under normal conditions was unknown. Some members of graduate faculties had been at the University before 1939, but the main bulk of the student body had started, and would probably finish their courses during wartime. Study under these conditions is a considerable strain, due to public opinion, personal uncertainty, and strict government supervision; and it is a credit to the group that they were able to carry on their studies, and at the same time show a great deal of interest in the extra curricular aspects of college life.

The past session will be remembered mainly for the stringent regulations issued by National Selective Service early in 1944; for the number and the intensity of the war charities drives conducted by the Students' Executive War Council; and for a revival of student support of social functions and athletic activities. There will be some who remember the discussion caused by the refugee petition, and by the reduction in the amount of military training for senior essential students.

THE WAR EFFORT

It has long been the practice for the student body at McGill to raise funds for charitable organizations, and since the begining of the war, this practice has been extended to the war charities. Three years ago, the Students' War Council was formed for the purpose of coordinating and directing the student effort along these channels.

The net total raised by the undergraduates during the past session was $6287.37, and the total expense incurred in raising this sum was $135.10, or slightly over two percent. The university may feel justly proud of this record, for it tops last year's total by more than $250, and is the largest amount ever raised by the undergraduate body.

Most of the money was obtained for war charities, in the course of three financial drives, and a concert; but $1170.76 was contributed in the Amalgamated

---

JAMES G. MACLEOD is Editor-in-Chief of the *McGill Daily*, and Secretary of the Undergraduate Committee of the Graduates' Society.

Some of Results of First Book Drive

Charities campaign held early in the session. The remainder was raised by the Executive War Council directly, or by committees working in collaboration with it.

The contribution to the Canadian Red Cross was $2415.00, of which about one-fifth was the proceeds of the second Annual Red Cross Concert, an all-student show directed by Victor Goldbloom. The rest of the amount was raised by personal subscriptions of the students. International Students' Service benefited to the extent of $2369.95, this being the largest single amount obtained by personal solicitation. The aims and works of the Service, which sends books to students in occupied countries and in prison camps, was described by Miss "Billie" Rowland, an active member of the organization. The "Shell-Out" Campaign, which netted $331.66, was run on a competitive basis, and the proceeds went to Greek, Chinese and Russian relief.

In addition to its excellent work in the financial drives, the War Council sponsored two book and magazine drives, an aid-to-Russia clothing campaign, and enrolment for the Red Cross blood bank and for "guinea-pig" work in research at McGill. The "guinea-pigs" are volunteers who submit themselves as subjects for experimental research, and although some of the work is secret, it may be said that some were used in testing the new sea-sickness remedy now being used by the armed forces.

In the faculty of Engineering, where new ideas are not on the ration list, the executive endeavoured to increase the attendance at the Red Cross Concert and at the same time obtain more blood donors, by offering free tickets to the concert to all those who would give some blood.

The success of these campaigns showed that the student could find time to support and organize activities which he considered important, and that he realized he had a duty both as a citizen and as a student.

WARTIME REGULATIONS

In addition to worries over essays, examinations, labs., lectures, assignments, contributions, and military training, the wartime student is plagued by the interpretation of National Selective Service regulations concerning his stay at college. Since the regulations are rarely defined, and are even less intelligible than the income tax forms, the student finds himself in the position of a mountain climber hanging on a rope, and not knowing who is at the end of it, or what he intends to do. The regulations were definite enough, however, to result in thirty-nine "graduations" at Christmas; and since the latest ruling is that only the top half of the non-essential classes will be allowed to return to university in the fall, it is expected that there will be a considerable number of involuntary graduations in the course of the summer.

The new regulations apply to Arts and Law principally, since Commerce has been classed as one of the essential faculties, a classification which caused considerable speculation and no little discussion. One of the remedies suggested was that everyone come in the top half of the class, but it was decided that this was physically impossible. With some trepidation, a mathematician suggested that if sixteen students started a four year course, only one would graduate. This started a minor panic, until it was discovered that the regulations would apply for one year only. Thus, the present college group is being forced to bear the brunt of the regulations for themselves, their predecessors and their successors.

The injustices of the plan were immediately apparent, for a class of dunderheads would be treated on the same basis as a class of brilliant and conscientious students; and Artsmen freely admitted that all classes were not of the same mental calibre. The fact that no distinction was made between the social sciences and the humanities, while every distinction was made between these two groups and a B.Sc. course in very unessential subjects was the basis of another trend of heated conversation. Other students, basing their conclusions upon scientific research, would quote cases of students classed as B.Sc. and essential, whose main courses were part of the Arts curriculum, and who took only a few science subjects, etc., etc.

The number affected at McGill was relatively small, 166 students in Arts and 33 in Law, but regardless of the number, the principle was felt to be unjust. It would have been far better to have drafted the whole class, since it would have prevented the throat-cutting competition of trying to get in the first half, and of trying to get as many others as possible out of the first half.

The essential students, in the meantime, stood by and watched the proceedings with the greatest of interest. They did not feel very sympathetic, since they considered the non-essential courses a waste of money and time; but when they ventured an opinion it was usually to the effect that the government should have been able to devise a better method of getting the dregs out of the bottom of the man-power barrel. The Meds., being far removed from the scene of the tragedy, were still trying to figure out when they would graduate, since the acceleration of courses had been stopped in all incoming classes since the beginning of the session, and the senior years were gradually leaving the freshman class behind.

In the middle of February, the Technical Personnel Selection Board, a product of the Wartime Bureau of Technical Personnel, arrived at McGill to interview senior Engineering, Science, and Agricultural students. Although several of the western universities expressed dissatisfaction with the decisions of the Board, they handled the cases of McGill students in a very thorough and efficient manner. The body was composed of representatives of the W.B.T.P., and of the Army and Navy, and upon interviewing each member of the graduating class, they were able to give him a fairly accurate picture of where he would be used upon graduation. They also arranged that the lists of employers would not be posted until all those acceptable to the services had been notified. This scheme prevented indiscriminate job hunting, and allowed the students to enter their final examinations with a clear picture of their immediate future.

The only consolation which the student body could find in the N.S.S. regulations was the fact that the government had taken the reins into its hands, and although there were injustices, the students could depend upon action of some sort. Since the main objection in previous years had been the vacillation of the government's policy, the step was an encouraging one, even if some insisted it had been taken in the wrong direction.

MILITARY TRAINING

As a concession to the fact that the invasion of Canada was no longer imminent, the syllabus of military training was reduced to one hour per week for the senior years of Engineering and Science, and the amount and type of training required of Medical students was also changed. In commenting upon the military training situation in his annual report, Principal James stated that

> "Although there is no student feeling against the idea of military training (which in fact evoked an enthusiastic response from the student body during the early years of the war), it must be confessed that there is a growing resentment against the monotony of the present syllabus and against the attitude of the Army authorities towards the whole scheme."

Capt. Alex Stalker, President of Students' Society and Miss "Billie" Rowland, I.S.S. speaker in connection with "drive" raising $2369.95, being interviewed by *Daily* reporter.

Although the students agreed with the sentiment of these remarks, they felt rather that the training time could be spent to better advantage at study, since the services had given every indication that they would require only a limited number of college graduates in the future. An additional bone of contention was the fact that no credit was given for military training taken at McGill, while at other universities the district authorities recognized the training.

The Navy and Air Force units on the campus, being more closely associated with the active units, were enthusiastically received. The presence of the Canadian Army Course, which had occupied Douglas Hall, did much to confuse the time-tables in Engineering, but they were strong competitors in campus sports, playing both on university and intramural teams.

THE REFUGEE PETITION

Every year, and often twice a year, the campus finds itself split on some issue, usually of a political nature. This session, the Sir Robert Falconer refugee petition, which was circulated throughout the Dominion, was the cause of the furore. The petition held that "the government should offer sanctuary without

The Late Captain Percival Molson, M.C. (1880-1917)

By
FREDERICK J. TEES

IN the spring issue of THE MCGILL NEWS, it was announced that the Molson family had recently given to McGill University a collection of medals, trophies and decorations won by the late Captain Percival Molson, M.C., after whom the Stadium takes its name.

These valuable tokens of his prowess will be placed in one of the cabinets in the foyer of the Sir Arthur Currie Memorial Gymnasium-Armoury and a Committee, nominated by the Board of Governors, is now at work arranging for their housing and display.

The career of Percival Molson was a noted one, and it is fitting that with the accession of this unusual collection, the present generation should be reminded of one whose great qualities and high principles made him the inspiration of his *confreres*.

Percy Molson, as he was known to those of us who were his classmates in school and college, was born at Cacouna, P.Q., a summer resort on the Lower St. Lawrence, on August 14th, 1880.

He was the third son of John Thomas Molson and Jennie Baker Butler, a grandson of Thomas Molson.

He attended the Montreal High School, at that time on Peel Street, on the site now occupied by the Mount Royal Hotel. Here he graduated in 1897, and entering the Arts Faculty of McGill University in the fall of that year, was granted the degree of Bachelor of Arts in 1901. He was a good student.

His family hoped he would proceed into law, as many relatives on his mother's side had been prominent in that profession, but he chose instead to enter the Faculty of Applied Science as it was then called, now the Faculty of Engineering. After one year he decided his place was in business and entering the offices of the National Trust Company, he had risen

---

FREDERICK J. TEES, M.C., B.A., M.D., F.R.C.S. (C.), F.A.C.S., is Lecturer in Surgery and Honorary Consultant Surgeon, Department of Physical Education, McGill University.

A leading athlete himself, Doctor Tees was a school and college mate of Percy Molson, and always prominent in sporting circles. Doctor R. Tait McKenzie's famous statue "The Sprinter," though a composite of about one hundred noted sprinters, was largely based on photographs for which Doctor Tees, Percy Molson, Ovie Howard and John Morrow posed.

to become manager of the Montreal Branch at the outbreak of the First Great War.

He promptly joined the McGill C.O.T.C., taking his first military training with that Corps. In 1915, enlisting with the Second Universities' Company as Second in Command, he proceeded overseas as reinforcement to the already famous P.P.C.L.I., the Princess Patricia's Canadian Light Infantry.

He was seriously wounded in the Battle of Sanctuary Wood on June 2nd, 1916, and for his part in this engagement was awarded the Military Cross. Invalided to Canada for treatment, he had every justification for accepting one of several offers of Staff Appointments or returning to civilian life, but he insisted upon returning overseas to his unit, which he rejoined in June, 191'.

On July 5th, 1917, in the western outskirts of Avion, he was killed by a direct hit from a trench mortar and was buried in the military cemetery at Villers au Bois.

Such is the brief outline of his life, cut down in its prime.

One of McGill's most loyal sons, he had worked devotedly for many years in the activities of the McGill Graduates' Society and in the creation of the stadium which bears his name, for the completion of which he left a bequest of seventy-five thousand dollars. He had always taken an active part in patriotic and charitable works and the chapel at the Boys' Farm and Training School at Shawbridge, to which he also left a generous legacy, was likewise named after him.

The present collection of medals and trophies is striking evidence of his prowess on the athletic track and field. At all times he showed that spirit of fair play and good sportsmanship which was part of his very nature, and at the end of his athletic career he had earned the unique distinction of never having been penalized or even reproved in any sport for unfair tactics.

He excelled on the track and the football field, in hockey and also in rackets, golf, tennis, cricket and billiards. Yet, in his enthusiasm for every healthy pursuit, he found time to devote extensively to fishing, aquatic sports and life in the wilds.

Many trophies which are not included in the McGill collection were won in these various sports but he was never a pot-hunter. He played for the love of the game and the benefit to be derived therefrom. Needless to say he kept himself in excellent physical condition the year round.

His interest in track activities began at the High School. He did not really mature until he reached the Sixth Form. One of the writer's prized possessions is a cup won for the hundred yards dash when in the Fifth Form. Percy was second. One year later his legs grew long and he left me far behind. In fact, in his last year, he won the Rector's Trophy for the highest aggregate score. This is in the present collection, along with medals and cups for winning the 100, 220 and 440. In that year he also won these events in the first meet organized for interscholastic competition by Major W. B. T. Macaulay.

In his first year at college, he won the half mile, the silver cup for which is in the collection.

In his sophomore, junior and senior years he won the Individual Trophy for the highest aggregate score in the McGill Sports, an accomplishment which is unique in McGill history. The accompanying photograph taken in his running suit in his second year at College gives some indication of the striking physique of his young manhood.

It was in 1899 that the first Intercollegiate Track Union was organized. To him and to his running mate, John Morrow, is largely due the fact that McGill was the consistent winner in those early years.

After graduation he won many events in the C.A.A.U. Championships and in the M.A.A.A. handicaps, but his outstanding achievement was when he went to the A.A.U. Championships in Milwaukee in 1903 and took first place in the running broad jump, in which he defeated the holder of the World's Record, though on this occasion the record distance was not reached.

In football, he played successfully on the first teams of the Montreal High School, McGill University and the M.A.A.A. The last five years of his football career were on the latter team, of which he was captain in 1903 and 1904. He played in the back field, where his great speed, kicking power and sure hands made him outstanding.

In hockey he was captain of the 1901 Faculty of Arts Hockey Team, which won the Interfaculty Championship of that year. The writer played behind him in goal, at a time when there were no nets and when both the back and the front of the goal had to be guarded. Percy played "coverpoint" and his brother Walter "point," the two defense positions, one in front of the other. The following year he captained the University Team. This year saw the organization of the Intercollegiate Hockey Union, in which Molson took a leading part.

One amusing but characteristic incident occurred in the game played between Queens and McGill, where George Richardson and Percy Molson (both with stadia named after them), were the respective captains. The referee proceeded to put Molson off for a heavy body check on Richardson, but the latter on picking himself up and seeing what was happening, protested that the check was a fair one. The referee agreed and cancelled the penalty. Subsequently Molson was given credit for a goal but he pointed out

(*Continued on Page 30*)

Prominent Undergraduates

ALEX STALKER

Alexander Stalker ("Sandy" to his friends) might be classified as one of the "Old Timers" among the students, for since his arrival from the High School of Montreal he has spent four years in Arts and three in Law.

During these seven years his activities have been many. He has held various minor offices, and has been President of the Debating Union Society, Editor-in-Chief of the Annual, Chairman of the War Council, and finally President of the Students' Society, a post which he holds at present.

He has done considerable debating, including contests at Queen's, Varsity, McMaster, Western, and the U. of M. In the C.O.T.C. he has held almost every rank from cadet to his present one of Captain, the only undergraduate to hold this rank. In academic matters he led his class in the first two years of Law, and won a University Scholarship.

All this sounds very factual, but the list does speak for itself. Alex has really given much of his many abilities and energies to the campus he leaves this year.

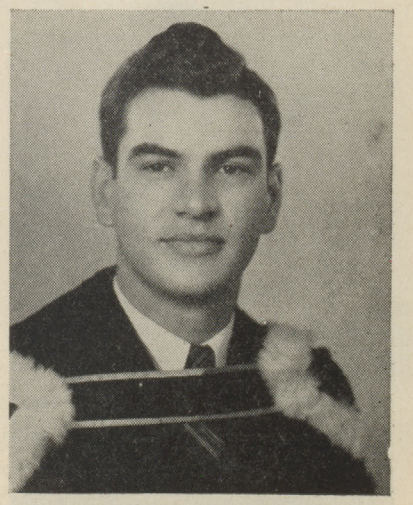

MARJORIE CROSS

Marjorie Cross, a member of the School of Physical Education, has proven a popular and respected leader in campus life. She has done credit to her position as President of the Women's Union this year, and the success of many campus functions has been largely due to her sage counsel and active participation. She has also served as Secretary of the Women's Union, and has been a member of the Annual Board for two sessions.

As Marje graduates from the "muscle school," McGill loses one of her finer daughters. Not only is the lady in question charming, but Marjorie has a strong sense of ideal that does not suffer from neglect. Marje is to be married shortly and she leaves with the best wishes of a student body which she has served well.

REX M. FREEMAN

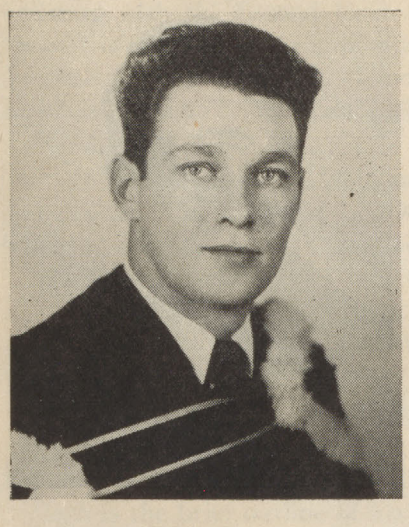

Rex was one of our many pre-engineering students who spent most of Science I on the Arts Building steps, looking longingly at the Engineering Building. When he got to "The Building" he spent many hours looking longingly to the Arts Building—but usually for other reasons.

In his sophomore year Rex's classmates could find no one physically larger, so he was elected class president; and later treasurer of the Engineering Undergraduate Society. The first Med-Plumbers' Ball was held in the spring of 1941, with Mart Kenney in attendance and Rex on the Committee. This has been an annual occurrence for the past four years, Rex acting as chairman during the last two years.

The Scarlet Key endured him for two consecutive years where he was secretary, chaperone and bouncer-de-luxe. Later he became Vice-President of the Engineering Undergraduate Society and Chairman of the Students' Athletic Council. In the latter capacity he was instrumental in leading McGill's request for the resumption of intercollegiate sports. Rex was also master of ceremonies at the successful Athletic Festival.

We wish him the best of luck, for the duration, in the Royal Canadian Ordnance Corps.

Prominent Undergraduates

THOMAS PETER HUTCHINSON

In spite of the many inhibitions traditionally associated with the engineering profession, Tom Hutchinson has captained the McGill Union through one of its most successful years since its founding in 1907. The energetic Westerner has more than justified his election to the second highest position on the campus by crowding more socials, banquets, and meetings into a Union year than have ever been booked before.

Having completed preliminary education and two years college in Manitoba, he was faced with a dollar dilemma which he solved by a few years of extra-curricular research in stevedoring, sea-faring, industrial chemistry, and heavy construction. The logical place to recuperate from such strenuous occupations was McGill and so he has graced the campus with his many activities, not the least of which is the presidency of the McGill Civil Engineering Society. Once an enthusiastic athlete, he is the holder of a National speed-skating record but has restricted his recent physical efforts to beating the Band's bass drum. We understand that he is now slated to do a more serious type of beating under the colours of the Royal Canadian Engineers who have accepted his application as a technical officer.

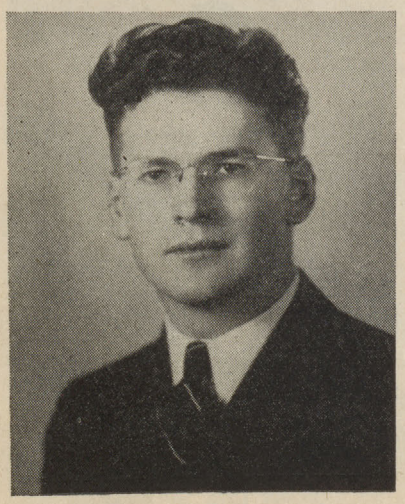

JAMES GORDON MacLEOD

Quarried in Montreal. Graded upon leaving D'Arcy McGee High School, tests showing the highest percentage in the province in McGill entrance examinations. Fine aggregate added during Engineering course, and during membership in Phi Epsilon Alpha, the Honorary Engineering Society at McGill. Coarse aggregate added by associates on sports staff of Daily. Final aggregate analysis showed some of the qualities of an engineer, a sports writer, and a newspaper editor.

Spread and bladed in upper years of Civil Engineering course. Consolidation aided by positions of Editor-in-Chief, *McGill Daily*, representative from Engineering on the Students' Executive Council, secretary of the Undergraduate Committee of the Graduates' Society, and member of Scarlet Key Society.

Opened temporarily for the use of the Royal Canadian Engineers last summer, when serving as a Temporary Second Lieutenant. Finally inspected and accepted by the Royal Canadian Navy for service in the Construction Branch.

ROBERT J. D. MORRIS

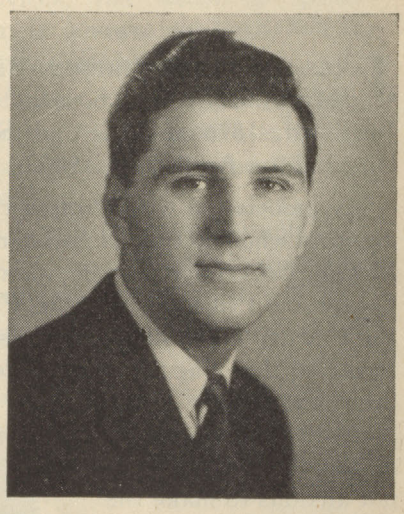

Robert J. D. ("Bob") Morris is one of the students who came to us from the University of British Columbia. There he had considerable experience in student government and handling student affairs. It was thus only reasonable that he should have been elected Representative to the Students' Executive Council from his Faculty, Theology.

On the Council he proved to be quiet, cheerful, resourceful, and willing to fight for something in which he believed, and he was appointed Vice-Chairman. He was turned to to fill jobs which required organization and ability, and he was especially glad to undertake them if they were to help those less fortunately situated. His handling of the International Student Service campaign made it one of the most successful drives held on the Campus in many years.

Because of the arrangement of the Theology courses, Bob has had to go to Toronto to finish his studies.

Prominent Undergraduates

DAN C. LORTIE

"Happy" Lortie is one of the younger and more promising student leaders on the Campus. Only in his sophomore year, he already bears a lion's share of the responsibilities of student government.

Dan got involved when he was appointed Editor-in-chief of "Old McGill"—one of the most arduous and responsible tasks on the Campus (approx. budget—$7,500). In addition to directing the production of what is planned to be an original volume of the Annual, Happy is Secretary of the McGill War Council and Vice-President elect of the McGill Union.

Enthusiastic and bubbling with ideas, Dan is interested in a large variety of subjects. Chief hobbies are reading, photography, and some music (listening). At McGill Dan is following an honours course in the social sciences.

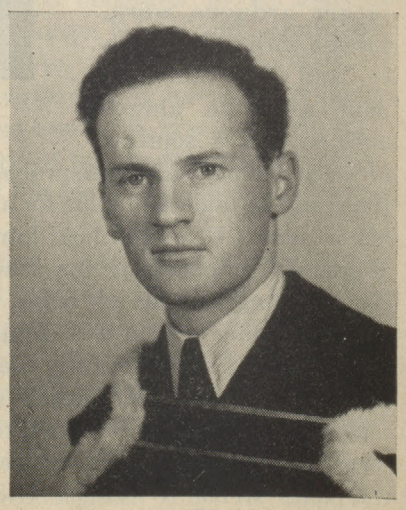

CONSTANCE CORDELL

Constance Cordell, in her last year of Arts, has been one of the more popular coeds during her four years at McGill. Not only has she been very active in the field of sports, but has also found time to serve in various executive capacities. Connie was Tennis Manager and President of M.W.S.A.A., and in both positions she has led a year of great activity and success.

No baseline commentator, Constance is an outstanding tennis player in a university that boasts many fine racquet-handlers. This versatile lady was also a member of the board that produced the new and ultra-successful Athletic Festival.

The lady in question is also noted for a ready smile and charming manner. And to top it all, Connie also finds time to devote energy to her studies.

JAMES HUBERT CROCKER MACLURE

The smattering of higher education Jim Maclure obtained by writing off the Canadian Bankers Association exams. while serving five years with the Royal Bank, started something. He entered McGill in 1939 in search of the fountain head of education; hence, *pro bono publico:* Civil Engineering '44.

His financial status for the last three years was partially subsidized by the Baylis Scholarship. This benefit was somewhat counteracted in 1942 when he assumed the responsibility of a wife in addition to an education.

Early in undergraduate days, his interest and time proved an easy mark for student affairs, leading him finally during the past year to the presidencies of The Engineering Undergraduates' Society and of the Honorary Engineering Society of McGill University, Phi Epsilon Alpha. He also had the good fortune to be McGill's Senior Representative to the Engineering Institute of Canada, and to be a member of the Undergrad Committee of the Graduates' Society. Fortunately, however, he confined most of his horn blowing to the McGill Band.

With a pass degree in Civil Engineering, but with honours in everything else, he was selected by the Construction Branch of the R.C.N., only to be rejected as over-age.

J. C. Simpson

By
GERTRUDE MUDGE

JAMES CRAWFORD SIMPSON, B.Sc. (McGill), LL.D. (Mt. Allison), was born at Brockville, Ont., on June 3rd, 1876 and died at Ste. Anne's Military Hospital, on April 20th, 1944.

My association with Professor Simpson dates back 21 years when, acting as Assistant to the Registrar of McGill University, I was informed by Sir Arthur Currie, the Principal, that Dr. C. F. Martin, Dean of the Faculty of Medicine, had asked that I be transferred to that Faculty and would I please go up and interview Prof. J. C. Simpson, then Secretary of the Faculty. I was not anxious to make the change, but who could say "no" to Sir Arthur? I have certainly never regretted it, for the happiest years of my working life have been spent with Dean Martin and Professor Simpson.

THE LATE DR. J. C. SIMPSON

Professor Simpson's opening remark to me was "I'm a terrible procrastinator and you'll have to keep after me," which I did for over 17 years! The work was strange and difficult and many nights during that reorganization we would burn the midnight oil. It was satisfying, if rather arduous work, though with such a kindly and understanding man we were always able to find a solution for even the most abstruse problem and he was almost too ready to take the blame for any mistakes, whether his or mine. I can still hear him say "We must have a policy," emphasizing his remark by an energetic right forefinger on his left palm. The whole filing and record-keeping system was completely reorganized at this time, and so successfully that when the American Medical Association was asked by a medical school to recommend a system for them to install, they recommended ours. It was in consequence of this that during one summer a young woman was apprenticed to our office to learn the technique before being appointed Registrar of one of the Southern Medical Schools.

His was a most interesting and varied career and I regret that I was unable to persuade him to write his autobiography. I am glad, however, to be able to set down a few of the details as I remember them.

After leaving school he started work as an apprentice in the Art Department of a lithographic establishment, which was, as he said, "owned by the meanest man and staffed by the toughest gang on the Island of Montreal;" nevertheless, he there gained the title of Lithographic Artist.

In 1896 he entered the Faculty of Medicine, and enjoyed considerable success under the inspiration of Dr. Frank Shepherd, then Professor of Anatomy, who was not only a scientist but an accomplished draughtsman. It was a misfortune, indeed that early in his student career he became infected by the contents of a culture tube that was accidentally spilled on a laboratory bench. This resulted in a prolonged illness, during which he realized that his medical career was at an end. One can well imagine his despair, but new courage came to him through the interest of Dr. John George Adami, then Professor of Pathology at McGill and afterwards Vice-Chancellor of the University of Liverpool, who led him into other fields of science. He became a biologist and in 1903, though still only able to do a half day's work, was appointed to the staff of McGill as a Demonstrator. In 1907 he received the B.Sc. degree in Biology and spent the next five months at the Marine Biological Station at Plymouth, England. It was during that summer that he was awarded the 1851 Scholarship which enabled him to

GERTRUDE MUDGE is Assistant-Secretary of the Faculty of Medicine at McGill University and was for many years Dr. Simpson's Secretary.

spend the next two years in research at Cambridge, where he gained the friendship and appreciation of the famous Dr. Shipley. In 1909 he was to have made a two-year voyage of exploration in the South Pacific, but was doomed to disappointment when he received word that the leader of the expedition had been killed in a motor accident and the trip was abandoned. At the same time he was offered and accepted the professorship in Biology at McGill and at the end of that year was made head of the newly created Department of Histology and Embryology in the Faculty of Medicine.

And so there came to the Faculty of Medicine the man who, although not a graduate of Medicine, yet, in close harmony with the Dean, Dr. C. F. Martin, for so many years guided the destinies of medical education, as Secretary for the first thirteen years, Associate Dean for the next four years and, finally, as Dean for a year before his retirement in 1941. During this time, by his charm of personality and friendly approach he conferred a lasting benefit on McGill, making many intimate contacts with other medical schools, and in his clear-cut expressions of opinion at educational conferences, revealing the fact that the McGill Medical School compared favourably with the other great schools of the continent. At these conferences his analytical mind and clearness of vision enabled him to speak with authority and to offer a satisfactory solution to many an educational problem.

He was a remarkable and forceful teacher, and his students in Histology and Embryology will remember his extraordinary facility in drawing on the blackboard with both hands at once. It was not until he realized that the class was paying more attention to his ambidexterity than to the subject matter in hand, that he stopped this delightful practice!

Unfortunately his administrative duties became so heavy that he was obliged to relinquish his teaching and devote his whole time to the office, but he was never too busy to see the students who came to him with their problems. I can see him now, sitting behind a desk piled high with unfinished work and yet welcoming with his kindly smile each and every student coming with some personal problem, financial, or academic, or even a love affair gone wrong, and each could be sure of an understanding reception and usually a satisfactory solution.

In October, 1931, at the opening ceremonies of the new Science Building at Mount Allison University, the Honorary Degree of Doctor of Laws was conferred on Prof. Simpson and his great friend and admirer, Prof. Roy Fraser, of the Department of Biology at Mount Allison presented him for this degree with the following citation:

"It has taken many men to build and maintain the splendid tradition of medical education in Canada. Some have been teachers, some have been officers of the Medical Faculty and some have been both. Among those who have served with high distinction in both teaching and administrative services, the name of James Crawford Simpson is known to both North American and overseas institutions.

A multitude of McGill students, Mount Allison students among them, hold him in affection and admiration, as a splendid teacher and a kindly friend.

He has served with untiring devotion and constructive ability the cause of medical education and has been an ambassador of good will and cooperation between the medical schools of Canada.

I have, therefore, the honour, Mr. President, of presenting to you James Crawford Simpson, as a most worthy candidate for the degree of Doctor of Laws."

As a token of appreciation and affection, Dr. Simpson gave Prof. Fraser one of his treasures, a framed sheet of Darwin's geology notes, signed by Darwin.

His other main interest during this period was Athletics. Although never strong enough throughout his life to participate actively in sports, he was the guiding spirit in Canadian Intercollegiate Athletics, striving always to keep amateur sports definitely amateur and strongly advocating college athletics for the benefit of all students and not only for those of championship calibre. In all of this he was loyally supported by his dearly loved friend "Dad" Lamb. Prof. Simpson was on the Athletics Board for 24 years, being Chairman of it for seven, and was many times President of the Canadian Intercollegiate Athletic Union.

In 1937, Prof. Simpson and his wife motored to California and were entertained in royal fashion by the graduates who were delighted to be able to honour one who had so often helped and encouraged them in their student days. In all his endeavours he was sympathetically supported by his wife and as his home and family came first with him, he must have been particularly gratified by his daughter's brilliant record at McGill and his son's valuable contribution to the war effort.

Professor Simpson had a keen sense of humour and loved to tell jokes on himself. One of his favourites was that during the last war when he went up for his equitation test, he had to jump a hurdle. "I was not much of a rider" he said "and the horse knew it. We went at the hurdle; the horse stopped and I went over. The second time, I fell off and horse went over. I was getting ready to try it again when the O.C. came up and said 'as you and the horse have both been

(*Continued on Page 30*)

The Graduates' Society Bids You Godspeed

An epistle from the President

By
FRASER KEITH

YOU, who are leaving the halls of learning at this time, are going out into a sorry world which challenges you to make it better or worse. You are learned in the arts and the sciences, in law and commerce and medicine. Most of you are equipped to face the world with a profession, but have you acquired a love of learning? It is fair to answer that you have, and your usefulness in life is going to be in just proportion to the extent to which that acquirement is yours.

According to Huxley, "That man has a liberal education who has been so trained in youth that his body is the ready servant of his will, whose intellect is in smooth working order, whose mind is strong with the knowledge of the great and fundamental truths of nature and of the laws of her operation, who is full of life and fire, but whose passions are trained to come to heel by a vigorous will, the servant of a tender conscience, who has learned to love all beauty whether of nature or of art, to hate all violence, and respect others as himself."

Forty years separated your graduating world and mine. Two different worlds. Mine a peaceful world —the Edwardian period following the gay nineties and the close of the Victorian era—the golden age of Canada's prosperity, to continue almost to the first great war. Yours is a period where the best of mankind is fighting to save civilization. Never were bravery or strength of character more greatly needed.

You have taken your college course in difficult times, under trying conditions. Your fathers fought, and your elder brothers are fighting, for a priceless heritage, *Liberty*, the history of which is the history of limitation on the power of government.

You are, doubtless, going out into the world with an open mind, not saying with Pope, "For forms of government let fools contest;" but with the wisdom to know that there are groups in this country trying to impinge their fanatical, radical formulae and theories upon us at the present time,—a menace to our way of life. Some of these false doctrinaires you know. They are in our midst. They would impose upon you a bondage, the very antithesis of the freedom for which we are fighting.

Yours is the youth, the enthusiasm, the knowledge, and the capacity, to bring about a new order in this old world. We have before us a formidable problem transcending any yet faced by a previous generation in the world's history.

What a challenge!

What is your answer?

Are you going to throw down the gauntlet and show the world that you are thankful for the opportunity to demonstrate to your seniors and to those who may come after you that you are going to unlock the door and lighten up the path for the way of life to all future generations? Are you going to tune your lives to those ideals which stand for freedom, security, happiness? And are you going to help tear down the forces of greed, hate, and lust for power?

The answer, surely, is a resounding "Yes."

If I may give one word of advice, "let the desire to be useful be a dominating passion of your life." There is but one straight road to success, and that is merit. "The man who is successful" says Burke Cockran, "is the man who is useful. Capacity never lacks opportunity, it can not remain undiscovered because it is sought by too many anxious to use it."

We, who are your seniors and your elders, have faith that you will rise to the heights, meet the challenge unafraid, and be a guide and an inspiration to those who will follow after.

You are now entering that great fraternity of McGill graduates located everywhere, and in their name I welcome each and all to our fellowship.

May the taint of radicalism never soil you.

May your minds be strong and purposeful to meet the greatest emergency.

May your hearts be tuned to the call of humanity.

May health and strength be granted you sufficient for your most onerous tasks.

May you be so guided in your daily lives, that life's richest blessings be your portion.

And

May your loyalty to your *Alma Mater* be as great and as abiding as is your obligation to her.

Scarlet Key members holding back crowd (including Principal James and Dr. A. S. Lamb) at Athletics Festival

Major Sports Revival at McGill

By
ALLAN KNIGHT

WITH more spirit and greater enthusiasm than that shown for several years, the students of McGill have made this past season one of the best for some time in the realm of sport on the campus. Although the support of the teams wearing the Red and White in the major sport was not all it could have been, more time was spent on actual participation in athletics.

Realizing that all work and no play would do as much harm as the reverse, and feeling that a fit body helps bring about better marks, the attitude of the students, in general, was to go out and avail themselves of the opportunities presented for healthy recreation on and around the campus.

Starting off in the early fall the tennis courts were crowded with novice and veteran alike. A very successful tournament was held, and before the winners were declared, several exciting battles held the interest of the many onlookers.

The first McGill entry in league competition on the football field since 1939 gave its followers plenty to cheer about. Starting several weeks after the other entries, R.C.A.F., Navy, Army and Verdun had commenced their schedule, the team played four six-point games.

After winning and losing once, the Kerrmen faced the highly-touted Air Force aggregation in an important engagement. Not only did they hold the blue boys in check, but the Red team held the lead until five minutes before the end of the game, when a touchdown pass ended all hopes for a championship. However, their fine showing won them well-deserved praise from football fans the city over.

The team was bolstered by several players from the No. 2 Canadian Army University Course, living at Douglas Hall, and studying at the university.

During the season, an intramural football league was formed. This league gave ample opportunity to all enthusiasts of the gridiron game and was noted for the competent manner in which it was run.

In the fall and during the winter, the trackmen had their day, and although their number was few, their calibre was high. Several meets were run off with various service teams, and in each of these, McGill entries ranked high.

The hockey team was entered in the National Defence League along with teams from the Army,

ALLAN KNIGHT is Sports Editor of the *McGill Daily*.

"Pop" Kerr still coaches football team

Navy and Air Force. The team had been hard hit by graduations, but Lorne White, taking over the reins from Dr. Bobby Bell, who accepted the post as manager of the Army entry in the Q.S.H.L., did a good job with the many rookies. Lack of experience, however, was too great a handicap and the boys were unable to cope with their stronger rivals.

Successful intramural and interfaculty leagues were run off in hockey, with games being played at the Forum and at the MacTavish rink. Skating to the *tempo* of waltz and band music was an outdoor attraction to both the boys and girls, and during the evenings goodly numbers of students took advantage of the smooth ice surface right on the campus.

Basketball squads were entered in the Montreal Basketball League, both in the senior and intermediate divisions. The seniors turned in several fine games and had a successful season, making the playoffs, and losing out in the semi-finals to a more experienced Sir George Williams College quintet. The intermediate team had little luck and were just edged out of a playoff spot. A C.A.U.C. team from the campus was entered in the intermediate division, and although they showed a good deal of promise, lack of time to practise marred the season from a victory standpoint for these soldier-students. The cage setup was completed by an interfaculty league.

A novel idea sponsored and presented by the Students Athletics Council proved highly successful, attracting one of the largest turnouts of students in many years. Termed an Athletics Festival, it combined basketball, boxing, wrestling, fencing, judo and gymnastics, running the events one after another and two attractions concurrently.

For the evening, a team from Middlebury College, Vermont, was invited to play the McGill senior cagers. Teams were formed in the wrestling, boxing and fencing clubs and along with an exhibition by the gymnast troupe, the affair took on the air of a three-ringed circus. For the first time the Judo club put on a public display, and the antics of the members had the crowd in an uproar.

Entertainment by several of the students, and a dance completed the program for the evening. The general opinion of those attending was that such affairs should be repeated more often.

Tournaments were run off during the year in squash and swimming also. The swimming team held a telegraphic meet with the University of Toronto, and came out on top. This was no novelty for the team since they took top honours in nearly every meet they entered.

Some agitation has been started by the student body for the return of a form of competitive sports among the universities of eastern Canada. The idea was to have exhibition games between the college teams in the various sports.

Firm support was given the proposal by local students and by those of the University of Western Ontario. However, little has been done, since Queen's and the University of Toronto showed no inclination to back the attempt.

In conclusion, it may be said that the sports outlook on the McGill campus is improving, and that, when once again the scourge of war has been erased from the face of the earth, students may look forward to the friendly competition which has for so long been a part of the intercollegiate world and our way of life.

Dr. A. S. Lamb Honoured

Dr. A. S. Lamb, Director of the McGill School of Physical Education and an active member of the Quebec Association for Health, Physical Education, and Recreation, Inc., has been made the first life member of that organization.

Dr. Holtfreter Wins Guggenheim Fellowship

One of the Guggenheim Fellowships awarded to Canada this year went to Dr. Johannes F. K. Holtfreter, Rockefeller Foundation Fellow at McGill University and one of the world's leading experimental geneticists for investigations of the causal factors involved in the embryonic development of vertebrates. He is of German origin and was sent from England to an internment camp in Canada, being released upon the appeal of Canadian scholars who have the highest admiration for his work and esteem for him personally. For the past two years he has worked at McGill.

Undergraduate Committee of Graduates' Society Formed

By JAMES G. MacLEOD

On Founder's day, 1943, the undergraduates holding the principal executive posts on the campus were made members of the McGill Graduates' Society. The move was a novel one, and it was motivated by the desire of the graduates to establish a closer relationship between themselves, and the members of the undergraduate body.

A committee consisting of Mr. Fraser Keith, president of the Graduates' Society, and of all the students who had been elected to the graduate body, was formed. Their job was to establish some common bond between the two groups, and ultimately, to be of some benefit to the university on the basis of this cooperation. The problem was not an easy one for there was no precedent upon which to base their actions.

The problem was attacked from two sides. It was decided that in order for one group to keep in contact with the activities of the other, use would be made of the two publications, The McGill News and the *McGill Daily*. A form of liaison was established between them, and the present issue of the News, as well as some articles on the Graduates' Society published in the *Daily* are the result.

Graduating Committee members were appointed to contact their classes, in the hope that they could encourage their fellow students to maintain their interest in the University, and in its activities after graduation. Their efforts met with considerable success, in spite of the uncertainty of the graduating students as to their future positions and addresses.

While these activities were progressing, the Montreal branch of the Graduates' Society became interested in the newly-formed McGill Film Society, which was being subsidized by the Students' Executive Council. The Society was showing movies free of charge to the student body, and the graduates were so enthused with the variety and scope of these films that they expressed the desire to participate in the Society. A joint executive was set up, further strengthening the bond between the two groups.

Feeling that the best way to bring about a meeting of the students and graduates was a banquet, the Undergraduate Committee organized the first Grad-Undergrad banquet, which was attended by about fifty graduates and an equal number of undergraduates. The event was a great success. Alex. Stalker, president of the Students' Society and chairman of the Undergraduate Committee, presided and led the sing-song of McGill favourites.

In addressing the gathering, Mr. Keith enumerated the activities and future aims of the Committee, and thanked the undergraduates for their whole-hearted cooperation. He pointed out also that the Committee had recommended the raising of money for scholarships for returned men and women who had seen active service, and expressed the hope that this would be favourably considered by the Graduates' Society; particularly in view of the fact that the Committee had been instrumental in increasing the number of graduating students who had become members of the Society.

In closing, he stated that "This in brief is a great contribution and stems to even greater achievement in the future by this and similar committees which are bound to have a very beneficial effect on the welfare of our *Alma Mater*."

A list of the graduates and students present at the banquet follows. The students were picked by their respective faculties on the basis of the work they had done for the faculty Undergraduate Society during the session, and the invitation was in the nature of a mark of appreciation for these services.

Stephen Leacock

By
JOHN CULLITON

"WHEN I was lecturing at McGill on winter afternoons, the gathering of the twilight would give me warning that my time was up, and that I must say 'Good night, gentlemen.' And now I can see that the sky has darkened and the light has faded from the windows, and I know the time has come when I must say, 'Good night, gentlemen—forever'."

Close the curtain.

Thus one likes to think of Stephen Leacock bidding his final farewell. And why not? They are his words.

Professor Stephen Leacock, Political Scientist, Economist, Historian, Scholar, Humourist, Writer—and Humanitarian, has died. The loss is not only to McGill, to Canada, to the Empire, but to the whole world. He achieved what few Canadians have achieved during their life time—world recognition. He is mourned wherever there are men. That is as it should be. However, the important fact is not that he has died but that he has lived.

Catholic in his tastes, intense in his interests, Stephen Leacock was a prodigious worker. His apparently endless leisure time, which he shared so generously and so genially, was purchased at a price.

Rising at 5 or 5.30 in the morning, he would seat himself at his desk, a little tea and bread at his elbow, and begin to write. A walk at 7, breakfast, and then back to his work until noon. When writing, Professor Leacock used neither secretary nor shorthand. As he put it, he could think about as fast as he could write. A new view or a new approach and a completed article would go in the waste basket. Just good was not enough.

After lecturing at the University from 12 to 1 and again in the afternoon from 2 to 4, he would walk down to the University Club, swinging his stick, humming a tune, returning greetings with either a lift of his stick or the raising of his hat. I need not describe it, you have seen him.

In the late afternoon there would be billiards, then home to his dinner and library. He was a grand guest and a grander host, and he loved an evening with the "boys," most of whom were over fifty. His generosity, his kindliness, and his humour made those evenings unforgettable.

He was a born *raconteur;* his face would light up; his eyes shine, and that infectious chuckle bubbling up from inside would overflow to all around him. "Enjoy this with me," it seemed to say. A favourite story for the "boys" was against himself. This may have appeared in print before. No matter. It is worth telling again.

When he got his first Ph.D. (the real one) he was quite proud of it and decided to take it to Europe for a trip. The only way to take a Ph.D. for a trip was to put it down on the ship's passenger list—Doctor Leacock.

"I was just settling down in my cabin," he would say, "when the steward rapped, opened the door, and asked, "Dr. Leacock?, the Captain's compliments, doctor, will you please come and have a look at the second stewardess' knee."

"I was off like a shot. But it was no use. Another fellow got there ahead of me. He was a Doctor of Divinity."

Professor Leacock was not a legend on the campus. He was the campus. Never too hurried, never too busy to give his time, his knowledge, and his attention, to any student. Yes, and to use his influence. His lectures were crowded. Adam Smith, John Stuart Mill, and Malthus would come to life. He, before Winston Churchill, saved the British Empire every Monday, Wednesday, and Friday, at 3 o'clock, in room 20.

His approach to a subject was historical. This is well illustrated by what was advertised as "A series of six lectures on the problem of deepening the St. Lawrence Waterway, by Professor Stephen Leacock." After the fourth lecture, a member of the class was approached and asked, "How far have you got in deepening the St. Lawrence?" "The first white man arrived yesterday," he replied.

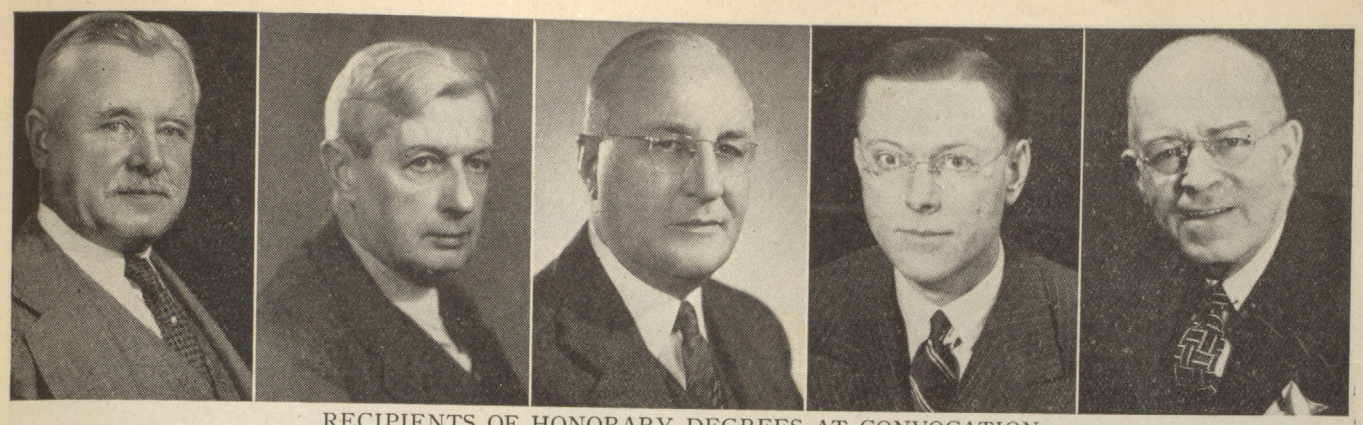

His belief in the British Empire has been mentioned before. His belief in the destiny of Canada was not the less for this. It can be understood why on retiring from McGill his decision was, "Fetch me my slippers . . . I'll rock it out to sleep right here." England would have been too cramped. His vision was too boundless, his imagination too unharnessed, his prophesies too grand to be confined within the "tight little island."

Much has been said and written of Dr. Leacock's attachment to Orillia and his home at Old Brewery Bay. All this is true only if you think of it as a lookout to the unending horizons stretching from it.

In later years the North Country, with its immensity, with its endlessness, seized and held him. For hours he would read about it, talk about it, and explore

---

JOHN CULLITON, B.A. (Sask.), M.A. Assistant Professor of Economics at McGill University, now serving as a Flying Officer with the Royal Canadian Air Force, was for many years closely associated with Dr. Leacock, both as a colleague and a friend.

RECIPIENTS OF HONORARY DEGREES AT CONVOCATION

Left to right: Hon. Thibaudeau Rinfret, B.C.L. '00, Chief Justice of the Supreme Court of Canada; Professor Edouard Montpetit, secretary-general of the University of Montreal, and director of its school of social, economic, and political science; Dr. Evarts Ambrose Graham, professor of surgery at the Washington University School of Medicine, co-editor of Archives of Surgery and Annals of Surgery, and editor of the Journal of Thoracic Surgery; Graham Ford Towers, B.A.'13, Governor of the Bank of Canada, and chairman of the National War Finance Committee; and Kenneth Mackenzie Cameron, B.Sc. '02, chief engineer, Dominion Department of Public Works, and past president of the Engineering Institute of Canada.

Chief Justice Rinfret, Professor Montpetit, and Graham F. Towers will be awarded honorary LL.D. degrees, while the honorary D.Sc. degree will be given to Dr. Graham and Kenneth M. Cameron.

it. Books, maps, more books, more maps, strewn around like the country itself. Then, as the evening ended, he would say, with something that sounded like a sigh, "A country's wealth is what you walk on." He would have liked to walk it.

In "My Discovery of the West" he followed in the footsteps of "My Remarkable Uncle." A trying trip, but at the end of it he was able to say in answer to how he liked Victoria, "If I had known about this place before, I would have been born here."

Mountains, hills, forests, prairies, streams, rivers, trees, and grass, he loved them all. And weather. Fierce or soft, it made no difference. But it had to be weather. Changeable. Cloudless skies, waving palms, and an always wafting breeze were not for him. No. "I'll sleep it out here."

Professor Leacock liked his fellow men. Because a man was rich, that was nothing against him. Perhaps he could not help it. A banker need not be damned because he was a banker. He used to say "Some of my best friends are bankers" and then chuckle. An industrialist was all right too—up to a point. He used to say he could not dislike a man because he was a Liberal. That would be too much trouble: there were too many of them. "After all, there are only two Conservatives left, and one has moved to England."

He hated greed. He hated cruelty. He had a fear of power. It might be misused. Of the strong he was suspicious, of the weak a supporter. He could have been a tremendous hater, but he wasn't. The blaze of his own kindliness glared out for him any evil in others. His likes and loyalties were personal. His antagonisms directed against a black goblin that floated around somewhere making trouble.

Sometimes there were doubts. He used to say "If all men were decent and reasonable there would be no need for all the trouble in this world."

Stephen Leacock had described himself.

Dr. John B. Porter Dies

Dr. John Bonsall Porter, senior Emeritus Professor of Mining Engineering at McGill University, died suddenly at his residence in Montreal, on April 17, at the age of 82, thus bringing to a close a long and distinguished career as scientist, engineer and teacher. Dr. Porter has been identified with the University for almost half a century.

He received his degree in mining engineering from Columbia University in 1882 and his Ph.D. degree in 1884. He also held an honorary D.Sc. from the University of Good Hope, Union of South Africa.

When Dr. Porter retired from active teaching at McGill in 1927, his name was perpetuated by the establishment of the John Bonsall Porter scholarship in the Faculty of Engineering. He was always interested in young people and his home was a centre of hospitality to his students, where he was always ready to counsel and assist. Many of his former students are now leaders in the mining profession throughout the world.

He was an expert fisherman and amateur photographer and had a notable collection of recordings of the finest instrumental music though he was not himself a musician.

In 1921 he was honoured by the Institute of Civil Engineers in London, England, by being made chairman of its Canadian Advisory Committee, also serving as a member of its Council.

Other positions held by Dr. Porter included that of corresponding member of the Council of the Institute of Mining and Metallurgy of Great Britain; past president of the mining section, Society of Civil Engineers (now the Engineering Institute of Canada); one of the founders and past president of the Sigma XI Society of McGill; and one of the founders of the Canadian Engineering Standards Association and former vice-president of that organization.

Dr. Porter was the author of a number of publications dealing particularly with coal.

McGill University War Records—X

By
R. C. FETHERSTONHAUGH

WITH a sharp increase in immediate prospect as a result of the enlistments which will follow the ending of the academic session in May, the total of cards in McGill University War Records on April 20, 1944, had reached 5,399. Of these, 4,538 represented McGill men and women on Active Service, including 168 whose names appear on the roll of killed and missing, 33 who are known to be prisoners of war, and 422 who are serving in the United States Forces. As usual, the latest news we have received of graduates and past students on Active Service is presented in the *On His Majesty's Service* section of this issue, with a special supplementary list, noting the appointments of 400 undergraduates. Eleven hundred undergraduates of the wartime years are known to be on Active Service at the present time; the four hundred listed are those of whom authentic news has been received since January 1.

In preparation for our Autumn issue, to appear as usual in September, we renew our invitation to McGill men and women on Active Service, or their friends or next of kin, to send us news appropriate for these or for our *On His Majesty's Service* columns. Photographs for the University's wartime record are also invited. Please address letters or photos to

or send them in care of the Registrar's Office, McGill University. At either address, photographs or correspondence will be warmly welcomed.

HARRY WICKWIRE FOSTER
APPLIED SCIENCE, 1921-22

As a mark of appreciation of his co-operation with American forces, Brigadier H. W. Foster, Canadian Army, who commanded the Canadian contingent in the landing upon Kiska, Aleutian Islands, and in the subsequent garrisoning of the island until the Canadian troops were withdrawn, has been awarded the United States Legion of Merit. Announcement of the award by National Defence Headquarters, Ottawa, was made on April 13, together with a statement that the United States Government had cited Brigadier Foster as an officer whose "leadership and unselfish devotion to the success of the project were outstanding and set a high mark for unreserved co-operation between two Allied powers." Brigadier Foster, son of the late Major-General G. L. Foster, Director General of Medical Services for the Canadian Forces Overseas in the Great War, is a graduate of the Royal Military College of Canada and has served in the Canadian Permanent Force since 1924. On February 8, National Defence Headquarters announced that, following the disbandment of the Kiska contingent, he had returned to duty in a senior appointment overseas.

HERMAN JOSEPH SEMAN
LL.B. '24

By direction of the President of the United States, under the provisions of the Act of Congress approved July 20, 1942, the Legion of Merit was awarded to Colonel H. J. Seman on October 18, 1943, by the Headquarters of the United States Army Force in the Middle East. Now serving as Assistant Judge Advocate General of the U.S. Army Forces in China-Burma-India, Colonel Seman was decorated "for exceptionally meritorious service as Staff Judge Advocate, U.S. Army Forces in the Middle East, from January, 1943, to October, 1943." His accomplishments in this post are stated in the citation of the award to have been "of the highest order" and to have involved negotiations with several countries, through which criminal jurisdiction over men of the American Forces was waived by the countries concerned and vested in the U.S. Army. In addition, as President of the Foreign Claims Commission in the American theater of operations in the Middle East, Colonel Seman was instrumental, through prompt settlement of the claims brought before him, in maintaining friendly relations between the U.S. Forces and the countries in which the claims arose.

CYRIL HOULTON NEROUTSOS, D.S.O.
ENG. 1922-'24

For gallantry under heavy fire and for prompt and effective leadership during a critical phase of the battle at San Leonardo, Italy, on December 10, 1943, Lieut.-Col. C. H. Neroutsos, of a Canadian armoured regiment, received the Distinguished Service Order, according to the announcement by National Defence Headquarters, Ottawa, March 6, 1944. Amplifying the announcement, Headquarters described the skilled disposition Lieut.-Col. Neroutsos made of his forces on the night of December 9 and how these enabled him on the morning of the 10th, when advised that a part of the operations had failed, to lauch his "A" Squadron to the attack in a matter of minutes, with infantry co-operating and adequate artillery support. The attack thus launched secured the San Leonardo bridgehead and stabilized a dangerous situation. Under "most murderous mortar and artillery fire," Lieut.-Col. Neroutsos then established his headquarters in the town and directed the tank activity in the sector. His work "unquestionably had a great influence on the further development of the divisional plan."

EUGENE SEELEY COLER
M.D. '22

A veteran of the Great War, in which he won the Distinguished Flying Cross while serving as an officer of the Royal Flying Corps, Lieut.-Col. E. S. Coler, Medical Corps, U.S. Army Air Forces, was awarded the United States Legion of Merit, October 27, 1943, by command of General Eisenhower. As Staff Surgeon for the U.S. 8th Army Air Force in North Africa from November, 1942, to July, 1943, Lieut.-Col. Coler introduced a "Medical Operational Status Report" later to be known as the "Care of Fliers Report," which was unique in the North African theater and was "of inestimable value in determining future policies for the Air Forces." Data from his "pioneer work in statistical control," the citation added, "made possible markedly increased operational efficiency in the command in which he served," and "his many practical suggestions in problems peculiar to flying personnel were an important factor in raising the health and morale of combat crews throughout the entire air arm." After his service in North Africa, Lieut.-Col. Coler returned for a time to the United States, but is now serving again with the Headquarters of a U.S. Army Air Force overseas.

FAY BROUGHTON BEGOR
M.D. '41

"For extraordinary heroism and devotion to duty as Medical Officer aboard an Infantry Landing Craft when that vessel was disabled by a near miss from a Japanese bomb on September 4, 1943," and for "his ministration to the wounded in the face of repeated Japanese bombing and strafing attacks until he was fatally wounded by enemy fire," Lieut. (J. G.) F. B. Begor, Medical Corps, U.S. Naval Reserve, has been posthumously awarded the U.S. Navy Cross, by order of the President of the United States and in accordance with a citation issued over the signature of the U.S. Secretary of the Navy, Colonel the Hon. Frank Knox. Describing the circumstances of the action in which Lieut. Begor's life was given, at Lae, in New Guinea, Rear Admiral D. E. Barbey, U.S. Navy, noted that he bore himself throughout the action "without regard to his personal safety" and that he carried on with courage and professional skill until his thighs were broken by a bomb dropped from an enemy plane. "He was an officer of high personal character and fine professional reputation; a splendid shipmate, whose loss is deeply felt by us all," the Admiral wrote. Recently, we have learned that a Destroyer Escort Vessel of the U.S. Navy is to be named in Lieut. Begor's honour. Should this plan be given effect, McGill will share in the pride of the fitting tribute to a graduate whose life was nobly given.

MORTIMER PATRICK BOGERT, D.S.O.
ARTS 1931-'32

A graduate of the Royal Military College of Canada and a past student of McGill, Lieut.-Col. M. P. Bogert was awarded the Distinguished Service Order, March 6, 1944, for his leadership of a unit from the Maritime Provinces during heavy fighting near Jelsi, Italy, on October 9, 1943. Having served previously with The Royal Canadian Regiment and with the British Army in Egypt and Libya, Lieut.-Col. Bogert directed his unit during the crossing of the river south of Jelsi with courage and skill and later, by a bold flanking movement, dislodged the Germans from a commanding position in the nearby hills. In the words of the official citation, "his leadership and skill, his determination and courage, were responsible for the complete success of an operation which enabled flanking battalions to maintain a rapid advance." Some two months after the engagement in which he won the D.S.O., Lieut.-Col. Bogert was wounded in action in Italy. He has since made a satisfactory recovery, however, and, having been promoted meanwhile to Colonel, is again serving with a formation of the Canadian Army Overseas. His two brothers are also in the Army, Major Herbert Bogert, serving in Newfoundland, and John R. Bogert, Royal Canadian Army Medical Corps, in his final year in Medicine at McGill.

DAVID HOPE-SIMPSON, D.F.C.
B.Sc. '40, M.Sc. '41

Though few particulars have yet reached us, we have learned with pleasure of the award of the Distinguished Flying Cross to Pilot Officer Davie Hope-Simpson, Royal Canadian Air Force, for "high skill, fortitude, and devotion to duty," while serving overseas. According to our records, Pilot Officer Simpson trained for flying service in Canada and left for overseas duty more than two years ago. Since then no detailed report of his services had come to hand, until, on March 11, 1944, we were advised by a correspondent of the honour he had won. At McGill, he is remembered as a student from England, who, having taken his Bachelor's degree in Science, proceeded to his M.Sc. in geology, the degree being conferred *in absentia* at the Fall Convocation, October 6, 1941. Further particulars of his overseas service are awaited with lively interest.

Unsatisfactory Students Leave

Thirty-nine students have been asked to withdraw from McGill University as a result of doing unsatisfactory work during the first term, in accordance with the agreement made between the Dominion government and Canadian universities last August. The names of these students will be forwarded to the divisional registrar, National Selective Service.

Ex-Soldiers Take McGill Courses

Among the students enrolled at McGill this year were thirteen who had been discharged from the armed services and who were enabled to continue, and, in some cases, to begin university studies with free tuition provided by the government. Single students also receive a maintenance grant of $10.20 a week, and married ones $14.40 per week. Where progress is satisfactory the assistance may be continued for as many months as the candidate served in the forces, and where special scholarship is demonstrated, the student may be assisted to a post-graduate degree.

Miss Elizabeth Hall, Librarian, Dies

Miss Elizabeth (Bessie) Hall, for 35 years a member of the staff of the Redpath Library, died in Montreal, on April 21. She graduated from McGill in 1891 and joined the staff of the Library in 1901 and was in charge of the travelling libraries until her retirement in 1936.

William Gentleman

By
T. H. MATTHEWS

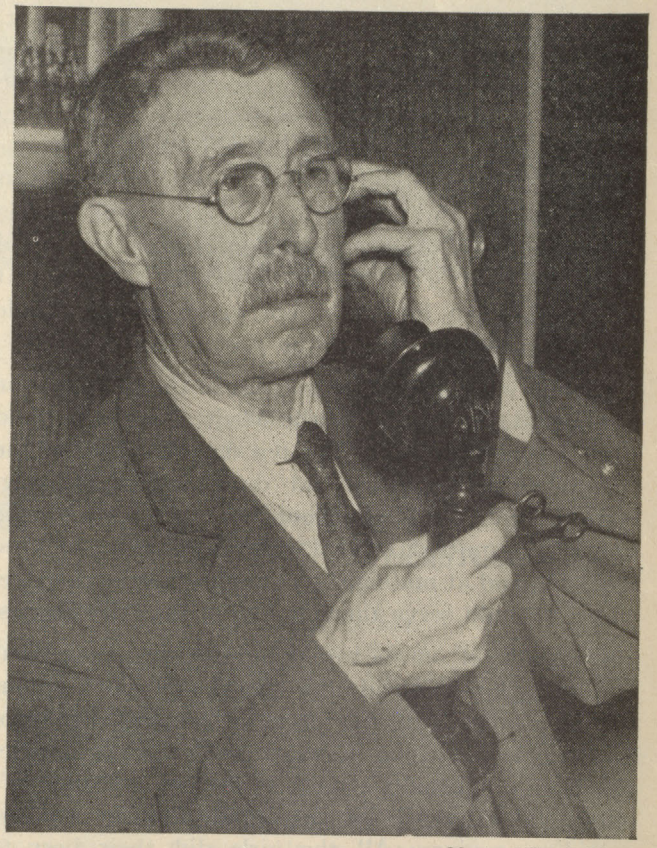

WILLIAM GENTLEMAN'S greatest happiness has been his job and an occasional grumble about it. Principals, deans, professors, and students came and went, but "Bill," the pivot of the Arts Building, one thought and hoped was there for ever. Now even he must retire, a victim of his own zeal, and his building must try to get along without him. Who is there fit to wear his uniform?

Bill is fiercely proud of his building, his students, and his professors; and his loyalty has matched his pride. Every student who has been in the Faculty of Arts and Science during the past twenty-four years treasures pleasant and grateful memories of the man by the door who gave them such excellent advice, who was never too tired or too busy to help them, and who never forgot them. They will remember, too, the big heart and many kindnesses of Mrs. Gentleman who mothered the sick, helped to make so many theatrical costumes, and could always produce a cup of tea when it would do most good. The staff have even more cause for gratitude. For them Gentleman performed innumerable services, little and big, with almost supernatural reliability. A colleague or a student might forget, but if Bill said he'd do something, it was as good as done. The longevity of professors is probably a by-product of men like Bill.

At his retirement staff and students alike will delight to tell stories of him. They will remember his racing up those high stairs two steps at a time, his shepherding of the freshmen (a benevolent despotism), his suspicion of all changes, his pride in Moyse Hall, and his gentle and effective control over the stage hands and the cast of the Red and White Revue. I shall remember him in many circumstances but perhaps especially in two.

It is eleven o'clock in the morning during the session. The janitor's office is jammed and seething. Professor A is there with some books he wants Bill to look after for an hour; Professor B wants Bill to tell Professor C that the hour of a meeting has been changed; Professor D wants yellow chalk; seven undergraduates want information, advice, keys, lost property, books, tickets, safety-pins; somebody else wants Bill on the telephone. And they all get what they want.

My second memory is of a fine June evening at half-past five. There are no students in the building and Bill appears on the porch with a flat wooden seat which he places by a western pillar—always the same

Montreal Gazette Photo

BILL GENTLEMAN

pillar—and sits down for a quiet smoke, a look at the Campus, and a bit of fun with his spaniel puppy (a gift from a graduating class). Perhaps Mrs. Gentleman may come up from their apartment and sit with him and their two young English evacuees may make it a real family party. A word with a passing friend about the war news, or fishing, or old times, and then, his pipe finished, away to supper.

Bill Gentleman will, I trust, be spared from now on the rush and bustle of that little office of his, but the spot by the pillar will always be there and I hope that for many years Bill will be there too.

T. H. MATTHEWS, M.A. (Oxon.), is Registrar of McGill University and a member of the Editorial Board of the *McGill News*.

McGill Receives Many Gifts

A number of gifts, grants, and bequests of a total value of more than $8000 have been made to McGill University recently according to an announcement following a meeting of the Board of Governors. The list included an additional donation of $4500 for hormone research by Dr. Hans Selye from the Des Bergers-Bismol Laboratories.

J. C. Simpson

(*Continued from Page 19*)

over, how about calling it a day?' and that's how I got my certificate."

I wish I had jotted things down as he talked but, unfortunately I didn't and so have only fleeting memories of some incidents, as, for instance when he was called in by a foreign government to discover why the sardine industry had failed in a certain district; or about the zoological expedition off the Gaspe Coast in a small boat and a rough sea; or the time he was on a sketching trip in some foreign country and asked for a hot bath, when a huge hogshead was brought into the kitchen, filled with hot water, and the whole family gathered to watch the proceedings!

Former students will recall that in the old days the Medical Ball was held in the Medical Building, and what a time that was! For ten days beforehand the Committee of Students would "decorate" the Building, being fortified each afternoon by tea served by the Ladies' Committee, headed by Mrs. Martin and Mrs. Simpson, and at midnight by currant buns and coffee, which I would serve them in one of the laboratories.

Our suite of offices would have to be cleared out and turned into powdering rooms and cloak rooms for the ladies, and for days afterwards Professor Simpson would come in to me with various articles one does not usually expect to find in a Professor's office. Through all this time of turmoil, he was the presiding genius. All the girls did their best to persuade him to dance, but in vain. He loved to sit on the side-lines, however, and have the boys bring up their partners to be introduced.

He was extraordinarily skilful with his hands and had a wonderful eye for colour and design. Painting was one of his hobbies and on his last holiday in Florida, just after retiring from McGill, he made great strides in portrait work, which he enjoyed more than landscape painting, his former mode of expression. He was also a skilled cabinet maker and an inlaid desk that he made for his daughter was perfect in beauty of design and exquisite workmanship. It must have been gratifying in the years after his retirement to be able to devote his leisure hours to these artistic hobbies, and when he went to live in Ste. Anne de Bellevue in 1941, that is what everyone expected he would do. But that kind of life didn't satisfy him and he returned to the Army as Secretary of the Divisional Advisory Committee of the Canadian Medical Procurement and Assignment Board with the rank of Captain, and many's the day I would answer the telephone to hear that familiar voice say "It's the pest speaking, do you think you could look up something for me?" When the retirement age was enforced in 1943 he was retired from the Army but kept on with the same work in an honorary capacity until his final illness in February.

When he retired from the University, he was the recipient of many gifts; he was elected the third emeritus member of the Graduates' Society, February 7, 1943; dinners were given in his honour, and complimentary speeches were made; but with his simplicity of mind and modesty of disposition, he received these tributes with astonishment, and it was hard to make him realize that everyone really meant it when they sang "For he's a jolly good fellow."

It is difficult to believe that he has gone and I feel sure that his many friends among the young graduates, now serving their country in the four corners of the earth, will join with me in saying a reluctant farewell to one whose clarity of thought and breadth of vision added to the prestige of McGill; a man so well-loved for his never failing courtesy, his sympathy, his gentleness of disposition, and all the qualities that made him an example to follow and a memory to cherish.

The Late Captain Percival Molson, M.C.

(*Continued from Page 14*)

to the referee that the puck had gone in off his arm and the goal was disallowed.

After leaving McGill, he played with the Victoria Hockey Club, the most famous and successful amateur team in Canada over a period of years. Organized in 1873, this club carried on as an amateur organization until recent times. The influence of men like Percival Molson helped maintain a tradition of two generations.

Such then is the record of one whose name will live in the annals of McGill. His successes never went to his head and he ever retained an innate modesty. The qualities which made him beloved by all his classmates, led to his being chosen president of his class in his senior year, the highest honour in the gift of the student body of those days.

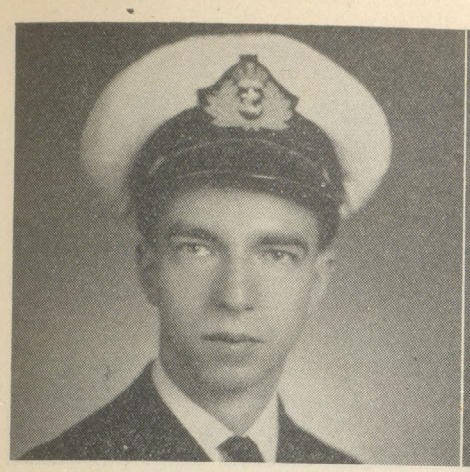

On the wooden cross which first marked his grave in France and which now rests in the family vault, someone scrawled the simple tribute—"a gentleman."

His loss is a grievous one—those who knew him agree that there was no post of honour that he could not have graced.

It is some consolation that his name lives forever in the stadium and that the present collection will be an inspiration to succeeding generations and a constant reminder of one who was "a verray parfit gentil knight."

All McGill Students now X-Rayed

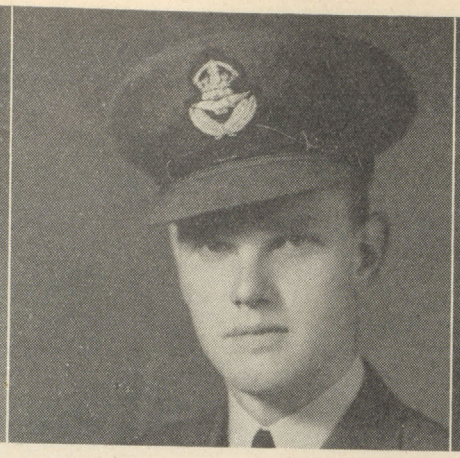

This year for the first time all McGill students received chest X-rays. For some years all new students have been X-rayed, but this year all students on the campus as well as lecturers and demonstrators were tested.

On His Majesty's Service—XIX

Edited by
R. C. FETHERSTONHAUGH

COVERING two months instead of the usual three, owing to the publication of this issue in May instead of June, this nineteenth installment of *On His Majesty's Service* presents in the form with which our readers are now familiar, the latest news of McGill graduates and past students on Active Service. We again thank many friends for help in gathering the particulars of service given below and invite further contributions of this nature. The correction of errors noted is also requested. Please address new information or corrections to

THE McGILL NEWS,
3466 University Street,
MONTREAL

or phone to the Graduates' Society, MA. 2664.

We remind our readers that general dates, such as "March, 1944," when added to the items below, indicate only when the news given reached us, or when it was known to be valid. We have found that this is of great help in giving the information in a clear perspective. As usual, we have added a supplementary list of items at the end of this section, to permit the inclusion of news received too late for presentation in our regular columns. A special supplementary section in this issue gives recent news of some four hundred undergraduates. All lists, regular and supplementary, are written in a manner conforming with the security regulations of the Press Censors for Canada.

Casualties

WE deeply regret to record the following casualties, reported in the period, February 25 to April 25, 1944.

Killed in Action

KINGSTON, LIEUT. PETER ROOKE (B.Eng., '37), Royal Horse Artillery, formerly of the South African Artillery, Killed in Action in Italy, February 16, 1944. Lieut. Kingston, who, previous to his death, had served in South Africa and Syria, was the only son of the late Charles Burrard Kingston (B.A., '87; B.Sc., '92; LL.D., '30), and of Mrs. Kingston, Forest Row, Sussex, England.

Killed in Air Operations

READ, FLYING OFFICER HENRY CALVIN CHAMBERS (Sci., 1938-'42), Royal Canadian Air Force, attached Royal Air Force, Killed near Foggia, Italy, by the crash of his bomber plane when returning from air operations over Bulgaria, March 16, 1944. Flying Officer Read was the elder son of Mr. and Mrs. G. C. Read, 130 Wolseley Avenue, Montreal West, P.Q. He was married, January 15, 1944, to Miss Mabel Smith Malcolmson, Grangemouth, Scotland.

Killed in Flying Accident

SCHOFIELD, FLIGHT LIEUT. TOM. (Phys.Ed., '37), Royal Canadian Air Force, Killed in a Flying Accident near Trenton, Ontario, February 17, 1944. Flight Lieut. Schofield was one of the crew of a plane which failed to return from a night flight during which a heavy snowstorm was encountered. The wrecked plane and the bodies of the crew were found in April. Flight Lieut. Schofield was buried with Air Force honours in Montreal, April 25, 1944. He was a son of the late Arthur Schofield and of Mrs. Schofield, 1649 Graham Boulevard, Town of Mount Royal, P.Q. A daughter was born to his wife, the former Jean Caley, in Orillia, Ontario, April 10, 1944.

Missing, Believed Killed

KERR, WARRANT OFFICER LOUIS LYNDON (B.Sc. [Agr.] '41), Royal Canadian Air Force, Missing after a Bombing Raid on Hanover, Germany, September 22/23, 1943, now listed as "Missing, Believed Killed." German authorities have reported to the International Red Cross that he lost his life in the operations mentioned, September 23, 1943. His mother is listed as his next of kin.

TIMMINS, FLYING OFFICER WILBERT HARRY (Eng., 1937-'40), Royal Canadian Air Force, previously reported "Missing after Air Operations Overseas," now reported "Missing, Believed Killed," German authorities having notified the International Red Cross that he was shot down and killed during air operations over Brunswick, Germany, January 15, 1944. Flying Officer Timmins was a son of Mr. and Mrs. H. B. Timmins, 6874 Sherbrooke Street, West, Montreal.

WRIGHT, ELECTRICAL SUB-LEUT. GORDON WILLIAM (B.Eng., '43), Royal Canadian Naval Volunteer Reserve, attached Royal Navy, "Missing, Presumed Killed, as a Result of Enemy Action," March 1, 1944. Electrical Sub-Lieut. Wright was the only son of Mr. and Mrs. Percy W. Wright, 31 Brock Avenue, South, Montreal West, P.Q.

Died on Active Service

BISSETT, LIEUT.-COMMANDER JOHN EDWIN (B.A., '11; B.Sc.,'14), Royal Canadian Naval Volunteer Reserve, Naval Service Headquarters, died at the Naval Hospital, Ottawa, after a brief illness, March 18, 1944. The funeral was held in Montreal, March 21, 1944. Lieut.-Commander Bissett, who had served in the Navy in the Great War, was a son of the late E. H. Bissett and of Mrs. Bissett Winnipeg, Manitoba.

LYMAN, FLIGHT LIEUT. CHARLES PHILIP (B.Eng., '33), Royal Canadian Air Force, suddenly, of a heart attack following a minor operation, at the Air Force Hospital, Rockcliffe, Ontario, March 9, 1944. Flight Lieut. Lyman was a son of the late C.P. Lyman and of Mrs. Lyman, 4155 Côte des Neiges Road, Montreal, and is survived also by his wife, the former Edith Du Perre, and by two children, living at 5771 Trans-Island Avenue, Montreal. The funeral was held in Montreal, March 11, 1944.

ROSS, LIEUT. ALEXANDER BENTICK (Agr., 1940-'41), Nova Scotia and Prince Edward Island Regiment, died on Active Service Overseas. So reported in the Army Casualty List, March 13, 1944. Lieut. Ross was a son of Thomas Etheridge Ross, North East Margaree, Nova Scotia.

Presumed Dead

PASCOE, FLYING OFFICER PHILIP JOCELYN (Diploma in Agriculture, '31), Royal Canadian Air Force, Missing after a Bombing Raid on Cologne, Germany, June 28, 1943, now listed "For Official Purposes Presumed Dead." German authorities have reported to the International Red Cross that he lost his life in the raid mentioned, June 29, 1943. His wife is listed as his next of kin.

Missing

BLAKENEY, FLYING OFFICER LESTER FERGUSON (Arts, 1940-'41), Royal Canadian Air Force, Missing in Air Operations over Europe, February 25/26, 1944. Flying Officer Blakeney is a son of Mr. and Mrs. Leser H. D. Blakeney, 20 Spadina Avenue, Ottawa, Ontario.

HOWARD, WARRANT OFFICER GEORGE BEVERLY (Agriculture, 1939-'40), Royal Canadian Air Force, Missing after Air Operations over Europe, April 13, 1944. So reported in press notices, April 17, 1944. Warrant Officer Howard is a son of G. A. Howard and of the late Mrs. Howard, Shawville, P.Q.

RODGERS, SERGT. WILLIAM KENNETH (Com., 1941-'43), Royal Canadian Air Force, Missing in Air Operations Overseas—R.C.A.F. Casualty List, March 7, 1944. Sergt. Rodgers is a son of Mr. and Mrs. Kenneth A. Rodgers, 5600 Bradford Place, Montreal.

STERNS, FLIGHT LIEUT. WILLIAM MEREDITH, D.F.C. (B.Sc.,'39), Royal Canadian Air Force, "Missing after Air Operations Overseas." So reported in the R.C.A.F. Casualty List, March 24, 1944. Flight Lieut. Sterns is the only son of Mr. and Mrs. Frank E. Sterns, 63 Cartier Street, Ottawa, Ontario.

Wounded

HOWARD, MAJOR ROBERT PALMER (B.A., '32; M.D., '37), Royal Canadian Army Medical Corps, Central Mediterranean Force, reported "Wounded," Can. Army Casualty List, April 21, 1944.

QUAYLE, LIEUT. JAMES THOMAS BOULTON (Sci., 1941-'42), Quebec Regiment, Can. Army Overseas, Central Mediterranean Force, reported "Wounded, Remaining at Duty," Army Casualty List, November 22, 1943, reported again as "Wounded," Army Casualty List, March 6, 1944.

Honours and Awards

THE following honours and awards were reported in the period, February 25 to April 25, 1944. Further reference to a number of these awards appears in the McGILL UNIVERSITY WAR RECORDS Section of this issue.

Distinguished Service Order

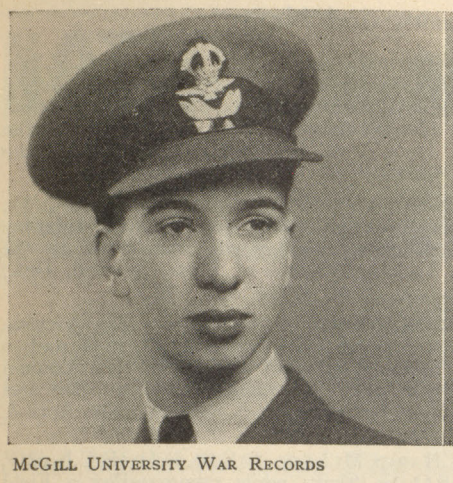

BOGERT, LIEUT.-COL. MORTIMER PATRICK (Arts, 1931-'32), March 6, 1944, for gallant service while in command of an infantry battalion from the Maritime Provinces during the advance of his unit to Gildone, Italy, October 9, 1943. He was subsequently wounded in action in Italy, December 12, 1943.

NEROUTSOS, LIEUT.-COL. CYRIL HOULTON (Eng., 1922-'24), Can. Armoured Corps, March 6, 1944, for skill and determination in the leadership of his regiment in the seizure of the San Leonardo bridgehead, Italy, December 9/10, 1943.

United States Legion of Merit

COLER, LIEUT.-COL. EUGENE SEELEY, D.F.C. (M.D., '22), Medical Corps, United States Army Air Corps, by command of General Eisenhower, "for exceptionally meritorious conduct in the performance of outstanding services from November, 1942, to July, 1943, as Staff Surgeon for the *** Air Force." Award dated, October 27, 1943.

FOSTER, BRIGADIER HARRY WICKWIRE (App. Sci., 1921-'22), Canadian Army, for his co-operation with U.S. Forces in the

occupation of Kiska, Aleutian Islands, in 1943. Award by the United States Government announced by Canadian National Defence Headquarters, April 13, 1944.

Seman, Colonel Herman Joseph (LL.B., '24), now Assistant Judge Advocate General (India), United States Army Forces in China-Burma-India, for services in the Judge Advocate General's Department in the Middle East in 1943.

U.S. Navy Cross (Posthumous)

Begor, Lieut. (Junior Grade) Fay Broughton (M.D., '41), Medical Corps, United States Naval Reserve, for "extraordinary heroism and devotion to duty," in the care of wounded during landing operations at Lae, New Guinea, September 4/5, 1943. Award announced, March, 1944. Lieut. Begor died, September 9, 1943, of the wounds he suffered on this occasion.

Distinguished Service Cross

Miller, Lieut. David Lloyd (B.Sc. [Agr.] '40), Royal Canadian Naval Volunteer Reserve, "for courage and gallantry in action against an enemy submarine." Award announced, May 4, 1943.

Distinguished Flying Cross

Hope-Simpson, Pilot Officer David (B.Sc., '40; M.Sc., '41), Royal Canadian Air Force, for "high skill, fortitude, and devotion to duty," while serving overseas, March, 1944.

Mentioned in Despatches

Winn, Capt. James (B.Eng., '35), Royal Canadian Engineers, for services in the Central Mediterranean Area. Award announced, March 24, 1944.

General Service Record

United States Forces

Cashin, Lieut. (Junior Grade) John Carney (M.D., '43), Medical Corps, U.S. Naval Reserve, Ship's Surgeon, destroyer U.S.S. *Brush*, April, 1944.

Edel, Staff Sergt. Leon (B.A., '27; M.A., '28), No. 3 Mobile Broadcasting Company, U.S. Army, Camp Ritchie, Maryland, April, 1944.

Evans, Lieut. Ronald MacKinnon (B.Sc., '39), has been promoted to Captain while serving in the Chemical Warfare Branch of the U.S. Army in North Africa, according to a press despatch, March 24, 1944.

Harvey, Capt. Glen W. (M.D., '40), Medical Corps, U.S. Army, 54th Evacuation Hospital, serving in New Guinea, March, 1944.

Imbleau, Lieut.-Commander Joseph E. Lorrain (M.D.,'22), Medical Corps, U.S. Naval Reserve, Navy Yard Dispensary, Brooklyn, N.Y., March, 1944.

Kaufman, Lieut.-Col. Moses Ralph (M.D., '25), Medical Corps, U.S. Army, Consultant Neuropsychiatrist, H.Q., U.S. Army Forces in New Caledonia, March, 1944.

Kelly, Capt. Adolphus Bruce (M.D., '26), Medical Corps, U.S. Army, 204th General Hospital, serving in the Territory of Hawaii, March, 1944.

Kilroy, Capt. Dan. Orville (M.D., '39), Medical Corps, U.S. Army Air Corps, serving in England, March, 1944.

Kunin, Lieut. (Junior Grade) Kalman Clarence (B.Sc.,'41; M.D., '43), Medical Corps, U.S. Naval Reserve, at sea, with U.S. Naval Amphibious Forces, April, 1944.

Lynch, Lieut.-Commander Herbert Cornelius (M.D., '33), Medical Corps, U.S. Naval Reserve, U.S. Naval Training Station, Moscow, Idaho, March, 1944.

MacDonald, Lieut.-Col. John Kingsley (M.D., '26), Medical Corps, U.S. Army, Commanding Officer, 78th Station Hospital, serving in North Africa, March, 1944.

Miller, Capt. Noah (M.D., '25), Medical Corps, U.S. Army, a Station Hospital, serving in Italy, April, 1944.

Palmer, Lieut. Forrest McDowell (B.Eng., '42), U.S. Army Air Forces Training Center, Baer Field, Fort Wayne, Indiana, April, 1944.

Palmer, Lieut. Hugh Douglas (M.D., '43), Medical Corps, U.S. Army, 50th Officers' Training Battalion, Medical Field Service School, Carlisle Barracks, Pennsylvania, March, 1944.

Peabody, Lieut. Sherman Milne (M.D., '40), Medical Corps, U.S. Naval Reserve, serving aboard the Aircraft Carrier, U.S.S. *Lexington*, March, 1944.

Shapiro, Private Hyman Robert (B.A., '29), Ordnance Corps, U.S. Army, Heavy Automotive Maintenance Company, Camp Maxey, Texas, April, 1944.

Stewart, Capt. William Allan (M.D., '33), Medical Corps, U.S. Army, serving "Somewhere in Asia," March, 1944.

Turnbull, Lieut. Rupert Beach (M.D., '40), Medical Corps, U.S. Naval Reserve, Field Service Medical School, Camp Elliott, San Diego, Cal., April, 1944.

Wade, Major Robert S. (M.D., '25), Medical Corps, U.S. Army, Fitzsimons General Hospital, Denver, Colorado, March, 1944.

Teitelbaum, Major Michael H. (B.A., '21; M.D., '25), Medical Corps, U.S. Army, promoted to Lieut.-Col., May 13, 1943; serving as Chief of Medical Service and Consultant Neuro-Psychiatrist, 121st Station Hospital, Overseas, March, 1944.

Wechsler, Capt. Jacob J. (M.D., '25), Medical Corps, U.S. Army, discharged from Active Service on medical grounds, July, 1943; has resumed civilian practice in New York, March, 1944.

White, Sergt. John W. (Med., 1935-'41), Medical Corps, U.S. Army, 117th Station Hospital, serving in New Guinea, March, 1944.

Winter, Lieut.-Col. William Lewis Gordon (App. Sci., 1921-'23), Signal Corps, U.S. Army, who returned to the United States some time ago, after service in the Caribbean Area and in Great Britain, is again serving in the U.S. Forces Overseas, March, 1944.

British Forces

CLARK, CAPT. JOCELYN GILBERT (B.A., '38; M.A., '39), formerly of the Gordon Highlanders, British Army, was reported serving as Adjutant, a Commando Unit, British Home Forces, April, 1944.

DONALD, SQUADRON LEADER HENRY GORDON (B.A., '29; M.A., '30), serving in the Royal Air Force (V.R.), Norfolk, England, April, 1944.

GRANT, CADET ROBERT YEOMAN (Agr., 1939-'44), McGill C.O.T.C., enlisted in the Fleet Air Arm, Royal Navy, January 26, 1944.

NEWCOMBE, LIEUT. HOWARD BORDEN (Ph.D., '39), Royal Navy, H.M. Dockyard, Rosyth, Scotland, March, 1944.

SIMPSON, MAJOR GEORGE A. (M.D., '30), Royal Army Medical Corps, who since the outbreak of war has served in Great Britain and India, was reported in press despatches to be serving in Ceylon, March 7, 1944.

WALLACE, CORPORAL ARTHUR WILLIAM (B.Arch., '26), who served with the Royal Army Service Corps in France in 1940, was reported in the same service in Cairo, Egypt, March, 1944.

Dominions' and Indian Forces

FAULKNER, CAPT. GEORGE VERMILYEA (M.D., '34), previously reported as a Staff Officer with the British Army in Britain, is serving with the 3/2nd Gurkha Rifles, India Command, March, 1944.

OGILVIE, FLIGHT LIEUT. DOUGLAS ROLT (B.A., '31; Law, 1931-'35), recently promoted to his present rank, while serving in the Royal Australian Air Force at Darwin, Australia, March, 1944.

Promotions

Army

BYERS, DONALD NEWTON (B.A., '33), to Major, a Heavy Anti-Aircraft Regt., R.C.A., Overseas, March, 1944.

CARVER, JOHN KENNETH (D.D.S., '23), to Major, Can. Dental Corps, C.D.C. Headquarters, Ottawa, March, 1944.

CIPRIANI, ANDRE JOSEPH (B.Sc., '32; M.D., '40), to Capt., R.C.A.M.C., Active Army, Ottawa, February 4, 1944, with seniority from October 19, 1943. (*Canada Gazette*, March 25, 1944).

COLEMAN, ROWAN CORRY, M.C. (B.A., '36), who won the Military Cross while commanding a company of Princess Patricia's Canadian Light Infantry in Sicily in the summer of 1943 and later was appointed Second-in-Command of the Regiment, to Lieut.-Col., Canadian Infantry, Can. Army Overseas, March, 1944.

Royal Canadian Engineers

BLAIR, LIEUT. DONALD LANSDOWNE (B.Arch., '32), No. 1 Can. Engineers Reinforcement Unit, Overseas, March, 1944.

THE SHACKLES ARE BREAKING

THE GREATER DESTINY of tomorrow is in our hands

•

NOW - more than ever - must we strive unceasingly to finish the job

•

NOW - more than ever - must we SAVE and LEND for

VICTORY.

"WE NOW HAVE REACHED A POINT IN THE JOURNEY WHERE THERE CAN BE NO PAUSE. WE MUST GO ON! IT MUST BE WORLD ANARCHY OR WORLD ORDER."

—WINSTON CHURCHILL *(at Harvard University)*

ELECTRONICS
CONTINUES TO PERFORM NEW WONDERS

Precipitron, the Westinghouse electronic air cleaner, removes particles as small as 1/250,000 of an inch.

"Electronics," long familiar to the electrical engineer, has made possible many important applications of electricity during the past half century.

Radio is an electronic device . . . X-ray . . . Talkies . . . "Radar". A few of the Westinghouse developments in the field of electronics include the Ignitron, the Sterilamp and the Precipitron. These and many other new achievements will be among the contributions which Westinghouse engineers will make to the "Electronic Age."

Westinghouse

The Name that means Everything in Electricity

CANADIAN WESTINGHOUSE COMPANY LIMITED HAMILTON, CANADA

HEBERT, MAJOR CHARLES PIERRE (B.A., '21), has returned to Britain from the Mediterranean Area to join the Canadian Forces there as a Civil Affairs Officer. ANGUS, LIEUT. MARY JANET (B.H.S., '39), Dietitian, No. 4 Canadian Casualty Clearing Station, Central Mediterranean Force, March, 1944.

A 10,000-ton ship hull ready for launching. Fabrication by Dominion Bridge Co. Limited.

Erection of steel framework for a building. Fabrication and erection by Dominion Bridge Co. Limited.

Ships - FIRST COUSINS TO STEEL STRUCTURES

● When, at the outbreak of war, Dominion Bridge Company Limited was asked to build ships, some people doubted whether this specialized work could be done successfully by an organization whose closest previous experience had been with structural steel fabrication. Their doubts proved groundless. In fact, the Company's previous experience enabled it to develop methods never before used in shipbuilding. For instance, the accurate shop fabrication of hull plates, floors, frames, etc., meant that these parts could be assembled at the shipyard with greater speed, accuracy and economy.

In tackling the problems of this new work, the Company developed new techniques and gained new experience in the working of steel, in welding procedure, in field erection and many other departments. The value of these cannot be over-estimated for they provide a broader outlook on peacetime projects.

Smokes still wanted

"Have you noticed" a friend said the other day "the difference in the 'thank-you' cards from the boys in Italy? The ones you send cigarettes to through the Overseas League, I mean. They are so much fuller, less formal than the cards we got from England." And what he said is true . . . all the more reason then to keep up the flow of cigarettes through:—

The Overseas League Tobacco Fund
Keefer Building, Montreal

★

$1 sends 400 cigarettes to sailor, soldier, or airman. With each pack is enclosed an acknowledgement card. Send a subscription today!

Women's Services

PRINCE, SERGT. BETTY (B.A., '40), R.C.A.F. (W.D.), after service in Newfoundland and later at Trenton, Rockcliffe, and Mont Joli, has again been posted to Rockcliffe, where, among other duties, she is instructing pre-aircrew in aircraft recognition.

STEVENSON, PRIVATE MARGARET L. (Margaret L. Hill, B.A.,'35), Canadian Red Cross Corps, serving in London, England.

Dr. C. Purves Honoured in Wisconsin

Dr. Clifford B. Purves, who last summer became the second E. B. Eddy professor of industrial and cellulose chemistry at McGill University was recently awarded the honorary D.Sc. degree at the spring commencement of the Institute of Paper Chemistry, Lawrence College, Appleton, Wisconsin.

Dr. Purves delivered the commencement address on "Reactivity of the Hydroxy Groups in Cellulose."

Active Service Mail-Bag

THE following are extracts from letters recently received. We hope to include further such extracts as a regular feature of our coming issues.

U.S. Navy Amphibious Forces, at sea

"I would like very much to continue receiving THE MCGILL NEWS. If possible, could you forward it to my new address. Thanking you for your kind attention and in fond recollection of Alma Mater."

K.C.K. (B.Sc., '41; M.D., '43

N.D.H.Q., Ottawa

"I have today received a copy of the Spring, 1944, issue of THE MCGILL NEWS. This publication is very gratefully received and I have read it with much interest. I thank you very much indeed."

C.D.A. (B.Com., '24

Can. Women's Army Corps, Toronto

"Once again THE MCGILL NEWS has pursued me half way across Canada and back again, and its arrival is more than ever welcome."

—J.E.G. (B.Com., '39

U.S. Medical Corps, Somewhere in Asia

"Please send my MCGILL NEWS to the address given. I have missed at least one copy in my moving around. If my fees are due, please notify me, as the NEWS is invaluable in this global war."

—W.A.S. (M.D., '33

R.C.A.F., Edmonton, Alta

"I would like to notify you of my change of address. I don't want to miss any copies of THE MCGILL NEWS."

—D.A.R. (B.Sc., '38; M.D.,'41

R.C.A.M.C., Italy

"Have recently run into a lot of my class-mates both from High School and McGill. The MCGILL NEWS is a favourite piece of literature here and there is always a rush when it comes. We get more news out of it about our friends than from anywhere else."

—E.A.S.R. (B.A., '38; M.D., '42)

U.S. Medical Corps, North Africa

"Yesterday received the Winter issue of the NEWS, which I most thoroughly enjoyed. Periodically we run across McGill men in this theatre. These are always happy occasions and I have been fortunate in being able to pass the NEWS among them, to their great delight. We are exceedingly proud of what McGill has contributed and is contributing to the war effort. We are disseminated throughout the world in this gigantic struggle, each earnestly trying to fill his tiny niche with honour to his Alma Mater. On behalf of my late father (McGill, Med., '06), Captain, R.C.A.M.C., and myself, I salute you."

—J.K.M. (M.D., '26)

U.S. Forces, China-Burma-India

"Let me take this opportunity to thank you very much for continuing to send THE MCGILL NEWS. I received the Autumn, 1943, copy only this morning. Getting the NEWS is a great help, for it does keep one in touch with one's classmates."

—H.J.S. (LL.B., '24)

4th Can. Division, Overseas

"Have just received the Winter, 1943, number of the NEWS and have read it with interest and appreciation. Many thanks! It will shortly go the rounds in the Mess. Just to be sure I receive future issues, will you please correct your mailing list, as shown."

—G.R.A. (B.A, '30)

Man takes wing; intrepid airmen blaze new global trails; the world shrinks under the speed of air travel, and vast new regions are laid open to development.

Post-war skyways, following the Great Circle routes to the north, will place Canada at the cross-roads of the world, with wide scope for promoting international trade, travel, and understanding.

With the progress of to-morrow, Canadians will, as in the past, find The Royal Trust Company ready to serve them in safeguarding the fruits of their labours, while at home or on missions to new horizons.

THE ROYAL TRUST COMPANY

CORPORATE SECURITY — PERSONAL SERVICE

Offices across Canada from Coast to Coast

Can. Infantry, Italy

"As for news of myself, I have little. I was wounded in action December last and got back to my unit in March. I must compliment you on your Winter, 1943, issue of the NEWS. Dr. Nicholls' article [on the McGill Chemistry Department] was specially interesting, since I came of the Chemistry Building."

—G.K.W. (B.Sc., '41)

Veterans' Guard of Canada

"Thank you for putting me on your mailing list. It is good to be receiving the NEWS again, and to read about old friends. On my arrival here about a month ago, I found the Medical Officer of the Camp to be a McGill graduate. He says he has not received THE MCGILL NEWS recently, so I have passed the Spring number on to him. Hail Alma Mater!"

—A.J.R.P. (B.A., '17)

U.S. Army, Camp Ritchie

"The NEWS is always welcome and it's a great satisfaction to see how large a rôle McGill men are playing in the war. I look forward to continuing to read it when I get overseas, as I expect to do in the not too distant future."

—L.E. (B.A., '27; M.A., '28)

Med. Corps, U.S.A.A.F., England

"Before pushing overseas, I was receiving THE MCGILL NEWS, but since arriving in England I have not received any copies. Tell the powers that be that I am still alive and would like to be back on the mailing list."

—D.O.K. (M.D., '39)

BANKING IS ADAPTABLE

...it changes constantly to meet this country's changing needs

FOR INSTANCE...

Ever wonder where your ration coupons go? The answer is that your grocer takes your sugar, butter and other coupons to his bank, which acts as the government's agent in identifying and accounting for millions of spent coupons. This vast bookkeeping job—known as "Ration Coupon Banking"—is just one of the new, additional assignments which the banks have assumed as part of their wartime service.

Another is the payment, on behalf of the government, of certain subsidies arising out of wartime price control. Still another is the handling of exchange transactions as agents of the Foreign Exchange Control Board.

At the same time the banks have arranged facilities to serve military establishments and new war-industry centres alike.

Through loans to industry and agriculture, they have helped to increase the supply of raw materials, weapons and food.

They have acted as issuing agents for approximately $5,700,000,000 worth of Victory Bonds and War Savings Certificates, as well as lending direct financial aid to the government through short term loans.

...All this in the face of widespread staff changes resulting from enlistments of 8,360 trained bank employees.

The war emergency has proved the readiness and ability of Canada's banks to adapt their services to new conditions. It has proved, once again, the strength of your banking system, which is providing a firm base of financial service for the greatest economic effort in the nation's history, and will with equal resourcefulness meet the challenge of the years ahead.

THE CHARTERED BANKS OF CANADA

Undergraduates On Active Service

(A Supplement to the *On His Majesty's Service* Section)

OUT of the eleven hundred McGill students now on Active Service, nearly four hundred have advised the Principal of their service appointments since January 1 of the present year. Through the Principal's co-operation, we have been given the information about these students which appears below. In this special Convocation and Undergraduate issue of the NEWS such a list seems most appropriate.

To permit the inclusion of the list in the space available, abbreviations have been essential, as has a grouping of the students under headings showing only the faculty or school in which they *last* were registered, though the total years of their attendance at McGill are given. The month at the end of each item shows when the news given was received. We emphasize that the names listed represent only that fraction of enlisted students who, personally or through their friends, reported to the Principal in the period from January 1 to April 10, 1944. The total of students in each faculty or school known to be on Active Service, as of April 10, is shown in the headings below.

Agriculture (Known Student Enlistment, 73)

ANGROVE, CADET DONALD JAMES (1942-'43), C.A.C., Camp Borden, Ont. (January)

BROWN, L/AC RONALD EDWARD (1942-'43), No. 1 B. and G.S., R.C.A.F., Jarvis, Ont. (February)

BUTTERWORTH, A.B. JOHN FRANCIS (1942-'43), R.C.N.V.R., awaiting sea appointment. (January)

DAWSON, O/S JOHN ADDINGTON (1940-'42), R.C.N.V.R., Newfoundland. (January)

DE MARTIGNY, SUB-LIEUT. MICHEL LE MOYNE (1941-'42), R.C.N.V.R., Saint John, N.B. (February)

GOODWIN, GNR. ALAN MURRAY (1941-'43), R.C.A., Petawawa, Ont. (January)

LE LACHEUR, LIEUT. ARTHUR GARNET (1941-'43), R.C.A. (February)

MACLEAN, O/S JOHN MURRAY (1942-'43), R.C.N.V.R., H.M.C.S. *Cornwallis*, N.S. (January)

MCTEER, O/S CHARLES PHILIP (1941-'43), R.C.N.V.R., H.M.C.S. *Carleton*, Ottawa. (January)

MOXLEY, LIEUT. JOHN ELLIS (1941-'43), R.C.A., Petawawa, Ont. (February)

NASON, LIEUT. ROLAND WESLEY (1941-'43), R.C.A., Overseas. (February)

O'BRIEN, 2ND LIEUT. GEORGE ALLAN (1941-'42), R.C.A., Petawawa, Ont. (January)

PHILIP A. C. KETCHUM, M.A. (CAMB.) B. PAED.

THE contribution which mining has made to the development of Canada cannot be over-estimated. The mining industry has pushed back the northern frontiers and created a new empire in what was a wilderness less than two generations ago.

Where northern lights flickered on rocky wastes, there are now modern towns, utilities, transportation, and an industry whose activity has stimulated and benefited business, manufacturing and agriculture in all parts of Canada.

Today the mining industry is working for war. Tomorrow Canada's mines are destined to play a major part in helping to rebuild and strengthen the economic and industrial structure of the Dominion.

"PIPING HOT"

NEXT TIME you dine in a restaurant, consider the amount of piping equipment which enters into the preparation of your meal—in the refrigerating system, the food and plate warmers, the large coffee urns, the gas lines to ranges, the hot and cold water lines.

Consider, too, the role of piping back in the meat packing plants, in food processing, in dairies and bakeries and storage plants. Crane supplies much of this equipment, which is why, wherever you go, you will often see the familiar name of Crane or the initial "C."

Scope for ENGINEERS in all Categories

At CANCAR, we build rolling stock, street cars, buses . . . and aircraft . . . meaning countless opportunities for engineering graduates. Plan your engineering future NOW. Think in terms of this huge company, now in all-out war production but ready on the day of victory to swing into full-scale peacetime production.

Canadian Car & Foundry Company Limited

MONTREAL FORT WILLIAM BRANTFORD AMHERST

IN the great fight for freedom, justice and civilization, the industrial chemist has added to his peace time task of helping to build a better world, the task of co-operating with all branches of industry in protecting the right to live in such a world.

THE ANNUAL LUNCHEON AND MEETING OF THE NEW YORK GRADUATES' SOCIETY OF McGILL UNIVERSITY, HELD IN THE CANADIAN CLUB, WALDORF ASTORIA HOTEL IN NEW YORK CITY ON FRIDAY, MARCH 17TH.

Left to right: MR. NORMAN HART, Agent of the Royal Bank of Canada in New York; MR. FRASER S. KEITH, President of the Graduates' Society; MR. MORRIS W. WILSON, Chancellor of McGill University; MR. DOUGLAS S. COLE, President of the New York Graduates' Society of McGill; DR. F. CYRIL JAMES, Vice-Chancellor and Principal; HUGH D. SCULLY, Canadian Consul General in New York; DR. OTTO SCHMIDT, President-Designate of the New York Society..

Annual Luncheon of New York Graduates' Society

THE New York Graduates' Society of McGill University held its Annual Luncheon and Meeting at the Canadian Club in the Waldorf Astoria Hotel, on March 17th, under the Presidency of Douglas Cole, Senior Canadian Trade Commissioner in the United States and Consul at New York.

The guests of honour on this occasion were Mr. Morris W. Wilson, Chancellor of McGill University and President of the Royal Bank of Canada, Dr. F. Cyril James, Vice-Chancellor and Principal of McGill University and Mr. Fraser S. Keith, President of the parent graduate body and head of the Development Division of Shawinigan Water & Power Ltd., Montreal. Other guests at the head table included Mr. Hugh D. Scully, a graduate of the University of Toronto, Canada's first Consul-General in the United States, and Mr. Norman Hart, the No. 1 Agent of the Royal Bank of Canada in New York.

The occasion was historic, for it marked the first time in the history of any McGill graduate body that the Chancellor, Principal, and President of the Graduates' Society were guests of honour simultaneously.

Principal James introduced the Chancellor, who spoke of McGill's contribution to the war effort and her close cooperation with the government authorities. He referred specifically to the use of Douglas Hall by army cadets and Macdonald College by the C.W.A.C., pointing out also how important the facilities of the Sir Arthur Currie Memorial Gymnasium-Armoury have been to the military training programme.

The presentation of Purvis Hall to the University by Mr. J. W. McConnell, was also mentioned, as was the valuable work being carried on in the Neurological Institute, and the joint operation by McGill

University and the Royal Victoria Hospital of the former Sir Montagu Allan residence as an Institute of Psychiatry.

Chancellor Wilson also dealt with the setting up by the Board of Governors of a Needs Committee, under the chairmanship of the Principal, and a Financial Exploration Committee, under the chairmanship of Mr. J. W. McConnell, with a view to determining what were the University's most pressing needs, and how funds might be raised to meet them. Salary increases for the University staff were an immediate need, and this is now being attended to.

In conclusion, the Chancellor said that not only was McGill playing a prominent part in present problems but that those in charge of her destinies are determined to maintain her high traditions and equip her to make the maximum contribution to the future development of Canada.

Fraser Keith, President of the Graduates' Society, extended the greetings of the parent body to those present, stating that McGill men have reason to be proud of the University's high standing throughout the world and that it had been said that McGill's contribution to the war had been the greatest of any university among the Allied Nations.

The graduates are proud of the governing body of the University, and of her young men who are fighting and dying in every corner of the world, he said.

The following officers of the New York Graduates' Society were elected by acclamation for 1944-'45: President, Dr. Otto V. M. Schmidt; 1st Vice-President, Col. F. E. Gendron; 2nd Vice-President, W. W. Colpitts; Hon. Sec'y-Treasurer, Dr. E. Percy Aikman; Board of Governors, Dr. D. S. Likely, Douglas Cole, B. O. Smith, Stuart E. Kay, Dr. A. M. McLellan, Dr. Roy Grimmer, Prof. T. F. Newton.

Notes from New York Graduates' Society Meeting

WE are in receipt of the following personal notes gathered at the Annual Meeting and luncheon of the New York Graduates' Society on March 17, 1944.

Anderson, L. K. (B.A., '23), has just returned from a tour of the Latin American countries (Brazil, Chile, Colombia, Costa Rica, Guatemala and Mexico) in the interest of the Board of Foreign Missions of the Presbyterian Church of America.

Ascah, R. G. (B.Sc., '39), is now associated with the Research and Development Dept. of Canadian Industries Ltd., at Belœil, Que.

Burleson, Henry S. (B.Sc., '34), is at present associated with the Sperry Gyroscope Co. Inc., as an engineer on aircraft armament.

Jonitz, Dr. Robert (M.D., '30), maintains his practice in East Orange, N.J., and is Chief Obstetrician at the Newark (N.J.) Memorial Hospital.

Levitt, Miss Bella (B.A., '39; M.A., '41), received her Ph.D. from the University of Pennsylvania in June, 1943, and is now teaching in a private high school in New York City.

MacLeod, Dr. Colin M. (M.D., '32), is the Director, Commission on Pneumonia Board for the Investigation and Control of Influenza and other Epidemic Diseases in the United States Army, receiving the appointment in 1941.

Presner, Dr. J. C. (M.D., '25), was made Asst. Chief G. V. Surgeon at Lennox Hill Hospital (O.P.D.) New York, and is also Asst. Surgeon of Urology, Bellevue Hospital, New York.

Simpson, Mrs. Jennie L. S. (B.A., '17), is teaching Botany at Hunter College, in the Dept. of Biological Sciences with the rank of Associate Professor.

Weiss, Miss Jane Elizabeth (B.A., '37), has been transferred from New York to the Washington United Nations Information Office, 2841 McGill Terrace, Washington 8, D.C.

Principal Addresses Sherbrooke Rotary Club

Principal F. Cyril James addressed the Sherbrooke Rotary Club recently on the subject of post-war reconstruction, stating that following this war a satisfactory international policy must be formed to avoid the errors made after the last conflict. Forty McGill graduates in the Sherbrooke district attended the meeting.

Windsor Graduates' Meeting

A meeting of McGill graduates, residing in Windsor, was held at the Windsor club on Saturday, April 1st, the occasion being the visit of the President, Fraser Keith, to that city. E. G. McCracken, secretary of the Ontario Society, gave hearty cooperation in making arrangements for this gathering.

During the dinner, the record made by Stephen Leacock, called "My Old College," was heard from the local radio station, and much appreciated.

Mr. Keith reviewed the activities of the Society during the past year, pointing out that McGill's financial position had been materially improved, making it possible to increase salaries and install much needed equipment. An outstanding feature had been the inauguration of a new class of membership from amongst the undergraduate leaders, and the formation of the Undergraduates' Committee of the Graduates' Society which had rendered meritorious service on behalf of the Society culminating in the Graduate-Undergraduate dinner held for the purpose of getting better acquainted. This, he hoped, would be a definite feature of Society activities.

Advantage of the occasion was taken to express the good wishes of Chancellor Wilson and Principal James.

Those present were:

D. W. Smith, B.Sc., '23; P. J. G. Morgan, M.D.,'22; F. J. Ryder, B.Sc., '29; A. St. C. Ryley, B.Sc., '10; George F. Laing, M.D., '15; Kenneth Fleming, B.Sc., '23; Jas. E. Daubney, B.Sc., '10; D. F. Smith, B.Sc., '25; Howard E. Reid, B.Sc., '23; Eric Pope, B.Sc., '20; John Howie, M.D., '27; R. J. Haslam, B.S.A., '25; H. P. Green, B.Sc., '15; C. W. Owen, B.S.A., '25; James S. Gow, B.Com., '23; J. J. Stuart, B.Com., '35; John A. Marsh, B.Com., '23; E. G. McCracken, B.Sc., '23; R. C. Brown, B.A.,'26; C. S. K. Robinson, B.Com., '24; E. G. Ryler, B.Sc., '14; F. E. Gardiner, B.Sc., '14; J. W. Little, B.Sc., '07; H. B. Smith, M.D., '21; James R. Cox, M.D.,'00; K. Hallsworth, B.Sc.,'36; Robt. Agajeenian, B.A., '29; A. J. M. Bowman, B.Sc., '09; W. M. Mitchell, B.Sc., '24; S. Hardie Campbell, M.D.,'23; D. H. Woollatt, B.Sc., '16; H. Lloyd Johnson, B.Sc., '27; J. Clark Keith, Varsity, '10.

Graduates' Society President Visits Halifax

On Thursday, April 20th, and the following two days, Fraser Keith, President of the Graduates' Society, visited Halifax, accompanying the president of the Engineering Institute of Canada, De Gaspe Beaubien, B.Sc., '06 on his visit to the variousbranches of the Institute. In the party were: R. E. Heartz, McGill '17, George Dickson, B.Sc., '05, and L. Austin Wright, general secretary of the Engineering Institute.

Besides a visit to Mount Allison University, meetings of the Institute, and the Association of Professional Engineers of the Province of Nova Scotia, were attended, including the annual dinner of the Halifax branch of the Institute at which many McGill men were present. A special McGill table was arranged, and during the evening the president of the Institute, himself a McGill man, called upon his fellow graduates to stand and give the McGill yell, which was done with considerable enthusiasm. Following the dinner, most McGill men present, accepted an invitation from Fraser Keith, to a social gathering. At this meeting, Mr. Keith outlined the progress made by the University during recent years.

Those present included:

E. M. Woolcombe, Chairman of the Branch, Mgr. Foundation Maritime Limited; C. H. Wright, District Manager, Canadian General Electric Company; Dr. Alan Cameron, Deputy Minister of Mines, Nova Scotia; W. P. Copp, Professor of Engineering, Dalhousie University; Donald Dunbar, Superintendent, Pictou County Pr. Board, New Glasgow; G. Vibert Douglas, Professor of Geology, Dalhousie University; Douglas Fraser, Office of Coordinator of Naval Construction; John Kaye, Mgr. Engineering Service Co., Ltd.; John Wightman, Mgr. Consolidated Mining & Smelting Co., Cariboo; G. F. Bennett, Foulis and Bennett Electric Ltd., Capitol Building, Halifax, N.S.; George Dunbar, Chemical Engineer, Imperial Oil Co., Dartmouth, N.S.; Harvey Thorne, Works and Building Department, H.M.S. *Stadacona*, Halifax; James F. Kelly, Stellarton, N.S. Mr. Kelly was on the staff for four years following graduation; W. A. Mitchell, Imperial Oil Company, Dartmouth, N.S.; Ernie Martin, Public Works Department, Ottawa.

The officers of the branch are:

E. M. Woollcombe, Chairman; Mrs. Norman H. Gosse, M.D., Secretary; Dr. Walter L. Muir, Treasurer.

St. Francis District Branch Meets

Dr. F. Cyril James, the principal of McGill University, addressed a joint meeting of the Sherbrooke Rotary Club and the St. Francis Branch of the McGill Graduates Society at Sherbrooke on Tuesday March 28th. The meeting was arranged through the efforts of Rotarian B. N. Holtham, K.C., a former secretary of the St. Francis Branch, and Wesley H. Bradley, the present Secretary-Treasurer of the Branch. Some fifty graduates and former students of the University from various parts of the Townships attended the meeting.

Among those at the head table were Dr. R. H. Stevenson of Danville, the president of the St. Francis Branch, and a number of prominent graduates including Mr. Justice C. D. White, William Paton, Rev. E. C. Amaron, principal of Stanstead College, Dr. R. J. Spier of North Hatley and Dr. Warren Lynch and Dr. Réné Duberger of Sherbrooke.

Wartime conditions including the restrictions on travelling have made it difficult for the St. Francis Branch to organize meetings of McGill men in that area. Their officers are grateful, therefore, to the Sherbrooke Rotary Club for the opportunity thus given of holding a joint meeting on the occasion of the visit to the Townships of McGill's principal and vice-chancellor.

Recent Appointments in Mining Engineering

Flight-Lieutenant Leigh W. Bladon, R.C.A.F., B.Sc., '26, has been named Macdonald Professor of Mining Engineering in succession to the late Prof. W. G. McBride, and Associate Professor O. W. Brown, B.Sc., '10, has been promoted to Professor of Ore Dressing, succeeding Professor J. Bell, who retired in 1942, according to a recent university announcement.

Flight-Lieut. Bladon learned to pilot his own plane when making surveys in the bush as a field engineer for the Consolidated Mining and Smelting Company of Canada. Later he was employed by the Dome Mines in South Porcupine, Ont., as chief mine engineer, leaving in 1942 to become an aircraft maintenance engineer in the R.C.A.F. who will transfer him to the reserve of officers in order that he may take up his duties in the autumn.

Professor Brown has been in the Department of Mining Engineering at McGill since 1930.

George C. McDonald On Hydro Board

George C. McDonald, B.A., '04, former president of the Graduates' Society and governor of McGill University, has been chosen as one of the five members of the newly created Quebec Hydro Commission. He resigned from the Board of Governors, to which he had been elected in 1932, upon accepting the Hydro appointment.

Sudbury Branch

We are indebted to D. R. Lochead, Secretary of the Sudbury Branch for the following personal notes about some of its members:—

***Lockhart, R. F. [Bob]** (B. Eng., '39), is a shift boss at Garson Mine (International Nickel) where he lives with his wife and 18 month son.

Perham, Alan (B.Eng., '38), is a shift boss at Levack Mine, (International Nickel). He recently became engaged to a member of the W.R.C.N.S.

***Kierans, Tom** (B.Eng., '39), is a Safety Engineer at Frood Mine. He has two children, a girl and boy.

***Morisett, Fernand** (B.Eng., '34), an engineer at Frood, is now completely recovered from head injuries received when a rock from a blast in the open pit fell through the roof of his office.

***Cook, Dr. W. J.** (Med., 1904), our oldest member, and one of the ones responsible for the formation of the Sudbury branch, is completely occupied with Public Health and Welfare work. He is Sudbury's Public Health Officer, and as such, presented a most outstanding and comprehensive Brief on Sudbury's Public Health Requirement to the Urquart Mining Commission in March of this year.

Cook, Dr. J. B. (Med., 1938), is in Sudbury, on leave. He is with the Army Medical Corps and is stationed at Halifax.

The Student Year (1943-44)

(Continued from Page 11)

regard to race, creed, or financial position, to all peoples oppressed by Nazi tyranny."

A committee composed of most of the religious and political clubs on the campus was set up to circulate the petition and obtain signatures from the student body. Arguments flared immediately. One side, the humanitarians, held that the only decent thing to do was to sign the petition, and what were the Allies fighting for anyway. The other side, the hard, suspicious individuals, held that it would be folly to sign anything so indefinite and impractical, and Canada was doing enough if they could feed their own widows and orphans on muskeg in the Northern wilds. A few small groups rose above these petty arguments, and vociferously and severally announced that it was a capitalist plot to get cheap labour, a scheme concocted by international Jewry, and an Axis plan to get fifth columnists into Canada.

Tears were shed, there was a gnashing of teeth, and when the student body was about ready to let the matter drop, the Students' Executive Council decided that they would issue a proclamation. The effect of this was that although the Council approved "the principle of admitting to Canada in wartime refugees from Nazi persecution . . . without consideration as to race, colour, or creed," . . . it was opposed to the petition as presently worded.

In all, about fifteen hundred signatures were obtained, but since an indefinite number of these were obtained off the campus, it was impossible to tell whether the majority of the students signed or not.

THE SOCIAL FIELD

Although the average citizen may think that a frenzied social whirl is an integral part of any college curriculum, this is far from the truth in wartime. Since the beginning of the war, all social activities have been restricted to the campus, and only two undergraduate formals are permitted, the Junior Prom, and the Med-Plumber Ball. These dances were very successful, the Sir Arthur Currie gymnasium being packed to capacity on both occasions.

At the beginning of the session, the Freshman class was introduced to university life with the usual fanfare. Although some persons objected to the initiation rites requiring a bare leg of all the Frosh, the sport was taken in good part by all the students. The Reception Committee, under the chairmanship of Leslie Darragh, was so successful in educating the innocents in the ways of college life that, by the spring, the Freshman class was ready to assume the duty of organizing the Arts and Science Hop. The student body, including the gate crashers, were of the opinion that the dance and floor-show was the most successful that had been seen since 1939.

This is a typical example of the spirit of hard work, enthusiasm, and hard play which was characteristic of the student body of 1943-44. If they can carry it into their graduate pursuits, Canada will not have much to worry about in the solution of her post-war problems.

Graduates Meet With Toronto Alumni

A unique event took place on March 29 when members of the University of Toronto Alumni Society of Montreal invited members of the Montreal Branch of the Graduates' Society of McGill University to join them in a dinner meeting at the Montreal Club. Dr. H. J. Cody, president of the University of Toronto, was the speaker, and called attention to the fact that the creation of a good post-war world depends on the interest, integrity, and intelligence of the people. He advocated a closer study of Canada's affairs as well as a knowledge of external matters. Unity of Canadians from the Atlantic to the Pacific was essential if Canada was to play the part she has earned in the creation of a post-war world, he said. Dr. Cody was introduced by Col. J. J. Creelman, K.C. A toast to "Old McGill" was proposed by E. P. Flintoff, K.C., and replied to by Principal F. Cyril James, who praised the wartime work of both universities, expressing the wish that each work harder to create even greater cooperation in the days of peace.

Head table guests included Russel Smith, Gordon Pitts, Dr. A. D. Campbell, Rev. R. S. W. Howard, E. P. Flintoff, K.C., Dr. C. J. Tidmarsh, J. H. Brace, Principal James, Col. J. J. Creelman, K.C., A. E. Leslie, F. R. McDonald, G. B. Glassco, and C. A. Morrison.

McGill Favoured by West Indians

According to Sir Frank Arthur Stockdale, K.C.M.G., C.M.G., C.B.E., F.L.S., Comptroller for Development and Welfare in the West Indies, and British co-chairman of the Anglo-American Caribbean Commission, Canadian universities are favoured by West Indian students and by far the greatest percentage of them choose McGill. About 160 students from the islands are believed to be registered at McGill this year.

Personals

THE McGILL NEWS *welcomes items for inclusion in these columns. Press clippings or other data should be addressed to H. R. Morgan, Recorder Printing Company, Brockville, Ontario; or to The Graduates' Society of McGill University, 3466 University Street, Montreal. Items for the Autumn issue should be forwarded prior to July 15.*

***Anderson, R. G.,** M.Sc., '23, who has been Assistant Purchasing Agent for the Consolidated Mining and Smelting Company at Trail, B.C., has been transferred to the Montreal office as Technical Assistant to the Vice-President in Charge of Sales.

Berk, M. Ralph, B.Sc., '29, is chemist-in-charge, McKay Smelters, Limited, Ottawa.

*Member of The Graduates' Society of McGill University.

"WE MUST BEWARE of trying to build a society in which nobody counts for anything except a politician or an official, a society where enterprise gains no reward, and thrift no privileges."

The Rt. Hon. Winston Churchill.

Churchill is right!

What is PRIVATE ENTERPRISE?

It is the natural desire to make your own way, as far as your ability will take you; an instinct that has brought to this continent the highest standard of life enjoyed by any people on earth. It is the spirit of democracy on the march.

THE ROYAL BANK OF CANADA

Stockton, L., B.Eng., '42, joined the staff of the Consolidated Mining and Smelting Company, and is employed in the Lead Refinery of the Trail Plant.

Births

Beecher—On August 24, 1943, to T. S. Beecher, B.Sc., '39; M.D., '41, and Mrs. Beecher, a daughter, Mary Ann.

Buchanan—In Montreal, on March 15, to Rev. W. J. Victor Buchanan, B.A., '36, and Mrs. Buchanan, a daughter.

Christie—In Montreal, on February 25, to Squadron-Leader A. Mowatt Christie, B.Eng., '35, R.C.A.F., and Mrs. Christie, a daughter.

Collard—In Montreal, on April 3, to Edmund G. Collard, B.A., '31; B.C.L., '34, and Mrs. Collard, a son.

Conklin—In Montreal, on April 4, to Hanford A. Conklin, B.Com., '35, and Mrs. Conklin, a son.

Dowd—At Kinburn, Ont., to W. R. Dowd, B.A., '15; M.D.,'18, and Mrs. Dowd, a son.

Drake—In Ottawa, on March 2, to Lt.-Col. E. M. Drake, B.Eng., '34, and Mrs. Drake, a daughter.

Draper—At Gaspe, Que., on March 5, to Lieut. Patrick M. Draper, B.A., '39, R.C.N.V.R., and Mrs. Draper, a son.

Gales—In Montreal, on March 27, to Lt. D. Lorne Gales, B.A., '32; B.C.L., '35, and Mrs. Gales (Isabel Dawson, B.A.,'33; B.C.L., '36), a daughter.

Giles—In Montreal, on February 24, to Drummond Giles, B.Sc., '27, and Mrs. Giles (Eleanor Brooks, B.A., '28), a son.

Harley—On February 25, to Lieut. Gordon G. Harley, B.Eng., '41, of Windsor Mills, Que., and Mrs. Harley, a daughter.

Hart—In Montreal, on October 20, 1943, to William R. Hart, B.Com., '34, and Mrs. Hart, a daughter, Mary Elizabeth.

Hill—In Montreal, on September 2, 1943, to Emerson S. Hill, M.D., '23, and Mrs. Hill, of Torrington, Conn., a daughter.

Hobbs—At Arvida, Quebec, on March 8, to David H. Hobbs, B.Eng., '39, and Mrs. Hobbs (Kathleen Rochester, B.Sc.,'39), a daughter.

Kneeland—In Montreal, on February 29, to Scott F. Kneeland, B.S.A., '37, and Mrs. Kneeland, a daughter.

MacKimmie—In Montreal, on April 16, to Lieut. G. Bruce MacKimmie, B.Eng. '43, R.C.N.V.R., and Mrs. MacKimmie (Mary I. Carmichael, Phys.Ed. '42), a daughter.

McLernon—At Halifax, N.S, on March 4, to Captain R. R. McLernon, B.Com., '35, and Mrs. McLernon, a son.

Moss—In Augusta, Georgia, on March 11, to Captain Carl A. Moss, D.D.S., '41, and Mrs. Moss, a daughter, Susan Elizabeth.

Moyle—At Arvida, Que., on April 1, to Captain Allan H. Moyle, B.Sc., '40; M.D., '42, and Mrs. Moyle, a daughter.

Nelson—At Kingston, Ont., on March 15, to Captain Leeds M. Nelson, B.Com., '34, and Mrs. Nelson, a daughter.

Raff—In Montreal, on April 9, to M. J. Raff, M.D., '23, and Mrs. Raff, a daughter.

Rosenbloom—In Montreal, on April 15, to Lewis J. Rosenbloom, B.Com., '27, of Sherbrooke, Que., and Mrs. Rosenbloom, a son.

Ross—In Montreal, on February 7, to R. D. Ross, and Mrs. Ross (Margaret Hart, PhysEd., '38), a son, Donald Carter.

Schwager—In Saskatoon, Sask., on March 30, to Surgeon Lieutenant Paul G. Schwager, M.D., '39, and Mrs. Schwager, a daughter.

Smaill—In Montreal, on March 5, to Bruce Smaill, B.A., '38, and Mrs. Smaill, a son.

Stovel—In Montreal, on March 8, to S. R. Stovel, B.Sc., '37, and Mrs. Stovel, a daughter.

Tansey—In Montreal, on February 22 to Lt. J. Gordon Tansey, B.Com., '32, and Mrs. Tansey, a son (Still-born).

de Tonnancour—At Shawinigan Falls, Que., on February 11, to Charles G. de Tonnancour, B.Eng., '40, and Mrs. de Tonnancour, a daughter, Michèe.

Walsh—In Montreal, on March 31, to Allison A. M. Walsh, B.A., '33; B.C.L., '36, and Mrs. Walsh, a daughter, Diana Allison.

Walsh—In Montreal, on March 27, to A. Bradford Walsh, B.S.A., '36, and Mrs. Walsh, Macdonald College, a son.

Webster—At Ottawa, Ont., on January 6, to Major E. C. Webster, B.A., '31; M.A., '33; Ph.D., '36, and Mrs. Webster (Inez G. Patton, B.A., '30), a son.

Correction

We regret that in the Births Column of the Spring Number, Mrs. Phyllis Bennett Cousens, B.A., '34, was erroneously listed as the mother of a daughter born on February 10 to Kingsley Cousens, B.Com.,'32, and Mrs. Kingsley Cousens.

CONSIDERING present day conditions, an analysis of your Will might reveal that it was not planned to the best advantage. That is why prudent men are reviewing their Wills and enlisting the aid of men thoroughly conversant with the intricacies of Succession Duties and Income Taxes. All too often estates are needlessly reduced by lack of specialized guidance in planning the Will.

So let's talk it over. The services of our Estates officers are freely given. Call at our office or telephone and our representative will gladly call on you.
